# THE LABOUR GAZETTE

Prepared and edited in the Department of Labour, Ottawa

MINISTER—THE HONOURABLE GIDEON D. ROBERTSON.

DEPUTY MINISTER—F. A. AGLAND.

Volume 20

JANUARY, 1920

Number 1

## NOTES ON CURRENT MATTERS OF INDUSTRIAL INTEREST

### The month in brief

At the beginning of December the percentage of unemployed among members of trade unions was 3.58 as compared with 2.71 at the beginning of November. According to returns received from more than 4,700 firms, there was a slight decline in the total volume of employment throughout Canada at the beginning of December, which decline continued and became pronounced in the Christmas week due to the slackening of the Christmas trade and to a period of stock-taking. A drop in employment at the end of the month was recorded in all provinces. In civic employment there was a decrease of nearly 15 per cent in comparison with November, but an increase of nearly 21 per cent as compared with December, 1918. According to preliminary figures, the various offices of the Employment Service of Canada received about 35,000 applications for employment, were notified of 26,000 vacancies, and made about 21,000 regular placements and 5,400 casual placements during December, as compared with 38,000 applications, 34,700 vacancies, 25,400 regular placements and 5,500 casual placements in November.

The time loss on account of industrial disputes during December was less than during both November, 1919, and December, 1918. There were in existence during the month 22 strikes, involving about 2,828 workpeople and resulting in

a time loss of 48,960 working days. Of these strikes 15 were on record at the beginning of the month, while seven strikes were reported as having commenced during the month. At the end of the month there were on record 13 strikes, involving about 1,695 workpeople.

The average cost of the weekly family budget of staple foods rose during December, averaging \$14.70 at the middle of the month as compared with \$14.27 for November, \$13.63 for December, 1918, and \$7.95 for December, 1914. The index number of wholesale prices rose to 322.7 for December as compared with 307.7 for November, 288.8 for December, 1918, and 137.6 for December, 1914.

### Proceedings under the Industrial Disputes Investigation Act

During December the Department received reports from three Boards of Conciliation and Investigation established to deal with disputes between (1) the Maritime Coal, Railway and Power Company and certain of its employees, being members of District No. 26, United Mine Workers of America; (2) the Toronto Railway Company, Toronto Electric Light Company and Toronto Power Company, and the employees of the said companies respectively, members of Local Union No. 353, International Brotherhood of Electrical Workers, and (3)

the Canadian Pacific Railway Company and certain of its employees at St. John, N.B., being marine freight handlers, members of Local Union No. 838, International 'Longshormen's Association.

Five applications were received for the establishment of Boards, further appointments were made in connection with previous applications received, and advice was received in the Department of the settlement of a dispute in which negotiations were pending.

#### **Association of Workmen's Compensation Board**

A conference of delegates of the various provincial Workmen's Compensation Boards was held at Vancouver on December 1-3, for the purpose of discussing the laws of workmen's compensation and problems relating to their administration, and of reaching an understanding with the Dominion Government with regard to the claims of Government employees. At the conference there was formed an Association of Canadian Workmen's Compensation Boards. The objects of the Association as outlined in the Constitution include the securing of unification of Workmen's Compensation laws and regulations, and of uniformity in their administration, and in the reporting and tabulation of industrial accidents and diseases, and the provision of ways and means for the prevention of accidents, and for the rehabilitation of injured workmen. The following officers were elected: President, Mr. S. Price, Chairman of the Ontario Workmen's Compensation Board; Vice-President, Mr. E. S. H. Winn, Chairman of the British Columbia board; Secretary-Treasurer, Mr. N. B. Wormith, Toronto, Secretary of the Ontario board; Member of the Executive Committee, Mr. J. T. Stirling, Chairman of the Alberta board. Among the resolutions passed, one adopted unanimously called upon all the Canadian compensation boards to endeavour in their respective provinces to have the benefits of compensation laws extended to all wage earners whose average annual earnings are less than \$2,-

000. Another resolution strongly advocated legislation vesting in the various boards the power of enforcing accident prevention measures. The next annual meeting of the Association will be held in Toronto, on the first Monday in October, 1920.

#### **Extension of Mothers' Pensions in Canada**

The Mothers' Pensions Act of Saskatchewan has been amended to extend pensions to indigent women whose husbands are inmates of institutions for feeble-minded or incapables, and who are unable to provide for their children. The Provincial Treasurer of Manitoba has announced that the sum of \$300,000 was placed in the estimates for mothers' allowances for the coming year. Last year the sum of \$200,000 was appropriated for this purpose, all of which has been expended. Members of the Ontario Government, in reply to a deputation from various labour organizations, social service councils, and other bodies, expressed their sympathy with the movement for mothers' pensions, and intimated that early action would be taken along this line. It was stated by the deputation that a survey of the province showed that there were over 16,000 widows with more than 31,000 children. It was estimated through visits to the homes that about 3,200 widows and nearly 9,000 children were in need.

#### **Group Insurance plans of Canadian Companies**

The Murray - Kay Company of Toronto has presented to every member of its staff who has completed six months' service an insurance policy ranging in value from \$500 to \$1,000, according to length of service, the amount advancing to \$600 for two years' service and then advancing \$100 each year until the maximum is reached. The policies are issued under a Group Insurance plan, without expense to the employees, and without the requirement of a medical examination. An insured employee is at liberty to take up the

policy on leaving the Company. In case of permanent disability the insured is paid either in a lump sum or in instalments, if preferred. The Dominion Sheet Metal Corporation of Hamilton recently announced that each employee had been insured for \$1,000, which would increase \$100 each year until \$1,500 had been reached. The amount of the policy would be payable to the family of the insured employee at his death, or to the insured himself in case of total disability. The Taylor-Forbes Company, of Guelph, Ontario, has also announced that it has insured the lives of all its employees, according to their length of service, beginning with \$500 after the first three months; \$600 after one year; \$700 after two years; \$800 after three years; \$1,000 after four years; \$1,200 after five years; \$1,300 after six years; \$1,400 after seven years; \$1,500 after eight years; \$1,600 after nine years, and \$2,000 after ten years' service. Thereafter, \$100 a year is added to the policy until \$3,000 is reached on nineteen years of service.

Similar group insurance plans for the benefit of their employees have been announced by the International Nickel Company of Canada; the T. Eaton Company, of Toronto and Winnipeg; Canadian Cottons, Limited, of Montreal, Cornwall and Toronto; the Louis K. Liggett Company, operating nineteen drug stores in seven cities; the Cornwall and York Cotton Mills, St. John, N.B.; the Ottawa Paint Works, Ottawa, Ont.; McDonald and Willson, manufacturers of electrical appliances, Toronto; the Duncan Lithographing Company, Hamilton, Ont.; D. E. Macdonald & Company, dry goods merchants, Guelph, Ont.; the McLagan Furniture Company and the Stratford Chair Company, Stratford, Ont.; the Gray-Dort Motors, Limited, Chatham, Ont.; the Williams, Greene & Rome Company, shirt manufacturers, Kitchener, Ont.; the McCormick Biscuit and Candy Works, the Sherlock-Manning Piano and Organ Company, and Smallman and Ingram, London, Ont., the Canadian Salt Company, Windsor,

Ont.; and the Corbett Foundry and Machine Company, Owen Sound, Ont.

#### **Employment Managers' Association formed**

An Employment Managers' Association has been formed at Toronto. Its objects are "To promote and foster interest in employment and industrial relations problems in Toronto and elsewhere; to discuss problems of employees, including selection, training, management and working conditions; to encourage closer co-operation between industrial relations executives, and to work with municipal and governmental bodies to bring about closer co-operation concerning employment problems." The following officers were elected: President, C. H. Pringle; first vice-president, H. D. Warren; second vice-president, W. L. Clark; secretary, S. B. Heath, Hydro-Electric Power Commission; treasurer, F. W. Allen.

#### **Co-partnership scheme at Port Sunlight, England**

Lord Leverhulme recently announced a co-partnership scheme which was to be put into effect at the works of Messrs. Lever Bros., Limited, at Port Sunlight, England. The scheme consists in the distribution of dividends in the shape of additions to weekly wages. It appears that this plan was acceptable to all the labour unions except the National Association of Carpenters and Joiners, which threatened to expel any of its members who participated in the Port Sunlight co-partnership scheme. This action was resented by a large number of carpenters at Port Sunlight and they held a meeting at which the following resolution was unanimously passed:

"That this meeting of co-partners employed by Messrs. Lever Brothers, Limited, emphatically protests against the action of the National Association of Carpenters and Joiners in threatening to expel from the above association members participating in the Port Sunlight co-partnership scheme. Our co-partnership recognizes the just right of labour

to receive a share of the profits which they have helped to make, and any attempt to prevent co-partners participating in the benefits accruing from the co-partnership scheme is diametrically opposed to the true principles of trades unionism. We also pledge ourselves to resist by all means in our power any interference with our liberty as a free people."

In his recent visit to Canada Lord Leverhulme announced the intention of his company to extend the policy of making every employee a shareholder on a greater scale than before. He also stated that the inauguration of the six-hour working day in subsidiary plants in Canada was under consideration.

**Employment in Great Britain** Returns published in the December issue of the *British Labour Gazette* show that 3,719,679 men have been discharged from the forces in the United Kingdom since the Armistice. Of these only 353,668, or 9.5 per cent, were claiming an out-of-work donation on November 28. Between January 11 and November 7, 1919, non-disabled ex-service men, to the number of 240,867, were placed in employment. Trade unions with a membership of 1,500,325 reported 42,538, or 2.8 per cent of their members out of work at the end of November compared with 2.6 per cent at the end of October, 1919, and 0.5 per cent at the end of November, 1918. It was stated in the House of Commons in November that 100,000 more persons were then employed in the British Isles than at the outbreak of the war.

**Industrial Courts in Great Britain** With the passing of the Industrial Courts Act by the British Parliament in December a permanent industrial court was established to take the place of the interim court which came into existence in November, 1918, under the Wages (Temporary Regulation) Act. During the period of its existence 930 awards were made by the interim court. The Minis-

ter of Labour of the United Kingdom has been advised by the court on fifty occasions on matters relating to wages and conditions of employment, and on the advice of the court the Minister has issued twelve orders extending throughout a trade or a branch of a trade an award of the court. It is stated that most of the important industries of the country have had recourse to the interim court. By agreement representatives of employers and employees in the engineering trade appeared before it once every four months. Other trades appearing before it included shipbuilding, transport, brickmaking, cement, building, cotton, woollen, jute, chemicals and explosives, soap and candles, leather, clothing and metals.

**Special British Trades Union Congress** A special Trades Union Congress was held at Westminster, England, on December 9 and 10, for the purpose of discussing the nationalization of coal mines and other matters. This meeting was called in accordance with a resolution passed at the Annual Trades Union Congress, which met at Glasgow in September, an account of which appeared in the October issue of the *LABOUR GAZETTE*. With regard to the nationalization of coal mines, a resolution was passed deferring a decision on action to be taken until an adjourned congress which is to be held in February. A resolution was passed in favour of an immediate reduction of the cost of living, with an instruction to the parliamentary committee to demand from the Government the acceptance of certain remedial measures proposed by the Miners' Federation. In another resolution the Government was condemned for withdrawing the civilian out-of-work donation without making provision for unemployed persons, and a demand was made that effective steps be taken to find employment or maintenance for all those affected by the Government's decision. A proposal to substitute for the parliamentary committee a Trades Union Congress General Coun-

cil; to be elected annually by Congress, was carried by a large majority.

**United States Farmer-Labour Co-operative Commission** Steps have been taken in the United States by the four railway brotherhoods and the railroad shop crafts affiliated with the American Federation of Labour, in conjunction with the Farmers' Organization, to form an all-American Farmer-Labour Co-operative Commission. This movement was an outgrowth of the Farmer-Labour Conference which was held at Chicago in November, and its object is to obtain some relief from the high cost of living, through co-operative buying, production and distribution. It is announced that another conference will be held at Chicago on February 12-15.

**Bonus plan of Ford Motor Company** A plan to distribute from \$8,000,000 to \$10,000,000 in bonuses to employees of the Ford

Motor Company was announced by Henry Ford, president of the Company, on December 31. This bonus, payable on January 1, is based on the daily income and length of continuous service of the recipients. Men hired before October 1, 1914, receive a bonus of from \$150 to \$270. Those who were hired a year later receive from \$150 to \$250. Men hired before October 1, 1916, from \$110 to \$230. Men hired prior to October 1, 1917, from \$90 to \$210. Men hired prior to October 1, 1918, from \$70 to \$190, and men hired prior to October 1, 1919, from \$50 to \$150, the amount of the bonus varying according to the amount of pay received on December 31, 1919. The bonus is in addition to the profit-sharing plan which was instituted in 1914. A further announcement was

made of the issue of Ford investment certificates in which employees wishing a further share in the prosperity of the Company may invest a portion of their income. These certificates are to be issued to employees only, and will be non-negotiable and non-assignable. They will be in denominations of \$100, \$500 and \$1,000, and will bear a guaranteed interest of six per cent per annum. In addition to this, further payments will be made semi-annually, as the earnings of the company permit, at a rate fixed by the directors. Subject to thirty days' notice an employee may receive in cash at any time the face value of his certificate with accrued interest. The certificates must be paid for only out of bonuses and pay, and not out of bank savings or investments. Deposits toward the purchase of certificates will bear interest of three per cent compounded half-yearly.

#### Jottings

On the suggestion of Hon. Harry Mills, Minister of Mines for Ontario, resolutions were passed at a meeting of miners on December 15th, at Sudbury, to the effect that safety inspectors in mines should be appointed by the Government, instead of by the Companies, as at present; and that when inspectors from the Department make an inspection of mines, they should meet the men as well as the Companies.

The T. Eaton Company, Limited, has reduced the working day at its Winnipeg store by half an hour, beginning with the New Year, making the hours from 8.30 a.m. to 5 p.m. On Saturdays the store closes at 1 p.m. except in July and August, when it will remain closed all day, this arrangement having been

made a year ago, as mentioned in the LABOUR GAZETTE for February, 1919.

During the second year of the operation of the Pension and Benefit Plan of the Bell Telephone Company, which was inaugurated on July 1, 1917, the sum of \$147,265 was paid out by the Company for pensions and accident, sickness and death benefits. Over \$100,000 out of the total amount was paid out for sick benefits to 2,188 employees. An account of this scheme appeared in the issue of the LABOUR GAZETTE for May, 1917, on page 314.

The dockyard employees at Portsmouth have been offered by the British Government a choice of working one day short per week, or carrying out now on full time the programme of work for the next year or two. They were also offered a choice as to the day they would prefer to be idle. A ballot was taken which showed 5,787 in favour of working short time and 5,576 against. There were 5,517 votes in favour of Friday afternoon and Saturday morning for the idle day, and 209 in favour of having Monday off. The Chatham dockyard employees voted overwhelmingly in favour of working only four and a half days a week, in order to avert discharges.

An industrial medicine division has been established at the University of Cincinnati where medical students and physicians will be instructed in industrial medicine, sanitation and safety problems, public health and hospital management. There will also be a research laboratory for the investigation

of industrial conditions menacing the health of employees. Students will spend part of their time in the school and part in industrial establishments. The sum of \$40,000 annually for five years is being provided by a number of employers for this purpose.

The engineering firm of Ruston and Hornsby, of Lincoln, England, have acquired an estate of 350 acres near that place, where they are building an industrial garden suburb, with provision for 3,000 houses, as well as shops, institutes, recreation grounds and allotment gardens. It is proposed to provide electricity and hot water for domestic purposes from a central station. The housing will be managed on co-partnership principles and will not be confined to employees of the firm.

The result of the Economic Essay Contest conducted by the Chicago firm of Hart, Schaffner & Marx, for 1919, has been announced. In Class A, open to all Americans except undergraduates of an American university, the first prize of \$1,000 was awarded to Edgar S. Furniss, Ph.D., Assistant Professor of Political and Social Science in Yale University, for a study entitled "The Position of the Labourers in a System of Nationalism." The second prize of \$500 was awarded to T. Bruce Robb, Ph.D., of the University of Oklahoma, for a study on "The Guarantee of Bank Deposits." In Class B, open to undergraduates, the first prize of \$300 was awarded to Earl Bryan Schwulst, of Harvard University, for a study on "The American Street Railway Problem."

## INDUSTRIAL CONDITIONS DURING DECEMBER, 1919

## I.—General Review

A slight decline in the total volume of employment throughout Canada from the November level set in during the first week of December, continued throughout the month,

**The Labour  
Market**

and became pronounced in the Christmas week. This latter drop was due partly to the slackening of the Christmas trade and to a period of stock-taking. In the Maritime provinces decline set in at the middle of the month and continued over the holiday and stock-taking season. Ontario was fairly steady, starting the month with a slight gain, which was maintained with minor fluctuations until the end of the month when there was a sharp drop. In Quebec the decline was more pronounced and continuous. In the Prairie provinces a slight initial drop was followed by a fairly considerable rise, which in turn was followed by a drop. In British Columbia a marked drop culminated in the second week, followed by a slightly upward tendency with a further decline later. In the metals and machinery group a rise in the volume of employment was recorded for the first half of the month, which was most marked in Ontario and Quebec; but a drop occurred later. Vehicles showed weekly fluctuations with a drop at the end of the month. A marked drop during the second week in the figures for Quebec was attributed to the scarcity of coal and steel at that period. Ontario and the Prairie provinces experienced a steady rise. In the food group a marked decline continued at an increasing rate throughout the month in all provinces. The textile groups showed a general gain

for the first half of the month, followed later by a slightly greater decline. In the pulp, paper and printing industries a similar course was recorded. The woodworking and furniture group reported increased employment until the last week, when a downward tendency was noted. The clay, glass and stone group showed a steady gain, which took place mostly in Ontario, but the general level dropped during the last week of the month. In paints, oils and chemicals conditions were steady until the end of the month when a slight drop was recorded. In mining and quarrying there was a slight rise at the beginning of the month, which was followed by a steady and rather sharp decline. Building and construction experienced a marked and increasing seasonal decline, the drop being specially sharp in the third week of the month. Railway construction experienced a continuance of the sharp decline of November, though there was a steadying up at the end of the month. Railway operation showed a very slight general drop. A local drop in Quebec in the first week was attributed to the shortage of fuel at that time, and a sharp increase in the Maritime provinces at the same period was due to the opening of the winter port season at St. John and Halifax. The lumbering industry, as a whole, started with a gain, which afterwards changed to a decline, there being a sharp drop near the end of the month. In the Prairie provinces, however, an increase was recorded for each week.

The time loss on account of industrial disputes during December was less than during November, 1919, and December, 1918.

**Strikes**

There were in existence at some time or other during the month 22 strikes, involving about 2,828 work-

people, and resulting in a loss of about 48,960 working days, as compared with 25 strikes, involving about 4,903 workpeople and 84,073 working days in November, 1919; and 17 strikes, involving about 3,941 workpeople and 64,079 working days in December, 1918. On December 1, there were on record 15 strikes, affecting 2,326 workpeople. Seven strikes were reported as having commenced during December as compared with 6 in November. Four of the strikes commencing prior to December and five of those commencing during December were reported terminated, leaving 13 strikes, involving about 1,695 workpeople, on record at the end of the month.

In prices the movement was again upward, both the retail prices food budget and the wholesale prices index number showing substantial increases, the advances being greatest in dairy products, potatoes, iron, lumber, and in raw furs. The average cost of a family budget of staple foods in terms of retail prices in some sixty cities was \$14.70 at the middle of December as compared with \$14.27 for November, \$13.65 for December, 1918, and \$7.95 for December, 1914. The index number of wholesale prices rose to 322.7 for December, as compared with 307.7 for November, 288.8 for December, 1918, and 137.6 for December, 1914.

## II.—The Industries and Trades

Employment continued good in the steel industry in SYDNEY. The moulders' strike continued, somewhat affecting employment in other departments. The strike was settled, however, before the close of the month. The output of the Dominion Steel Company's plant was, in tons, as follows: pig iron, 9,700; steel ingots, 14,800; wire rods, 7,250; wire and wire products, 1,450; merchant bars, 720. One blast furnace was in operation. The output of the SYDNEY MINES steel plant was as follows: iron, 7,600 tons; steel, 10,750 tons. Boat and shipbuilding and repairing were less active. Stove and furnace workers, metal roofers, galvanized iron workers, etc., continued active. HALIFAX reported a falling off in shipbuilding during the month, but skilled employees were retained for repair work. Stove and furnace workers were busily employed, overtime being necessary owing to shortage of help. All available electricians were busy, no lay-off being reported in this department. Sheet-metal workers, coppersmiths and plumbers were very active. At WESTVILLE structural steel

workers were quiet. Engine and boiler, automobile and agricultural implement workers were busy. Sheet metal plants were active, and electrical trade normal. Shipbuilders at TRENTON were busy. In CHARLOTTETOWN dullness was reported throughout this group. AMHERST reported slack conditions in some departments, with improvement as the month progressed. All available sheet metal employees at ST. JOHN were reported working, and the rolling mills were steadily active, but shipbuilding declined. At MONCTON average activity continued in the locomotive and car repair shops of the Canadian National Railways. Foundries and machine shops also continued steady. In FREDERICTON the foundries, machine shops and garages were fully employed. MONTREAL reported normal conditions during the month in the structural steel industry. Engine and boiler makers and sheet-metal workers were fairly active, and electrical workers were normally employed. In QUEBEC a large number of shipyard workers were laid off. Sheet metal workers also had a very dull month, and the architectural iron and steel, the stationary and portable engine

**Metals,  
machinery,  
conveyances**

and the automobile trades were all quiet. Locomotive and carshop and stove and furnace workers were busy. At SHERBROOKE architectural and structural iron and steel workers and stationary and portable engine and boiler makers were fairly active. Overtime work was the rule in the foundries in THREE RIVERS where the steel and wooden shipbuilding yards were very busy. The metal and machine shops at St. HYACINTHE were very active and repair shop workers were fully employed. A demand for more help for the sewing machine factory was reported from St. JOHN'S IBERVILLE. Slackness in the shipyards and shops was reported from SOREL, many employees being discharged. The iron and steel factories and car shops in OTTAWA and HULL continued active throughout the month. In TORONTO the structural steel industry was reported quiet owing to the continued shortage of material. Engine and boiler plants were in steady operation. Shipbuilding still remained fairly active, without, however, any new orders. Stove and radiator plants were working to capacity. The automobile, agricultural and sheet metal trades were busy and the machinery trade was fairly active. HAMILTON reported continued general activity throughout all branches of the metal group. A steady demand for skilled men continued to be reported from NIAGARA FALLS. Pattern makers were in demand at WELLAND for the foundry. Boilermakers at St. CATHARINES continued active and electrical and metal workers were well employed. BROCKVILLE reported the tool and hardware trades exceptionally active, while fair conditions prevailed in the stationary and portable engine and boiler and sheet-metal works. Stove and furnace workers were active. KINGSTON reported general slackness in employment, a number of men being laid off in the locomotive shops, though the shipbuilding yards were kept busy on repair work. The metal trades in BELLEVILLE reported an excellent month, and the bar iron, nail, bolt and tool makers were

kept steadily employed. The Grand Trunk locomotive shops were very busy, and engine and boiler makers were well occupied. PETERBOROUGH reported a record month's activity, moulding and core shops in some cases employing double the usual number of men. Many machinists worked overtime and electrical workers were unusually busy. Machinists and tool makers were in strong demand. GALT reported very good conditions throughout all branches of the metal and machinery group. In BRANTFORD steady employment was the rule during the month, the agricultural implement works being very active. The carriage works were running overtime and the range and stove factories, engine and boiler and machine shops were well employed. KITCHENER reported a demand for tinsmiths, also for cycle and clock makers and electrical workers. Foundry, machine shop and structural iron workers all worked full time. In GUELPH moulders were in demand, and all metal workers were reported very active both here and in STRATFORD. WOODSTOCK reported temporary stoppage of work in the wagon factory for stocktaking, with good employment prospects ahead. Moulders were in demand, and stove and furnace and other lines were well engaged. In LONDON some slackening was reported in the threshing engine and thresher factories. The wire and iron and stove works continued busy, with short stops in some factories for stocktaking. Labour conditions in St. THOMAS were reported good. Activity in CHATHAM was affected to some degree by fuel shortage, but general labour conditions were good. WINDSOR reported work in the architectural and structural steel shops hampered by shortage of steel. This was also felt in the automobile works, which, however, continued to run full-handed. Machinists and tool makers were in demand, and many more will be required when the new motor factory begins work. Moulders are required for the foundries, and owing to the rush of business in the machine shops, machinists and tool mak-

ers were in strong demand. Metal roof work at a standstill owing to weather conditions. At ORILLIA the carriage factory had a record month, and the agricultural implement and stove workers continued steadily active. There was a resumption of activity in the production of pig iron, etc., by the electrical process, and further activity in this direction was anticipated. In OWEN SOUND conditions were reported as very satisfactory. The shipbuilding yard at PORT ARTHUR was steadily active. The car shops at FORT WILLIAM experienced a temporary slackness. The railway shops were busy, and skilled and semi-skilled mechanics all continued at work. WINNIPEG reported that employment conditions continued in the metal trades without material change in the number of employees. Every department in the railway shops was well engaged. Experienced men were in demand in the automobile repair shops. The rolling mill at MEDICINE HAT remained closed, and other metal working industries were rather quiet. At EDMONTON iron and sheet metal workers, machinists and electrical workers were all fairly busy. At VANCOUVER the structural iron and steel workers continued busy during the month. Rolling mill workers and boiler makers were fairly well employed. Steel shipbuilding continued active but wooden shipbuilding ceased in the district. Motor engine shops were busy on repair work, and stove and furnace, electrical fixture and sheet metal workers were all busy. In NEW WESTMINSTER the engineering shops were busier than at any time since the general strike last June. The sheet metal works were quiet and the electrical trade about normal. VICTORIA reported activity in auto repair shops and stove and furnace factories.

At SYDNEY abattoirs and meat packing houses continued active. Bakers and confectioners at HALIFAX reported the busiest month of the year, overtime being frequent. Creameries and aerated water factories

had a busy Christmas season, but employed no extra help. The milk factory at TRURO continued working to capacity. WESTVILLE reported activity throughout the food group. At CHARLOTTETOWN bakers, confectioners, butchers, meat cutters and tobacco workers were very active. The sugar refineries at St. JOHN closed for lack of raw sugar, about 200 workers being thrown out of work, but the mechanical, repair and shipping departments remained at work. Bakers and confectioners were exceptionally busy, and flour and feed, creamery and dairy workers had a good month. Aerated and soft drink factories were slack, but breweries were fairly busy. At MONCTON flour mills, bakeries and biscuit factories were active and creameries and dairies had seasonal activity. At FREDERICTON the packing houses were active, bakers and confectioners were rushed, but the soft drink trade had a sharp decline. Bakers in BATHURST also had a seasonal rush. MONTREAL reported that the flour and feed plants were fairly active. Abattoirs and packing houses were busy, and bakers and confectioners were very active in connection with the holiday trade. Soft drink and brewery workers were active and cigar makers about normal. Candy factories employed many extra hands in the making and selling of their products. At QUEBEC the bakers and confectioners were very busy, tobacco and brewery workers were also busy, but creameries and dairies, and abattoirs and meat packing houses had a quiet month. A number of creameries and dairies closed at SHERBROOKE for the winter. It was reported that a quantity of local cream was being shipped to the United States. Bakers and confectioners, breweries and cigar factories were busy, abattoirs and packing houses and soft drink plants were fairly active. The butter and cheese factories at St. HYACINTHE reported a great decrease in activity during the month. Mineral waters took a similar drop. Cigar and tobacco factories worked at full time. At THREE RIVERS and SOREL bakers and confec-

tioners had a busy month, and activity prevailed in other branches. OTTAWA and HULL reported an exceptionally good month for abattoirs and meat packing houses, bakers, and confectioners, but some depression in the dairy trade attributed to advanced price of milk. At TORONTO the flour and feed and meat packing industries operated steadily. Bakers and confectioners, and biscuit and candy makers were very busy. Breweries had a fair month, but soft drink factories were quiet. Cigar makers had plenty of work with a demand for more women workers. HAMILTON reported continued activity throughout the group. Female help was in demand at NIAGARA FALLS for a cereal factory. At ST. CATHARINES activity prevailed in all the branches of the food group, but the canneries experienced the usual seasonal decline. At BROCKVILLE and KINGSTON bakers and confectioners reported unusual holiday activity, with good conditions in other lines. Creameries and dairies were hampered by some shortage of milk and cream. BELLEVILLE reported activity in flour and feed mills, and bakers and confectioners, creamery, dairy and soft drink workers all had a busy Christmas season. A shortage of female help was reported in several lines in PETERBOROUGH, especially for the cereal food factories, which had a very busy month. Creameries, soft drink and cigar factories were also busy. GALT reported general activity throughout the group. Female help was in demand for the confectionery trade at BRANTFORD, employment conditions being reported good in all branches of the food group. The sugar factory at KITCHENER closed on December 26, after operating day and night for two months, but as most of the employees were farm hands no unemployment was reported. Active conditions prevailed throughout the rest of the food group. Similar activity was noted in GUELPH in all lines excepting breweries and soft drink establishments. At STRATFORD, WOODSTOCK and LONDON the workers in the food industries had an active Christmas season. Active con-

ditions continued at ST. THOMAS, with night shifts in the flour mills. CHATHAM reported seasonal activity, and at WINDSOR the bakers had the busiest season on record. Creameries were hampered by scarcity of milk; breweries ran two shifts. Owing to a fire, work ceased at one of the cereal factories and was not expected to re-start before the middle of January. The bakers and confectioners at ORILLIA had a busy month. At OWEN SOUND expert candy makers were in some demand. One of the flour mills was idle through shortage of power and lack of wheat. Other branches of the food group were active. Dairies were busy, but prospects were not good owing to scarcity of feed. WINNIPEG reported the baking and confectionery and vegetable canning trades very brisk, but without any change in employment. In REGINA the flour mills continued running full time with full staff. Help was in demand in the baking and confectionery trades. A new biscuit factory opened during the month. Creameries and dairies reported a shortage of milk as hampering their activity. MOOSE JAW reported quiet conditions in abattoirs and meat and packing plants, due to shortage of supply of cattle. Creameries were also slack from scarcity of milk. In MEDICINE HAT the flour mills continued very active, candy makers, bakers and creamery workers all being well engaged. At LETHBRIDGE the flour mills gave steady employment and the breweries worked without any short time. CALGARY reported that the flour and feed plants, abattoirs and packing houses, also bakers and confectioners, were fairly busy. Soft drink and brewery workers had a quiet month. Meat packers at EDMONTON had steady employment during the month. In FERNIE the bakery and confectionery workers were very busy. Dairies increased activity though hampered by lack of feed for stock. Breweries and soft drink factories worked to capacity. In VANCOUVER flour, feed and cereal plants were busy. The sugar refinery was not very busy owing to sugar shortage.

Abattoirs and packing houses were busy. Bakers and confectioners were very busy for the Christmas trade. Brewery and creamery workers were also busy, but slackness was noted in fruit and vegetable canning, aerated water, and tobacco factories. The meat packing houses at NEW WESTMINSTER were busy. Bakers and confectioners did a large holiday trade, but brewery workers were slack. In VICTORIA feed and cereal plants continued to operate steadily. Activity prevailed in the baking and confectionery trades, and breweries were fairly busy, but cigar makers and soft drink workers had a dull month.

The woollen mills at TRURO were closed for a few weeks for repairs, but

**Textiles,  
cordage and  
carpets**

the mattress factory ran full time. The cotton mills at ST. JOHN continued active. At MONCTON the underwear workers were steadily employed, but the woollen mills were handicapped by an accident which occurred in the process of remodelling and enlarging. The cotton factory at FREDERICTON was running to capacity. MONTREAL reported the woollen and knitting operatives busy, and the cotton mills were working to capacity during the month. Tent and sail makers were rather slack. At QUEBEC the cotton mills were very busy and working overtime, but tent, awning and sail makers were very dull. At SHERBROOKE cotton and woollen mill operatives were very busy; and active conditions prevailed in the hosiery, underwear and knitted goods trades, and among the bleaching, dyeing, finishing and textile printing workers. THREE RIVERS reported steady employment of about 1,300 hands in the cotton mill. At ST. JOHN'S and IBERVILLE thread and tape workers continued active. A marked shortage of female help was noted in the textile industries in TORONTO, woollen and knitting factories being rushed by foreign contracts. Hosiery, sweater and underwear workers were also busy. A shortage of experienced female help was reported in the carpet factory. Tent

and awning workers were slack. In HAMILTON workers in the cotton, hosiery, knitted goods, silk, linen, felt, carpet and rug, rope and twine industries, and in bleaching, dyeing and finishing were reported active. The tent, sail and awning trades were fairly busy. Female help was in demand in the knitting factories at NIAGARA FALLS. At ST. CATHARINES the woollen and knitted and silk goods workers were well employed. Employment was slack in the tent, awning and sail factory at BROCKVILLE. The cotton and woollen mill workers at KINGSTON were very busy. A shortage of female help was reported in the woollen and textile trade both at PETERBOROUGH and GALT; and rope and twine makers were busily employed. A similar shortage was noted in the silk glove and underwear factories at BRANTFORD, where help was also in demand in the cordage factories. The woollen underwear and blanket operatives were very busy. At KITCHENER help was reported short in the twine factory. Felt makers were well occupied. At STRATFORD textile workers continued in steady employment, and at WOODSTOCK a considerable shortage of female help was noted in the knitting factories, with a general demand throughout the textile group for all the help that could be obtained. LONDON reported that overtime was the rule in the hosiery factories, with a demand for more female help. At GUELPH flax spinners for the linen mills and weavers for the Brussels and Wilton carpet factory were in demand and great activity prevailed in the cotton spinning mills, overtime work being the rule. Worsted spinning and hosiery and knitted good factories were also very active. At ST. THOMAS the knitting factory continued busy, and the textile factories at CHATHAM were running to capacity. The worsted factory at ORILLIA increased employment during the month. OWEN SOUND reported activity in the spinning and weaving of blankets from home-grown wool, mostly for the wool producers. The knitting factories were also busy. In WINNIPEG bag makers had a satisfactory month, with a slight in-

crease in employment in one factory. Tent and awning makers were quiet, and knitting workers continued in steady employment. In VANCOUVER the knitted goods trade was reported busy, but the tent, awning and sail makers were slack.

Employment continued good in the ready-made clothing trade at HALIFAX,

#### Clothing and Laundering

but fell off in the steam  
laundries and dyeing  
establishments. Help  
was reported very short

in the cap factory at TRURO, the management making enquiries in Newfoundland for available female workers. The shirt factory ran full time during the month. At CHARLOTTETOWN tailors, garment workers and laundry workers had a busy month. At ST. JOHN ready-made clothing workers were active, and steam laundries were kept busy owing to the ocean steamer trade. MONCTON reported millinery, cap and tailoring establishments all very active throughout the month. Tailor shops at FREDERICTON were busy, and steam laundries and dyeing establishments were active. In MONTREAL the strike of hat and cap workers in four hat factories, which began in November, continued throughout the month, affecting about four plants. Ready-made clothing trades and laundries were fairly active. QUEBEC reported ready-made clothing trades working overtime, glove and fur trades very busy, women's whitewear trade busy, but steam laundry and dyeing plants slack. In SHERBROOKE and ST. HYACINTHE the latter industry was reported very busy, and the ready-made clothing trade was busy. Glove workers at THREE RIVERS had a good month. A strong demand for female help was reported in the shirt and collar factories at ST. JOHN'S and IBERVILLE. SOREL reported the clothing trades as very well employed, and an exceptionally good month in all clothing lines was noted at OTTAWA and HULL. In TORONTO female help was in demand in the garment, whitewear and glove factories, and clothing work-

ers were well employed in all branches, the hat and cap and fur trades being very busy. Steam laundries and dyeing establishments were active. In HAMILTON help was reported short in the ready-made clothing, hat, cap, glove and fur trades, and more laundry help was wanted for the shirt and collar factories. Women's wear and steam laundries and dyeing trades were active. Female help was required at NIAGARA FALLS in the corset, hat and suspender factories. Steam laundries were active at ST. CATHARINES, and at BROCKVILLE hat, glove and fur workers were also fairly busy. Clothing and laundry trades were active at KINGSTON and the shirt factory at BELLEVILLE was very busy. PETERBOROUGH reported activity in the factories for women's and children's wear. More help was required at GALT for the shirt and collar factories, also for the steam laundries. Ready-made clothing and hats and fur good factories were also very busy. The overall factories at BRANTFORD ran full-handed and laundry and dyeing plants also had a busy month. Help was short in KITCHENER for the shirt and collar factories, some firms now operating branch factories at points where female labour is more plentiful. One whitewear factory closed down, but the workers were all absorbed by other concerns. A few jobs were open in the glove factories. Robe and clothing plants worked full time. At GUELPH the women's whitewear and hat factories were active, and at STRATFORD conditions were good in the ready-made clothing factories and steam laundries. Increased employment was noted in the fur industry at LONDON, clothing makers being busy with orders for export. Female help was in demand at WINDSOR for the overall factories, especially sewing-machine operators. Glove makers were also busy, but shirt and button makers were quiet. Laundries and cleaning establishments were fairly busy. At WINNIPEG the clothing trades continued actively employed. Ready-to-wear firms found it hard to secure experienced help. Additional glove work-

ers, both skilled and unskilled, were taken on during the month. A shortage of help was reported in the whitewear trade, and skilled furriers were also in demand. Shirt and cap makers continued in steady work. Employment in laundries showed a slight increase, and cleaners were fairly active. Laundries were active in BRANDON, REGINA and CALGARY. Garment makers at EDMONTON were in demand, about 250 workers being steadily employed. At VANCOUVER the ready-made clothing and custom tailoring trades were very busy in all lines. Whitewear factories, laundries, and dyeing and cleaning establishments were also busy. VICTORIA reported shirt and overall factories fairly active, employing full staffs. Steam laundries, dyeing and cleaning workers were active.

The pulp mill at ST. JOHN continued to run steadily. At BATHURST 425 men were employed at the pulp mill instead of 380, owing to the running of three shifts of eight hours each. At SHERBROOKE and THREE RIVERS the pulp and paper mills were very busy, about 900 men being employed at the latter mills. The mills at OTTAWA and HULL were all active throughout the month, and the cardboard factory was also busy. The felt and tarred paper industries at HAMILTON continued active, and at ST. CATHARINES the pulp and paper and beaver board workers were well employed. At KITCHENER the felt factory continued active. The pulp and paper mills at OCEAN FALLS and POWELL RIVER, B.C., were reported very busy, the former operating continuously. VICTORIA reported activity in the pulp, paper and fibre plants. The rubber roofing, felt and tarred paper workers were also busy.

At SYDNEY newspaper and job printers continued active. At HALIFAX printers, pressmen, engravers and bookbinders were all very busy, and paper box makers were well employed. Help was reported scarce at

WESTVILLE in the printing and publishing and bookbinding trades, and job printers were all busy. CHARLOTTETOWN reported employment steady throughout the group, and at ST. JOHN printers and binders were busy. Newspaper and job printers and bookbinders were fairly well employed at MONCTON and FREDERICTON. Both classes of printers at BATHURST were increasingly active. MONTREAL reported active employment for printers, bookbinders, engravers and lithographers, and many additional workers were taken on in the paper box, bag and novelty industries. At QUEBEC similar activity prevailed in all sections of the group. Printing and binding shops were active at ST. HYACINTHE and the paper box makers worked full time. At THREE RIVERS printers were reported active, but at SOREL they were rather slack. Job printers at OTTAWA and HULL were exceptionally busy. TORONTO reported a shortage of female labour in the paper goods group. Binderies and box factories were very busy up to Christmas, and printers, bookbinders, engravers and lithographers were steadily employed. Activity ruled throughout the entire group in HAMILTON, and at ST. CATHARINES and BROCKVILLE printers and binders continued busy. Printers were in demand at KINGSTON, and at BELLEVILLE and PETERBOROUGH they were also very busy, with frequent overtime. GALT reported the printers as being very busy, and paper box workers as well employed. Steady employment was the rule at BRANTFORD, printing and publishing shops running full handed, and paper box makers fully occupied. In KITCHENER job printers were rushed, newspaper printers fairly active and paper box

#### **Pulp, paper and fibre**

makers busy. Female help was in demand for the box factories in GUELPH, and printers were well employed there and also at STRATFORD. From WOODSTOCK it was reported that there were no idle printers, but that the supply of help was sufficient. At LONDON overtime work was the rule for printers, and the paper box makers were also very active. Steady employment for printers was reported from ST. THOMAS and CHATHAM. Printers were in demand in nearly all offices in WINDSOR, where the month's work was a record. Paper box workers were also exceptionally busy. OWEN SOUND reported great activity in all printing shops and the paper box factory greatly increased its operations. At PORT ARTHUR and FORT WILLIAM printers and bookbinders experienced a seasonal rush. Some demand for female help was noted from WINNIPEG for the bookbinderies, and good employment conditions prevailed in the printing shops. Printers were busy at BRANDON, and at REGINA experienced girls were in demand in the binding and publishing houses. In MOOSE JAW and district the printing industry was said to be somewhat hampered by difficulty in securing newsprint and paper stocks. General activity in the printing and binding trades was reported in MEDICINE HAT, LETHBRIDGE, CALGARY and EDMONTON. The same conditions were reported at VANCOUVER and VICTORIA in the printing, engraving and lithographing shops and in paper box and novelty factories.

Sash and door and planing mills continued active in SYDNEY, and at HALIFAX, in a season usually

#### **Woodworking and furniture**

slack, employment remained steady owing to the amount of house construction in progress. Conditions in WESTVILLE planing mills and furniture factories were fair, and at TRURO carpenters continued fairly well engaged. At CHARLOTTETOWN carriage and wagon repairers, upholsterers and varnishers had a dull month and coopers were also slack. ST. JOHN reported sash, door and

planing mill and box factory workers well employed, and broom and brush makers working overtime. Similar activity in MONCTON and surrounding district was attributed to extensive building operations in the city. The cooperage plant still continued in operation. Full employment continued also in the sash and door factories and planing mills at FREDERICTON. Conditions at BATHURST were about normal. At MONTREAL wooden box and furniture makers had a fair month, and piano makers were active. QUEBEC reported activity in the door factories and planing mills, and wooden box and broom factories. Wooden toy and sleigh factories were very busy, but cooperage plants were dull. At SHERBROOKE sash and door factory workers were fairly active. The organ makers at ST. HYACINTHE were very busy. At THREE RIVERS the chair and toy makers were actively employed, and the sash, door and planing mills had a good month, but wood and furniture workers were slack. At OTTAWA and HULL the sash, door and planing mills and wooden box factories continued to run at a reduced output. TORONTO reported an active month in these lines, the furniture, woodenware, toy, gramophone and piano trades also being well employed. In HAMILTON and ST. CATHARINES active conditions prevailed throughout the woodworking and furniture group, but in BROCKVILLE and KINGSTON employment was only moderately good. Sash, door and planing mills at BELLEVILLE still continued very busy in preparation for building activity in the spring, and at PETERBOROUGH activity continued in the wooden box and broom factories and cooperage plants. Help was in demand at GALT for the door and planing mills and furniture factories to meet the volume of work. Wooden box makers were also very busy. At BRANTFORD the strong demand for building material kept the planing mills all working overtime. Piano and organ case factories were also running full handed. Overtime work was the rule at KITCHENER in the furni-

ture and chair factories; and great activity also prevailed in the planing mills, wooden box and wooden toy factories. Piano and organ workers and broom makers were fairly active. At GUELPH piano makers were very busy, but planing mill workers were less active. Woodworkers were reported active in STRATFORD. WOODSTOCK reported an urgent and continued demand for skilled workers, machinists, bench-hands, cabinet makers and handymen, in the furniture trades. Help was sufficient in the organ factories, although they were very busy. At LONDON woodwork and furniture workers were reported as well employed. Increased employment was reported in the sash, door and planing mills at WINDSOR. One mill closed for ten days for repairs. Piano makers had a quiet month. In OWEN SOUND employment continued good in the planing mills, box, furniture and brush factories, but cooperage plants were dull. A scarcity of skilled furniture makers was reported at ORILLIA, and the planing mills increased their staffs during the month. At WINNIPEG activity continued in the sash, door and planing mills without any reduction in staffs. Box makers were reported in demand. Sash and door factories at REGINA continued running with full staffs. At MEDICINE HAT the planing mills were still active, but at CALGARY the sash, door and planing mills were quiet owing to shortage of material. At FERNIE the sash and door factories were fairly active. VANCOUVER reported continued activity in the sash, door and planing mills and wooden box and toy factories, but at VICTORIA employment conditions were reported less favourable.

WESTVILLE reported active conditions in the shoe and harness trade. The tannery workers at St. JOHN were working steadily. A shortage of help was reported at FREDERICTON in the shoe and larrigan factories. Harness makers were also busy. MONTREAL reported activity in the boot and shoe

trades owing to European orders. Tanneries were busy, and trunk, bag and harness makers were well employed. The strike among the rubber garment workers, reported last month, remained unsettled, though the factories affected continued to operate. At QUEBEC the boot and shoe factories were all working full time and full handed. The tanneries were also active, but trunk, harness and leather workers were rather slack. Tannery workers at St. HYACINTHE were active, but many boot and shoe workers were temporarily idle owing to stocktaking. THREE RIVERS reported activity in the boot and shoe trade, and at SOREL the tannery and shoe factory workers continued well employed. In TORONTO the boot and shoe workers had a busy month, and trunk and box factories were active. The harness and horse goods trade was quiet, but rubber trades were active. HAMILTON reported continued activity in the boot and shoe, trunk, bag and harness, and leather and belting trades. Rubber footwear workers at St. CATHARINES had a good month. At BROCKVILLE shoemakers were active, but the harness and belting trades were rather slack. The tannery at KINGSTON was very busy, as were the boot and shoe factories at PETERBOROUGH, the leather workers being active. More help was in demand in the boot and shoe factories at GALT. Harness makers were well employed. The shoe factory at BRANTFORD continued running full handed. KITCHENER reported shortage of help in the trunk and bag factories, and in the rubber factories. Double shifts were frequent in the rubber tire plant. The tanneries continued to be busy and the boot and shoe factories all ran full time. The rubber factories at GUELPH, STRATFORD and WOODSTOCK continued active. At LONDON the tannery and shoe factory workers were exceptionally busy. Skilled workers were in demand in the shoe industry at St. THOMAS, and the leather and tanning industries at OWEN SOUND were active. The tannery and trunk workers at BRANDON continued busy, but at CALGARY the trunk, bag,

harness and horse goods workers had a quiet month. Boot and shoe workers at VANCOUVER continued busy.

WESTVILLE reported clay workers busy, but brickyards were quiet after a busy season. At St.

**Clay, glass  
and stone**

JOHN cut stone, granite and brickyard work continued dull, but the

limekilns continued active. MONCTON reported the cement plants still active supplying the demand for concrete, sewer pipes, etc. The glass works closed down at the beginning of the month, the supply of gas being limited by the N. B. Board of Public Utilities, about twenty employees being affected. At MONTREAL the glass factories continued in steady operation. QUEBEC reported dull conditions in this group, the stone cutters being slack, the brick and tile industries ceasing for the season and the limekilns being very quiet. In SHERBROOKE the cut stone and granite trades were quiet and the brick yards closed down for the year. THREE RIVERS reported an active month in the concrete block and sewer pipe yards. At TORONTO glass workers had plenty of employment, but the brickyards closed down after an active season. Activity prevailed at HAMILTON in the cut-stone and granite, brick, tile, cement, lime, pottery and porcelain trades, but in BROCKVILLE the cut-stone, granite, and brick-making trades were quiet. KINGSTON reported the granite and marble shops fairly active, but the cut-stone workers dull. At BELLEVILLE the cement plant was working day and night, and the pottery works were also very busy with smallware and sewer pipes. The cut stone and granite shops at GALT were slack, but in BRANTFORD the brickyards were running continuously. At KITCHENER the stone and granite cutters were steadily employed, but the brick, tile and sewer pipe makers were less active. STRATFORD reported the brickyards busy and WINDSOR reported that stone, sewer pipe and cement workers had an exceptionally busy month and that the asphalt makers also worked overtime. At REGINA the cut stone and

granite works were fairly busy and at MEDICINE HAT brick and tile and stone-ware plants had a good month's work. VICTORIA reported the brick, cement and lime industries rather dull.

SYDNEY reported that workers in lubricating oils and greases continued

**Paints, oils,  
chemicals,  
explosives**

active, and in HALIFAX the paint and varnish factories were running to capacity. At MONT-

REAL the paint and

varnish, and drug and medicine industries continued about normal, and at SHERBROOKE powder, acid, extract, drug and medicine factories were fairly active. The paint mills at THREE RIVERS continued active. TORONTO reported that the paint and varnish, soap and chemical factories were active. At HAMILTON the toilet and laundry soap and the acid and drug industries were active and the gunpowder and cartridge factories were fairly busy. The paint and varnish factories at BRANTFORD continued running full time. KITCHENER reported the oil and grease trade fairly active. At WINDSOR the paint and varnish industries showed the usual seasonal decline after a busy year. Additional female help was employed in the perfume factory for the Christmas trade. At WINNIPEG soap workers continued to be well employed. At REGINA the oil refinery continued working full time with full staff. The soap makers also had a good month. The linseed oil mills at MEDICINE HAT continued running day and night. At VANCOUVER the Ioco oil refinery continued busy. Soap makers continued in steady employment, but paint factories were less active. The paint and soap factories at VICTORIA were still active, and the explosive plants continued busy.

The earnings of the Canadian Pacific Railway during November were \$17,366,849, as compared with \$15,023,088 in November, 1918. The number of persons employed by the Canadian Pacific Railway, Grand Trunk Railway and the

**Railways,  
shipping and  
'longshore work**

Canadian National Railways on railway operation including general offices, train and engine crews, station forces, sleeping and dining and parlour car employees, showed only a nominal decrease during the month of December. The number of employees at the end of the month being 66,350 as compared with 66,600 at the end of November. The average maintained throughout the month was between these two figures. Taking each company separately the Canadian Pacific Railway showed a reduction of 500 persons, Grand Trunk Railway 200 persons, and the Canadian National Railways an increase of 450.

In SYDNEY during December the steam, street and electric railways continued active without marked change from previous month. Railway repair shops, navigation and 'longshore work, and transfers, liveries and garages also continued steadily active. HALIFAX reported a busy month for both steam and electric railwaymen, while the 'longshoremen had the busiest month of the season. Transfers and liveries had a satisfactory month. At WESTVILLE railways and shippers had a good month, but transfers, liveries and garages were quiet. At CHARLOTTETOWN all regular transportation employees were busy, the traffic on the Prince Edward Island Railway being exceptionally heavy, one or two extra trains being required every day to keep the freight moving. There were about 500 regular employees on the P. E. I. railway. Liveries, teamsters, etc., all reported a good month's employment. St. JOHN reported steam and electric railways exceptionally busy. 'Longshoremen were well employed and transfers, liveries and garages reported increased activity. At MONCTON car repair work was reported active. FREDERICTON reported activity in the railway repair shops and freight sheds. Transfer and livery workers were also busy. At MONTREAL railway work was very active, but 'longshore work was quiet owing to the close of navigation. Railway repair shops were very active. QUEBEC reported a decided falling off in pas-

senger traffic, but an increase in freight traffic. Street railways increased their fares to seven cents, and a decrease in traffic was anticipated. Railway repair shops were busy. Steam railway workers at SHERBROOKE were fairly busy, and railway repair shops, electric railways and transfers, liveries and garages were all busy. SOREL reported satisfactory conditions in all transportation lines. In OTTAWA and HULL navigation ceased about December 1. The railways, transfers, liveries, garages and express companies were active as usual at this season. TORONTO reported steam railways rushed with holiday business. Repair shops had plenty of work. Street cars, express companies, garages, etc., were very busy towards the close of the month. In HAMILTON the electric railways were very busy. Steam railways were fairly active, though passenger traffic was affected by the adverse money exchange rate and the quarantine regulations due to alleged smallpox in Ontario. Navigation closed on December 20. At NIAGARA FALLS transportation by rail was heavy, and freight handlers, teamsters and express men were all active. Railwaymen at St. CATHARINES were well employed in all branches. BROCKVILLE reported railwaymen active. Repair work was fairly busy, also transfers and garages, but 'longshore work was quiet. In KINGSTON steam and electric railways were fairly well employed, repair shops were active and garages busy. At BELLEVILLE the railways were exceptionally busy, and transfers, liveries and garages had a good month. At GALT steam and electrical railway workers were busy, but the coal shortage affected the former. Transfers and garages were active. BRANTFORD reported busy conditions in the railways, especially in the freight departments. Street railways, transfers and garages were also busy. Freight handlers and other railwaymen at KITCHENER were reported well occupied. Electric railwaymen were active. Help was scarce in the garages, but liveries were slack. At STRATFORD the railway repair shops and

garages were active. LONDON reported a record month for the railway men, more help being required round Christmas. The G.T.R. car shops had a busy month. At LONDON, CHATHAM and WINDSOR also the railwaymen were very busy, traffic being very heavy. At OWEN SOUND railway workers were reported active, but navigation closed. At SAULT STE. MARIE the registered tonnage passing through the canal during December was 93,304, and the freight tonnage was 65,298. At PORT ARTHUR and FORT WILLIAM the seasonal closing down of the freight sheds, coal docks and other 'longshore labour occurred about the middle of the month, excepting in connection with one freighter. In WINNIPEG no change was reported in the railroad shops, every department being well engaged. At BRANDON also employment continued good in all branches of the transport industry. Steam railways at REGINA had an extra heavy month's work. The electric railway service was increased during the month. Repair shops were fairly busy. Railway employees at MOOSE JAW, MEDICINE HAT and CALGARY had an active month. VANCOUVER reported a seasonal reduction in railway service. The electric railways, repair shops, transfers and garages were busy. 'Longshoremen were fairly active. At VICTORIA transportation of all kinds continued active. 'Longshoremen were fairly well employed.

Stone quarrying in QUEBEC district continued slack. At THETFORD MINES about 1,500 workers were steadily employed (metalliferous) in the asbestos industry. Export was reported as rather slow, but the mines were very active. SHERBROOKE reported the chrome iron and asbestos mines fairly busy. The granite quarries were quiet and the copper mine closed down during the month. During the month of December the mines of COBALT shipped a total of 14 cars containing approximately 1,052,925 pounds of ore, as compared with 1,788,280

pounds in November. Bullion shipments for the month amounted to 429 bars containing 509,776.04 fine ounces as compared with 642,191 fine ounces in November. The mines were reported to be well supplied with labour. A wage increase of 25 cents per day was paid the employees owing to the increase in the price of silver. Recent high grade discoveries promised continued activity at its present rate. In the gold camps of PORCUPINE and KIRKLAND LAKE activity increased steadily, a number of new mining operations opening up. In FERNIE district some improvement was noted in the industry during the month, chiefly due to the number of men returning to work at the Kimberley mines. 53 per cent of the men were there reported to be at work, a fair proportion of these being men brought by the companies from Winnipeg, Calgary, Edmonton, or any other source. At FERNIE, TRAIL and ROSSLAND a curtailment of operations in the mines, smelters and refineries was caused by severe weather in the middle of the month. At the Trail smelter only one copper and one lead furnace was in operation. Part of the concentrator closed down, also the lead refinery. These conditions resulted in the temporary laying off of about 80 men. CRANBROOK reported that about 130 men were working at the Sullivan mines at the end of the month.

SYDNEY reported the output of the Dominion Collieries during December as 275,000 tons, against 259,000 tons in the previous month. The output of coke was 15,500. The output of the Nova Scotia Steel and Coal Company at SYDNEY MINES was approximately 56,000 tons, as compared with 57,000 tons in November. Bad weather conditions were responsible for decreased output of the various collieries in the middle of the month. Towards the end of the month there was a demand for skilled miners. Mining conditions at New GLASGOW continued normal. The Dominion Coal Company at Springhill

employed about 1,113 men. The Acadia Coal Co. at Stellarton had about 1,392 employees. At WESTVILLE the mines were operating steadily, the production being 40,804 tons, with 1,422 men employed. The strike at the Minto Mine at FREDERICTON still continued, both parties being very firm. The Company operated stripping work by steam shovels in order to supply the needs of local industries. LETHBRIDGE reported a busy month, all the mines working to full capacity. In CALGARY the coal mines were also exceptionally busy. The railway coal shipments on the C.P.R. from the Crow, Lethbridge, Canmore, Bankhead and Cranbrook mines advanced from 9,807 tons to 12,488 tons per week during the month. Shipments by the Canadian Northern from Drumheller, Nordegg and Edmonton district varied during the month from 10,920 to 9,520 per week. Shipments by the Grand Trunk Pacific from Edmonton and west of Edmonton rose from 5,907 to 7,381 tons per week. Total shipments from this region varied from 29,386 tons per week to 31,326 tons per week during the month. Experienced miners were in demand in DRUMHELLER. FERNIE reported a lack of experienced coal miners and coke loaders, causing curtailment of output during the month. Coke manufacture continued practically dormant, but at MICHEL the coke ovens were operated on a limited scale. NANAIMO reported coal mining in Vancouver Island as brisk, all the coal mines in the district working regularly.

The value of the building permits issued in 35 cities during November amounted to \$6,936,438, as compared with \$9,469,567 in the previous month, and \$2,387,045 in October, 1918. During December considerable building activity continued at SYDNEY and the GLACE BAY district, the new structures being largely school-houses and churches. General labour, however, was adversely affected by the winter weather. In HALIFAX the erec-

tion of dwelling houses continued on a large scale, foundations being laid up to the middle of the month, when some men were laid off. Street paving was discontinued early in the month, but sewer and street railway extensions continued. At CHARLOTTETOWN quiet conditions prevailed, but at ST. JOHN some activity still continued. MONCTON reported building operations as still continuing active throughout December, plumbers and electricians being in good demand. Some shortage of skilled labour was reported at BATHURST. MONTREAL reported the building trades quieter, but with a number of uncompleted contracts which continued to give employment. In QUEBEC construction and repair work started on a few buildings. Outside work ceased at SHERBROOKE, OTTAWA and HULL for the season, but many labourers continued employed on inside work. Activity continued at TORONTO to a later date than usual owing to the strong demand for dwelling houses, and all classes of labour were reported well engaged as far as weather permitted. An unusually large number of buildings remained to be completed, which would furnish employment during the winter months. At HAMILTON the building trades were all actively employed. Plumbers, sheet metal workers, plasterers, general and building labourers and structural iron workers were all reported busy, but painters were less active. ST. CATHARINES reported building and construction work fairly brisk, and at NIAGARA FALLS all the building trades were busy, with a demand for more men in several of them. Most of the new construction was on private dwellings. Paving and sewer construction practically closed for winter. At BROCKVILLE, KINGSTON and BELLEVILLE building continued unusually active, mostly on dwelling houses. In PETERBOROUGH work on dwelling houses was dull, though several industrial firms were building additions. At GALT the building trades were fairly active both in private residences and industrial struc-

tures, and at BRANTFORD the cold weather did not quite stop building operations. KITCHENER reported carpenters, bricklayers and builders' labourers still in demand, and at GUELPH also a shortage of bricklayers was noted. In WOODSTOCK building activity practically ceased. LONDON reported a very busy month, work being rushed in view of cold weather, but no new structures were begun. At CHATHAM and WINDSOR the building trades were quiet. At SAULT STE. MARIE the building trades were quiet. Constructional work on elevators and breakwater at PORT ARTHUR and on the revetment wall at FORT WILLIAM slowed down or ceased owing to frost. Plasterers and plumbers were engaged on interior work. WINNIPEG reported considerable unskilled unemployment, but among the trades, excepting painters, conditions were good. In BRANDON employment was reported to continue fair, but in REGINA the building of private houses ceased for the season. In MOOSE JAW building revived with the moderate weather at the close of the month. CALGARY reported very quiet conditions, with likelihood of revival on weather moderating, and in EDMONTON increased employment had already set in. FERNIE reported activity in reconstructing camps on new sites. In VANCOUVER the building trade was not very busy owing partly to unfavourable weather. NEW WESTMINSTER reported the building trade very quiet, but in VICTORIA a revival of building construction resulted from the adoption by the City Council of the Federal housing scheme under which 33 loans were made averaging \$3,000 each.

The Canadian National Railways, Canadian Pacific Railway, and the Grand Trunk Railway showed further reductions in their railway construction (including maintenance of way) staffs during the month of December, the number of persons employed at the end of the month being 27,500 as compared with 33,900 at the end of November. These decreases were nearly all made during the first fortnight, the personnel

standing at 28,000 in the middle of the month. By companies the largest reduction was shown on the Canadian National Railways, there being 3,800 less workers employed at the end of December than at the end of November. The Canadian Pacific Railway made total reductions of 2,300 and the Grand Trunk made a nominal reduction only, there being but 300 less persons on pay-roll at the end of December than at the end of November.

From HALIFAX a considerable number of men were supplied for surrounding

lumber camps. The lumber companies at New Lumbering GLASGOW increased their woodmen, but a slackening in activity occurred round Christmas. At SYDNEY a demand for men for the woods was noted. CHARLOTTETOWN reported lumbering quiet, a large number of lumbermen being transferred to the woods in New Brunswick. The saw mills at St. JOHN were still running, but likely to stop any day. At CAMPBELLTON the lumber camps were reported well supplied with men. Lumbering operations showed great activity at FREDERICTON, with a decided shortage of help. BATHURST also reported increased activity, with demand for lumbermen for logs, pulpwood and ties. QUEBEC reported the surrounding lumber camps in full swing, with a scarcity of men. At SHERBROOKE also the lumber camps and some of the sawmills were very busy. From OTTAWA and HULL a number of men went into the woods, somewhat relieving the labour shortage. The saw mills in these centres closed down owing to snow and ice. PETERBOROUGH reported lumbering operations more active than for some years. A new mill started at LAKEFIELD. The camps are very busy, many men and teams being employed. The lumber camps near OWEN SOUND were busy. A big demand was reported at PORT ARTHUR and FORT WILLIAM for tie makers, experienced bushmen, pulp cutters and loggers, experienced men being difficult to secure. A demand for

men for the lumber industry was reported from points in MANITOBA, SASKATCHEWAN and ALBERTA. At DAUPHIN experienced bushmen and men to cut cordwood were required. At LETHBRIDGE lumbering was reported good with normal supply of men. At CRANBROOK few vacancies existed for the lumber trade, but men were wanted to cut pulpwood logs. FERNIE reported continued activity in the lumbering industry, with demand for swamper. The past nine months was reported to have been one of the most prosperous periods for the industry for many years. Plenty of men were available, though for various reasons they seemed unwilling to remain in the camps for more than a month or so. At NELSON, TRAIL and ROSSLAND activity was reported. At the

beginning of the month there was some demand for labour, but later there was no scarcity of help. A very busy season was anticipated. A demand for loggers was reported from KAMLOOPS and VERNON following milder weather. NEW WESTMINSTER reported that the sawmills were very busy until ice in the river stopped operations. At VANCOUVER the lumbering trade was not very busy, some camps closing down for winter, but others still operating. Saw and shingle mills were busy but found difficulty in getting cars to ship the goods ordered. At PRINCE RUPERT the sawmills were temporarily slack. NANAIMO reported lumbering generally active, but at VICTORIA the lumber industry was reported as continuing to give good employment.

## INDUSTRIAL DISPUTES INVESTIGATION ACT, 1907

### PROCEEDINGS FOR THE MONTH OF DECEMBER, 1919, WITH TEXT OF BOARDS' REPORTS

**D**URING the month of December the Department received reports from three Boards of Conciliation and Investigation established to deal with disputes between (1) the Maritime Coal, Railway and Power Company and certain of its employees, being members of District No. 26, United Mine Workers of America; (2) the Toronto Railway Company, Toronto Electric Light Company and Toronto Power Company, and the employees of the said companies respectively, members of Local Union No. 353, International Brotherhood of Electrical Workers, and (3) the Canadian Pacific Railway Company and certain of its employees at St. John, N.B., being marine freight handlers, members of Local Union No. 838, International 'Longshoremen's Association. Five applications were received for the establishment of Boards, further appointments were made in connection with previous applications received, and advice was received in the Department of

the settlement of a dispute in which negotiations were pending.

#### Applications Received

During the month of December applications for Boards were received as follows:

(1) From the employees of the Canadian Pacific Railway Company, at St. John, N.B., being marine freight handlers, members of Local No. 838, International 'Longshoremen's Association. The personnel of the Board and the text of the Board's report appear in the present article.

(2) From the employees of the Canadian Express Company, being messengers, clerks, porters, etc., members of the Canadian Brotherhood of Railroad Employees. A Board was established composed as follows: the Honourable Mr. Justice T. Fortin, Montreal, chairman, appointed by the Minister in the absence of a joint recommendation from

the other two members: Messrs. F. H. McGuigan and Fred Bancroft, Toronto, nominees of the company and employees respectively.

(3) From the police force of the City of Montreal, members of Local No. 62, Policemen's Federal Labour Union. The employer in this case being a municipality a Board could be established only by the joint consent of the disputants. This consent had not been received from the City at the close of the month.

(4) From the employees of the lines of the Grand Trunk Railway in Canada, being clerks, etc., members of the Canadian Brotherhood of Railroad Employees. No Board was established in this case, as, in the Minister's view, on account of an agreement being already in existence between the parties concerned, which did not expire until June 1, 1920, this was not a dispute falling within the meaning of the I. D. I. Act.

(5) From the employees of the Niagara, St. Catharines and Toronto Railway, being motormen and conductors, barn and shop men, powerhouse men, etc., members of Division 846, Amalgamated Association of Street and Electric Railway Employees of America. A Board was established, Messrs. Geo. D. Kelley, Ottawa, and J. A. McAninch, Merriton, Ont., being appointed members thereof on the recommendation of the company and employees respectively.

#### Other Proceedings Under the Act

During the month of December other proceedings under the Act took place as follows:

(1) The Board established to deal with the dispute between the Intercolonial Coal Mining Company, Limited, Westville, N.S., and certain of its employees, being members of District No. 26, United Mine Workers of America, was completed by the appointment of His Honour Judge G. Patterson, New Glasgow, N.S., as Chairman, on the

joint recommendation of the other two members, Messrs. John McKeen, Halifax, and J. C. Watters, Inverness, nominees of the company and employees respectively. Mr. William Maxwell, the first nominee of the company having resigned, Mr. McKeen was appointed in his stead.

(2) The Board established to deal with the dispute between the Maritime Coal, Railway and Power Company, Joggins, N.S., and certain of its employees, being members of District No. 26, United Mine Workers of America, was completed by the appointment of a chairman. The personnel of this Board and the text of the Board's report appear in the present article.

(3) A Board was established to deal with the dispute between the Acadia Coal Company, Limited, Stellarton, N.S., and certain of its employees, being members of District No. 26, United Mine Workers of America, composed as follows: His Honour Judge G. Patterson, New Glasgow, N.S., chairman, appointed on the recommendation of the other two members; Messrs. John McKeen, Halifax, and J. C. Watters, Inverness, nominees of the company and employees respectively.

(4) A Board was established to deal with the dispute between the Nova Scotia Steel and Coal Company, Limited, Sydney Mines, N.S., and certain of its employees being members of District No. 26, United Mine Workers of America, composed as follows: Professor Howard Murray, Halifax, and Mr. J. C. Watters, Inverness, nominees of the company and employees respectively.

(5) A Board was established to deal with the dispute between the Canadian Pacific Railway Company (Eastern Lines) and its sleeping car porters, composed as follows: His Honour Judge Colin G. Snider, chairman, appointed on the joint recommendation of the other two Board members; Messrs. U. E. Gillen, Toronto, appointed by the Minister in the absence of a recommen-

dation from the company, and Mr. Fred Bancroft, the nominee of the employees.

(6). Advice was received in the Department that an amicable adjustment had been reached as a result of renewed direct negotiations in the dispute between the Telephone Company of

Prince Edward Island and certain of its employees, being members of Local Union No. 970, International Brotherhood of Electrical Workers, in connection with which an application for a Board of Conciliation and Investigation had been received during the month of November.

### **Report of Board in Dispute between the Maritime Coal, Railway and Power Co., Joggins, N.S., and certain of its employees**

A UNANIMOUS report was received from the Board established to deal with the dispute between the Maritime Coal, Railway and Power Company, Joggins, N.S., and certain of its employees, being members of District No. 26, United Mine Workers of America. The Board was composed as follows: His Honour Judge G. Patterson, New Glasgow, appointed on the joint recommendation of the other two members; Messrs. G. R. Hulme, Montreal, and J. C. Watters, Inverness, nominees of the company and employees respectively. The report was accompanied by a signed agreement between the parties concerned.

#### **Report of Board**

In the matter of the Industrial Disputes Investigation Act, 1907, and re difference between the Maritime Coal, Railway and Power Company, Limited, and certain of its employees, being members of District No. 26, United Mine Workers of America.

To The Honourable  
Minister of Labour,  
Ottawa.

Sir,

The undersigned Board of Conciliation appointed under the above named Act in this matter beg to report as follows:

The Board met at River Hebert, Cumberland County, N.S., on the afternoon of Monday, December 29th, 1919, and subsequently adjourned to Amherst. As

will appear by the report of the Chairman under Section 54 of said Act, the Board was in continuous session, holidays not excepted, from the date of its first meeting until Monday, January 5th, 1920. At its first meeting the Board announced to the representatives of the employers and employees that its policy was to effect an agreement by negotiation between the parties concerned rather than to sit as a court, take evidence and deliver judgment. Employers and employees cordially agreed to accept the suggestion that they meet together and discuss their differences fully and frankly, and if possible come to terms. The Board was frequently consulted during the course of these negotiations and lent what assistance it could, but the bulk of the work was done by the representatives of the parties in private session and we are convinced the results are more satisfactory than if we had proceeded in the other way. These results are embodied in Schedule A annexed hereto, which is hereby made a part of this report. This schedule is to go into operation and be effective from the first day of January inst., and shall remain in force until terminated by either party giving thirty days' notice in writing of their desire to change.

The schedule of classification does not conform to that of any other colliery in Nova Scotia because of the different methods employed in work in the collieries of the Maritime Coal, Railway & Power Company. The duties of each man are somewhat different and it is impossible

to make the rates agree with other schedules, but each man is paid according to the work he performs. The mining rates at the Maple Leaf Colliery are subject to revision when the mine gets deeper and the conditions conform to those existing at the Joggins.

The Board was pleased to hear that the relations between the Maritime Coal, Railway & Power Company and their employees had always been of the most friendly kind and to see that the same good feeling still prevails. We are glad to think that the present negotiations far from impairing the friendly relations heretofore existing have rather deepened and improved them.

All of which we have the honour to submit.

(Signed) GEORGE PATTERSON,  
Chairman.

J. C. WATTERS,  
G. RATCLIFFE HULME.

Dated at Amherst, this  
5th day of January, 1920.

### Report of Board in Dispute between the Toronto Railway Company, Toronto Electric Light Company and Toronto Power Company, and the employees of the said companies respectively

A REPORT was received from the Board established to deal with the dispute between the Toronto Railway Company, Toronto Electric Light Company and Toronto Power Company, and the employees of the said companies respectively, members of Local Union No. 353, International Brotherhood of Electrical Workers. The Board was composed as follows: His Honour Judge R. D. Gunn, Ottawa, Chairman, appointed by the Minister in the absence of a joint recommendation from the other two members; Messrs. Wm. H. Moore and Fred Bancroft, Toronto, nominees of the company and employees respectively. The report was signed by the chairman and Mr. Bancroft and contained recommendations as to settlement of the dispute. At the close of the month a report had not been received from Mr. Moore.

#### Report of Board

In the matter of the Industrial Disputes Investigation Act, 1907, and of a dispute between the Toronto Railway Company, Toronto Electric Light Company, and Toronto Power Company, employers, and electrical

workers, members of Local Union 353, I.B.E.W., employees.

To the Honourable  
the Minister of Labour, Ottawa.

The Board constituted to investigate and report in the dispute herein opened proceedings at the City Hall, Toronto, on the 8th day of December, A.D. 1919, and were attended by Mr. F. J. Clarke, Chief Engineer, representing the employers, and Mr. James T. Gunn, Business Agent, and Mr. Douglas Smart, Secretary of Local Union 353, I.B.E.W., representing the employees.

The employees in this application for the establishment of this Board outline the nature and cause of the dispute herein as arising out of an award dated 3rd September, 1919, alleging by this award some seventy employees of one of the companies were placed in an anomalous position regarding wages and conditions, and that all efforts to adjust the differences were unavailing.

The statement is now made that the former Board was misled because the employees believe they acted on the assumption that all employees worked in

or about fifty hours per week while the fact is that these employees worked hours varying from 56 to over 60 per week. It is also represented to this Board that the proposed schedule of rates submitted to the former Board sought general increases of 16c. per hour and an 8 hour day and 44 hour week.

The further representations are made that the employees have benefited by the terms of the former report in a reduction of 12 to 16 hours per week, and many receive the same compensation as formerly paid for the greater number of hours, and also that it was never contemplated that there should be any reduction in the weekly earnings of any of the employees, but it does appear, and these employees claim, that although they received increases in rates they, in some departments, received less compensation and in others merely a trifling increase on former rates, whereas many other employees received substantial increases in rates and reduced hours also.

This Board had the very great advantage of the exhaustive and careful report of the former Board dealing with the same matters, and in addition the evidence of many of the employees and the fullest information on the disputed points ably presented.

The employees have submitted some disputes and differences arising out of the interpretation and terms of the former report and desire the Board to deal with them, but it does appear to this Board that these differences can be more happily resolved by a committee of the employees, and the Board do recommend that the employees be represented in all matters in dispute between themselves and the companies by a committee of themselves, and, in case of failure to reach agreement, the committee may call in one or two of the officers of Local Union 353 in further conference with the companies.

Dealing now with the dispute before this Board after the most full inquiry and careful consideration of the evidence and representations of all parties, we have decided, in order to restore the wages formerly paid and make some

slight proportionate increases, to submit the recommendations following:

(1) That the employees named in the different departments referred to in the schedule hereto annexed marked "A" be paid the rates in such schedule set out in addition to and over and above the rates and wages fixed by the terms of the report of the third day of September, 1919, hereinbefore mentioned.

(2) That these increases be paid from and after the 3rd of September last, until the determination of the schedule at present existing between the employees and the companies involved.

Dated this 31st day of December, A.D. 1919.

(Sgd.) R. D. GUNN,  
Chairman.

(Sgd.) F. BANCROFT,  
For the Employees.

#### SCHEDULE "A" HERETO.

### Report of Board in Dispute between the Canadian Pacific Railway Company and its Marine Freight Handlers at St. John, N.B.

A UNANIMOUS report was received from the Board established to deal with the dispute between the Canadian Pacific Railway Company and certain of its employees at St. John, N.B., being marine freight handlers, members of Local No. 838, International 'Longshoremen's Association. The Board was composed as follows: the Honourable Mr. Justice W. B. Chandler, Moncton, N.B., chairman, appointed on the joint recommendation of the other two members; Messrs. H. C. Schofield and F. A. Campbell, St. John, nominees of the company and employees respectively. The report contained recommendations as to settlement of the dispute and advice was received in the Department that the findings were acceptable to both parties concerned.

#### Report of Board.

In the matter of the Industrial Disputes Investigation Act, 1907, and of a dispute between The Canadian Pacific Railway Company, employer, and certain of its employees at St. John, N.B., being Marine Freight Handlers, Members of Local No. 838, International 'Longshoremen's Association, employees.

To the Honourable,

G. D. Robertson,  
Minister of Labour, Ottawa.

The undersigned members of the Board of Conciliation and Investigation appointed in this matter beg respectfully to report as follows:—

That on the 15th day of December, 1919, the members of the Board met at the City of St. John, and were duly sworn to the due performance of their duties as members of the Board. On the afternoon of the same day a meeting of the Board for purposes of organization and arranging for meetings was held. On the evening of the 15th day of December

instant, a meeting of the Board was held at the City of St. John at which were present the Superintendent for the Canadian Pacific Railway Company at St. John, N.B., Mr. Grout, and the President, Secretary and Business Manager of Local No. 838.

A meeting of the Board and of the representatives of the parties was also held on the morning of Tuesday, 16th instant, and in the afternoon of the same day. At those meetings statements and evidence were given on behalf of the parties respectively, and a general discussion of the application made by Local No. 838 and of the position taken by the Canadian Pacific Railway Company took place.

The following are the demands embodied in a statement submitted on behalf of Local No. 838.

"The men are asking for 65c. per hour and 10c. extra for bulk cargo in sheds and grain for the elevator men.

Time and a half for men called back for day or night work.

Double time for meal hours, Sundays and all Dominion public holidays.

Nine-hour day—6 men to a gang, extra men in bulk cargo in sheds with other conditions the same as in the agreement of 1918-19."

Towards the conclusion of the hearing it was agreed by the representatives of the parties, that all the demands except that as to wages should be withdrawn from the consideration of the Board, and that only the question of wages as embodied in the first of the demands above written should be dealt with by the Board.

The Board understands that the parties have agreed between themselves to the following demands, namely:—

- (a) Time and a half for men called back for day or night work.
- (b) Double time for meal hours, Sundays and all Dominion Public Holidays.

The Board further understands that the last of the demands as to a nine hour day, etc., was withdrawn by the representatives of the men, and that the parties will agree upon the points embodied in that particular clause of the demands of the Local.

Before actually proceeding to hear the parties to this matter, the Board endeavoured to bring about a settlement of the dispute, and requested the representatives of the parties present on the evening of the 15th inst., to consult together with a view of coming to an agreement if possible, but after a short discussion the representatives reported that they were unable to agree, and the hearing was therefore continued.

It appeared during the hearing that the men belonging to the Local are at present being paid at the rate of 47c. per hour for a ten hour day, together with a minimum of four hours when called out for overtime and double time for meal hours, Sundays and all Dominion public holidays.

The members of the Local claimed that living conditions in the city of St. John at the present time are such that they cannot decently maintain themselves and their families at the present rate of wages, owing to the increase in the cost of commodities, in rents, taxes, car fare and other matters. They also contended that considerable time was lost by the men employed in the work at the docks owing to occasional stoppages and interruptions in the work.

It was strongly contended on behalf of the Local that the men should get 10c. extra for handling bulk cargo, namely, cargo not contained in ordinary packages, in the shed either from or to the railway cars, and that the men handling grain in the railway elevator at the docks were also entitled to 10c. extra for their work, owing to the character of the

work, the unhealthy conditions owing to dust in the elevator and the danger of the work.

Distinctions were drawn on behalf of the Local between conditions at St. John and in other places, where in some instances lower rates of wages prevailed. For instance, it appeared that at the port of Montreal the summer rate during the present year 1919 for truckers and freight handlers was 48c. per hour for day work and 53c. per hour for night work. That at the port of Halifax, N.S., the rate for men doing the work of freight handlers is 45c. for day work and 50c. for night work. That at the port of Quebec, the summer rate for the present year was 57c. for day work and 85c. for night work, and they also contrasted the wages of the freight handlers with the wages now paid at the port of St. John to the 'longshoremen who load and discharge steamers and vessels at the docks. These 'longshoremen are now getting 70c. per hour for day and night work and they also get 10c. extra for handling bulk cargo.

The members of Local No. 838 are at the present time about 700 in number, and it was represented on behalf of the Railway Company that there were altogether too many men in the Local, as the greatest number of men employed as freight handlers by the Railway at the docks at any one time during the winter season does not exceed about 500 men, and it was further claimed by the representatives of the Railway Company that, owing to the large number of men belonging to the Local, the amount of wages earned by each member of the local was necessarily reduced as the work had to be divided among so many men.

The representatives of the Local, while not admitting the contention that there were too many men in the Local, stated that under arrangements made by the International 'Longshoremen's Association, with which this Local is affiliated, the Local admitted returned soldiers to membership without any charge and that this course had resulted in a very increased membership in the Local.

It was also contended on behalf of the Local that the work at St. John is very much harder than at a port like Montreal. There is practically no work of freight handling at the docks in West St. John during the summer season, the work being confined to about five months in the year, and extending generally from about the middle of November until 1st May. That weather conditions were at times very severe and that heavy clothing was necessary in order to enable the men to withstand the cold and exposure.

The work of the freight handlers, who are of course employees of the Canadian Pacific Railway, consists of discharging cars which are brought up to the sheds at the docks and placing the goods discharged in the sheds—also in loading into the railway cars goods placed in the sheds by the 'longshoremen, who discharge the steamers lying at the docks, the freight handlers having nothing to do with loading goods on the steamers or removing goods from steamers to the sheds, this work being done by 'longshoremen.

The wages paid truckers or freight handlers, as they are called, in the past are as follows:

Season 1912-13 .....	25c. per hour
Season 1913-14 .....	25c. per hour
Season 1914-15 .....	25c. per hour
Season 1915-16 .....	25c. per hour
Season 1916-17 .....	30c. per hour
Season 1917-18 .....	35c. per hour
Season 1918-19 .....	47c. per hour

The principal contentions made by the representatives of the Local were that owing to the high cost of living, the men were unable to maintain themselves and their families decently upon the wages received, namely 47c. per hour, and a good deal of evidence was submitted as to the actual cost of living in the city of St. John at the present time.

The Board has carefully considered the arguments advanced and evidence submitted on behalf of the parties re-

spectively, and being of opinion that there has been a considerable increase in the cost of living in the city of St. John within the last twelve months, and also considering the conditions under which the men are required to work at the docks at West St. John, has come to the conclusion that the members of the Local are justly entitled to some increase in wages to enable them to meet this increased cost of living, and as fair compensation for the work done by them.

The recommendation of the Board is: that the wages of the members of the Local be increased by 9c. per hour, namely from 47c. per hour to 56c. for ten hour day. That such increase in wages shall take effect from 20th day of November, 1919, and continue until 1st day of June, 1920.

The Board has also carefully considered the claim that the men should be allowed 10c. extra for handling bulk cargo in the sheds, and that the men handling grain in the elevator should be allowed a similar extra amount over and above the wages paid to the other freight handlers.

The Board does not see its way clear to recommend this extra allowance or payment either for handling bulk cargo or for handling grain in the elevator, and the members of the Board recommend that this rate of 56c. per hour be a flat rate to be paid to all members of the Local alike, without preference or distinction, either as to the men employed or as to the classes of work done by them.

All of which is respectfully submitted.

Dated this 17th day of December, 1919.

(Sgd.) WILLIAM B. CHANDLER,  
Chairman.

(Sgd.) H. E. SCHOFIELD,

(Sgd.) F. A. CAMPBELL,  
Members of Board.

## PROCEEDINGS OF THE CANADIAN RAILWAY BOARD OF ADJUSTMENT No. 1

THE Department has received ten new decisions of the Canadian Railway Board of Adjustment No. 1. The first nine of these decisions, Cases Nos. 53 to 61, have reference to disputes between the Toronto, Hamilton and Buffalo Railway Company and various employees in the train service. Case No. 53 relates to a dispute with regard to payment for way freight work on a certain section of the road. Case No. 54 has reference to a claim for a 'run-around' made on behalf of two engineers and two firemen. Case No. 55 deals with a controversy as to the application of Article 4 (a), Supplement No. 16. Case No. 56 relates to a claim that yard engine crews should consist of a foreman and two helpers. Case No. 57 has reference to a complaint that train baggagemen on two trains running between Hamilton and Buffalo were compelled to handle too much mail matter. Case No. 58 has reference to a claim by a conductor for payment when operating an official motor car. Cases Nos. 59 and 60 relate to a claim for a 'run-around' made by two brakemen. Case No. 62 deals with a claim of a telegraph operator of the Canadian National Railways for appointment as third trick operator.

**Case No. 53.—The Toronto, Hamilton and Buffalo Railway Company and the Brotherhood of Locomotive Engineers, the Brotherhood of Locomotive Firemen and Enginemen, the Order of Railway Conductors, the Brotherhood of Railroad Trainmen.**

A notice was issued by the Toronto, Hamilton and Buffalo Railway calling for applications for a conductor and two brakemen for the Welland sub-division way freight, running from Welland to Hamilton on one day, returning the following day, on the basis of a minimum allowance of 100 miles per day. The

employees contended that this was a violation of Article 11 of the Enginemen's Schedule, and of Article 15 of the Conductors' and Trainmen's Schedule, which provide for compensation for turn-around runs from Hamilton to Coyle, Waterford or Port Maitland and return, and that the run between Hamilton and Welland should be a turn-around run. The Company contended that these articles applied only to turn-around runs, and that there was nothing in the schedules requiring that local freight service between Hamilton and any other points should be on a turn-around basis, and that the Company had the right to change the method of operation, there being nothing in the schedules prohibiting such practice.

The decision of the Board was as follows

General railway practice establishes straight-away as well as turn-around freight service. Article 7, Supplement 15, and Article 6, Supplement 16, distinctly provide that the rates named herein are on the basis that 100 miles or less, eight hours or less (straight-away or turn around) shall constitute a day's work. The Schedule articles referred to in the submission only provide a basis for payment between the points mentioned if runs are operated as turn-around service.

The Board, therefore, decides that the Company is within its rights under the Schedule in assigning the local freight service as per their Notice 100, dated October 20th, 1919.

This decision, of course, carries with it the understanding that this specifically assigned service will be regularly operated as advertised, and cannot be operated one day as a turn-around service and on other days as a straight-away service.

**Case No. 54.—The Toronto, Hamilton and Buffalo Railway Company and the Brotherhood of Locomotive Engineers, the Brotherhood of Locomotive Firemen and Enginemen.**

Two engine crews of the Toronto, Hamilton and Buffalo Railway, which were assigned to regular passenger ser-

vice, were called to run light, one from Welland to Hamilton, the other from Waterford to Hamilton, to take out two exhibition special trains, which was not a part of their regular assignment. Claims were made for a run-around on behalf of two engineers and two firemen, who were on the Hamilton spare board at the time of the departure of these specials. It was claimed on their behalf that the special should have been handled by men on the Hamilton spare board, in accordance with Article 59 of the existing schedule. Paragraph "A" of this article provides for the assigning of men by the advertising of runs. Paragraph "B" provides that "Emergency or spare lists will be maintained, consisting of the junior unassigned men." Paragraph "C" provides for the filling of vacancies followed by provision that "runs not provided for above will be handled by the spare list men." The Company contended that the two regularly assigned crews who were at Waterford and Welland on the night of August 27, in the handling of this exhibition special, were in turn-around service, one from Welland to Hamilton and return, the other from Waterford to Hamilton and return, and that the crews on the spare board at Hamilton were therefore not affected.

The decision of the Board was as follows:

The Board decides that the spare work in question could not be covered by advertisement, neither could it be considered a vacancy, but that it rightfully belonged to the spare list men, who were located at Hamilton where the work originated. Therefore, the claim of the men is sustained.

**Case No. 55.—The Toronto, Hamilton and Buffalo Railway Company and the Order of Railway Conductors, the Brotherhood of Railroad Trainmen.**

A disagreement arose with regard to the employment of regular passenger men in freight service on the Toronto, Hamilton and Buffalo Railway, in order to make up their monthly guarantees. The men contended that this was in vio-

lation of Article 4 (a) of Supplement No. 16, which reads as follows: "Regularly assigned passenger trainmen who are ready for service the entire month and who do not lay off of their own accord, shall receive the monthly guarantee provided for in Article 1, exclusive of overtime. Extra service may be required, sufficient to make up the guarantees, and may be made between regular trips, may be made on lay-off days, or may be made before or after the completion of the trip. If extra service is made between trips which go to make up a day's assignment, such extra service will be paid for on the basis of miles or hours, whichever is the greater, with a minimum of one hour. Extra service before or after the completion of a day's work will pay not less than the minimum day. The basis of actual pay for extra service applies only in making up the guarantee; after guarantees are absorbed, schedule provisions for extra service apply." The Company contended that regularly assigned passenger trainmen might be used in any class of service, in order to make up their guarantee, that no train service employees on the railway were restricted to passenger service, that it has always been permissible, and still is, for employees on this road to go from passenger to freight yard service, and vice versa, subject to the seniority rule. The Company quoted, in support of their contention, Article 6 of the schedule, which reads: "Trainmen assigned to regular passenger service will not be required to do work other than their regular service on assigned runs when other competent crews are available." The Company further contended that this question was clearly covered by the decision in answer to Question No. 38, Interpretation No. 1 to Supplement No. 16.

In delivering its decision the Board declared that it had carefully considered the bearing on this case of Question No. 38, Interpretation No. 1, Supplement 16, and answers thereto, and it was established before the Board that there was a greater interchangeability

of service on this line than generally exists. While it was permissible, under Article 6 of the Schedule, for passenger men to be required to do work other than their regular service on assigned runs, when other competent crews were not available, this was clearly for emergencies, and the Schedule still requires such service.

The decision of the Board was as follows:

The Board sustains the contention of the employees and decides that regularly assigned passenger men may not be used in freight service to make up monthly passenger guarantees, yet the Board does not intend its decision to prohibit the interchangeability of service which the Schedule now permits, but rules that this interchangeability should not be extended through the incorporation in the Schedule of the provisions of Supplement No. 16, which permit extra service to be required sufficient to make these monthly guarantees.

**Case No. 56.—The Toronto, Hamilton and Buffalo Railway Company and the Brotherhood of Railroad Trainmen.**

A number of yard engines on the Toronto, Hamilton and Buffalo Railway were being operated by a crew consisting of a foreman and one helper. The employees contended that a safety rule should be incorporated in the Trainmen's Schedule, reading as follows: "Yard crews shall consist of not less than a foreman and two helpers." It was held that two helpers were required in order to make operations safe and prevent danger to property and injury to persons. It was contended that this rule was necessary owing to the nature of obstructions surrounding industrial plants, dangerous grades, and curvature of tracks which interfere with safe communication of signals. The Company contended that there was nothing in the Conductors' or Trainmen's Schedule which designated the number of men to

constitute a crew in the yard service, that the basis of the present assignment affords both safe and efficient operation, that this question was a managerial one, and that the points raised by the employees were taken into consideration in assigning the number of men to work in each yard engine.

The decision of the Board was as follows:

The Board decides that it would not be justified in ruling that all yard crews should consist of not less than a foreman and two helpers.

The increased compensation to men in yard service under the application of General Order No. 27 of the Director General United States Railroad Administration (McAdoo Award) and Supplements thereto, does not, however, justify a reduction in the number of men comprising yard crews under the practice and conditions previously prevailing on the railway concerned as an offset against such increased compensation.

There were conditions brought to the notice of the Board which indicated that there might be some cases in which the employees would be justified in asking for a second helper in the crews, but such cases could only be properly ruled upon with a full knowledge of the details of the conditions in each individual case.

The Board believes that with this decision on the general question as submitted, it should be possible for the employees and the Company to agree with reference to any individual cases in question, and recommends to the parties that they should confer with that end in view.

**Case No. 57.—The Toronto, Hamilton and Buffalo Railway Company and the Brotherhood of Railroad Trainmen.**

The train baggagemen operating Trains 70 and 71 of the Toronto, Hamilton and Buffalo Railway, between Hamilton and Buffalo, are required to handle a volume of mail, in addition to their other duties. The employees contended that this practice had become burdensome and that they were held to strict accountability if any mail packages miscarried. To the handling of mail had been added the handling of a great amount of parcel post matter, and

for this service they received no extra compensation. They contended that a Government mail clerk should be assigned to cover these runs. The Company contended that the quantity of baggage handled on these trains was exceedingly light, and that the quantity of mail which the baggagemen were required to handle as part of their work did not create a burdensome condition; that a corresponding volume of mail was carried over the rails of connecting railways where no additional assistance was necessary.

The decision of the Board was as follows:

Having due regard for all the evidence submitted, the Board decides that it cannot, under existing conditions, consistently go beyond the provisions of General Order No. 27 and Supplements thereto in the matter of compensation, nor is it within the jurisdiction of the Board to decide as to the appointment of Government mail clerks on trains.

However, the Board suggests that officers of the Company make further effort with the Post Office Department to have mail sacks sorted in such a manner as to relieve men in the baggage car from performing that service to the extent which may be justified.

**Case No. 58.—The Toronto, Hamilton and Buffalo Railway Company and the Brotherhood of Railroad Trainmen.**

A conductor of the Toronto, Hamilton and Buffalo Railway was employed on an official motor car running from Hamilton on a round trip of 130.18 actual miles, occupying twelve hours and ten minutes. Part of the trip was over the Michigan Central lines. He made a claim for payment at through freight rates for a total of 232½ miles. The conductor's time ticket was declined and the Company paid actual mileage at through freight rates, with overtime on a speed basis of 12½ miles per hour, the total payment being \$7.02 for 130 miles and \$1.19 for overtime of one hour and

forty-six minutes. The employees contended that the conductor should be paid 132½ miles on the Toronto, Hamilton and Buffalo Railway, under the rates and rules of Articles 8 and 15 of the existing agreement, and one day at through freight rates for service on the Michigan Central Railway. The Company contended that the conductor had covered 130 miles, for which through freight rates were allowed as provided for in Article 8, overtime being computed on a speed basis of 12½ miles per hour, in accordance with Article 11, and that it had always been the practice for the Toronto, Hamilton and Buffalo crews to operate over the Michigan Central Railway in joint service, extra service and special service on the same basis as on the Toronto, Hamilton and Buffalo Railway tracks.

The decision of the Board was that there was nothing in schedule conditions under which this question could be properly decided, and that therefore the conductor should be paid 200 miles in settlement for the service rendered.

**Case No. 59.—The Toronto, Hamilton and Buffalo Railway Company and the Brotherhood of Railroad Trainmen.**

Brakemen B—— and D——, of the Toronto, Hamilton and Buffalo Railway, stood first and second respectively on the spare board. Brakeman D—— was chosen to fill a temporary vacancy as station switchman, and brakeman B—— consequently claimed a run-around. It was contended on behalf of brakeman B—— that he was a qualified yardman, having been in charge of yard engines which are often required to switch passenger equipment. The Company quoted Article 21 of the Schedule, which reads as follows: "When un-

assigned crews are available and are run around at terminals, they will be paid 50 miles for each run-around and hold their turn out. When an unassigned crew has come on duty in turn and has got its engine and commenced to work, it will remain with train called for even though another crew comes on duty later and gets out of terminal first. The first crew called will not be entitled to pay as per this rule." The Company contended that this applied only to unassigned crews, a number of which have been set up to do extra or pool work, and that it did not apply to employees on the spare or extra board. It was further declared that the man required to fill this temporary vacancy needed special qualifications and knowledge which brakeman D—, who was chosen for it, possessed, whereas brakeman B—was not qualified for the position.

The decision of the Board was as follows:

Considering all the circumstances, the Board decides that the claim for payment of run-around to brakeman B— is denied.

This decision does not, however, support the Company's contention that Rule 21 applies only to crews as a whole. In regard to this question the Board decides that under the general application of this or similar rules in other schedules the conditions apply to individuals as well as crews, subject to other schedule conditions.

NOTE.—The Board suggests to the parties the mutual adoption of a rule to govern the practice of employees in train service being given an opportunity to pass regular examinations in order of seniority.

**Case No. 60.—The Toronto, Hamilton and Buffalo Railway Company and the Brotherhood of Railroad Trainmen.**

This case is somewhat similar to Case No. 59. Two brakemen, R— and D—, of the Toronto, Hamilton and Buffalo Railway, stood first and second respectively on the spare board. The latter was called and used as a yard

foreman to fill a temporary vacancy on yard engine operating in the industrial territory at Hamilton. Brakeman R— then claimed a run-around. It was contended on behalf of brakeman R— that he was familiar with the work in that territory and should have been used on the 9 o'clock engine, on which brakeman D—was used. Brakeman R— was used on the 12 o'clock engine, doing practically the same work, and it was claimed that he should be paid in accordance with Article 21, and a run-around was therefore claimed for him.

The Company submitted the same contention as in the previous case, claiming that Article 21 applied to crews and not to spare employees, and that brakeman D— possessed special qualifications for the temporary vacancy he was called upon to fill. The evidence submitted to the Board, however, showed that brakeman R— had on a number of previous occasions acted as yard foreman, and was again called as such a few hours after the call in connection with which a claim for a run-around was made. The Board decided that the claim of the employees was sustained.

**Case No. 61.—The Toronto, Hamilton and Buffalo Railway Company and the Brotherhood of Railroad Trainmen.**

This case, like the two immediately preceding, had reference to a claim for a run-around made by a spare brakeman, on the ground that he stood first on the spare board, but that the man who stood second was run out ahead of him. The claim was made under Article 21, quoted under Case No. 59. The Company made the same contention as before, namely, that this Article applied to unassigned crews and not to employees on the spare or extra board.

It was stated by the Board that during the hearing of this case it developed that the two brakemen were called for at the same time, one for road service and the other for yard service.

The decision of the Board was as follows:

The Board decides that under all the circumstances the claim for payment of run-around to brakeman D—— is denied.

This decision does not, however, support the Company's contention that Rule 21 applies only to crews as a whole. In regard to this question the Board decides that under the general application of this or similar rules in other schedules the conditions apply to individuals as well as crews, subject to other schedule conditions.

**Case No. 62.—The Canadian National Railways (Eastern Lines) and the Order of Railroad Telegraphers**

A telegrapher employed by the Canadian National Railways was the senior applicant for the position of third trick operator at Charney, Quebec. He was advised by the Superintendent of his appointment to this position, but about a month later he was advised to resume duty at his old post, as father and son could not be employed at the same station.

The employees contended that this was a violation of the seniority rules of the Schedule, and that this telegrapher should receive the appointment. It was contended by the National Railways that there was a standing rule that father and son could not be employed where one was under the jurisdiction of the other.

The Board stated that from oral evidence it seemed that an order of the Minister of Railways regulating the employment of relatives was issued some years ago to the railway officers, but it did not seem to have been issued to the employees. "The general provision of the Schedule regarding promotions is contained in Article 6, Clause (a), which reads in part: '(a) The right of promotion of telegraphers will extend over each General Superintendent's district, and will be governed by merit, fitness and ability, of which the General Superintendent shall be the judge. Where these are sufficient, senior telegraphers will be given preference, etc.'"

It was shown in this case that merit and ability were sufficient, and the Board gave considerable attention to the view that the word "fitness" might in some cases with propriety be held to sustain any objection by the Company to an appointment on the ground of relationship.

The decision of the Board was as follows:

Mr. R—— having, pursuant to the terms of the Telegraphers' Schedule, applied for the position of third trick operator at Charney, and having been advised of his appointment thereto, the Board decides that under all the circumstances of the case the claim of the employees be sustained.

The Board would not, however, be justified in rendering a decision which might be generally construed as preventing arrangements being made in individual cases which will properly protect the interests of the Company.

**COST OF LIVING ADJUSTMENT OF WAGES FOR VANCOUVER ISLAND COAL MINERS**

A COST of Living Commission was appointed on January 21, 1919, to determine every three months the increase in the cost of living for coal miners on Vancouver Island, and to report the amount by which wages should be increased or decreased accordingly. The Commission consisted of Mr. John McAllister representing the miners, Mr.

Tully Boyce representing the operators and D. T. Bulger, Fair Wages Officer of the Department of Labour, as Chairman. The Commission made its fourth report\* on October 16, 1919, for the quarter ending September 30, 1919, the

\*For previous orders see LABOUR GAZETTE, March, 1919, p. 254; May, 1919, p. 535; and August, 1919, p. 900.

change in rates of pay to date from November 1. As on previous occasions information as to prices of the principal commodities was obtained from merchants in the several mining districts, Nanaimo, Ladysmith, Cumberland, Courtenay, South Wellington, Union Bay, Bevan and Cassidy's.

Fresh pork sausage showed marked advances, while very slight advances occurred in jams, syrups, dried vegetables, sago, rice, barley, tapioca, soap, lard, evaporated fruit, tea, coffee, canned salmon, and corned beef. Sharp declines were found in fresh mutton, veal, and beef, but slight increases in canned beef and tongue, butter and cheese. Prices of canned vegetables, flours, cornmeal, oatmeal, rolled oats, ham and bacon showed no changes when compared with prices three months earlier.

The method of computation was the same as for previous adjustments, namely, to take the percentage of increase or decrease, as the case may be, of prices on September 30 over those on June 30 for groceries, provisions, meats, etc., and to add two-fifths of this increase or decrease as an equivalent to cover similar increases or decreases in clothing, boots and shoes. For this period a decrease of 1.26 per cent was

found, amounting to  $3\frac{3}{4}$  cents per day on the wages when the base rate was \$3 and to 4 cents when the base rate was \$3.15.

A complaint as to this adjustment being made by some of the miners a special session of the Commission was held at Ladysmith on November 26. On inquiry it was found that the complaint of the miners was due to their belief that the Commission had not been furnished with the prices for Ladysmith actually current in that locality on September 30, and that the correct prices were higher than those quoted to the Commission and would indicate an increase, not a decrease, from June 30. The Commission then visited all the merchants at Ladysmith who had furnished information as to prices, examined their counter sales books for September 30, and found that correct information as to prices had been furnished to the Commission, and that the statistics as to prices obtained by the miners who laid the complaint were for better grades than those quoted for the Commission and in some cases for different dates, but that even then figures showed more decreases than increases. The Commission therefore unanimously refused to consider their award.

### STRIKES AND LOCKOUTS IN CANADA DURING DECEMBER, 1919

SEVEN strikes, involving about 502 employees, were reported as having commenced during December. There were in existence at some time or other during the month 22 strikes, involving about 2,828 workpeople. The total time loss on account of industrial disputes was estimated at 48,960 working days, as compared with 84,073 in the previous month and 64,079 in December, 1918. The time loss occasioned by the seven strikes which began in December was 9,246 working days, while a loss of 41,314 is charged to the 15 strikes that commenced prior to December. Termination was reported in the case of 4

disputes which commenced prior to December. Five of the disputes commencing during December terminated during the month, leaving the following 13 strikes, affecting approximately 1,695 workpeople, on record December 31: lumber workers at Hyle, Alta.; miners at Kimberley and South Minto; pottery workers, St. Johns; moulders, Brantford; moulders and coremakers, Sherbrooke; moulders and patternmakers, Toronto; shipbuilders, Sorel; garment workers and military workers at Montreal; millinery workers, Marieville; glass workers, Thorold; and musicians at St. John.

### Disputes by Industries

The following is a review of the disputes by industries in the order in which they appear in the statistical table. A brief summary is given of the more important strikes.

**LUMBERING.**—The logging industry in British Columbia was practically free of strikes during December. During the late summer and autumn there were over a dozen strikes of loggers in various camps in that province. The last of these—at Chase, B.C.—continued until early December, when the strikers were replaced by other workers, although the Loggers' Union had not yet declared the strike off, and there were still about twenty strikers on strike pay. About 100 men were reported on strike at the North West Lumber Company's camp at Hylo, Alta., but more definite information had not been obtained at the time of writing. Presuming that the Hylo strike was in existence throughout the month, the approximate situation for December was 100 workers on strike and a time loss of 2,600 working days.

**MINES, SMELTERS, QUARRIES, CLAY PRODUCTS, ETC.**—The strike at the Sullivan Mine, Kimberley, B.C., remained practically unchanged. This strike commenced on September 12, when about 200 men went out for a flat increase of one dollar per day. The company refuses to recognize the One Big Union which, it claims, instigated the strike, and whose local executive is charged by it with inducing the men to violate their contract with the company. The company asserts that it will not consider the situation in any conciliatory way until the strikers repudiate their One Big Union affiliation. The One Big Union is alleged to have caused a one-day strike at Bellevue, Alta., on December 13. A committee of the One Big Union interviewed the management of the Western Canada Colliery Company at Bellevue for the purpose of asking for

negotiations toward an agreement between the miners and the employers. The brief strike was practically a result of the clash between the conflicting interests of the United Mine Workers of America and the One Big Union, in respect to union dues. It has been apparent that two labour organizations—the United Mine Workers of America, and the One Big Union—are striving for control of labour unionization in the mining territory of District 18. A strike, involving 150 miners and surface labourers of the Minto Coal Company, Limited, commenced on December 6, at South Minto, N.B., and remained untermiated at the end of the month. The men demanded a general wage increase of 10 per cent and an eight-hour day instead of the former nine-hour day. The real commencement of this dispute dates back to July 15, when the management of the company refused to accede to the above-mentioned demands of wages and working conditions made by the recently organized Minto local of the United Mine Workers of America. A Conciliation Board was appointed by the Department of Labour, and, after an investigation into the circumstances, a majority report of this Board awarded a one per cent increase. While this was satisfactory to the company, it was rejected by the miners, who then prepared to go on strike. However, the Department of Labour again intervened in another effort to effect an amicable settlement. Negotiations were re-opened through a representative of the Department and the men continued at work pending the result of further conferences. On December 5, the Minister of Labour notified the representatives of the United Mine Workers that he had been unable to obtain concessions better than those awarded by the Board of Conciliation. The miners voted again to strike and ceased work on December 6. At the end of the month, this strike remained untermiated. For the month of December, the strike situation in the

group was, approximately, 3 strikes, involving 393 employees and a time loss of 9,618 working days.

**METALS, MACHINERY AND CONVEYANCES.**—The latest entry in this group was a lockout of the employees of the Canadian Des Moines Steel Company at Chatham, Ont. The employees of the company in Chatham, numbering about 20, recently organized a Local of the Brotherhood of Boilermakers, although no demands upon the company had been made. The company, on November 24, informed its employees that they could withdraw from the Union or leave the employment of the company. It was claimed by the company's officials that the work done in their establishment did not come under the classification of boilermaking, and that, therefore, their employees were not eligible for membership in such a union. The men ceased work. After about two weeks of deadlock, the Industrial Relations Committee of the Chatham Chamber of Commerce succeeded in satisfactorily adjusting the dispute. The lockout of moulders at Brantford and the strikes of moulders at Sherbrooke and Toronto, and the strike of shipbuilders at Sorel, remained unterminated. After nearly a month's duration, the strike of moulders at Sydney, N.S., terminated on December 23. This strike was caused by the refusal of the officials of the Dominion Iron and Steel Company to accede to the wage demands of their moulders. The management of the company contended that it was not possible to grant the wage demands of the moulders without extending a similar increase to other classes in its employ. A successful settlement was effected through the mediation of Mr. J. C. Watters, and the company practically consented to a general increase to all its workers. Seven strikes, affecting 918 employees and totalling a time loss of 23,106 working days, was the approximation in this group for December.

**WOODWORKING.**—At the end of November, the strike of upholsterers at Kitchener had been reduced to where

it concerned only four shops. The latest report indicates that this strike ceased early in December.

**CLOTHING.**—Three strikes in this group remained active at the end of the month. These three were carried over from the previous month's report and include the garment workers and millinery workers in Montreal and the millinery workers at Marieville, Que. These strikes involved, approximately, 276 employees and a time loss of 7,176 working days.

**FOODS, LIQUORS AND TOBACCOS.**—A strike of bakers resulted at Kitchener, on December 8, when the demands of 22 members of the Bakers' Local were refused by the various employers in the city. After six days' duration, the strike was settled by negotiations. The wages, previous to the dispute, were from 31½ cents to 40 cents per hour with some shops working 70 hours per week. The employers have agreed to submit a revised schedule of increased wages and better working conditions.

**CHEMICALS AND EXPLOSIVES.**—The strike of the 12 operating engineers at the alkali plant of the Brunner Mond Canada, Company, at Amherstburg, no longer exists owing to the replacement of strikers by other workers, although nominally, it has been listed as a strike. It commenced on June 28.

**TRANSPORTATION.**—The strike of 800 freight handlers at St. John, which commenced on November 21, for a nine-hour day and a flat increase of 18 cents per hour, terminated on December 21. The men resumed work, pending the decision of a Board of Conciliation.

**MISCELLANEOUS.**—Sixty watch-makers in Toronto went on strike on December 1, for increased wages. Their demands were reported to be a flat rate of \$1 per hour, the former rate being 75 cents per hour. The union also objected to the piece-work system. After being on strike for two weeks, the men were reported as voting to return to work on condition

that negotiations toward an increased wage schedule would be resumed the next month.

**BUILDING AND CONSTRUCTION.** — A strike of iron workers and carpenters on the Government elevator at Port Colborne was the chief dispute in this group during the month. The strike was precipitated on December 15, when the men's demands for greatly increased wages were refused. The employees based their demands on the claim that the work was extra hazardous and exposed to the extreme rigour of the weather. Through the mediation of an officer

of the Department of Labour, negotiations were resumed, and a settlement was effected with the steel workers, who voted to return to work on December 18 at the former rate of 85c. per hour. The carpenters at first refused to return at their former rate of 70c. per hour and demanded \$1 per hour. By December 22, most of the carpenters had secured work elsewhere, and the Local raised the bann on preventing the return to work of the remainder on the elevator job. Three strikes, involving 170 employees and a time loss of 954 working days, was the approximation for December.

### STRIKES AND LOCKOUTS DURING DECEMBER, 1919

Industry or occupation	Particulars.	No. of employees affected	Time loss in working days
<b>Strikes commencing prior to December, 1919</b>			
<b>LUMBERING.</b> —			
Loggers, Chase, B.C. ....	Commenced September 18. Demand for the 8-hour day. Information received in the Department states strikers' places have been filled.	45	.....
<b>MINES, SMELTERS, QUARRIES, CLAY PRODUCTS, ETC.</b> —			
Miners, Kimberley, B.C. ....	Commenced September 12. For increased wages. Unterminated. ....	200	5,200
Pottery workers, St. Johns, Que. ....	Commenced November, 1913. Against a reduction in wages. Unterminated.	43	1,118
<b>METALS, MACHINERY AND CONVEYANCES.</b> —			
Moulders, Brantford, Ont. ....	Locked out May 1. Demand for increased wages. Unterminated. ...	9	234
Moulders and coremakers, Sherbrooke, Que. .	Commenced September 23. For increased wages. Unterminated. ....	28	728
Moulders and coremakers, Sydney, N.S. ....	Commenced November 26. For increased wages and shorter hours. Work resumed December 23.	57	1,083
Moulders and patternmakers, Toronto, Ont. .	Commenced May 1. For increased wages and shorter hours. Unterminated.	150	3,900
Shipbuilders, Sorel, Que. ....	Commenced August 12. For increased wages and shorter hours. Unterminated.	650	16,900
Stationary engineers, St. John, N.B. ....	Commenced November 11. For increased wages and shorter hours. Strikers' places filled about December 4.	3	9
Steel workers, Chatham, Ont. ....	Locked out November 24. Company demanded that men resign from a boilermakers' union. Work resumed about December 15.	21	252

## STRIKES AND LOCKOUTS DURING DECEMBER, 1919—Continued.

Industry or occupation	Particulars.	No. of employees affected	Time loss in working days
<b>WOODWORKING.—</b>			
Upholsterers, Kitchener, Ont. ....	Commenced September 25. For increased wages, shorter hours and a minimum wage scale. Information received in the Department indicates this strike lapsed during November.	4	.....
<b>CLOTHING.—</b>			
Garment workers, Montreal, Que. ....	Commenced October 20. For recognition of the union. Untermiated.	20	520
Millinery workers, Marieville, Que. ....	Commenced October 25. For increased wages and shorter hours. Untermiated.	56	1,456
Millinery workers, Montreal, Que. ....	Commenced November 27. For increased wages. Untermiated....	200	5,200
<b>CHEMICALS AND EXPLOSIVES.—</b>			
Steam and operating engineers, Amherstburg, Ont. ....	Commenced June 28. For increased wages and union recognition. Information received in the Department indicates strikers' places have been filled.	12	.....
<b>TRANSPORTATION.—</b>			
Freight handlers, St. John, N.B. ....	Commenced November 21. For increased wages and shorter hours. Men returned to work at former rates pending the decision of a Board of Conciliation. Work resumed December 4.	800	2,400
<b>MISCELLANEOUS.—</b>			
Glass workers, Montreal, Que. ....	Commenced October 6. For increased wages and shorter hours. Information received in the Department indicates this strike was terminated the latter part of November.	60	.....
Glass workers, Thorold, Ont. ....	Commenced June 18. For increased wages and shorter hours. Untermiated.	80	2,080
Musicians, St. John, N.B. ....	Commenced November 4. Against employment of non-unionist. Untermiated.	9	234
<b>Strikes commencing during December, 1919</b>			
<b>LUMBERING.—</b>			
Lumber workers, Hylo, Alta. ....	Commenced December 1. Against a reduction in wages. Untermiated.	100	2,600
<b>MINES, SMELTERS, QUARRIES, CLAY PRODUCTS, ETC.—</b>			
Miners, South Minto, N.B. ....	Commenced December 6. For increased wages and improved working conditions. Untermiated.	150	3,300
<b>BUILDING AND CONSTRUCTION.—</b>			
Bricklayers, Calgary, Alta. ....	Commenced December 22. Question as to nature of work. Men returned to work pending the decision of the International Union Executive. Work resumed December 31.	7	56
Carpenters, Port Colborne, Ont. ....	Commenced December 15. For increased wages. Settled through mediation of the Department of Labour. Work resumed December 22.	83	498
Stonecutters, Toronto, Ont. ....	Commenced December 2. Against the use of a pneumatic hammer. Terminated about December 8.	80	400
<b>FOODS, LIQUORS AND TOBACCO.—</b>			
Bakers, Kitchener, Ont. ....	Commenced December 8. For increased wages and shorter hours. Settled by negotiations; demands were partially granted. Work resumed December 15.	22	132
<b>MISCELLANEOUS.—</b>			
Watchmakers, Toronto, Ont. ....	Commenced December 1. For increased wages. Settled by negotiations. Work resumed December 13.	60	660

## STRIKES AND LOCKOUTS IN THE UNITED KINGDOM DURING NOVEMBER, 1919

THE following details with regard to strikes and lockouts in the United Kingdom during November, 1919, based on returns from employers and workpeople, are taken from the December issue of the *British Labour Gazette*.

**NUMBER, MAGNITUDE AND DURATION.**—The number of trade disputes beginning in November was 48, as compared with 53 in the previous month, and 43 in November, 1918. In these new disputes about 9,300 workpeople were directly and about 700 workpeople indirectly involved (*i.e.*, thrown out of work at the establishments where the disputes occurred, though not themselves parties to the disputes). In addition over 83,000 workpeople (mainly in iron foundries) were involved, either directly or indirectly, in 65 disputes which began before November and were still in progress at the beginning of that month. The total number of disputes in progress in November was thus 113, involving over 93,000 workpeople, as compared with nearly 630,000 workpeople involved in disputes in progress in October, 1919, and 55,000 in November, 1918.

Of the 1,782,000 working days lost in November by all disputes in progress, about 66,000 were lost by disputes which began in that month. The total aggregate duration of all disputes in progress in October, 1919, was 4,535,000 days, and in November, 1918, was 252,000 days.

**CAUSES.**—Of the 48 new disputes, 23 directly involving about 2,700 workpeople, arose on demands for advances in wages; two, directly involving 600 workpeople, on other wages questions; four, directly involving 800 workpeople, on details of working arrangements; 12, directly involving 3,600 workpeople, on questions respecting the employment of particular classes or persons; four, directly involving 1,100 workpeople, on

questions of trade union principle; and three, directly involving 500 workpeople, on other questions.

The following table classifies these disputes by groups of trades and indicates the number of workpeople involved (whether directly or indirectly) at the establishments concerned and the approximate time lost during November in all the disputes in progress:

Groups of Trades	Number of Disputes			Number of workpeople involved in all disputes	Aggregate duration in working days
	Started before 1st Nov-ember.	Started in Nov-ember.	Total		
Building.....	4	3	7	1,700	27,000
Mining & quarrying.....	6	6	12	12,000	39,000
Metal, engineering and ship-building.....	16	11	27	65,900	1,572,000
Textile & clothing.....	10	11	21	2,500	22,000
Other trades ...	29	17	46	11,600	122,000
Total.....	65	48	113	93,700	1,782,000

**RESULTS.**—During the month, settlements were effected in the case of 33 new disputes, directly involving about 7,400 workpeople, and 24 old disputes directly involving about 13,200 workpeople. Of these new and old disputes, 19, directly involving nearly 10,300 workpeople, were settled in favour of the workpeople; 15, directly involving about 3,900 workpeople, in favour of the employers; and 23, directly involving nearly 6,400 workpeople, were compromised. In the case of 12 other disputes, directly involving about 5,400 workpeople, work was resumed pending negotiations.

## COAL MINERS' WAGE DISPUTE IN THE UNITED STATES

### Termination of the Strike

**A**FTER some 40 days' duration, the strike of 400,000 miners in the bituminous coal fields of the United States terminated, officially, on December 10. Since its commencement on November 1, the course of this strike has been reviewed in recent issues of the *LABOUR GAZETTE*, and the present article will continue the record of developments since November 30.

The end of November saw the strike firmly established despite a Federal injunction to restrain it. Two proposals of settlement, one by Mr. W. B. Wilson, Secretary of Labour, and one by the Fuel Administrator, Dr. Garfield, had also been made. Mr. Wilson's proposal of a 31 per cent wage increase was acceptable to the miners, but was rejected by the operators. Dr. Garfield's proposal of a 14 per cent increase (to be borne by the operators and not by the public in increased coal prices), was reluctantly agreed to by the operators; but the miners expressed considerable dissatisfaction with it.

On December 2, the situation had become so acute that the Fuel Administration and the Railway Administration jointly adopted drastic measures to prevent a coal famine during the cold weather. Restrictions, even more severe than the war-time fuel regulations, were put into effect by which coal was cut off from all industries except those considered absolutely essential. Coal distribution was limited only to the "priority list" of the Fuel Administration, which included the railroad and transportation services; the departments of the Federal, State, County and Municipal governments and institutes, including hospitals; public utilities, including newsprint paper mills; retail dealers, under which

domestic consumers were supplied. There were no preferred factories or industries except those above specified, and those furnishing the necessities of life. Under this sweeping order, curtailment of production was in prospect for all industrial activity, with the further possibility of the closing of all churches, schools and places of amusement and a reduction in street lighting.

On December 5, a crisis appeared to be developing, and by another drastic order there was a reduction in railroad passenger service of one-third in "train miles" in the north, central and south-western railroad regions. This order, which affected 150 railroads, resulted in the saving of about 11,000 tons of coal per day.

At this time, the wage loss was estimated at more than \$2,000,000 daily, and more than one million workers, other than miners, were completely idle, or employed but part of the time. In Chicago, the loss to business seemed to be greater than elsewhere. The city was forced to adopt a 6½ hour business day and more than 400,000 persons were directly affected. In the northwest region, for a period, there were only 8,000 cars of coal for 30,000,000 people, an average of 27 pounds per capita. The Governor of Nebraska had to appeal for volunteers to go to the mines to dig coal. Students from the State University and 2,000 other citizens voluntarily enlisted for this service. The same situation prevailed in the States of Kansas and Wyoming.

The furnishing of bunker coal for foreign steamships in all United States ports was forbidden after 1.00 a.m. December 5, in compliance with an order from the Fuel Administration. Coal production at this period was estimated at 33½ per cent of normal, but the re-

serve stock had become almost entirely depleted.

Early in December, the Government, convinced that all efforts to bring about a resumption of coal mining had failed, and that the Federal injunction to restrain the strike had been violated, decided to institute Contempt of Court proceedings. The Government attorney's interpretation of this injunction was that it applied to individual miners, operators, or other persons, who in any way encouraged the strike or interfered with the production of coal. A Federal Grand Jury decided to extend the scope of its enquiry to investigate not only alleged violation by the miners of the Federal injunction and the Lever Act, but also alleged violation by the mine operators of the Sherman Anti-Trust Law.

While the Contempt of Court hearing was in progress at Indianapolis, President Wilson personally intervened in the strike on December 6, with a proposal somewhat similar to the Garfield decision. He prefaced his conditions of settlement with an appeal to the miners, in their own interests, not to prejudice the public against organized labour, and also on the grounds of national safety. The basic terms in this proposal were:—

(1) The miners to return immediately to work and to receive in the meantime a 14% rise in wages as suggested by Dr. Garfield.

(2) Appointment of a commission of three consisting of a delegate of the operators, a representative of the miners, and a third member chosen to represent the public.

This commission was empowered to investigate the conditions of the mining industry in detail and to award a new scale of wages in accordance with its investigations. It would further decide whether, in view of such awards, the price of coal should be increased. The report of this commission was to be made within sixty days; and in the meantime the cost of the increase in wages would be borne by the operators.

It was further understood by the miners' delegates that any award would be retroactive to the date of the men's return to the mines.

This proposal was not satisfactory to the mine operators, though they did not voice their objection at the time it was made. On December 10, telegrams were dispatched by the officials of the mine workers to the four thousand locals of the Union, instructing the men to return to work immediately. The operators then stated that though they had no part in the settlement and no knowledge of the terms, which were unacceptable to them, nevertheless, they were prepared to yield to the President on the condition that the entire industry be investigated thoroughly before any award was made by the Board of Three. This Board has since been appointed by President Wilson and is now in session.

Dr. Garfield, the Fuel Administrator, followed the announcement of President Wilson's award by resigning, because, as he stated before the Senate Interstate Commerce Committee, he considered that the rights of the public should not be subordinated to either the coal operators or the coal miners, a condition which he anticipated would result from the President's award. Dr. Garfield contended that the executive in creating a Board of Three was surrendering the public to a combination of the operators and miners who could sink their differences, and, by combining their votes at the Board, put any additional cost upon the nation.

The Federal Grand Jury, summoned to investigate alleged violations of the Lever Act and the Anti-Trust laws by coal operators and miners and charges of conspiracy by both, was impanelled on December 17, and is now in session. The judge instructed the jury to investigate charges that the mine owners had not only conspired among themselves to limit the production of coal, but that they had also conspired with the miners themselves against the Government and the public.

It is estimated that during the last week of this strike, over 5,000,000 work-people were deprived of their work. In money, this was estimated as representing to wage-earners a loss of \$20,000,000 per day.

Production was estimated on December 16, at 79.1 per cent of normal, with the railways transporting an increasing average of coal each week.

During this strike, the coal situation in Canada was disrupted to some extent. Railway passenger service was restricted by about 10 per cent, with the prospect of further reduction. The Fuel Administration resumed charge of the allocation of coal. Had the strike continued much longer many coke and coal using industries would have faced the immediate prospect of entirely closing down.

### HOURS OF LABOUR IN CANADA

IN view of the possibility of early legislation with respect to the hours of labour by those countries parties to the League of Nations, the Department of Labour in June last conducted an enquiry into the hours of labour at that time prevailing in Canada. Questionnaires were sent by the Department to about 8,500 firms and some 6,250 replies were received. These returns referred to the hours worked by approximately 612,000 workpeople, or about 50 per cent of the workers in the industries covered. Some occupations, because of their seasonal or intermittent character were omitted from the enquiry or covered only in part, as for instance that of 'longshore work, logging, fishing and canning.

From the following tables, which give in some detail the results of the enquiry, it is seen that at the beginning of June, 1919, there were 266,236 workers out of a total of 612,398, or 43.4 per cent, who were working on an 8-hour day. This number, however, includes an approximation of 100,000 steam railway employ-

ees who were working on a basic 8-hour day, which did not necessarily constitute an actual 8-hour day. Firms employing less than five workers are not included in the tabulation.

## BRITISH LABOUR AND THE LEAGUE OF NATIONS

### Manifesto Issued by Prominent Leaders of Organized Labour

**F**OLLOWING a resolution passed at the British Trades Union Congress, held in Glasgow in September last, to the effect that propaganda in favour of the League of Nations should be undertaken by the Congress in conjunction with the British Labour Party, many prominent leaders of organized labour in Great Britain have signed the following manifesto:

1. The late world-war has cost the combatant nations 7,000,000 in men killed, and 18,000,000 in men wounded or maimed, about £40,000,000,000 in money, has left Great Britain saddled with a vast debt of over £7,000,000,000, and has plunged Europe into industrial chaos. All this waste of life and wealth could have been avoided if there had only been a League of Nations before the war.
2. Peace has left many great questions unsettled in Eastern Europe and the Far East which may produce another and yet greater war, even perhaps in our lifetime, if it be not prevented.

3. The next war, if it comes, will be far more terrible and destructive even than the late war, for it will begin with all the aerial and submarine fleets with which the late war left off, only the destructive forces will be infinitely greater. Such a new war will mean the destruction of European civilization, of European industry, and of the white workingman's standard of life.
4. The prospect of another and still greater war is one we must either prepare for by vaster armaments than ever, or prevent. The first alternative is unthinkable. There remains only prevention. Prevention is possible by the League of Nations to enforce peace. There is no other way.
5. The war has left behind it a situation of the utmost difficulty as regards finance, industry, and food for the nations, which can only be successfully met by "pooling" the resources of all the nations for the industrial recovery of the world.
6. As the standard of life is the main factor in the cost of production, it is vain to raise it in one nation if it remains low in another. For this purpose international machinery amongst the Governments of the nations is absolutely necessary, and the League of Nations, with its International Labour Office, should supply this need.
7. The League of Nations will not supplant the Labour "Internationale," but will supplement it. It will help to do amongst the Governments what the "Internationale" is seeking to do in the industrial world. The more powerfully Labour supports and is represented in the League of Nations, the more can each help the other. We need both the League of Nations and the Labour "Internationale." They are not rivals, but friends working in co-ordinated endeavour towards the same goal—Peace.
8. The League of Nations is the greatest experiment ever tried upon the earth. In its success lies the future hope of humanity. It can only succeed if it be a real League of Peoples, not merely a League of Governments. To this end it is necessary that every individual shall take an instructed and active interest, till he can say, "This is my League, through which I bring my influence to bear on international politics to insure peace and to prevent war." It can only succeed if all sections of public opinion are firmly united behind it in the determination that it shall succeed.
9. The object of the League of Nations Union is thus to instruct and unite all sections of public opinion, both amongst manual workers and brain workers; and also to serve as a national channel for putting forward such amendments as time may prove necessary in the League of Nations constitution

and machinery. The League of Nations Union should therefore be supported by every man and woman who has at heart the ensuring of peace, the prevention of a new and greater war, the industrial recovery of Europe, the improvement of the standard of life, the continuation of our civilization, and the progress of humanity.

## ANNUAL CONVENTION OF THE CANADIAN LEGISLATIVE BOARD OF THE INTERNATIONAL BROTHERHOOD OF LOCOMOTIVE FIREMEN AND ENGINEMEN

**T**HE Annual Convention of the Canadian Legislative Board of the International Brotherhood of Locomotive Firemen and Engineers took place at Ottawa during December 8-14. Mr. W. L. Best, the general chairman, stated in his introductory remarks, that the convention represented between 8,000 and 9,000 members, and that in the United States the International Brotherhood had a membership of 120,000. The organization had invested in Canadian banks \$150,000, in Canadian Victory bonds \$150,000, and in Canadian provincial and municipal bonds, \$679,000.

The Premier, Sir Robert Borden, then addressed the Convention. He referred to the fact that about one-half the total railway mileage in Canada was, or shortly would be, in the ownership of the State, and emphasized the importance of devising some means by which this great essential and national activity should not be interrupted by disputes between employers and employed. Referring to the administration of the government railways, he said:

The problem of administering about 22,000 miles of railways in this country is one of exceptional moment and difficulty. Upon its successful solution probably depends the success of state ownership, not only in Canada, but upon the whole North American continent. We must give earnest attention to some means by which the employees shall have just representation in the executive administration of this great system. I have given to this question some study in the consideration of the problem as a whole, and you may be assured that such a proposal will command my entire sympathy.

The Honourable N. W. Rowell, President of the Privy Council, who followed,

referred to the recent International Labour Congress at Washington, at which forty nations were represented. He said that although there were men there of different races and divergent views, yet all showed a great unanimity when discussing matters affecting the welfare of the toiler and the development of industry. As a result of this he was impressed with the practicability of bringing together men from all nations in the world to discuss industrial problems. A third impression he received was that the first international industrial conference had pointed the way, and would mark the opening of a new era in the industrial history of humanity.

The Honourable G. D. Robertson, Minister of Labour, pointed out that if the administration of the state-owned railways in Canada was to be successful, it would only be through the loyal co-operation of the men in the six great railway organizations. He referred to the admirable relations which had prevailed during the war between the railway organizations and the Canadian Railway War Board. He expressed the belief that Canada would come through the period of reconstruction as successfully as any of the warring nations, and stated that from March 8 to November 22, the last date for which the Department of Labour had reports, 226,000 persons had been placed in employment in Canada, of whom 38 per cent were returned soldiers. He said that at the present time applications for workers exceeded the demands for work. There was a labour surplus in Victoria, B.C., but in other Canadian centres there was a shortage. The Department of Labour had arranged with the Department of Railways for the transportation of workers from centres where there was a labour surplus to places where employment was more plentiful, and 21,687 such transfers had been made.

The Convention opposed the perpetuation of the Railway Board of Adjustment No. 1, on the ground that it would introduce the principle of compulsory arbitration against which the Organization had frequently declared itself.

Resolutions were passed at the Convention in favour of the enactment of legislation and rules for the following purposes: To prohibit railway companies from requiring employees engaged in the operation of trains to remain on duty an excessive number of hours; to require all locomotives to be equipped with automatic operating firebox doors, and all switch and transfer engines, as well as road engines, to be equipped with power headlights; to remove excessive gases and smoke in train operation through tunnels; to maintain equitable compensation for industrial accidents throughout the province where no suitable workmen's compensation laws exist; to provide more equitable payments to widows and dependent children of deceased workmen; to amend the Garnishee Act by providing that the party to be garnisheed must be notified by registered mail before the wages can be held; and to provide for a minimum wage for female employees in all provinces. The Board also declared itself in

favour of old age pensions, mothers' pensions, unemployment insurance, the restriction of the employment in the locomotive service of foreigners who lack a working knowledge of English or French; the establishment of an equitable uniform provident fund for all railway employees; Government ownership of all public utilities, the employment of a practical railway man from the ranks of the railway employees on the Board of Railway Commissioners and on the board of directors of the Canadian National railways.

The following officers were elected for the ensuing year:

Chairman and Canadian Legislative Representative, Wm. L. Best, Ottawa; secretary-treasurer, James Pratt, Toronto; chairman, board of directors, F. W. Hicks, Winnipeg; secretary, J. A. Killingsworth, St. Thomas, Ont.; board of directors, P. E. Island, P. A. Smith, Charlottetown; Nova Scotia, J. W. McLean, Truro; New Brunswick, F. W. Henderson, St. John; Quebec, H. J. Wark, Sherbrooke; Ontario, Wm. G. Graham, Lindsay; Manitoba, F. W. Hicks, Winnipeg; Saskatchewan, G. A. Hall, Moose Jaw; Alberta, Geo. W. Yeats, Field; British Columbia, T. L. Bloomer, Nelson.

#### REPORT OF THE EMPLOYMENT SERVICE OF CANADA FOR THE FOUR WEEKS' PERIOD, NOVEMBER 8—DECEMBER 6, 1919

**R**EPORTS from Employment Offices to the Dominion Headquarters of the Employment Service of Canada, Department of Labour, show a further falling off in the number of placements during the four weeks from November 8 to December 6, the number of placements recorded being 23,981 as compared with 26,354 during the preceding four weeks.

The following table presents in summary form by provinces a record of placements from the beginning of March

to December 6. As has been indicated in previous issues of the LABOUR GAZETTE, regular placements refer only to those applicants for whom employment of more than one week's duration was found, while casual placements refer to those applicants for whom the employment found was likely to be of less than one week's duration. It will be observed that the number of regular placements from the beginning of the record until December 6 was 243,860 or at a rate of 6,096 per week, while the number of casual placements over the same

period was 33,481 or a weekly average of 837 persons. During the period under review the regular placements were distributed as follows:

Week ending November 15...	6,909
Week ending November 22...	5,923
Week ending November 29...	5,770
Week ending December 6....	5,379

applicants at the beginning of the preceding four weeks, while at the same time there were 16,868 vacancies unfilled as compared with 23,537 vacancies unfilled at the beginning of the preceding period. This indicates that while the number of unplaced applicants remained about the same, these applicants were in a less favourable position regarding opportunities for employment than they were at the beginning of the preceding period due to the number of vacancies having decreased materially. During the four weeks 38,381 new applications and re-applications were registered, while during the same period 32,585 vacancies were notified—an excess of applicants over vacancies of 5,796. The corresponding figures for the preceding

four weeks' period were 36,811 and 37,991, or an excess of vacancies over applicants of 1,180, indicating that the demand for labour fell off slightly more than the volume of labour available. The situation as reflected by the returns for the present period is the usual situation at this season of the year. Since the first of June there has been with one or two exceptions an excess of vacancies over applications. With the curtailing of outdoor construction activity has come a slackening in the demand for labour. It is probable that the situation will continue to exist to a greater or lesser degree until the revival of outdoor construction activities in the Spring.

The accompanying chart shows graphically the number of applications and vacancies registered as well as the number

of placements made over the period of the record. The chart indicates a fairly constant number of applicants to have been registered over the period, the number registered being higher than during the preceding four weeks. The number of vacancies referred to the Employment Service, on the other hand, de-

creased to a point where applications exceeded the number of vacancies reported, the number of applicants for work exceeding the number of vacancies reported for each week under review. The number of placements made, as shown by the foregoing summary, decreased during the period.

### EMPLOYMENT CONDITIONS IN CANADA DURING THE PERIOD NOVEMBER 15—DECEMBER 13, AS REPORTED BY EMPLOYERS

**W**EEKLY reports from employers to the Dominion Headquarters of the Employment Service of Canada, Department of Labour, during the four weeks from November 15 to December 13, show that on the whole a decline in the volume of employment was registered, increases being reported during the first two weeks of the period under review followed by noteworthy decreases during the latter two weeks.

During the four weeks reports were received regularly from 4,900 firms, the number reporting for the week ending December 13 being 4,980, which firms had 699,509 persons on payroll.

The following chart shows weekly the percentage increase or decrease in the volume of employment for the full period of the record—March 22 to December 13. As formerly, the chart presents a series of percentages, which percentage records the increases in the volume of employment during that week as compared with the preceding week. As the number of firms reporting changes from week to week no attempt should be made to read the chart as a cumulative total. The chart indicates that while a consid-

erable increase in the volume of employment was registered during the first two weeks of the period, decreases were reported in the weeks December 6 and 13. The changes recorded were:

Week ending November 22nd—an increase of .6 per cent.

Week ending November 29th—an increase of .1 per cent.

Week ending December 6th—a decrease of .2 per cent.

Week ending December 13th—A decrease of .7 per cent.

The decreases registered were substantial ones, offsetting the increases reported for the first half of the period.

The reports indicate that conditions in the different districts varied somewhat during the four weeks. The Maritime Provinces reported a decrease during the full period with the exception of the week ending December 6, when a small increase took place. Quebec showed increases during the first two weeks and decreases during the third and fourth weeks. The declines in these weeks were substantial and much more than offset the increases reported in the first part of the period. British Colum-

bia recorded an increase in the first week only, the decreases in the last two weeks especially being greater than the increase recorded the first week. In Ontario gains were shown in the first three weeks and a loss during the fourth week, the loss, however, being a nominal one. Prairie Provinces registered an increase in the first and last weeks and declines on November 29 and December 6, the losses, however, being offset by the gains shown in the weeks ending November 22 and December 13.

Summarizing the returns by industrial groups, Commercial and Mercantile, Chemicals, Leather and Leather Goods, Metals, Pulp, Paper and Printing, and Textiles registered increases during the full period, while Lumbering, Clay, Glass and Stone Products, Vehicles, Woodworking, Quarrying and Mining and Railway Operation showed

increases during the period as a whole, although declines were registered during individual weeks. In considering all the groups which showed plus tendencies during the period, Commercial and Mercantile made by far the greatest gains, which gains were accounted for by the increases in the number of persons taken on for the holiday season. Vehicles, Metals, Lumbering and Textiles registered substantial gains as well, while the other groups showed less appreciable increases. The groups which recorded declines during the whole period were Building and Construction and Miscellaneous. Of these groups Railway Construction registered very noticeable increases during the last three weeks of the period. Food, Drink and Tobacco, Railway Operation and Building and Construction also showed considerable increases.

**UNEMPLOYMENT IN TRADE UNIONS AT THE CLOSE OF NOVEMBER, 1919**

THE present article on unemployment among the members of local trade unions deals with unemployment as at the end of November, 1919, and is based on returns received from 1,460 labour organizations with a total membership of 193,204. For all occupations represented 3.58 per cent of the members were unemployed as compared with 2.71\* per cent in October, 1919. Unemployment as used in this report has reference to involuntary idleness due to economic causes. Persons occupied in work other than their own trades, or who are idle because of sickness or as the direct result of strikes or lockouts, are not considered as unemployed. That the percentage out of work is larger than in the previous month is due to there having been less employment for workers in all the groups of occupations, particularly in manufacturing and transportation.

Unemployment in the manufacturing and mechanical industries as reported by 389 unions having a combined membership of 58,047 was more prevalent than in the preceding month, 3.16 per cent of the members being idle as compared with 2.27 per cent in October. There was less activity in metals, machinery and conveyances, pulp, paper and fibre, food, tobacco and liquors, woodworking and furniture, leather, boots, shoes and rubbers, and glass bottle blowing. The slackness was particularly noteworthy in the metals trades, which continued to be affected by conditions in the ship-building industries. Workers in the clothing, and printing, publishing and paper goods groups were more fully employed, while the percentage of unemployment among the textile workers re-

mained the same. There was considerable short time reported by workers in metals, machinery, conveyances, and printing, publishing and paper goods.

Reports from 586 organizations of transportation workers having a total membership of 74,764, indicated that 3.87 per cent were unemployed as compared with 2.61 in October. There was more unemployment among steam railway employees (whose returns constitute nearly 70 per cent of the entire group membership reporting) than in the preceding month, due partly to the usual laying off of maintenance of way employees for the winter, and partly to the shortage of coal caused by the strike of miners in the United States. Navigation workers reported their usual seasonal slackness, the summer ports being partly closed and the winter ports not then fully opened. Teamsters and chauffeurs also showed more unemployment, but street and electric railway employees recorded fewer members out of work.

In the mining, quarrying, and refining of ores group, reports were received from 39 unions with an aggregate membership of 11,582, and show that 1.14 per cent were unemployed as compared with .91 per cent in October. Employment for miners and mill and smeltermen was not as active as in October.

The percentage out of work in the building and construction group as reported by 226 organizations having a combined membership of 26,201, was 5.82 as compared with 5.42 in October, 1919. Bricklayers, masons and plasterers, granite and stone cutters, plumbers and steamfitters, tile layers, lathers and roofers, bridge and structural workers and hod carriers and building labourers reported more unemployment than at the end of October. Carpenters and joiners, electrical workers, painters, decorators and paperhangers, and steam shovel and dredgemen, however, were more fully engaged. Conditions in British Columbia, where most of the unem-

---

\*Revised figures.

ployment in this group was reported, continued to reflect the inactivity in shipbuilding. There was some short time reported by bricklayers, masons and plasterers, carpenters and joiners and plumbers and steamfitters.

In the public employment group, as reported by 78 unions having a total membership of 8,377, the percentage out of work was .47 as compared with .06 in October, 1919.

Unemployment in the group of miscellaneous trades as indicated by returns received from 140 unions with 13,992

members was more prevalent than in the preceding month, 3.24 per cent of the members being idle as compared with 2.95 per cent in October. Slight increases in the percentages of unemployment are recorded by barbers, musicians and theatre employees, and stationary engineers and firemen. Retail clerks, hotel and restaurant employees and unclassified workers, however, showed less unemployment. The percentages reported idle in the different groups of occupations are indicated in the following table:

\*Revised figures.

The following table summarizes the returns by provinces. As compared with October, 1919, Quebec, Ontario, Manitoba, Saskatchewan and British Columbia recorded larger percentages of unemployment. In Nova Scotia, New Brunswick and Alberta, however, there was less unemployment reported:

TABLE II

Province	Nov., 1919	Oct., 1919	Sept., 1919	Aug., 1919	July, 1919	June, 1919	May, 1919	April, 1919	Mar., 1919	Feb., 1919	Jan., 1919	Dec., 1918	Sept., 1918	June, 1918	Mar., 1918	Dec., 1917	Sept., 1917	June, 1917	Mar., 1917	Dec., 1916

†Revised figures.

# EMPLOYMENT FOR CIVIC EMPLOYEES IN FIFTEEN CITIES, DECEMBER, 1919

**R**EPORTS from fifteen cities showing the number of workers temporarily engaged and the wages paid these employees during the first two weeks in December, showed decreases of nearly 15 per cent in the number of workers and of slightly over 15 per cent in the wages paid as compared with the preceding month. In December, 7,918 persons were temporarily employed during the two weeks and the pay-rolls amounted to \$316,604.96 as compared with 9,301 employees and an aggregate pay-roll of \$375,101.79 in November. In comparison with the same period in 1918, increases of nearly 21 per cent in the number of workers and of over 30 per cent in the wages paid are indicated, there having been 6,558 employees with a total pay-roll of \$243,352.70 in the first two weeks in December, 1918.

Edmonton reported an increase in the number of employees both as compared with the preceding period and with the same fortnight in 1918. Ottawa, Toronto, Hamilton, London, Winnipeg, Regina, Moose Jaw, Saskatoon, Calgary, Vancouver and Victoria showed decreases as compared with November, 1919, and increases as compared with December, 1918, while St. John, Montreal and Brandon recorded declines in both comparisons.

As to wages, Moose Jaw, Saskatoon and Edmonton showed increases both as compared with November, 1919, and with December, 1918. Ottawa, Toronto, Hamilton, London, Winnipeg, Brandon, Regina, Calgary, Vancouver and Victoria reported declines in comparison with the preceding period and increases in comparison with the same period in 1918, while St. John and Montreal recorded decreases in both cases.

EMPLOYMENT (BOTH CONTRACT AND MUNICIPAL WORK) AFFORDED WORKPEOPLE TEMPORARILY EMPLOYED BY CITY CORPORATIONS, DECEMBER, 1919, COMPARED WITH NOVEMBER, 1919, AND WITH DECEMBER, 1918.

# EMPLOYMENT IN THE BUILDING TRADES DURING NOVEMBER, 1919, AS INDICATED BY BUILDING PERMITS

**E**MPLOYMENT in the building trades as indicated by the value of building permits in 35 cities showed a decrease during November as compared with the preceding month, the total value of building permits falling from \$9,469,567 in October to \$6,936,438 in November, a decrease of \$2,533,129 or 26.8 per cent. New Brunswick and British

Columbia were the only provinces to record considerable increases in this comparison.

As compared with the corresponding month in 1918, there was an increase of 190.6 per cent, the value for November, 1918, being \$2,387,045. In this comparison all the provinces, except Nova Scotia, recorded substantial increases. A substantial increase in employment

ESTIMATED COST OF BUILDING WORK AS INDICATED BY BUILDING PERMITS ISSUED IN THIRTY-FIVE CITIES.

in the building trades during 1919 as compared with 1918 is indicated by the large increase in the value of the building permits issued, the preliminary figures for eleven months in 1919 being \$71,757,564 as against \$35,192,012 in 1918.

Of the large cities, Toronto, Edmonton and Vancouver recorded increases in November, both as compared with

October, 1919, and with November, 1918. Montreal and Winnipeg showed declines in comparison with October of 1919 and increases over November, 1918.

Of the smaller centres, Moncton, St. John, Brantford, Hamilton, Kitchener, Stratford and Regina all showed gains both as compared with October, 1919, and with November, 1918.

## RECENT INDUSTRIAL AGREEMENTS

THE following is a summary of the more important industrial agreements recently received by the Department. While the conclusion of every industrial agreement implies the acceptance, to a greater or less degree, of the principle of collective bargaining, it should not be overlooked that in a number of cases the agreement was reached only after the employees had been on strike. The agreements are arranged by industrial groups.

### Building and Construction

OTTAWA, ONT.—BRICKLAYERS' UNION, No. 7, STONE MASONS' UNION, No. 14, AND THE ASSOCIATION OF CANADIAN BUILDING AND CONSTRUCTION INDUSTRIES. Agreement in effect from May 1, 1919, to April 30, 1920.

Eight hours shall constitute a day's work, 8 a.m. to noon, and 1 p.m. to 5 p.m., five days of the week, and four hours on Saturday, 8 a.m. to noon.

The wages of bricklayers and masons shall be 75 cents per hour, and foremen shall receive not less than 10 cents per hour over the regular rate paid.

Except in cases of emergency, no work shall be done between 5 p.m. and 8 a.m. from May 1, 1919, to April 30, 1920. Work on Sundays and holidays shall be paid for at double time.

TORONTO, ONT.—THE GRANITE CUTTERS' INTERNATIONAL ASSOCIATION, AND VARIOUS EMPLOYERS. Agreement in effect from April 1, 1919, to April 1,

1922, shall include granite cutters, letterers, carvers, sand blast and surface machine operators, lathe and plane operators, sawyers, tool sharpeners and polishers.

Eight hours shall constitute a day's work, 8 a.m. to 5 p.m., five days in the week, and four hours on Saturday, 8 a.m. to noon. One full hour shall be allowed for dinner.

The minimum rate of wages shall be as follows: Per hour—April 1, 1919, to August 1, 1919, 70 cents; August 1, 1919, to April 1, 1920, 75 cents; April 1, 1920, to April 1, 1921, 80 cents; April 1, 1921, to April 1, 1922, 85 cents.

No overtime shall be worked except in case of emergency, such as from the spoiling or breaking of a stone, or delay in quarrying large sizes, or when an accident has happened, and then overtime pay shall apply at the rate of time and one-half, holidays double time.

Surface machines shall be operated with a dust-proof partition, or, if operated without a partition, the machine must be fifty feet away from the cutting shed.

Special agreement for tool sharpeners—Eleven to fourteen men to constitute a tool sharpener's gang; over fourteen to be paid at the rate of: Per day—First year, 35 cents per man; second year, 37½ cents; third year, 40 cents. If a tool sharpener has less than a gang he may have an agreement, but in no case is the rate per man to be less than

55 cents per day for the first year; 57½ cents per day for the second year, and 60 cents per day for the third year, or if cutting part of the time the minimum rate of wages shall be paid.

HAMILTON, ONT. — INTERNATIONAL ASSOCIATION STEAM AND OPERATING ENGINEERS, LOCAL NO. 700, AND THE HAMILTON CITY HOSPITAL BOARD. Agreement in effect from August 1, 1919, to April 1, 1920, and thereafter unless thirty days' notice terminating it is given by one party or the other, provides that eight hours shall constitute a shift. Fourteen days' holidays shall be allowed in each year with pay. The following minimum wage scale shall be paid: Per month—Chief engineer, \$150 with house; Per hour—Assistant chief engineer, 65 cents; shift engineer and relief engineer, 62½ cents.

WELLAND, ONT.—INTERNATIONAL ASSOCIATION OF PLUMBERS AND STEAM-FITTERS, LOCAL NO. 595; AND THE MASTER PLUMBERS. Agreement entered into September 1, 1919, and to remain in force until three months after notice desiring a change is given by either party.

Eight hours shall constitute a day's work, 8 a.m. to noon, and 1 p.m. to 5 p.m., the first five days of the week, and 8 a.m. to noon on Saturday.

The minimum rate of pay for journeymen shall be 75 cents per hour. Overtime at the rate of time and one-half shall be paid for work the first three hours after quitting time, and double time from then till eight in the morning and for any work on holidays.

LONDON, ONT.—INTERNATIONAL BROTHERHOOD OF ELECTRICAL WORKERS, LOCAL NO. 120, AND THE PUBLIC UTILITIES COMMISSION. Agreement made May 1, 1919, amended December 1, 1919, effective till May 1, 1920, provides a new rate of wages as follows: Per hour—Foreman, 70 cents; class A men, 64 cents; class B men, 57 cents; class C men, 52 cents.

FORT WILLIAM, ONT.—UNITED BROTHERHOOD OF CARPENTERS AND JOINERS, LOCAL NO. 2610, AND THE TWIN CITIES

DISTRICT COUNCIL OF CARPENTERS AND JOINERS. Agreement in effect from August 15, 1919, to May 31, 1920.

Eight hours shall constitute a day's work, 8 a.m. to noon, and 1 p.m. to 5 p.m., for five days of the week, and four hours on Saturday, 8 a.m. till noon. Overtime at the rate of time and one-half shall be paid for work after quitting time and double time on Sundays and holidays. No member shall be allowed to work overtime while other members are out of work.

Wages shall be 75 cents per hour.

VANCOUVER, B.C.—PILE DRIVERS' AND WOODEN BRIDGEMEN'S, DERRICKMEN'S AND RIGGERS' UNION, LOCAL NO. 156, AND VARIOUS EMPLOYERS. Agreement in effect for 1919 provides that eight hours shall constitute a day's work, from 8 a.m. to 5 p.m. Overtime at the rate of time and one-half shall be paid for work from 5 p.m. to midnight and double time after midnight and on holidays.

Two or more shifts may be employed at regular scale, but seven and one-half hours shall constitute a day's work, and no shift shall receive less than eight hours' pay. The hours of the shifts may be arranged between the employer and the steward on the job. If the second and third shift work less than seven and a half hours, then double time shall be paid for the time worked. Double time shall be paid for any one working in more than one shift. When more than one shift is employed they will be allowed to work four hours each on Saturday.

Any member who is ordered to report for work and is not to work shall be paid at least two hours' time. Men shipping on jobs must have transportation paid both ways, including meals and berth, provided they work two weeks. Men quitting job in less than two weeks shall forfeit transportation. Men shipping on jobs of less than one week's duration shall have travelling time both ways; eight hours in each twenty-four hours.

Wage scale: Per hour—Pile driving,

foremen, \$1.12½; boom men, 93¾ cents; firemen and crew, 87½ cents; wooden bridgemen, foremen, \$1.12½; framers and erectors, 87½ cents; derrickmen, foremen, \$1.06¼; crew, 81¼ cents; riggers, foremen, \$1.06¼; on work over 50 feet high, \$1.18¾; crew, 81¼ cents; on work over 50 feet high, 93¾ cents.

**Domestic and Personal (including Amusements).**

TORONTO, ONT.—THE MOVING PICTURE OPERATORS' UNION AND LOCAL EMPLOYERS. Agreement entered into August 25, 1919, to remain in effect until notice given in writing by either party that change is desired.

Theatres giving afternoon and evening performances shall recognize as their regular hours: 2 p.m. to 5 p.m. and 7 p.m. to 11 p.m. Eleven hours shall be recognized as the minimum working time charge per day for theatres running a continuous performance, 9.30 a.m. to 11 p.m. Operators employed in theatres giving afternoon and evening performances will be allowed two hours for supper.

The wage scale shall be 90 cents per hour for all regular working hours, for relief during supper hours, for operators of spot lamps or electrical effects other than in the booth, and for extra matinees. Changing films shall be charged for at the rate of \$1 per change. Screening pictures, taking down or putting up posters, etc., if done during any other time than contained in the regular hours, shall be classed as overtime and shall be paid for at the rate of time and one-half, payable in half-hour periods.

**Food, Liquors and Tobacco.**

LONDON, ONT.—THE BAKERS' UNION, LOCAL NO. 270, AND THE BREAD MANUFACTURERS. Agreement entered into July 26, 1919, and to continue in force for one year and thereafter from year to year unless thirty days' notice of a desired change be given by either party.

Fifty hours or less shall constitute a week's work of six days. All time worked over fifty hours shall be considered overtime and shall be paid as follows: For all time worked up to fifty-four hours, regular hourly rate, for time over fifty-four hours, time and one-half.

Day work shall not commence before 5 a.m. nor later than 9 a.m.

Wage scale: Per week—Shops employing four men or over: foremen, day work, \$28, night work, \$30; oven men and dough mixers, day work, \$26, night work, \$28; bench hands, day work, \$24, night work, \$26; other help, day work, \$22, night work, \$24. Shops employing three men or less, foremen, day work, \$25, night work, \$27; other help, day work, \$23, night work, \$24. Shippers, per week—head shipper, day work, \$22, night work, \$24; other help, day work, \$20, night work, \$22.

**Printing and Publishing**

OTTAWA, ONT.—INTERNATIONAL PRINTING PRESSMEN AND ASSISTANTS' UNION, No. 5, AND THE EMPLOYING PRINTERS OF OTTAWA. Agreement which expired June 30, 1919, revised and in force till May 31, 1921.

The hours of work remain the same as in the previous agreement, forty-eight hours per week, between the hours of 7 a.m. and 6 p.m. each day, except Saturday when work shall cease at 12 o'clock noon. Overtime at the rate of time and one-half shall be paid for work done during the first three hours after quitting time, after three hours and on Sundays and holidays, double time.

The scale of wages for night staffs shall be paid for at the rate of 20 per cent over the day rate, and forty-five hours shall constitute a week's work. Overtime for night staff shall be time and one-third of day rate for the first three hours after completing nine hours, after these hours double day rate.

Scale of wages: Per week—Cylinder pressmen, pressmen on one cylinder and two platens, \$32; pressmen on two ponies

or four platens, \$28; pressmen on one platen, \$17, on two platens, \$19.75, on three platens, \$22.50; cylinder feeders, \$22; pony feeders, \$16; platen feeders, first six months, \$5, second six months, \$6, third six months, \$7, fourth six months, \$9, fifth six months, \$11.

THOROLD, ONT.—INTERNATIONAL BROTHERHOOD OF PAPERMAKERS AND THE ONTARIO PAPER COMPANY, LTD. Agreement dates from May 11, 1919, to May 11, 1920, to remain in force for another year if 30 days' notice of desired change not given.

Operation of paper mill shall be six days per week from 7 a.m. Monday to 7 a.m. Sunday, and no employee shall be required or permitted to work on paper machines between 7 a.m. Sunday and 7 a.m. Monday except for washing screens, oiling dryer bones and for repair work as done by mechanics.

The schedule for hours for tour workers and hours on which tours shall change shall be Monday at 7 a.m. to 4 p.m., 4 p.m. to midnight, midnight to 8 a.m. Tuesday, Wednesday, Thursday and Friday, at 8 a.m. to 4 p.m., 4 p.m. to midnight, midnight to 8 a.m. Saturday at 8 a.m. to 4 p.m., 4 p.m. to midnight, midnight to 7 a.m. Any tour workers required to work between 7 a.m. Sunday and 7 a.m. Monday shall be paid at the rate of time and one-half.

Dominion Day (32 hours), Labour Day (24 hours), and Christmas Day (40 hours) shall be holidays, with a fourth day to be determined by the company. Any work done on these days shall be paid for at the rate of time and one-half.

Boss machine tenders of paper mill shall work 8 hours per day and receive a minimum wage of \$1.40 per hour, and shall alternate tours each week.

Rates of pay: Per hour—Machine tenders, No. 1 and No. 2 paper machines, \$1.10, No. 3 and No. 4 paper machines, 99 cents, back tenders, No. 1 and No. 2 paper machines, 99 cents, No. 3 and No. 4 paper machines, 81 cents; spare hand, 78 cents; 3rd hands, No. 1

and No. 2 paper machines, 68 cents, No. 3 and No. 4 paper machines, 61 cents, 4th hand, Nos. 1, 2, 3 and 4 paper machines, 54 cents, 5th hand, Nos. 1, 2, 3 and 4 paper machines, 51 cents; oilers, 47 cents; cleaners, 44 cents; wrapper machine tender, 60 cents, helper, 51 cents; beater or mixer room, head beater man, 75 cents; Supercalender, operator, 65 cents, helper, 46 cents; winderman, 58 cents, helper, 46 cents.

LONDON, ONT.—INTERNATIONAL TYPOGRAPHICAL UNION, No. 133, AND VARIOUS EMPLOYEES. Agreement entered into June 7, 1919.

A week's work shall consist of five days of eight consecutive hours each (exclusive of lunch period) between 7 a.m. and 6 p.m., and one day of four hours with work begun not later than 8.30 a.m., or six nights of seven consecutive hours (exclusive of lunch), 7 p.m. to 6 a.m. On legal holidays four hours shall constitute a night's work, time of starting not earlier than 11 p.m., except when said holiday falls on Thursday or Friday, when seven hours shall be worked.

Regular overtime shall be paid for at the rate of time and one-half. No employee shall be allowed to work more than three hours' overtime in any one day or night, but any employee called back to work overtime shall be paid for five hours' work at full overtime rate. Work done on Sundays and holidays shall be paid for at double time.

Scale of wages: Newspapers, Per week—Foremen, machinists, operators, bankmen, headingmen, admen, makeupmen, proofreaders, assistant proofreaders, day work, not less than \$30, night work, not less than \$32. Job printing establishments: Per week—Foremen, machinists, machinist-operators, castermen, operators, book and job printers (hand), proofreaders, assistant proofreaders, day work, not less than \$30, night work, not less than \$32.

Apprentices. Wage scale: Per week—First year, \$7; second year, \$8.50; third year, first six months, \$10, second six months, \$12.50; fourth year, first six

months, \$14, second six months, \$17.50; fifth year, \$20.

PORT ARTHUR, ONT.—INTERNATIONAL TYPOGRAPHICAL UNION, No. 575, AND VARIOUS EMPLOYERS. Agreement in effect from November 1, 1919, to November 1, 1920.

Forty-eight hours shall constitute a week's work, for day work, eight hours per day between 6 a.m. and 6 p.m., and forty-two hours a week's work, for night work, seven hours per night between 6 p.m. and 6 a.m. All work over these hours shall be paid for at the rate of time and one-half for the first three hours, after that double time until relieved. Work done on Sundays and holidays shall be paid for at time and one-half, except Labour Day, which shall be paid at double rate.

Scale of wages: Per week—Admen, stone and job men, linotype and monoline operators, day work, not less than \$35, night work, not less than \$38; apprentices, first two years, at the option of the office; third year, \$15; fourth year, \$20; fifth year, \$25.

FORT FRANCIS, ONT.—THE INTERNATIONAL BROTHERHOOD OF PAPERMAKERS AND THE INTERNATIONAL BROTHERHOOD OF PULP, SULPHITE AND PAPER MILL WORKERS AND THE MINNESOTA AND ONTARIO PAPER COMPANY. Agreement in effect from May 23, 1919, to May 1, 1920.

Hours of employment for day workers shall be eight hours per day, six days per week, and work done in excess of this shall be paid for at the rate of time and one-half; no employee shall receive less than four hours' pay at overtime rate.

Schedule of hours for tour workers and hours when tours shall change shall be 8 a.m. to 4 p.m., 4 p.m. to midnight, midnight to 8 a.m. Tour workers required to work between 8 a.m. Sunday and 8 a.m. Monday, or overtime at any other than tour work, shall be paid at time and one-half rate. Operation of ground wood and sulphite mill shall be six days per week and six and one-half

days per week when pulp is needed or when it is necessary to save water from being wasted.

Scale of wages: Per hour—Wood Room—Foremen, 53 cents; oilers, 45 cents; pulp unloaders, 44 cents; sawyers, 45 cents, helpers, 44 cents; American drum barker, cleaner, conveyor men, 44 cents. Ground Wood Room—Head grindersmen, 55 cents; grindersmen, 48 cents; block handlers, 47 cents; ground wood screens, 48 cents; oilers, 46 cents. Boiler Room—Head firemen, 57 cents; firemen, 50 cents; hog fuel, 45 cents; steam engineers, 58 cents. Beater and Mixing Room—Broke beaters, 46 cents. Finishing and Loading Room—Head finisher, paid monthly rate; checker, 48 cents; roll finishers, loaders, 48 cents; new men, 45 cents. Yard Crew—Foreman, paid monthly rate; common labourers, 44 cents. Mechanics, 60 cents with advance over existing rates as follows: men receiving 50 to 59 cents, 5 cents; men receiving 60 to 69 cents, 4 cents; men receiving 70 cents and over, 3 cents; core men, 47 cents.

EDMONTON, ALTA. — INTERNATIONAL TYPOGRAPHICAL UNION, No. 604, AND THE CAXTON CLUB. Agreement in effect from November 15, 1919, to October 31, 1920.

Eight hours shall constitute a day's work between 7 a.m. and 5 p.m., six days a week, and seven and one-half hours a night's work between 7 p.m. and 5 p.m., six nights a week.

Wage scale: Day work: Per hour—Book and job printers, stonemen, make-ups, proofreaders, journeymen engaged in hand composition and distribution, operators of typesetting machines, November 15, 1919, to April 30, 1920, 82 cents; May 1, 1920 to October 31, 1920, 86 cents; machinist operators and castermen, foremen, November 15, 1919, to April 30, 1920, 86½ cents; May 1, 1920, to October 31, 1920, 90½ cents; machine tenders, November 15, 1919, to April 30, 1920, 82 cents; May 1, 1920, to October 31, 1920, 86 cents; night work, \$2 per week in excess of day scale of prices; split shift, night scale of prices; apprentices, day work, first six

months, \$10; second six months, \$11.50; third six months, \$13; fourth six months, \$14.50; fifth six months, \$16; sixth six months, \$17.50; seventh six months, one-half journeyman's scale; eighth six months, two-thirds journeyman's scale; night work, \$2 per week in excess of day scale.

### Textiles, Cloths and Cottons

TORONTO, ONT.—THE AMALGAMATED CLOTHING WORKERS OF AMERICA AND THE ASSOCIATED CLOTHING MANUFACTURERS. Agreement in effect from August 21, 1919, to June 1, 1920, and thereafter unless 30 days' notice given by either party desiring a change.

Forty-four hours shall constitute a week's work in the shops of the members of the associated clothing manufacturers with the exception of the House of Hobberlin, where forty hours shall constitute a week's work.

Overtime shall be dispensed with as far as possible, but when necessary shall be paid for at the rate of time and one-half. Double time shall be paid for work done on holidays.

When new workers are employed, two weeks shall be considered a probationary period if the new workers are regularly employed in the trade. In case of apprentices or workers taken from other trades, the probationary period shall be four weeks. A manufacturer shall have the right to take into his employ as many returned soldiers as his business can absorb, and shall have the privilege of developing workers through the apprenticeship system on a basis to be determined by the representatives of the manufacturers and the union.

### Vehicles for Land and Water Transportation

MONTREAL, QUE. — THE MARINE TRADES AND LABOUR FEDERATION AND THE AMALGAMATED SOCIETY OF ENGINEERS AND THE CANADIAN VICKERS, LIMITED. Agreement in effect from July 14, 1919, to April 1, 1920.

Forty-seven hours shall constitute a week's work on day shift, to be worked

as follows: eight and a half hours per day for the first five days of the week to be worked between the hours of 7.30 a.m. and noon, and 1 p.m. to 5 p.m., and four and a half hours on Saturday from 7.30 to noon. Time and a half shall be paid for all overtime on new work and plant repairs, and double time for repair work on ships and work on Sundays and holidays. Night shift shall be worked from 7.30 p.m. till midnight, and 1 a.m. to 6 a.m., and shall be paid at the rate of time and one-quarter, Monday till Friday. For all time worked outside of these nights overtime rates shall apply.

When employees on the day or night shift are required to change from one to the other, and are required to work two shifts or parts of two shifts in any twenty-four hours, the second shift shall be paid for at overtime rates. When employees are called out to work after the close of the regular work day they shall be paid not less than five hours unless they be notified to return to work before leaving the premises. In such cases their time shall start not later than one hour after the close of the regular work day.

Men sent to outside points shall receive first-class transportation while travelling, not less than \$2 per day for board, wages while travelling, and an allowance for expenses while working or waiting.

Leading hands and charge hands shall receive not less than 10 per cent over the men whom they have in charge.

Apprentices shall serve four years' apprenticeship, and on its completion shall receive 20 per cent less than the mechanics' rate for three months, 10 per cent less for the next three months, and then full pay.

Helpers will work under the direction of mechanics and when required to prepare for furnaces before the regular starting time, they will be paid not less than thirty minutes extra per day.

The rates shall be as follows: Per hour — Welders, machinists, plumbers, steam-

fitters, blacksmiths, pipe fitters, copper-smiths, sheet metal workers, 75 cents; carpenters, joiners, electricians, 70 cents; locomotive crane drivers, 65 cents; pneumatic drillers, painters, ship riggers, 60 cents; machine drillers, 57 cents; motor attendants, overhead crane drivers, air compressor attendants, gas producer men, 55 cents; dock firemen, light men, jib crane drivers, 52½ cents; red leaders, 52 cents; locomotive crane drivers' helpers, 47½ cents; yard labourers, 45 cents.

#### Railway Operation

VANCOUVER, B.C.—THE AMALGAMATED ASSOCIATION OF STREET AND ELECTRIC RAILWAY EMPLOYEES AND THE BRITISH COLUMBIA ELECTRIC RAILWAY COMPANY, LTD. Agreement effected through the medium of an arbitration board, the report of which was published on page 1394 of the December issue of the LABOUR GAZETTE.

#### Shipping and 'Longshore Work

ST. JOHN, N.B.—THE INTERNATIONAL 'LONGSHOREMEN'S ASSOCIATION, LOCAL No. 1039, AND VARIOUS STEAMSHIP COMPANIES TRADING INTO THE PORT OF ST. JOHN. Agreement in effect from December 1, 1919, to November 30, 1920, and from year to year unless 30 days' notice given by either party prior to the expiration of any one year.

Nine hours shall constitute a day's or night's work. For day work the working hours shall be 7 a.m. to noon and 1 p.m. to 5 p.m., at the rate of 60 cents per hour. For night work the working hours shall be 7 p.m. to midnight and 1 a.m. to 5 a.m., at the rate of 90 cents per hour.

Double time shall be paid for day work on Sundays and holidays, and double time and one-half for night work on the same days. When required to work at repairing oil or water tanks on board vessels which have no hatch and must be entered by way of a manhole, double time shall be paid. If men are required to work during dinner hour,

from noon till 1 p.m., they shall receive double time for that hour and until relieved.

ST. JOHN, N.B.—THE INTERNATIONAL 'LONGSHOREMEN'S ASSOCIATION, COAL HANDLERS' UNION, LOCAL No. 810, AND VARIOUS STEAMSHIP COMPANIES. Agreement in effect from December 1, 1919, and thereafter unless notice given thirty days prior to the first of December of any subsequent year.

The day shift will work from 7 a.m. to 5 p.m., meal hour from noon to 1 p.m., and the night shift from 7 p.m. to 5 a.m., meal hour from midnight to 1 a.m. When men start to work for the night shift they shall receive three hours' pay if the work ceases at or before 10 p.m. If the work continues after 10 p.m. they shall be paid for the half night. If work commences at 1 a.m. or after that time and ceases before 5 a.m., full time shall be paid from 1 a.m. until 5 a.m. except when work is discontinued through stress of weather. All work performed during the hours between noon and 1 p.m., 5 p.m. and 7 p.m., midnight and 1 a.m., 5 a.m. and 7 a.m., shall be paid for at double time. Work done on Sundays and holidays shall be paid for at double time. Waiting time shall be paid for at full rate for the first hour, and half rate for succeeding hours. All work performed under steam shall call for six men or more.

The rate of pay shall be 80 cents per hour for day and night work.

PORT ARTHUR, ONT.—THE EMPLOYEES OF THE COAL DOCK AND THE CANADIAN NATIONAL RAILWAYS. Agreement in effect from June 26, 1919, to June 26, 1920.

Eight hours shall constitute a day's work. Men working less than a day shall be paid a minimum of five hours. Time and a half will be allowed for overtime over eight hours and double time Sundays and holidays.

Rates of pay: Per hour—Engineers and locomotive cranemen, 66¼ cents; hoisters, first year, 63¾ cents, over one year, 66¼ cents; cable splicers, 61¼ cents; repair men, 52¼ to 61¼ cents;

foremen, H. C. Shed Nos. 1, 2 and 3, 60 cents, foreman (gang), 58 $\frac{3}{4}$  cents; car-loader operator, 57 $\frac{1}{2}$  cents; engineers' helpers and firemen, 56 $\frac{1}{4}$  cents; scraper operators, 55 cents; cableroad men, 53 $\frac{3}{4}$  cents; labourers, day watchmen, 50 cents.

VANCOUVER, B.C. — THE SAILORS' UNION OF THE B. C. COAST AND THE B. C. COAST STEAMSHIP CO. OF THE C. P. R. AND THE COASTWISE STEAMSHIP AND BARGE COMPANY, LTD. Agreement in effect from November 1, 1919, to October 31, 1920.

Eight hours shall constitute a day's work in home port; ten hours while vessel is on her route, or 48 hours per week, excepting work necessary for the safety of the ship, or mooring and un-mooring ship. All overtime shall be paid at the rate of 60 cents per hour.

Members of the crews working on watch and watch basis will be paid overtime when called out on their watch below.

Wage scale: Per month—Winchmen, quartermasters, night watchmen, \$85; look-outs, quarterdeck men, stevedores, \$80; deckhands, \$75.

#### Miscellaneous Occupations

QUEBEC, QUE.—AGREEMENT GOVERNING THE TELEGRAPHERS OF THE MONTMORENCY DIVISION OF THE QUEBEC RAILWAY, LIGHT AND POWER COMPANY, in effect from February 1, 1919, to October 1, 1920, and from year to year unless ninety days' notice given by either party desiring a change.

Eight consecutive hours, exclusive of the meal hour, shall constitute a day's work, except that where two or more shifts are worked, eight consecutive hours with no allowance for meals shall constitute a day's work.

Overtime shall be paid for at the rate of time and one-half. Even hours shall be paid at the end of each pay period, fractions thereof will be carried forward. When notified or called to work outside of established hours, telegraphers will be paid a minimum of two hours

at overtime rate. Telegraphers will not be required to suspend work during regular hours to absorb overtime. At offices where only one telegrapher is employed, sixty consecutive minutes will be allowed for a meal between 11.30 a.m. and 1.30 p.m., or he shall receive in lieu thereof one hour at overtime rate.

The agent or assistant agent and yard master at Quebec, when necessary, will work ten hours without being paid overtime. When required to work on Sunday they will be paid extra *pro rata*. Work over ten hours shall be paid for at an overtime rate, computed on schedule rate, eight hours per day, twenty-six days per month.

If telegraphers are required to attend switch, semaphore or yard limit lamps, they will receive two dollars per month for two or less such lamps, and sixty-five cents per month for each additional lamp.

Wage scale: Per month—Quebec agent, \$155; assistant agent and yard master, \$125; Per hour—Chief train-despatcher, 86 cents; train-despatcher, 81 cents; relieving train-despatcher, 73 $\frac{3}{4}$  cents; Beauport Jet. agent and operator, 53 cents, assistant, 48 cents; St. Gregoire agent and operator, 48 cents; Montmorency Falls agent and operator, 53 cents, assistant, 48 cents; L'Ange Gardien agent and operator, 48 cents; Chateau Richer agent and operator, 48 cents; Ste. Anne Church agent and operator, 49 $\frac{1}{2}$  cents; Ste. Anne Station agent and operator, 53 cents, assistant, 48 cents; Beaupré agent and operator, 48 cents; St. Joachim agent and operator, 56 $\frac{1}{2}$  cents, assistant, 48 cents.

EDMONTON, ALTA. — THE AMALGAMATED ASSOCIATION OF STREET AND ELECTRICAL EMPLOYEES, LOCAL DIVISION No. 569, AND THE ALLIANCE POWER COMPANY. Agreement accepted by resolution of the city council November 24, 1919, as a result of the findings of a conciliation board, the report of which was published on pages 1277-80 of the November issue of the LABOUR GAZETTE.

## TEMPORARY WAGE AGREEMENT BETWEEN THE UNITED MINE WORKERS OF AMERICA, DISTRICT 18, AND THE WESTERN COAL OPERATORS' ASSOCIATION

**E**ARLY in December last conferences were held in Calgary between international representatives of the United Mine Workers of America, sent from the headquarters of the organization at Indianapolis to look after the interests of District 18, and the coal operators within that region. The miners were seeking a new wage agreement to replace the two-year agreement which expired last April, with a new wage scale to conform to the fourteen per cent wage increase recently granted to coal miners in the United States. Special interest was attached to these conferences, owing to the fact that the One Big Union was advancing its claims for recognition by the operators, with a view also to negotiating an agreement on behalf of the miners of the district. The representatives of the United Mine Workers of America advanced the proposition that all the mines throughout the district should adopt the "closed shop" principle, on the understanding that if this were done the organization would then do all in its power to discourage the organization campaign that was then being carried on by the officials of the One Big Union.

There was evidences of considerable unrest in the district, and on December 16, the Hon. G. D. Robertson, Minister of Labour, arrived in Calgary to inquire into the causes of the unrest among the miners, and the possibility of a strike resulting. Following the arrival of the Minister, further conferences were held between the operators and the representatives of the United Mine Workers, at which the Minister and Mr. W. H. Armstrong, Director of Coal Operations in the district, were present. On December 18, a settlement was reached in connection with the proposed wage increase. The fourteen per cent increase sought by the miners was agreed to by the operators, and embodied in an order

issued by the Director of Coal Operations. The agreement further provides that only members of the United Mine Workers of America may be employed in the mines of District 18. With respect to this provision the Minister of Labour, in reply to a letter from the president of the One Big Union, stated that in view of the probability of increasing agitation and unrest in the near future in the Alberta mining industry, and consequent hardship and suffering that would be inflicted on the public of the three western provinces who were almost entirely dependent upon Alberta for their coal supplies, it was deemed necessary to take this unusual step to meet the situation before any interruption of output should occur. With respect to the exclusion of members of the One Big Union from participation in the agreement, the Minister stated that it was obviously impossible to recognize two organizations as having jurisdiction to negotiate wage agreements for the same workers; and that the United Mine Workers of America, in contrast to the One Big Union, had a well established reputation for respecting and fulfilling its agreements.

The text of the temporary agreement made between the Western Coal Operators' Association and the United Mine Workers of America, and approved by the Director of Coal Operations for Alberta and eastern British Columbia in Order No. 141, is as follows:

December 18th, 1919.

Subject to the approval of the Director of Coal Operations, by order, we, the undersigned, agree to the following temporary agreement entered into between the Western Coal Operators' Association of Canada and the United Mine Workers of America, through their representatives,

(1) It is hereby agreed that, commencing December 1st, all members of the United Mine Workers of America or those who hereafter

become members of that organization and who are employed in or around the mines by members of the Western Coal Operators' Association shall be paid an increase of fourteen per cent, same to apply on prices and bonuses now paid to all classes of labour in such mines. This increase to temporarily remain in effect pending the investigation and negotiations which are now being conducted relative to mining conditions and wages in the competitive field of the United States.

(2) It is agreed that when negotiations are concluded in the competitive fields of the United States, that representatives of the Western Coal Operators' Association and the United Mine Workers of America shall be selected by each organization to meet in Calgary to formulate and negotiate an agreement to govern for a period of time which may be agreed upon by the representatives of the two associations and sanctioned by the Director of Coal Operations. The results of the investigation and negotiations in the United States to be taken into consideration in reaching a basis of agreement.

(3) It is further agreed this contract is made and entered into for the sole use of the members of the United Mine Workers of America and the members of the Western Coal Operators' Association of Canada. All men who work in and around the mines who are eligible to become members of the United Mine Workers of America must join that organization and agree to sign check-off for all dues, assessments and fines, and the management of the mines agree to forward deductions made to the Acting Secretary of the District or such other persons as that official may designate.

NOTE.—The foregoing clause to become effective whenever the officials of the United Mine Workers of America appear on the ground in

each locality and co-operate with the operators in arranging details.

(4) It is agreed that no man will be employed or be permitted to remain in the employ of the Company unless he agrees to comply with the foregoing conditions.

(5) Retroactive pay due miners under this agreement for the first period in December is to be paid in two equal instalments on the two pay-days in January.

(6) Nothing in this agreement shall prevent either side from taking up any matter for readjustment that may seem to them unjust when the conference referred to in Clause No. 2 convenes.

Signed on behalf of the Western Coal Operators' Association:

N. C. PITCHER,  
Vice-President.

W. F. MCNEILL,  
Secretary-Treasurer.

Signed on behalf of the United Mine Workers of America, District No. 18:

SAM. BALLANTYNE.  
WM. DALRYMPLE.  
R. LIVETT.

NOTE.—The representatives of the United Mine Workers of America urge that a clause be inserted providing for the acceptance of the United States settlement as a basis of negotiation in a new agreement. An agreement on this point being found impossible, this question is referred to the Coal Director for a decision when the new agreement comes up for consideration.

## FURTHER REGULATIONS AFFECTING WESTERN COAL MINES

SEVEN new orders have been received from the Director of Coal Operations for Alberta and Eastern British Columbia.\* Order No. 132 relates to the rates of wages in machine mining at the Monarch Mine of the North American Collieries. Order No. 133 has reference to the application of the cost of living bonus of 92 cents a day. Order No. 134 deals with a wage dispute affecting men at a power plant of the West Canadian Collieries, Ltd. Order No. 137 has reference to a wage dispute affecting tippie engineers of the

International Coal and Coke Company. Orders Nos. 139 and 141 relate to a general increase in wages in District 18. Order No. 140 regulates the prices of coal consequent upon the increase in wages.

ORDER No. 132.—The following wages and conditions affecting machine mining were declared to be in force at the Monarch Mine of the North American Collieries, Ltd., at Drumheller, Alberta:

Loaders.—The machine mining rates as at present according to Order No. 90 shall apply.

Machine men.—Per ton: Undercutting, entries, and entry cross-cuts ten feet wide or less, 40 cents; rooms and

\*For details of previous orders see LABOUR GAZETTE, November, 1919, p' 1,342, and various preceding issues.

pillars, 27 cents; fifteen foot room necks not over ten feet wide, the first fifteen feet from the entry to be paid entry price, the balance room price; room cross cuts not over ten feet wide, 27 cents; places not over ten feet wide driven to develop coal, 40 cents; places over ten feet wide driven to develop coal, 27 cents. In wet places, as defined in the Tentative Agreement, machine men shall be paid extra at the rate of 80 cents per 8 hours. Where the coal thins out so that there is less than forty-eight inches of coal in the place, the machine man shall be paid  $2\frac{1}{2}$  cents per ton extra for each inch that the coal is less than forty-eight inches. The minimum height of entries shall be five feet by eight inches from the bottom of the cut to the roof.

Scrapers.—Per ton: Scraping entries and entry cross cuts, ten feet wide or less, 30 cents; rooms and pillars, 20 cents, but the first 15 feet from the entry of room necks not over ten feet wide are to be paid entry price; room cross cuts, not over ten feet wide,  $25\frac{1}{2}$  cents; room cross cuts over ten feet wide, 20 cents; places not over ten feet wide driven to develop coal, 30 cents; places over ten feet wide driven to develop coal, 20 cents. While cutting in wet places the scraper shall be paid extra at the rate of 80 cents per 8 hours. Where the coal thins out so that there is less than 48 inches of coal in the place, the scraper shall be paid  $2\frac{1}{2}$  cents per ton extra for each inch that the coal is less than 48 inches. The minimum height of entries shall be five feet by eight inches from the bottom of the cut to the roof. These terms are based upon the screened coal basis with the present screening facilities.

ORDER No. 133.—Upon the request of the Commissioner of the Western Coal Operators' Association, asking for an interpretation of the application of the cost of living bonus of 92 cents per day, Order No. 50 was amended by a provision that where the outside employees worked nine hours prior to the issuance of Order No. 124, the cost of living bo-

nus should apply to eight hours' work, and that shorter time and overtime should be paid in proportion.

ORDER No. 134.—A dispute arose at the Mines of the West Canadian Collieries, at Blairmore, Alta., with regard to the rate of wages paid to employees engaged in firing the boilers at the power plant in No. 3 tunnel. These men claimed that they should be paid engineers' rates as they had obtained certificates under the Boilers Inspection Act of Alberta. It was declared by the Director that this Act required all employees firing boilers to have a certificate within a specified time, and that as the duties being performed were those of firemen, the rates specified for that class of work in the Tentative Agreement should apply.

ORDER No. 137.—A dispute arose at the Mines of the International Coal and Coke Company, at Coleman, Alta., regarding the rates of wages paid to tipple engineers. The men claimed that the nine-hour rates in the agreement should apply for eight hours' work. It was declared by the Director that Order No. 124 distinctly set out in the first clause that "the present rates as outlined in the agreement for an eight-hour work day shall remain as at present." This was interpreted by him to mean that where the Tentative Agreement specified an eight-hour rate, that rate should continue in force for the particular classifications to which it referred, until the agreement expired.

ORDER No. 139.—An application was made by the international representatives of the United Mine Workers of America for an increase in wages to their members in District 18, in accordance with recent advances made to coal miners in the United States. It was therefore ordered on December 1, that all miners of this organization employed in or about the mines of District 18 should be paid an advance of 14 per cent of their gross earnings, which include the increased cost of living bonuses. This increase should remain in effect pending

the negotiations being conducted relative to mining conditions and wages in the United States. In the event of these negotiations not being concluded within four months, the cost of living commission, as provided in Order No. 1 should be re-established, upon application.

ORDER No. 140.—Owing to the increase in wages granted by Order No. 139, the following advances in the selling prices of coal, f.o.b. the mines of the Province of Alberta and Southeastern British Columbia were authorized: Bituminous coal—Mines east and west of Crow's Nest Pass, and west of Edmonton, Brazeau and Canmore, were authorized to increase the price of their product by thirty-four cents per ton. Lignite coal—In the Drumheller area an increase of forty cents per ton was

authorized, and in the Lethbridge area an increase of fifty-two cents per ton. An increase of eighty-eight cents per ton was authorized in the price of anthracite coal, and an increase of forty-seven cents per ton in the price of coke.

ORDER No. 141.—This order ratifies an agreement entered into between the Western Coal Operators' Association and the United Mine Workers of America, in conformity with Order No. 139 referred to above. It provides for an increase in wages for members of the United Mine Workers of America and requires that all eligible men working in and around the mine operated by members of the Association must join the United Mine Workers' organization. The agreement is given in full on pages 72-73 of this issue.

#### FAIR WAGE CONTRACTS, DECEMBER, 1919

**D**URING December the Department of Labour received for insertion in the LABOUR GAZETTE the following information relative to 22 fair wage contracts, 5 of which were awarded by the Department of Public Works, and 17 by the Department of Railways and Canals. All but two of these contracts contained the usual fair wage clause which provides for the prompt payment of such wages as are current in the district in which the work is to be performed, and for observance on the various works under contract of the prevailing hours of labour, and which otherwise prevents abuses and secures the legitimate rights of the labour employed. The other two contracts contained fair wage schedules.

A statement was also received as to supplies ordered by the Post Office Department, subject to the Regulations for the Suppression of the Sweating System, the securing of fair wages, etc.

#### DEPARTMENT OF PUBLIC WORKS.

Repairs to breakwater, Petit Rocher, N.B. Name of contractor, Thos. P. Charleson, Ottawa, Ont. Date of contract, December 2, 1919. Amount of contract; schedule of prices.

Alterations and additions to Post Office, Brandon, Man. Name of contractor, Frank C. Lissaman, Brandon, Man. Date of contract, December 3, 1919. Amount of contract, \$5,781.75.

Construction of bridge abutments on River St. Louis, St. Louis de Gonzague, Que. Name of contractor, Onésime Poliquin, Portneuf, Que. Date of contract, December 9, 1919. Amount of contract, \$1,900.

Repairs to wharf, St. Jean D'Orléans, Que. Name of contractors, E. Méthot & J. E. Thibault, Montmagny, Que. Date of contract, November 26, 1919. Amount of contract: schedule of prices.

Re-urging motors.....	9.50
Repairing scales.....	19.20
Making up and supplying letter carriers' uniforms....	30,404.02
New mail bags supplied.....	533.89
Mail bagging.....	156,260.39
Letter box locks and keys.....	1,570.00
Mail clerks' boxes repaired.....	49.85

**PRICES RETAIL AND WHOLESALE IN CANADA, DECEMBER, 1919**

**T**HE chief features of the prices movement during the month were considerable increases in eggs, butter and potatoes and a general upward movement in materials which was very pronounced in lumber and in iron. Raw furs also advanced steeply.

In retail prices, the average cost of a family budget of staple foods in some sixty cities was \$14.70 as compared with \$14.27 in November, \$13.65 in December, 1918, and \$7.95 in December, 1914. The chief increases for the month were in eggs, butter and potatoes, with slight increases in several other lines. Meats advanced in the eastern provinces. Coal, wood and coal oil advanced slightly.

In wholesale prices the index number stood at 322.7 as compared with 307.7 for November, 288.8 for December, 1918, 290.9 for November, 1918. The chief increases for the month were in dairy products, iron and lumber, but there were also substantial increases in grains, fodder, some livestock and meats, fish, potatoes, textiles, fuel, building materials, and in raw furs. Decreases appeared in hogs, hog products, fresh fruits, and in hides.

The weekly budget for a family of five, including staple foods, laundry starch, coal, wood and coal oil, and rent, is based upon the estimated importance of the various commodities included, these being slight modifications of those employed in similar calculations by various official bodies. For some articles comparatively large quantities are included, owing to the omission of other important foods of the same class. For instance, the only fruits are evaporated apples and prunes, and the only fresh vegetable is potatoes. As market conditions affecting these usually affect the prices of other fruits and vegetables somewhat similarly, the relative proportion of expenditure on the various foods therefore tends to be maintained.

In fuel and lighting the quantities are estimated on a similar principle, anthracite coal being used chiefly east of Manitoba and soft coal and wood in the western provinces, while no allowance is made for the quantities required in the various localities owing to climatic conditions, nor for the difference in quality. It is estimated that these calculations represent from 60 to 80 per cent of the expenditure of an ordinary family, according to the total income.

The index number of wholesale prices is based upon the quotations of 271 commodities, one having been dropped in 1915, and is the simple average of the percentages which the current prices of the several commodities bear to their average prices for the base period, 1890-1899, these being therefore made equal to 100.

The accompanying tables and notes give details as to the prices movement during the month and as compared with the same month in the previous year. The table of retail prices shows the prices of some 30 foods at the middle of the month in 60 localities in Canada having a population of 10,000 or over. Quotations are obtained by the correspondents of the *LABOUR GAZETTE* from dealers doing a considerable trade with workingmen. All prices are for delivered goods. The rates for rent are for six-roomed houses in districts occupied by workingmen.

**Retail Prices**

In meats, prices averaged slightly lower, except in the case of sirloin steak and salt pork, which were practically unchanged. In the province of Quebec and in the Maritime provinces several lines averaged higher, while in Ontario and in the Western provinces some lines were slightly higher and some slightly lower.

In bread, flour, rolled oats, rice and tapioca, there were only slight changes.

COST PER WEEK OF A FAMILY BUDGET OF STAPLE FOODS, FUEL AND LIGHTING, AND RENT, IN TERMS OF THE AVERAGE PRICES IN SIXTY CITIES IN CANADA

cCalculated per bag from price per 100 lbs. fCalculated per cord from price quoted. kIncluding \$1.00 for delivery. dNatural gas. gSlabs and mill wood. hStove lengths. lLignite.

Beans averaged slightly lower and prunes higher. Sugar was one-half cent higher. Tea and coffee were upward. Potatoes showed a considerable advance, the increase being greatest in Nova Scotia, Quebec, Ontario, Sas'atchewan, Alberta and British Columbia.

Anthracite coal averaged two cents higher at \$13.39 per ton. Bituminous averaged ten cents higher at \$10.23 per ton. Wood was higher, especially hard wood, and coal oil advanced slightly.

### Wholesale Prices

**GRAINS AND FODDER.**—Wheat was unchanged at the prices fixed in August until the end of the month when the opening of the export market to the United States was followed by an increase of 50c. per bushel for spring wheat, No. 1 Northern Manitoba being advanced by the Wheat Board by 50c. per bushel to millers, making the price \$2.80 at Port Arthur and Fort William. Ontario winter wheat was unchanged. Western barley advanced from \$1.52 per bushel to \$1.65 at Winnipeg and Ontario barley from \$1.53 to \$1.65 at Toronto. Western oats advanced to 93c at Winnipeg, and Ontario oats advanced to 98c at Toronto. American corn fell to \$1.60 but rose to \$1.79 at Toronto. Flax seed had risen to \$4.99 at Winnipeg, later reaching \$5.18 and then falling to \$4.80. Ontario peas rose to \$2.75 and rye to \$1.71. Hay was slightly higher at Montreal and Toronto and baled straw advanced steeply.

**ANIMALS AND MEATS.**—Western cattle were one-half cent per pound higher at Winnipeg having risen to \$9.50-\$12.00 per hundred pounds. Cattle at Toronto rose slightly in the early part of the month, but eased off later to \$12.00-\$13.00. Dressed beef, hind-quarters, had fallen to 16.20c per pound at the end of November, but rose to 22-28c at the end of December. Fore-quarters rose from 13-15c to 15-18c. Hogs, live, at country points in Ontario rose from \$15.25 to \$17.25 per hundred pounds. Dressed hogs fell 2c per pound early in the month. Bacon fell to 42c.

at the beginning of the month, later to 40c and finally to 38c. Barrelled pork rose from \$51.00 to \$53.00 per barrel. Sheep and dressed lamb were higher. Fowl reached 29c toward the end of the month, and turkeys rose to 54c.

**DAIRY PRODUCTS.**—Finest creamery butter at Montreal rose to 69c at the beginning of the month, but eased off the next week and later fell to 66c. Creamery solids at Toronto advanced from 64c to 66c. Dairy prints were slightly higher. Cheese rose from 27c to 30c per pound at Montreal. Fresh eggs advanced at Montreal from 90c per dozen to \$1.10. Storage eggs were unchanged at 60-61c.

**FISH.**—Dried cod and haddock were 1c higher at 10c and 8c respectively. Halibut rose to 22c. per pound on the Atlantic coast. Mackerel advanced from 8c per pound to 10c. Lake trout rose to 17c-18c per pound at Toronto.

**FRUITS AND VEGETABLES.**—Potatoes rose from \$2.35 to \$2.60 per bag at Toronto. Beans advanced to \$6.00 per bushel. Onions were easier at \$5.00-\$6.00 per bag. Canned corn was easier at \$1.75 per dozen and canned tomatoes at \$1.95-\$2.00.

**MISCELLANEOUS FOODS.**—Sugar rose \$1.05 per hundred, reaching \$12.51 at Toronto. Glucose and honey were slightly higher.

**TEXTILES.**—Raw cotton was slightly easier at 38c. Manufactured cottons averaged higher. Raw silk, Japan, was higher at \$13.60 per pound. Silk thread, machine, rose to \$18.35 per hundred pounds. Jute was slightly easier, but hessian was slightly higher. Flax fibre, tow, and sewing twine were higher.

**HIDES, LEATHER, BOOTS, AND SHOES.**—No. 1 beef hides fell to 25c per pound. Calfskins were lower at 60c per pound. Horse hides were down to \$8.00-\$9.00 each. Sole leather eased off.

**METALS AND IMPLEMENTS.**—Pig iron advanced \$10.00 per ton, reaching \$49.50. Black sheets, galvanized sheets, tin plates, boiler plates, scrap iron, and

\*Preliminary. †Nine commodities off the market, fruits, vegetables, etc. One line of spelter was dropped in 1915.

steel bar advanced. Brass and copper were lower, but lead, quicksilver, bar silver, spelter and tin advanced. Coil chain and soldering coppers also advanced.

**FUEL AND LIGHT.**—Bituminous coal rose 25c per ton at Montreal. Anthracite coal was also 30c. per ton higher. Connellsville coke advanced at the ovens to \$6.00 for furnace and \$7.00 for foundry. Coal and coke advanced in the Crows' Nest Pass district.

**BUILDING MATERIALS.**—Steep advances occurred in lumber, high grade pine rising to \$105.00 per M. Lath rose to

\$15.00 per M and was reported to be unobtainable. Oak and birch also advanced. British Columbia fir rose \$5.00 per M at Winnipeg. Bricks also rose to \$21.00 per M. Lead pipe advanced 1c. per pound. Sash cord was higher. Copper wire was easier. Linseed oil, turpentine, and varnish advanced.

**HOUSE FURNISHINGS.**—Iron beds advanced.

**DRUGS AND CHEMICALS.**—Bleaching powder, carbolic acid, sulphuric acid and copperas advanced.

**MISCELLANEOUS.**—Malt, hops, and raw furs advanced.

## PRICES IN CANADA DURING 1919

### A Review of the Movement, with Tabular Statements

**PRICES** had risen regularly and steeply from the autumn of 1916 until the end of 1918 when the cessation of hostilities led to a decrease in the prices of certain lines most affected by war conditions. Some of these had eased off in October when it appeared that an armistice was a possibility. From November, 1918, until March, 1919, the general level of prices, as indicated by the wholesale prices index number, was downward, the index number falling from 290.9 in November to 277.4 in March. In some lines, however, which had not risen greatly during the war, the cessation of hostilities and the assurance of peace caused a more pronounced upward movement to set in, and after March this was greatly strengthened; while in those commodities which had fallen somewhat an upward movement later set in also, notably in cotton. Foods rose rapidly during the spring and summer months. The retail prices of foods had fallen slightly in February and March, but rose rapidly during May and each month thereafter during the year, except for a drop in October when many of the new crops were marketed.

**GRAINS AND FODDER.**—The price of wheat, Manitoba Northern No. 1, had been fixed at \$2.24½ per bushel in the summer of 1918 and was unchanged until the end of August, 1919, when the price for the new crop was fixed at \$2.30 per bushel to millers. The Canada Wheat Board controls the buying and selling of all wheat, paying farmers on the basis of \$2.15 at Port Arthur and Fort William, agreeing to divide among farmers at the end of the crop year the amount realized on the average above \$2.15 for each bushel sold. At the end of the year the price to millers was raised to \$2.80 per bushel in sympathy with the high market in the United States, which was then opened for the export of Canadian wheat. Western barley had fallen to 75c. per bushel in January, but reached \$1.68 in December. Ontario barley was down to 73c. in January at Toronto, but reached \$1.65 in December. Oats had fallen to 63c. in January, but rose to 93c. in December. Flaxseed had fallen to \$2.93 in January, but reached \$6.00 in August and was down to \$4.80 at the end of the year. Hay was up to \$22.00 at Montreal in January, rose to \$40.00 in May,

falling to \$20.00 in September, but rose to \$25.00 at the end of the year. The price of bran had been fixed at \$37.25 in January, but was raised to \$45.00 in August. Shorts had been fixed at \$42.25 in January and was raised to \$55.00 in September.

**ANIMALS AND MEATS.**—Cattle at Winnipeg rose from \$21.75 per hundred in January to \$15.00 in May, but fell to \$11.00 in October, rising thereafter to \$12.00. Cattle at Toronto rose from \$15.00 per hundred in January to \$16.00 in April, falling to \$13.50 in October. Beef, dressed, hindquarters, rose from 22-25c. per pound at Toronto in January to 28-30c. in July, but fell to 16-20c. in November. Hogs had fallen to \$15.00 per hundred pounds in January, reached \$23.75 in July and August, but fell to \$15.25 at the end of the year. Bacon was down to 40c. in the first three months of the year, rose to 50c. in August, but fell to 38c. in the last week of the year.

**DAIRY PRODUCTS.**—Butter rose from 52c. per lb. in January to 66c. in April, but fell to 50c. in June, reaching 69c. in December. Eggs at Montreal were up to 80c. in January, but rose to \$1.10 in December, the lowest price being 43c. in March. Milk prices were substantially higher at the end of the year than for the previous winter, having risen at Montreal from 35c. to 40c. per gallon, at Toronto from \$2.30 to \$3.10 per eight gallon can, and at Victoria from 50c. to 55c. per gallon.

**FISH.**—Dry cod fell from 12c. in January to 9c. in September, but reached 10c. in December. Halibut was steady. Haddock was fairly steady throughout the year on the Atlantic coast at 20c. and 22c. Lobsters, canned, rose from 38c. to 40c. per lb. Salt mackerel fell from 15c. per pound to 10c., and salt herring from 5c. to 2½c. Lake trout and whitefish were fairly steady.

**FRUITS AND VEGETABLES.**—Apples reached \$10.00 per barrel in March, but rose from \$6.00 in October to \$7.50 in November. Bananas rose from 6c. per pound to 8c. Evaporated apples reach-

ed 25c. in September as compared with 17c. in January. Currants fell from 26-28c. in January to 22-23c. in December. Prunes rose from 16c. in January to 21c. in November. Potatoes were down to \$1.25 per bag at Toronto in February, but reached \$2.60 in December, the crop in Ontario and the Western Provinces being short. Beans had fallen to \$4.25 in March, but reached \$6.00 in December. Onions and turnips were much higher in the autumn than a year before. Canned corn fell from \$2.35 in March to \$1.75 in December. Canned peas rose from \$1.95 in January to \$2.50 in December. Canned tomatoes fell to \$1.75 in February, but reached \$2.00 at the end of the year.

**MISCELLANEOUS FOODS.**—Bread was fairly steady throughout the year in sympathy with the fixed prices for wheat and flour. Rice advanced from 9c. per pound in January to 13c. per pound in the autumn. Tapioca fell from 14c. per lb. in January to 11½c. in April, but rose to 14½c. in the autumn. Coffee rose from 32c. in January to 39c. in August, and another line rose from 35c. in January to 46c. in the autumn. Sugar advanced from \$10.32 per hundred in January to \$12.51 in December. Maple sugar fell from 35c. in January to 24c. in April, but rose to 30c. in October. Cream of tartar was down from 90c. in January to 70c. in July, but rose to 75c. in the autumn.

**TEXTILES.**—Wool, Ontario, washed, had fallen to 60-70c in February, but rose to 75-80c. in May, falling to 65-75c. in July, remaining steady thereafter. The wool market was greatly disturbed on the cessation of the hostilities and prices were uncertain for some months until the surplus stocks of wool had been cleared out and a good demand during peace had become assured. A line of beaver cloth rose from \$4.40 per yard in January to \$4.55 in August. The cotton market was greatly disturbed on the cessation of hostilities, and raw cotton fell to 26½c. per pound by February, a decrease of nearly 10c., but rose to 39c. by November. The demand for cotton

had become good and the crop was short. Grey cottons averaged 66c. per pound in June as compared with 80c. in January, having been manufactured from cotton purchased some months before when prices had fallen. At the end of the year the average price was 74c. per pound. Coloured cottons and prints fluctuated similarly. Raw silks rose from \$6.22½c. per pound in March to \$13.60 in December. Spool silk rose from 62c. per dozen in January to 85c. in October. Jute had reached \$18.30 per hundred pounds in January, fell to \$12.40 in May and was at \$15.80 at the end of the year. Table oilcloth fell from \$5.52 per piece in January to \$4.98 in June, rising to \$5.70 in November.

**HIDES, LEATHER, BOOTS AND SHOES.**—No. 1 beef hides fell to 16c. per pound in February but reached 30c. by December. Calf skins rose from 50c. per pound to 60c. in May and fluctuated between 50c and 65c. during the last six months of the year. A line of sole leather rose from 82c. in January to 89c. in May, and \$1.00 in September, falling to 98c. in December. Boots had not risen during the war as steeply as other commodities on the average, partly because a relatively great increase had occurred in all leather goods before the war. When the armistice was signed, the market was uncertain and some declines occurred in leathers and even in boots, but steep increases soon followed and advances were made repeatedly during the year until September, after which the market was comparatively steady. A line of box calf rose from \$4.65 per pair in January to \$6.35 in September. Men's split leather boots rose from \$2.22 to \$2.65 in September.

**METALS AND IMPLEMENTS.**—Nearly all metals fell considerably after the armistice, especially copper and iron, but there was a general recovery after midsummer. Pig iron fell from \$49.50 per ton to \$37.50 by June, but reached \$49.50 again in December. Copper fell from 30c. in January to 18c. in May, reaching 27c. in August, falling to 24c. in December. Lead was down to 6½c. per

lb. in May, but reached 9c. in December. Silver had risen to \$1.00 per ounce at the beginning of the year, reached \$1.10 in August and \$1.30 in December. Spelter rose from 8c. per lb. in June to 10¾c. in December. Tin fell from 70c. per lb. in January to 60c. in February and did not change greatly thereafter.

**FUEL AND LIGHTING.**—Bituminous coal from the United States was up to \$8.85 per ton in January at Montreal, but fell to \$8.00 in February. In May Nova Scotia coal came on the market at Montreal at \$6.25 per ton. Anthracite coal was \$10.85 at Montreal in January, fell to \$10.00 in May, rising to \$10.90 in December. Coal oil rose from 8½c. per gallon to 21½c.

**BUILDING MATERIALS.**—Lumber advanced very steeply, especially after June. A line of good pine rose from \$60.00 in January to \$105.00 in December. Pine culls rose from \$47.00 in January to \$55.00 in December. B.C. fir at Winnipeg rose from \$32.25 per thousand to \$46.50. Rough lumber at Victoria rose from \$21.00 per thousand to \$29.00. Bricks advanced from \$18.00 to \$21.00 per thousand. Paints and oils also advanced considerably after June.

**HOUSE FURNISHINGS.**—Furniture advanced repeatedly during the year, from 10 to 15 per cent in January, 10 per cent in April, from 15 to 25 per cent in July and September. Earthenware and cutlery advanced from 5 to 10 per cent in the spring and again in the summer.

**DRUGS AND CHEMICALS.**—Prices in many lines receded after the cessation of hostilities. Alum fell from 6c. in January to 4¾c. in December. Carbolic acid was down from 85c. in January to 35c. in June. Glycerine fell from 56c. to 32c.

**MISCELLANEOUS.**—Raw furs advanced steeply throughout the year. Mink, muskrat and racoon more than doubled in price. Skunk advanced from \$8.50 per skin to \$10.00. Hops rose from 40c. per pound to 90c. Rope advanced from

## RENT.

[illegible]

28c. per lb. to 35c., but fell to 31c. Rubber, raw, fell from 54c. per pound to 47c.

In other countries prices as in Canada receded somewhat in many lines in the early part of the year, but later recovered as the industrial demand increased and the stocks of raw materials became scarce. Building materials were particu-

larly scarce and in demand owing to the practical cessation of new building of dwellings during the war. Food prices were high owing to the general scarcity, but there were the usual fluctuations according to seasonal and other market conditions. Tables of index numbers of prices in other countries appear on pages 93 and 94 of this issue.

## PRICES IN THE UNITED KINGDOM AND IN OTHER COUNTRIES

THE accompanying tables and the following notes give the latest available statistics as to the movements of prices in other countries as compared with Canada.

### United Kingdom

Retail food prices at December 1 were reported by the Ministry of Labour, in the British *Labour Gazette*, to be higher than a month before, the average level being 134 per cent higher than for July, 1914, whereas at the beginning of November the average level was 133 per cent higher than in July, 1914. The chief increases were in sugar and in milk, but there was a decrease in imported mutton. In retail prices of coal, however, there was an important decrease. The average increase in prices of all items (including food, rent, clothing, fuel and light) was, therefore, estimated to be 125 per cent since July, 1914. Allowing for changes in consumption, the average increase in family expenditure for food since July, 1914, was estimated to be 116 per cent. Prices of clothing for workingmen's families were estimated to be on the average three times as high as before the war. Coal prices were only 65-70 per cent higher than before the war after the reduction effected on December 1. Prices of gas had not then been reduced in accordance with the change in price of coal. Lamp oil prices had more than doubled, prices of candles had trebled, while matches had risen still more. The average increase in all fuel and light items

was, therefore, estimated at about 85 per cent.

### United States

The index numbers of wholesale prices showed advances, except in some lines of food. Dairy products showed the greatest increase in the foods group and metals rose the most among materials.

### France

The index number of retail food prices calculated by the Statistical Office indicated a level 180 per cent higher than in July, 1914, a fall of .9 per cent appearing for November.

### Belgium

The index number for Antwerp reported in the *Revue du Travail* showed an increase of 3.4 per cent in October as compared with the preceding month and an increase of 268 per cent as compared with April, 1914, foods being up 306 per cent, clothing, footwear, light, heat, etc., 249 per cent.

### Italy

Prices of food at Rome were reported to be 141 per cent higher in October than in 1914, and at Milan to be 248 per cent higher in November than in 1914.

### Iceland

The Statistical Department for Iceland reported the general level of prices of necessities in July to be 233 per cent higher than in 1914, but to have fallen 3 per cent between April and July.

## INDEX NUMBERS OF CHANGES IN WAGES AND COST OF LIVING IN THE UNITED STATES

*Reprinted from the Monthly Labour Review, November, 1919, United States Bureau of Labour Statistics.*

TWO tables are here given showing, by index numbers (percentages), the changes in recent years in earnings per hour in the following 11 industries [in the United States]. The number of wage earners reported by the Census Office as employed in each of these industries in 1914 is as follows:

Iron and steel.....	278,072
Cotton goods.....	393,404
Hosiery and underwear.....	150,520
Silk goods.....	108,170
Woollens and worsted goods.....	163,976
Clothing, men's.....	225,719
Boots and shoes.....	206,088
Lumber )	
Millwork )	618,163 (a)
Furniture.....	133,498
Cigars.....	178,872 (b)

(a) Includes all lumber manufactures.

(b) Includes all tobacco manufactures.

For the first-named industry figures are given for each of the 10 departments, as well as for the industry as a whole.

The pre-war year 1913 is taken as the basis of the comparison, or 100.

The increase in hourly earnings was greater in the iron and steel industry than in any other of the 11 here reported. Referring to the first table, it is seen that in all departments collectively the

hourly wage in 1919 was 221 per cent of the hourly wage in 1913. In other words, the wage per hour was  $2\frac{1}{5}$  times as great in 1919 as in 1913. The extent of the increase varies in the several departments. In blast furnaces, for example, the earnings per hour in 1919 were practically  $2\frac{1}{2}$  times as much as in 1913.

The tables show that the earnings per hour increased least in the millwork industry, where between 1913 and 1919 the increase was 51 per cent.

The figures here presented for the years prior to 1919 are based on reports that have been published by the bureau. The figures for 1919 are based on a very comprehensive industrial survey that has been made within the last year. This survey covered representative establishments in 28 industries, including those named above, for which 1919 figures are given. The tabulation of the material collected in this survey is yet in progress for other industries.

It will be observed that figures are not available for several of the years in the period covered, as the bureau has not been able to cover even the most important industries each year.

RELATIVE EARNINGS PER HOUR IN SPECIFIED INDUSTRIES, 1910 TO 1919.  
(1913=100.)

Year.	Cotton goods manufactures	Hosiery and underwear	Silk goods	Woollens and Worsted goods	Clothing, men's	Boots and shoes	Lumber (saw-mills only)	Millwork (sash, doors, etc.)	Furniture	Cigars
1910.....	88	82	82	90	(1)	92	97	90	99	(1)
1911.....	90	84	86	91	87	94	95	93	98	91
1912.....	99	89	92	102	88	93	96	97	97	96
1913.....	100	100	100	100	100	100	100	100	100	100
1914.....	103	103	100	103	(1)	101	(1)	(1)	(1)	(1)
1915.....	(1)	(1)	(1)	(1)	(1)	(1)	91	99	103	(1)
1916.....	120	(1)	(1)	127	(1)	107	(1)	(1)	(1)	(1)
1917.....	(1)	(1)	(1)	(1)	(1)	(1)	(1)	(1)	(1)	(1)
1918.....	179	(1)	(1)	193	(1)	147	(1)	(1)	(1)	(1)
1919.....	(1)	184	191	(1)	171	(1)	194	151	154	152

(1) Not reported.

The index number for 1914 for all departments in iron and steel is higher than that for any one department because of a variation in the proportion of employees in departments having different wage averages.

RELATIVE EARNINGS PER HOUR IN THE IRON AND STEEL INDUSTRY, 1913 TO 1919.

(1913=100.)

Year.	Blast furnaces	Bes- semer convert- ers	Open hearth furnaces	Puddling mills	Bloom- ing mills	Plate mills	Stan- dard rail mills	Bar mills	Sheet mills	Tin- plate mills	All depart- ments
1913.....	100	100	100	(1)	100	100	100	100	100	100	(3) 100
1914.....	101	90	100	(2) 100	102	101	99	96	101	102	(3) 103

(1) Not reported.

(2) Based on 1914, data for 1913 not being reported.

(3) Based on 9 departments in 1913 and 10 departments in other years.

(4) Not computed as 4 departments were not reported.

A carefully prepared estimate of the change in cost of living in the United States from July, 1914, to June, 1919, appeared in the October *Monthly Labour Review*. An estimate has since been made extending the comparison back to the year 1913.

July, 1914, retail prices of food were 2 per cent higher than the average for the year 1913.

Wholesale prices of commodities, as a whole, in July, 1914, were at the same level as in the year 1913. In the same period the wholesale price of cloths and clothing decreased 1 per cent, fuel and lighting 6 per cent, and house-furnishing goods 1 per cent. It is safe to assume, therefore, that there was no increase in the retail price of articles of family consumption other than food, and that the increase on cost of living, as a whole, was about 1 per cent.

Taking the increase in the cost of living between the year 1913 and the month

of July, 1914, as 1 per cent, and applying this figure to the series of index numbers in the October *Review*, the following index numbers result:

	Index number.
Average for 1913.....	100
July, 1914.....	101
December, 1914.....	103
June, 1915.....	103
December, 1915.....	104
June, 1916.....	110
December, 1916.....	118
June, 1917.....	129
December, 1917.....	142
June, 1918.....	158
December, 1918.....	174
June, 1919.....	177
Spring, 1919.....	175

The industrial survey figures speak mainly for the early part of 1919. The index numbers for change in cost of living for neither December, 1918, nor June, 1919, quite apply to the index number for wages in 1919. Probably a fairer figure would be a mean between the December and June index numbers, namely, 175, and this index number, 175, has been added to the cost of living index table as the figure most nearly comparable with the wage index for 1919 in the preceding tables.

## THE BOARD OF COMMERCE OF CANADA

### Statements Issued as to Policy of the Board.

**D**URING December, as in previous months, inquiries were made at various points throughout the Dominion by members of the Board of Commerce of Canada, by its local representatives, and by Fair Prices Committees under its authorization. The prices of milk for the winter were determined for many localities, notably for Toronto, where the market governs the price paid to farmers throughout a large area in Ontario, which area includes several other cities. The price of \$3.10 per 8-gallon can freight paid, determined in October, was not changed. At Winnipeg the Board issued an order that milk should be sold retail at 15 cents per quart and 8 cents per pint, and that any sale at a price in excess of these rates would be considered as a sale at an unfair price, and therefore an offence under the Fair Prices and Combines Act. An inquiry into an alleged combine of bakers and millers at Montreal, it was also announced, would be made in January.

During the month the Board issued several statements to the press with respect to its policy. The first of these, issued at Winnipeg on December 9, is a review of the work of the Board since August last. Two other statements, which were both issued at Toronto on December 27, have reference respectively to Combines and Tariffs. These statements are reproduced below:

#### Review of Board's activities

The Board of Commerce of Canada, having now completed its first quarter year of existence as a fully organized independent commission, with supervision and control over the profits of dealers in necessities of life, and over combines, including trusts and mergers, affecting articles of commerce, considers that it is now sufficiently informed to enable the formulation and statement of its policy in the

administration of the Combines and Fair Prices Act which administration has by statutory enactment been committed to it.

It was necessary that the Board should first acquaint itself with its task and with the scope of it, before reaching or stating conclusions as to its policy. Few can appreciate either the magnitude of that task or the efforts which the Board has already made in preparation for its execution.

Broadly stated, the jurisdiction of the Board as to profits is over food, fuel and clothing.

Of the many public hearings had by the Board in the various provinces the public has become aware, but of the far greater number of investigations conducted by interrogatory and questionnaire nothing has yet been heard or said.

#### INVESTIGATION MACHINERY.

There has been established at Ottawa under the direction of the Board certain investigation machinery by means of which the Board keeps itself continuously acquainted with the manufacturing and production costs of the commodities over which the Board exercises jurisdiction. By this means the Board may at any time inform itself without delay whether in any particular case there has or has not been excessive charging. This investigation machinery which is being constantly augmented will, when completed, it is fully expected, constitute an encyclopedia of all costs of necessities of all classes whatever, including even costs of transportation. The orders and declarations of the Board are made in the light of the information thus gleaned, so that it is dangerous, if not futile, for sellers of necessities to assert, as they sometimes do, that the Board acts without full knowledge of the various items of cost of the commodities in which they deal whether these be overhead charges or other costs of doing business or otherwise. The Board has at its disposal always a great fund of data of which its critics cannot know.

Supplementing the Board's inquiries there have been a few—a very few—reports or charges made by private individuals. All reports or charges made have been carefully followed up. In some cases the allegations made have not been established. In other cases the matters have been referred for criminal proceedings. In other cases restitution has been required and made to obviate further action on the part of the Board, which continues ready to receive particulars of cases of alleged profiteering, to investigate them, to pronounce upon the guilt or innocence of those charged and to cause punishment where the facts justify it.

The Board is not itself authorized to impose penalties, but the adjudication of the Board to the effect that in a particular case there was profiteering, forms the basis of a criminal prosecution; and the Board's declaration to that effect is conclusive proof of the offense when the offender comes to be tried in the criminal courts. The charge in the criminal courts against the offender may be laid either by the attorney general of the province or by any private individual with the consent of the Board. In any case, where the Board has adjudicated that there has been profiteering, the Board will give its certificate so as to enable any private individual to commence a prosecution. In extreme cases the Board will endeavour to see the proceedings carried to the stage of committal for trial, whereupon the matter will take the shape of an ordinary prosecution and will be taken in charge in the ordinary way by the crown officers of the province as is done in all other criminal matters. It is inconceivable that the attorneys general will treat these offenses as in any way different from other but ordinary breaches of the criminal law.

#### NOTIFY SECRETARY OF BOARD.

The preceding brief statement of the procedure to be followed in cases of alleged profiteering is made so that the public may know exactly what measures to adopt in case any consumer feels that he has been imposed upon. All that need be done is to communicate the facts to the secretary of the Board at Ottawa, whereupon arrangements will be made for hearing. It is, of course, utterly impossible for a

Board of three commissioners to be personally present at every point in the Dominion to hear all charges of this nature that may be advanced. Every matter must, however, ultimately reach the Board for its decision. The Board, therefore, must sooner or later consider each case. The evidence will, in most cases, be obtained through a local officer appointed for the purpose. The officer will have no authority except to take the evidence under oath. He will then transmit it to the Board, which will adjudicate, whereupon, if the offence is considered proved, a criminal prosecution will be commenced.

In order to remove any misapprehension in the public mind, the Board would point out that it has no machinery of a police character to detect offences, nor can it set up prosecuting agencies all over the Dominion. Even if that were otherwise practicable the fact is that the financial vote for the Board provides for nothing more than its existence and office management. Nevertheless, the Acts under which it works are so drawn that all things necessary can be done if, in addition to the employment of an examining officer by the Board for each particular case, the Board can have the aid of the public and local authorities. The Board submits that the assistance of the public and local authorities should be rendered freely and should not entail any expense. Local prosecuting machinery for the punishment of all criminal offences already exists. That machinery will not need to be augmented in order to discharge the additional work that will be involved in occasional profiteering charges.

The Board also points out that in addition to the matter of reasonable profits its jurisdiction extends to the matter of unreasonable accumulation of necessities. A certain amount of storage is, in this country, absolutely necessary. This applies both to imported goods and to those whereof, because of the winter, stocks in preservation must be kept on hand. This necessary storage may in certain cases be taken advantage of to enhance prices by restraining supply. In short, it may involve the "cornering" of food in order to raise prices or the hoarding of it until prices materially advance. The Board has jurisdiction to order the release and placing upon the market of food stuffs so unreasonably hoarded. All

cases of this kind, as well as those of excessive profits, ought to be brought to the attention of the Board by some person who is willing either to prove the offence or take charge of a proceeding under the Act by summoning witnesses, etc. The Board cannot be expected to be always and instantly aware of infractions of the Acts which are under its jurisdiction. As above stated, it cannot set up a local police or detective force in every community in Canada. Persons who are hoarding necessary food commodities in the face of public want should inform themselves as to the heavy penalty provided by the Act for their so doing. If charge of hoarding are laid and established before the Board, or if the Board itself becomes otherwise aware of the commission of this offence, offenders may look for relentless imposition of the appropriate penalties.

#### A GENERAL INQUIRY.

The Board deems it advisable to declare that its investigations to the present stage have not been confined to any one class of trade or industry, but have extended to many manufacturers, wholesalers, jobbers, retailers, and to some extent to farmers. Several very exhaustive enquiries into foods, fuel and clothing, including boots and shoes, have been in progress for some time. These enquiries follow the commodity from its origin as raw material to the counter in the retail store. Such enquiries necessarily consume much time. Meanwhile, as and when the Board considered itself sufficiently informed to enable just action, it has issued applicable declarations and orders. The processes of retail traders being simplest, it has naturally resulted that orders affecting the retail trade have issued first and so, to the present time, a majority of the Board's orders affect only that trade, but to the thoughtless and unreasonable demand that the Board make no orders against any class of trade until it is ready to make orders against all classes of trade at once the Board has replied that it must and will perform its duty as it, charged with the responsibility and in possession of the full facts, may determine. The orders already issued to bind retailers do not imply that they as a class have been guilty of either offence or impropriety. These orders fix maximum profits and enable the easier identification of the future profiteer. The Board, indeed, has

found among retailers generally a wholesome desire to avoid even the appearance of overcharging. It is believed that hereafter, as the result of the Board's investigations and orders, such cases of profiteering, if any, as do occur will be more simply and readily detected, exposed and punished. There is one species of undoubted profiteer who, seemingly, can be convicted upon his own confession, and that is he who claims the right to use the Board's orders as to maximum profits as justification for the raising of his prices. No orders of the Board so justify, and the Board will welcome particulars of such prostitution of its orders.

The Board is pleased to be able to observe as a result of its preliminary survey of business conditions that, despite high prices undoubtedly prevailing, profiteering, so-called, that is the taking of unjust profits, is not, in the Board's opinion, as common nor nearly as common, as many have charged or claimed. Business is in the main sound and honest, and the Board has a confident hope that business men will be as the Board's right hand in the now imminent business of tracing and punishing those among them who, according to the new business ethics of this era, have dishonoured their brethren.

Winnipeg, Dec. 9, 1919.

(Sgd.) JAMES MURDOCK,  
Commissioners.

#### Combines

(Issued at Toronto December 27, 1919.)

By section 4 of the Combines and Fair Prices Act, this Board is empowered and directed to restrain and prohibit the formation and the operation of combines.

By section 5 of the same Act it is provided that whenever the Board shall have reason to believe that a proceeding by it to restrain or prohibit the formation or operation of a combine would be in the public interest, it may, of its own motion, take the steps provided by the Statute to so restrain or prohibit.

Note that the Board is not merely empow-

ered to proceed. There is a Parliamentary *direction* that where, in its opinion, the public interest demands, the Board shall, of its own motion, so proceed.

Section 2 of the same Act extends the Board's jurisdiction as to combines to all articles of trade and commerce, and, in connection with articles of commerce, over mergers, trusts, monopolies, mutual agreements as to fixed or common sale prices, mutual agreements fixing common re-sale prices, sales or leases of businesses or of the control of businesses and to every mode of restraining or injuring commerce.

These provisions of the Act seem to have not yet become impressed upon the mind of the business community. The Board has noted that since its formation several mergers of an important character have been consummated and that several formerly exclusively Canadian business institutions have seemingly passed under other than Canadian control. If, upon investigation, it shall appear to the Board that as the result of these processes no detriment or likely detriment has ensued to the public of Canada, those who have, for instance, consummated such mergers or sold or purchased control of such businesses will have nothing to fear, but if, on the other hand, the Board, after investigation, in due course to be had concludes that such transactions have been against the interest of the public, the Board will be obliged to cause the dissolution of such mergers or the rescission of such sales of businesses, as the case may be. The practice of "stock watering," especially in the case of mergers of companies and in the reorganization and re-financing of businesses, has afforded in the past an excuse for the exaction of unjust profits. To this Board there has been committed a supervising power in cases where the transactions had can be said to come within the statutory definition of a combine.

The practice of fixation by agreement of a common sale or re-sale price, too, has conducted at times to either the unjust enhancement of prices or the maintenance of former just prices after they have become unjust by reason of a fall in the cost of production. There is nothing essentially wrong in the agreement of parties to either a fixed sale price or to a fixed re-sale price. The motives of the parties involved may be good or they may be

bad. The same may be said, indeed, of any other combine. It is the element of compulsion (always present) necessarily exerted against the general public as the result of such agreements, that makes state supervision over such agreements, in fact combines, necessary. The practice of fixing a common price of, say, milk or bread, has become so common that it has been forgotten that the practice is criminal, unless, indeed, this Board shall, upon investigation, exonerate. The practice of providing fixed re-sale prices for commodities has become so universal that it is regarded as in all cases right. In many, indeed most, cases it can be proved to be either beneficial or innocuous. But in many other cases it is decidedly against the interest of the public.

The time has come when this Board must require a more complete compliance with the legislation under which it operates, so far as trade agreements and trade practices are concerned.

Accordingly this Board will, early in January, 1920, provide by way of regulation to the effect that unless, before consummating any merger or transfer of business control (within limits to be by such regulation defined), full disclosure thereof is made to the Board, so that the interest of the public may be, by this Board, or, if necessary, by public enquiry, ascertained and conserved, this Board will deem such mergers or transfers against the interest of the public. The same regulations will extend to all price fixing arrangements, whether of sale or re-sale prices. As to past transactions, but had since July 7th, 1919, the date when the legislation establishing the Board was passed, there will be provision whereby the necessary information must be furnished this Board before March 1st, 1920. As the necessary information is received the Board will pass upon it, confirming or otherwise the transactions had but in no case ordering dissolution or discontinuance without the fullest opportunity being given the affected interests to shew that their arrangements made are not against the interest of the public.

Toronto, December 27th, 1919.

(Sgd.) W. F. O'CONNOR,

(Sgd.) JAMES MURDOCK,  
Commissioners.

## The Tariff

(Issued at Toronto December 27, 1919)

A recent pronouncement by this Board of its intention to investigate and discover whether or not the customs tariff was being taken advantage of to unfairly enhance prices of necessities of life seems to have been so misunderstood as to cause some to wonder, and express their wonder, whether this Board's investigation would render unnecessary a said-to-be-intended investigation of the tariff by a government appointed tariff commission.

This Board is not concerned with the excellence or propriety of any form of customs, whether one for protection, for revenue, or otherwise. It will take the tariff as it finds it, presuming neither to criticize nor to commend the political wisdom of those who framed it. So taking it, the Board will endeavour to discover whether any are abusing it or perverting it to a non-intended end—the exaction under its cover of greater profits than without it, if the competing parties were on even terms, the abusing or perverting party would have been enabled to exact. The object of Section 24 of the Combines and Fair Prices Act, 1919, is, in the judgment of this Board, to provide a machinery whereby the Governor-in-Council may be apprised by and through this Board whether “the making or taking of unfair profits on any necessary of life is facilitated by the duties of custom imposed on such necessary of life,” whereupon “the Governor-in-Council may direct either that such necessary of life be admitted into Canada free of duty or that the duty thereon be reduced to such amount or rate as will, in the opinion of the Governor-in-Council, give the public the benefit of reasonable competition.”

The Governor-in-Council can act upon the result of an investigation by this Board only in cases where this Board has investigated. To know whether unfair profits have or have not been taken or facilitated, this Board must first investigate. To ever become apprised so that he may act under Section 24, this Board must have (a) investigated, and (b) reported, to the Governor-General-in-Council. The reason for a report at all is so that the Governor-General-in-Council, if he pleases, may act. This Board reports to the Governor-General-in-Council as to tariff effect only because it cannot it-

self act. When exercising its ordinary jurisdiction it does not report to him, because, by statute, it can act.

To more clearly define the Board's powers and intentions, suppose a tariff commission were to be sent out, that it had reported and Parliament had provided a totally new tariff based upon a totally different principle, whatever it may be, from that of the present tariff, this Board's position is that Section 24 of the Combines and Fair Prices Act would still be there, and, apart from all other powers of this Board, authorize re-investigation as to whether the newly provided tariff was being utilized for the purpose of unfairly enhancing prices.

Some of those who have impugned the Board's power have thought it to be necessary as well to impugn the capacity and disposition of the Board's personnel. Such criticisms, as a matter of practice, the Board treats as self-answering.

There really can be such a thing as the abuse of a customs tariff, which even a protectionist can recognize.

As illustrating the increased Protection enjoyed by certain Canadian manufacturers during and since the war owing to: (a) their competitors ceasing to be the manufacturers of Great Britain and competition being with the manufacturers of the United States, and (b) the imposition of the War Tax, the following illustrations are given:

### *Effective Protection prior to War. Chief competing country—Great Britain.*

Page 40, Item 521 of the Tariff, gray cotton fabrics, 15 per cent.

Page 40, Item 522 of the Tariff, white or bleached cotton fabrics, 17½ per cent.

Page 114, Item 290 of the Tariff, Portland cement, 7c. per 100 lbs., 24½c. per bbl.

### *Effective Protection during and since the War. Chief competing country—United States.*

Page 40, Item 521 of the Tariff, gray cotton fabrics, 25 per cent, 7½ per cent, 32½ per cent, as against 15 per cent.

Page 40, Item 522 of the Tariff, white or bleached cotton fabrics, 25 per cent, 7½ per cent, 32½ per cent, as against 17½ per cent.

Page 114, Item 290 of the **Tariff**, Portland cement, 350 lbs. 35c.,  $7\frac{1}{2}$  per cent on value of cement, or, say 15c. total, 50c. as against 24½c.

NOTE.—From the first two items there has to be deducted something (less than  $2\frac{1}{2}$  per cent) on account of War Tax levied upon the raw material used. Nothing, however, requires to be deducted from the Portland cement, all the raw material used in the manufacture being found in Canada. The net results are as follows:

Item 521, before War, 15 per cent; during War,  $32\frac{1}{2}$  per cent less  $2\frac{1}{2}$  per cent, or 30 per cent; increase 100 per cent.

Item 522, before War,  $17\frac{1}{2}$  per cent; during War,  $32\frac{1}{2}$  per cent less  $2\frac{1}{2}$  per cent, or 30 per cent; increase  $71\frac{1}{2}$  per cent.

Item 290, before War,  $24\frac{1}{2}$  per cent per 350 lbs., 50c. per 350 lbs.

What this Board proposes to do is to trace and report the effects of cases like the preceding. If no impropriety is disclosed it will be well to know that the facts are so.

Toronto, December 27, 1919.

(Sgd.) JAMES MURDOCK,  
Commissioners.

## ACCIDENTS IN ONTARIO FACTORIES DURING 1918

### Annual Report of the Factory Inspection Branch of the Ontario Department of Public Works

THE thirty-first annual report of the Ontario Factory Inspection Branch, which is incorporated in the third annual report of the Trades and Labour Branch of the Ontario Department of Public Works, covering the fiscal year ending October 31, 1918, contains some interesting information with respect to fatal and non-fatal accidents in Ontario factories.

The report states that during the year much was done to safeguard employees, about 60 per cent of the notices served by the Branch on employers being in connection with guarding machinery or other safety measures, including the keeping of the premises clear of obstruction. Plans were formulated and completed to demonstrate to workmen, by means of lantern slides, the causes of accidents, and an illustrative lecture was given at London, Ontario. The total number of accidents reported during the year was 4,907, of which 78 proved

fatal. This shows an increase over the previous year in non-fatal accidents of 982, but there was a decrease of 4 in fatalities. Seventy-one of the fatalities reported were attributed to the following causes: 12, to elevators; 9, to shafting, belts and pulleys; 8, to electricity; 8, to falls; 7, to cranes and derricks; 6, to falling substances; 5, to acid and gas burns; 5, to cars; 3, to explosion of ammonia receiver; 3, to machines; 2, to scalds; 1, to an explosion of gun cotton; 1, to an explosion of cylinder head; and 1 to saws. (These fatalities were included in the table of fatal industrial accidents in Canada during 1918, which was printed in the LABOUR GAZETTE for May, 1919.) Investigation of the elevator accidents showed that in most cases the cause was due to acts of the employees rather than to faulty equipment, three of the accidents being due to men trying to board or operate a hoist while it was in motion; and in the accidents due to electricity attention is

drawn to the danger from insufficiently protected electric wires. Lack of, or unsuitable, protection for the eyes was responsible for 297 eye accidents in the metal trades, 153 of which were due to foreign matter entering the eyes, others to too close proximity to an acetylene welder, and the Inspector recommends workers to wear over their eyes suitable goggles of a light weight and well fitting. The report states that almost 80 per cent of the total number of accidents occurred in the metal working industries from causes which are governed largely, if not entirely, by the employees themselves; and that the solution for the elimination of such accidents is more safety education, much of which must be given through the co-operation of the foreman. "It is now realized," states the report, "that there are men who

have to be taught how to lift, how to pile, how to carry, even how to think—to be saved from themselves—and to this end the interest of the foreman is necessary, he must realize his obligation. Without co-operation on the part of all parties concerned, little headway will be made, and it will not do to say that a workman is careless, or thoughtless, or any other one of what are known as the seven deadly sins of industrial workers; he must be trained to 'think' as he is trained to work, and taught 'caution' for his own sake as well as his fellow-workers, who are frequently the victims of his 'thoughtlessness.'" The Branch also recommends that where cranes are operated, the platforms be sufficiently wide, efficiently guarded, and open spaces properly covered.

#### RECENT LEGAL DECISIONS AFFECTING LABOUR

**A** WORKMAN was poisoned by the inhalation of the fumes of mercury

**Damages  
awarded for  
mercurial  
poisoning  
under Quebec  
industrial  
accidents law**

when at work. He brought action against the company employing him, under the Quebec law relating to industrial accidents, claiming that he was suffering from a permanent injury. Judgment was

delivered in favour of the plaintiff in the Superior Court at Three Rivers. This judgment, however, was annulled by the Court of King's Bench in an interlocutory judgment, and the case was referred back to the original court for the hearing of additional evidence with reference to the permanence of the injury. At the second trial the original judgment was confirmed. The Company then appealed to the Court of King's Bench on the grounds; (1) That the workman had not met with an accident as the term was used in the law relating to industrial accidents, but that he had voluntarily accepted work involving

risks of mercurial poisoning, and that he was suffering from the original consequences of such work; (2) that the permanence of the disease was not sufficiently established.

It was stated by the Court that the first point had been considered in the interlocutory judgment when the case was sent back to the Superior Court. The Court stated that in its previous judgment it had already declared the disease came within the category of those under the law of industrial accidents. With regard to the second point, the Court had found in its first judgment that the permanence of the incapacity had not been sufficiently established. This question was a matter of opinion and a decision on it was not infallible. For this reason the law provides for the revision of the indemnity during a period of four years. By the judgment of the majority of the Court, with one dissentient, the judgment of the Superior Court was sustained, and the Company was condemned to pay the plaintiff the sum of \$1,900. (*Quebec — Gloux v. Canada Electric Products.*)

**Employer not guilty of inexcusable fault when injured workman knew conditions and how to avoid accident**

A factory employee, when walking over the automatic floor which covered the elevator shaft in the factory where he was working, was crushed between the ascending elevator and the shaft, and was severely injured. He brought action under the Workmen's Compensation Act and was awarded \$2,562 damages by the Superior Court of Quebec.

This sum included \$500 which was added on a finding of the Court that the employers were guilty of inexcusable fault. An appeal was taken from the judgment, the employers claiming that the respondent's disabilities were due to disease which had no relation to the accident; that his evidence was grossly exaggerated; that the amount awarded was unreasonable; and that the appellant company was not guilty of inexcusable fault.

The Court of Appeal declared in its judgment that the medical evidence was contradictory, and that as the trial judge was obviously in a better position to reach a decision on this evidence than an appellate Court, his finding as to the extent of the respondent's injury should not be interfered with. With regard to the question of inexcusable fault, the Court held that this charge was not justified by the evidence, as the injured employee knew the conditions, and knew by the cable wires when the elevator was

moving and when it was likely to pass through the automatic floor. It was therefore held that there was error in the judgment appealed from, insofar as it awarded \$500 for inexcusable fault. The judgment of first instance was therefore reduced by this amount and the sum of \$2,062 was awarded the respondent, with costs of appeal against him. (*Quebec—Kouri v. The Maple Exchange, Ltd.*)

A switchman was making a coupling, and when the cars were coming

**An employee cannot recover damages if hurt when disobeying rules of employer**

together he noticed that the coupling could not be made on account of one draw-bar protruding. In order to save time, he pressed the draw-bar over with his foot, which permitted the coupling to be made,

but at the same time his foot was caught and crushed. He brought action against the railway company for this injury. The evidence showed that the rules of the company forbade this practice. It was held by the District Court that under the circumstances of the case, the plaintiff at the time of the accident was performing an act outside the scope of his employment, and he was therefore not entitled to recover damages. An appeal was taken by the plaintiff against this judgment, but it was dismissed with costs by the Court of Appeal of Saskatchewan, the judgment of the District Court being sustained. (*Saskatchewan—Jackson v. Canadian Pacific Railway.*)

## NOTES ON CURRENT MATTERS OF INDUSTRIAL INTEREST

### **The month in brief**

At the beginning of January the percentage of unemployed among members of trade unions was 4.98, as compared with 3.58 at the beginning of December. According to returns received from more than 4,500 firms, there was a rapid recovery in employment in most industries after the first week of the month, when there was some slackness due to stocktaking. According to preliminary figures, the various offices of the Employment Service of Canada received about 35,850 applications for employment, were notified of 24,300 vacancies, and made about 21,700 regular placements and 4,500 casual placements during January, as compared with 35,000 applications, 26,000 vacancies, 21,000 regular placements, and 5,400 casual placements in December.

The time loss on account of industrial disputes during January was greater than in December, 1919, and January, 1919. There were in existence during the month 28 strikes, involving about 3,366 workpeople and resulting in a time loss of about 57,944 working days. Of these strikes 15 were on record at the beginning of the month, while 13 strikes were reported as having commenced during the month. At the end of January there were on record 16 strikes, involving about 2,347 workpeople.

The average cost of the weekly family budget of staple foods rose steeply, being \$15.30 at the middle of January as compared with \$14.73 in December, \$13.78

in January, 1919, and \$7.73 in January, 1914. The index number of wholesale prices rose to 336.4 for January as compared with 322.7 for December, 286.5 for January, 1919, and 136.5 for January, 1914.

### **Proceedings under the Industrial Disputes Investigation Act**

During January the Department received a report from the Board established to deal with the dispute between the Dominion Coal Company, Limited, Glace Bay, N.S., and certain of its employees, being members of District No. 26, United Mine Workers of America.

Two applications were received for the establishment of Boards and further appointments were made in connection with applications which had been received during previous months. A Commissioner was appointed under the Inquiries Act to investigate and report upon a dispute affecting employees of the firm of Guillet and Son, Mariville, Que.

### **First meeting of Governing Body of Inter- national Labour Office**

The first meeting of the Governing Body of the International Labour Office, provided for under the Labour Section of the Peace Treaty, opened at Paris on January 26. The Dominion Government was represented by Mr. F. A. Acland, Deputy Minister of Labour. Mr. Tom Moore,

President of the Trades and Labour Congress, also attended as substitute for Mr. P. M. Draper, who had been chosen at the International Labour Conference at Washington as one of the Workers' representatives on the Governing Body. The business brought before the Body included the discussion of measures to make effective the decisions reached at the Washington Conference. The question had been raised as to the legality of these decisions by reason of the delay in the ratification of the treaty of peace. On the advice of the legal advisers of the International Labour Office, the Governing Body deemed itself warranted in confirming what had been done at Washington and accordingly it confirmed the draft conventions and recommendations adopted there.\* These conventions and recommendations will afterwards be referred to the competent authorities in Canada and the other countries concerned, for acceptance or otherwise. On the motion of Sir Malcolm Delevigne, the British delegate, M. Albert Thomas, of France, who had been elected Provisional Director General of the International Labour Office at the International Labour Conference, was unanimously confirmed in his appointment. It was decided to hold an International Seamen's Conference at Genoa on June 15, and the next general Labour Conference early in the spring of 1921. The Seamen's Conference was regarded by the legal advisers as meeting the formal requirements of the Labour Convention with regard to the holding of an annual conference. The Governing Body adjourned on January 28, and will hold its next meeting in London on March 22. The Dominion Government has appointed Mr. Acland to represent it again at this second meeting.

\*For the draft conventions and recommendations see LABOUR GAZETTE, December, 1919, pp. 1440-1453.

### **Order-in-Council respecting immigrants**

Owing to the existence of a considerable amount of unemployment in various parts of Canada, an Order in Council, P.C. 2499, was passed on December 24, temporarily suspending regulations made by Order in Council, P.C. 924, of May 9, 1910, with regard to the entry into Canada of immigrants of the mechanic, artisan and labourer classes, and substituting therefor the following regulations:

"1. No immigrant of the mechanic, artisan or labourer classes, whether skilled or unskilled, shall be allowed to land in Canada unless he possesses in his own right money to the amount of \$250 and in addition transportation to his destination in Canada.

"2. If an immigrant of the mechanic, artisan or labourer classes, whether skilled or unskilled, is accompanied by his family or any member thereof, the foregoing regulations shall not apply to such family or members thereof, if the head of the family shall possess in his own right, in addition to transportation for his family to destination in Canada, a further sum of money equivalent to \$125 for every member of the family of the age of 18 years or upwards and \$50 for each child of the age of 5 years and under the age of 18 years."

These provisions were made to apply to immigrants from the United States from December 31, 1919, and to immigrants from other countries from January 15, 1920, and they shall remain in force until March 31. After this date the earlier regulations shall again become operative.

### **Bonuses to employees in Canada**

Toward the end of last year a number of Canadian companies announced a distribution of bonuses among their employees. The Dominion Sheet Metal Company, of Hamilton, Ont., granted their employees a bonus of ten per cent on the wages drawn by each one during the year ending November 30, 1919, in accordance with the practice followed by

the Company during the past three years. The Gray Dort Motors, Limited, of Chatham, Ont., announced that a bonus system would go into effect at their works from the beginning of the year. The bonus amounts to five per cent of the wages paid, and is based wholly on punctuality and regular attendance. The Canadian Bank of Commerce declared a cash bonus of ten per cent to those of its employees receiving salaries up to \$5,000 per annum, and five per cent to those receiving salaries of \$5,000 and upwards, with a maximum of \$500. This is in addition to a recent general increase in salaries. Employees of The Great North Western Telegraph Company, who had been in the service of the Company for a year, received a fifteen per cent bonus, while those in the service over six months and less than one year, received a ten per cent bonus. This did not affect railroad offices where commercial business is handled on a commission basis.

#### A profit-sharing scheme

The International Metal Works, Limited, of Brockville, Ont., employing about fifty hands, have announced a profit-sharing scheme according to the following plan: At the end of the year ten per cent of the profits is set aside for depreciation, a maximum of ten per cent is then paid on the capital invested, and twenty-five per cent is set aside as a rest account to provide for losses or unforeseen expenses. The balance is divided on a fifty-fifty basis between capital and labour. This applies to those who have been in the employ of the Company for one year or more. Payments to employees are made in twelve or twenty-four instalments, according to the method of payment, and they are divided *pro rata*, according to the earnings of each employee. At the end of five years, if there have been no losses, a further distribution is to be made from the rest account, on a fifty-fifty basis, between capital and the employees who have been in the service of the Company for three years or more.

#### Changes in wages and hours in a lumber mill

A radical change in the hours and wages of their employees was put into force on December 1 by the management of the Bathurst Lumber Company, Bathurst, N.B. Instead of operating the plant by two shifts of 11 and 13 hours each day, the system of three shifts of eight hours each has been adopted, while the rates of wages for the new shifts have been made the same as the former rates for a shift of ten hours, plus an advance of ten per cent, or the equivalent of eleven hours at the previous rate of pay. This means a substantial reduction in hours of labour, with a very slight reduction in wages. It is stated that the change involves for the company an advance in wage expenditure of 30 per cent and a considerable increase in the number of workers employed, but it is claimed that "there is every reason to believe that the change will be beneficial from the company's viewpoint as well as from that of the men."

#### Legislation requested of the Dominion, Ontario and Quebec Governments by labour delegates

Members of the Executive of the Trades and Labour Congress, accompanied by representatives of various international labour organizations, waited upon members of the Dominion Government on January 8, to present requests of the Congress respecting legislation. These included the following: With regard to immigration they requested the appointment of a representative of the organized workers among others on a Central Empire Board; the total exclusion of Orientals, or their limitation to one per thousand of the population by international arrangement; the elimination of bonuses paid to agents for the introduction into the country of industrial workers; intercession with the United States immigration authorities in order that Canadian theatrical mechanics entering the United States may be given the same

consideration as given to American theatrical mechanics coming to Canada; and repeal of amendments to the Immigration Act making possible the deportation of British-born subjects. Legislation was requested to provide for an eight-hour day and forty-four hour week, with an adequate minimum wage to insure a fair standard of living. With regard to the Industrial Disputes Investigation Act the suggestion was made that the time had arrived for an entire revision of the machinery of investigation and arbitration, and it was declared that the Congress stood ready to participate in a conference to undertake this work. A request was made that immediate steps be taken to bring into effect the recommendations of the Industrial Relations Commission and of the National Industrial Conference. Previous requests were repeated for an amendment to the fair wage clause to provide penalties against contractors wilfully violating fair wage clauses, for legislation granting trade unions the right of protecting their union labels, for compulsory labelling of receptacles containing white lead, etc., and for the erection of suitable buildings to protect car builders and repairers. Representation of labour on the Board of Directors of the Canadian National Railways was requested, and a protest was made against the policy of this Board of refusing to employ men who have reached the age of forty-five.

The Ontario Executive of the Trades and Labour Congress of Canada waited upon the Ontario Government on December 23 and presented their demands for labour legislation. These were in the form of resolutions in favour of the following: an eight hour day and forty-four hour week, with a six-day week for hotel and restaurant employees; provision for the incorporation of friendly societies; amendments to the housing scheme to permit loans to individual workers or groups of workers, equal representation of workers on housing commissions, and legislation to check the unearned increment; amendments to the Compensation Act to give organized la-

bour a representative on the board, and to place theatrical and stage employees on an equal footing with other workmen in the operation of the Act; abolition of the making of clothing in private homes; extension of the compulsory age for attending public schools to sixteen years; widows' pensions; extension of voting hours at elections to 8 p.m.; the abolition of running boards on street cars and prohibition of one-man operation of street cars carrying more than twelve passengers; the elimination of property qualifications for municipal candidates; reduction of the income tax according to the number of children in a family; representation of organized labour on the Ontario Hydro-Electric Commission; provision for the punishment of contractors who violate fair wage clauses in public contracts; the appointment of inspectors for stages and scaffolding; strict enforcement of mining laws for the protection of workers; prohibition of the use of pneumatic hammers in the cutting of stone; and abolition of night work in bake shops.

A delegation of representatives of the Trades and Labour Congress of Canada waited upon the provincial government of Quebec on January 19, and submitted requests for the enactment of laws containing the following provisions: The prohibition of the use of air or electric hammers in the manufacture of cut stone; the appointment of practical metal polishers as blower inspectors; better protection and sanitation for moving-picture operators; employment of experienced operators in electrical developing stations, with an eight-hour day where work is continuous, and one day's rest in seven; minimum wages for unskilled labour; abolition of the practice of making clothing in the homes of wage earners; removal of old wallpaper before putting on new; sanitary shop laws for barber shops; free and compulsory education; minimum living wage for school teachers; reformation rather than punishment in jails and prisons; eight-hour day; the raising of the age for admission of children to industrial establishments from 14 to 16 years; state insurance

against unemployment, sickness, invalidity and old age; pensions for needy mothers with dependent children; democratic management for government or municipal work; improvements to the compensation laws; proportional representation; extension of hours of voting; against yearly leases of property and in favour of monthly tenure; the prevention of profiteering in rents by fixing ten per cent as the limit of profit on rentals; and the election of all members of commissions, such as public utilities, tramways and others.

**Amendments  
to B.C. Work-  
men's Com-  
pensation Act  
proposed by  
railway men**

Early in January, a conference of railway employees took place at Revelstoke, B.C., for the purpose of discussing amendments to the Workmen's Compensation Act of British Columbia. Hon. Mr. J. W. de B. Farris, Attorney General and Minister of Labour of the province, was present at the meeting. The railwaymen made the following requests to the Minister: That the three-day clause in the Act be eliminated; that an increase be made to widows' allowances and that a per capita grant be made for each child without limiting the number to four in a family; that an increase be made in the disability grant, which is 55 per cent of the wages, and that the right of common law action be granted.

The Minister opposed the elimination of the three-day clause on the ground that it was the only protection against imposition on the part of a man suffering from a very minor accident. With regard to widows' allowances and grants for children, he pointed out that a law passed at the last session of the legislature enabled the Compensation Board to increase widows' grants from \$25 to \$35, and children's grants from \$5 to \$7.50, and to eliminate the restriction in the number of children in a family who could receive grants. (See LABOUR GAZETTE, November, 1919, p. 1260). With regard to an increase in the 55 per cent disability rate, the Minister pointed out that as wages rose the percentage itself

automatically constituted an equivalent increase. He rejected the granting of the right of common law action on the ground that it struck at the very root of the principle on which the Act was based.

**Accident pre-  
vention in  
British  
Columbia  
and Nova  
Scotia**

The Workmen's Compensation Board of British Columbia adopted last November a new set of accident prevention rules and regulations to take effect from January 16, 1920. One of the most important of these provides that every manufacturing plant, construction camp, logging camp and workshop in which fifty or more men are employed shall have an Accident Prevention Committee of not less than three members, to be selected from among the employees. The general duties of this committee are to inspect the entire plant at least once a month for the purpose of receiving complaints, judging risks and considering suggestions; to meet at least monthly for the discussion of accidents and their future prevention; to investigate and report in writing to their employers upon all serious accidents; to educate their fellow employees against dangerous practices and methods of work; to investigate fire conditions and examine fire-fighting appliances; to inspect lighting arrangements and report to employers all insufficiently lighted places where accidents might occur from this cause; to inspect or arrange for the inspection of all machinery, transmission motor-stops, etc. The committee in connection with the logging camps are required also to inspect particularly all spar trees, gin-poles, skid roads and general working conditions in and about the camps. Other regulations provide new general safeguards as well as special rules for the workers engaged in the several industries.

A group of Nova Scotia employers have recently formed an Accident Prevention Association for the purpose of taking measures to prevent accidents in the industries falling within the Work-

men's Compensation Act of the province. This Association, for the formation of which the Act provides, has power to enforce safety rules and regulations upon all employers carrying on industries to which the Act applies. An article describing the activities of other accident prevention associations in Canada appeared in the LABOUR GAZETTE issue of November, 1918.

**Emigration from the United States** The Inter-Racial Council in the United States issued a statement on December 31 that more than a million foreign-born labourers had emigrated since the Armistice, that a million more were preparing to leave, and that the United States was short four million labourers. "Immigration officials in New York," the statement reads, "are reported as estimating that next year's immigration will be only 300,000, as compared with the pre-war figures of 900,000 to 1,000,000 annually. What this decline portends may be readily understood when it is known that, due to the lack of immigration during the war, American industry has been deprived of the new labour it stood so much in need of, and that, moreover, tens of thousands of the foreign-born are giving up their jobs preparatory to returning to their home lands. Immigration providing labour and a home market for the lower priced articles, from 1911 to 1914 inclusive, was at the rate of 1,300,000 a year, as compared with an average of 240,000 a year from 1915 to 1919. We need immigration on a selective basis in order to protect American institutions from radical attacks, but any immigration policy which is designed to keep back the new labour which industry is so greatly in need of is bound to have a disastrous effect." A nation-wide education movement among thirty nationalities in the United States, having for its purpose the endeavour to "adjust the foreign-born to American life," has been undertaken by the council, which has held numerous conferences with leading representatives of each race. More than 400 industrial

and financial organizations of the country are said to be interested in the council, which advocates "a liberal attitude on the part of the public toward immigration" as a result of the reported unskilled labour shortage.

**Present status of the United States Employment Service** As indicated in the LABOUR GAZETTE, July, 1919, page 756, the United States Employment Service is at the present time only a

skeleton form of what it was during the war, owing to the temporary curtailment of funds. A bill was introduced at the last session of Congress providing for a permanent co-operative State and Federal system of employment offices, but it was not reported out from committee, and it is now understood that a new bill will be submitted to Congress at an early date. In the meantime a new system for the clearance of surplus labour in the United States has come into operation temporarily. During the war period the United States Employment Service had the power to shift labour from coast to coast or from North to South according to the needs of the essential industries. Under the new clearance system, to prevent any undue exodus of workers from one district to another, the country is divided into employment service zones, a regional director being stationed in each zone. Each zone will be expected to take care of its own labour, but any excess which it cannot place or any demands which it cannot meet will be cleared through the Washington office for the entire country. With reference to the future outlook of the Employment Service, the *United States Bulletin* states: "In spite of the difficulties experienced by the Employment Service since its curtailment of funds following the Armistice, officials are very optimistic about the outlook for public employment in this country. They are saying that the war advanced the principle of establishing non-fee-charging agencies for the man or woman out of a job, by twenty-five years, and that the International Labour Conference's resolutions

favouring the creation of such systems by every government on the globe, has given recognition to the principle in an international way. It is felt that even if the present organization should be eliminated, the demand from the states for headquarters under the Federal Government would be so great as to cause the creation of a new organization."

#### **Profit-sharing in Germany**

A recent issue of the *Economic Review* states that a profit-sharing scheme has been introduced by the Krupp's corporation in Germany by which bonds of 100 and 200 marks are to be issued for the benefit of the employees, giving them an opportunity of drawing the same dividends as other shareholders. It is also proposed to set up banks in which workmen can deposit their savings until they are large enough to buy additional holdings. The Siemens Company propose a similar scheme for their employees. At the Hans Tiedemann North German shipbuilding yard at Gluckstadt an agreement has been made between the management and the employees by which it provides that each employee will share in the profits of the Company according to his yearly earnings.

#### **Alien labour and mining accidents**

Mr. A. H. Fay, an official of the United States Bureau of Mines, in an article in the November 1 issue of the *Engineering and Mining Journal* traces a direct relation between the number of mining accidents in the United States and the number of inexperienced and non-English speaking foreign workers in the mining industry. The conclusion is drawn that had the fatality and injury rate for the English-speaking American been maintained throughout the coal mining industry, there would have been 716 fatalities less and 900 serious injuries less during the past few years. In the anthracite mines of Pennsylvania 43 per cent of the employees are English-speaking, the other 56 per cent being immigrants, mostly from Southern and Eastern Europe.

The proportion of fatalities in these mines is given as 28.8 per cent among the former, and 71 per cent among the latter class. Similarly, in the bituminous mines of Pennsylvania, where the workers are 35 per cent English-speaking and 65 per cent foreign, the fatality ratio is 27 to 73 per cent. In West Virginia 67 per cent of the workers are English-speaking, but although 17 per cent of this number are coloured employees, the proportion of fatalities among this class is only 53 per cent of the total; the foreign group numbering 33 per cent of the employees sustained 47 per cent of the fatalities. Almost the same ratio holds for the non-fatal accidents in these three districts. This higher proportion of deaths and injuries among alien miners is mainly attributed to the lack of a common language and to inexperience in mining.

#### **Jottings**

In the January issue of the *LABOUR GAZETTE* it was stated, on page 50, that the Canadian Legislative Board of the International Brotherhood of Locomotive Firemen and Enginemen at their Annual Convention had opposed the perpetuation of the Railway Board of Adjustment No. 1. Further information received shows that the resolution passed at the Convention declared that the Brotherhood "opposed the perpetuation of the Board of Adjustment *by legislative enactment*, inasmuch as such legislation would introduce the principle of compulsory arbitration to which the organization has repeatedly recorded its opposition."

As a result of a resolution passed at the Western Canada Conference of Printing Pressmen, at Winnipeg, in May last, the International Printing Pressmen's and Assistants' Union of North America have made arrangements for the future payment of Canadian per capita tax through Canadian banks. As the rate of exchange between Canada and the United States is very high and has caused a big expense not only to the International organization but to the

local organizations as well, a considerable saving should result.

An Industrial Council has been established at the Woodside plant of the Acadia Sugar Refining Company at Dartmouth, N.S., which employs about 300 men. Elections to the Council take place once a year, one representative being chosen to every 40 men in such a way that every craft in the plant is represented. Other members of the Council are appointed by the Company. All questions relating to wages or conditions of employment are dealt with by the Council, and settlements are made by it, subject to the approval of the Directors.

Three laws of interest to labour, passed by the Ontario legislature in March, 1919, went into force on January 1, 1920. These include the Mining Act, the Stationary and Hoisting Engineers' Act, and the Compulsory School Attendance Act.

On December 10, 1919, a commission was appointed by the provincial government of Nova Scotia, under an act passed at the last session of the legislature, to conduct an inquiry respecting hours of labour of women employed in industrial occupations and other matters relating to such employment, and respecting mothers' pensions or allowances. The members of the Commission are Miss Jane B. Wisdom, Halifax; and Messrs. John McKeen, Halifax; W. B. Scott, Glace Bay; and Alexander T. MacKay, Trenton, Secretary of the Commission.

A commission has been appointed in British Columbia to inquire as to the

laws relating to the subjects of Mothers' Pensions, Maternity Insurance, Health Insurance, and Public Health Nursing, which are in force in other countries. The chairman of the commission is Mr. E. S. H. Winn, chairman of the British Columbia Workmen's Compensation Board.

An Australian official report states that during the year ending June 30, 1919, maternity allowances were paid by the Commonwealth Government in 124,016 cases. Of these cases the mothers in 84,127 instances were attended, and in 39,889 instances unattended, by doctors. Claims were disallowed in 510 cases. The total of allowances paid amounted to £620,080, which was rather less than during any of the preceding four years. The cost of administration amounted to about 1.8 per cent.

An International Congress of Transport Workers will be held at Christiania, Norway, on March 15. At this congress the new constitution of the International Transport Workers' Federation will be discussed and put into definite form. This federation replaces the old organization which held its last congress in London in 1913, and which practically went out of existence during the early months of the war. The first steps toward reorganization were taken at an international congress held at Amsterdam on April 29-30, 1919, at the suggestion of the British National Transport Workers' Federation and the Swedish Transport Workers' Union. At this congress a provisional committee of five was appointed to draft the new constitution.

## INDUSTRIAL CONDITIONS DURING JANUARY, 1920

## 1.—General Review

The heavy decline in the volume of employment throughout Canada, which closed the month of December, continued during the first week of January. However, a marked rise commenced during the second week, due to the close of the stocktaking period. This rise continued until the end of the month when conditions became steady. In the Maritime provinces, the increase in employment reached its peak during the second week in January. There was a sharp drop in the third week, followed by a fair recovery at the close of the month. In Quebec, the month commenced with a decided decline, but the volume of employment rose gradually after the first week, the greatest increase being in the third week of the month. Ontario started the month with a heavy decline, but maintained the fairly steady increase which set in during the second week. In the prairie provinces, the general decline continued until the third week, when a slight rise closed the month. British Columbia maintained a steady upward tendency which culminated in a pronounced rise during the third week. In the metals and machinery group, after an opening decline, a rise in the volume of employment was decidedly marked, and, with slight fluctuation, remained steady. The increase commenced in all the provinces during the second week and indicated a return to more normal conditions after holiday and inventory periods. Practically the same general increase prevailed during the month in the vehicle group. Ontario and the Maritime provinces were especially steady and more than equalized the continuous slump in British Columbia, where a shortage of steel reduced shipyard activity. The food group indicated a decided recovery in the third

week of January, with a drop toward the close. The month commenced with a great decline, and the subsequent increase throughout Canada in the week ending on January 17 was the first since at a steady increase, which, however, November 15. The textiles continued slackened up somewhat at the close of the month. In the pulp, paper and printing group, a steady situation continued throughout the month which registered a fair increase. Commencing the month with a decline, the wood-working industry rallied to a fair but steady increase throughout the rest of the month. The same general course was recorded in the clay, glass and stone group. There was considerable fluctuation in these industries in the maritime and prairie provinces, but there was a steady increase in Ontario and Quebec. In the leather industries a decline was evidenced in the first week of the month, followed by recovery until the last week, when there was a slight drop. In paints, oils and chemicals, the steady increase which featured the month terminated in a further slight rise. In railway operation there was considerable fluctuation with a falling off at the end of the month. The mining and quarrying group indicated considerable fluctuation, terminating the month with an upward tendency. Ontario and British Columbia maintained an average steadiness, although the other provinces alternated between declines and increases. Building and construction closed the last two weeks of the month by registering a steady decline. Railway construction, with the exception of a rallying increase during the third week, averaged a decline for the month. The lumbering group showed a steady increase until the middle of the month, after which nominal increases were registered. British Columbia indicated the greatest activity in this group.

The loss of time on account of industrial disputes during January was greater than during December, 1919, and January, 1919. There

### Strikes

were in existence at some time or other during the month 28 strikes, involving about 3,366 workpeople, and resulting in a loss of about 57,944 working days, as compared with 22 strikes, 2,828 workpeople and 48,960 working days in December, 1919; and 13 strikes, 1,000 workpeople and 20,737 working days in January, 1919. On January 1, there were on record 15 strikes, affecting 2,022 workpeople. Thirteen strikes were reported as having commenced during January, as compared with seven in December. Three of the strikes commencing prior to January and nine of those commencing during January

were reported terminated, leaving 16 strikes, involving about 2,347 workpeople, on record at the end of the month.

The prices movement was steeply upward, both the retail prices food budget and the wholesale prices index number showing substantial increases.

### Prices

Important advances occurred in grains, flour, bread, meats, livestock and in potatoes. There were also considerable increases in fish, textiles, hides, metals, lumber and in raw furs. The index number of wholesale prices rose to 336.4 as compared with 322.7 for December, 286.5 for January, 1919, and 136.5 for January, 1914. The retail prices food budget averaged \$15.30 as compared with \$14.73 in December, \$13.78 in January, 1919, and \$7.73 in January, 1914.

## II.—Industries and Trades

In the Maritime Provinces the steel industry showed increased activity. At

### Metals, machinery, conveyances

SYDNEY the output of the Dominion Steel Company's plant was, in tons, as follows: Pig iron, 15,400; steel ingots, 18,100; billets, 5,000; rods, 8,800; wire nails, 1,550. Two blast furnaces were in operation. Employment increased towards the end of the month. The construction of the plate mill was practically completed, and the first plate was expected to be rolled shortly. Boat and shipbuilding continued quiet, though great activity is anticipated in the spring, when a new plant will be started. Metal roofing, galvanized iron and other metal trades continued steadily active. The output at the SYDNEY MINES steel plant was, in tons, as follows: iron, 6,200; steel, 10,000. Four open hearth furnaces were in operation with one under repairs. At NEW GLASGOW employment conditions in this group showed some fluctuation. Old employees in the

steel industry, rolling mills, etc., were retained, and in some cases staffs were increased. Structural iron and steel and bridge and car workers were rather slack. Shipbuilders had increased employment owing to the laying down of a new keel, employing 200 men. The yards at TRENTON were also busy, running double shift, though outside work was hampered by severe weather. HALIFAX reported the shipyards working steadily, four ships being under construction for the Canadian Government. About 1,800 men were employed in two yards. At WESTVILLE the structural steel industry was steady. Engine and boiler industries, sheet metal and electrical trades were well engaged. At AMHERST unemployment resulted from the closing of the car foundry on December 31, but one mill re-opened on January 12, employing sixty men, and other departments, it was expected, would shortly re-start. Two hundred and ninety-five men were reported on the staff of the engineering works. Shipbuilding came

to a stop early in the month at YARMOUTH. At CHARLOTTETOWN the foundry and machine shops gave increased employment. Business continued active at the rolling mills at ST. JOHN, but some of the unorganized moulders engaged in a strike. Two hardware plants ran overtime for several weeks supplying United States orders. MONCTON reported steady employment in the locomotive and car repair shops of the Canadian National railways. A stoppage of work occurred early in the month at the Record Foundry owing to damage by fire, but work was resumed the following week. Foundries, machine and repair shops at FREDERICTON continued active. At MONTREAL the structural steel industry continued normal. The engine and boiler makers were busy, the sheet metal workers fairly active, but the shipbuilding and electrical trades were slack. QUEBEC reported dullness in structural iron and steel, also in stationary and portable steam engine shops. Boat and shipbuilding were very dull at first, but regained activity at the end of the month. Locomotive repair, and stove and furnace workers were very busy. Automobile trades were dull, and metal roofing work ceased owing to severe weather. At THREE RIVERS the shipyards were reported active, though hampered by shortage of raw material. The iron foundries were very busy. The iron, machine and repair shops at ST. HYACINTHE had a busy month. At SHERBROOKE quiet conditions prevailed among the architectural and structural iron and steel workers. The iron and steel foundries at OTTAWA and HULL had a busy month. At TORONTO the metal and machinery industries were generally active, but production in many lines was curtailed by steel shortage. The architectural and structural steel trade was quiet. Engine and boiler makers were busy, orders for steel for these trades having been placed as a rule several months ahead. Automobile, agricultural implement and machinery plants were active, but many of these worked below capacity owing to the shortage of raw material. Electrical workers were well

employed. Continued activity was reported at HAMILTON in all branches of this group, including pig iron and steel, boiler mill products, plates, etc., architectural and structural steel, and iron, locomotive, stationary and portable engine works, boat building, carriage and motor, stove and furnace, electrical appliances, agricultural implement, metal roofing, cutlery factories, etc. At SR. CATHARINES the boiler makers, electrical workers and other metal trades were well employed. At NIAGARA FALLS the metal working industries continued active, a shortage of toolmakers and other experienced men being noted. BROCKVILLE reported quiet conditions among the stationary and portable boiler makers; automobile workers were fairly well employed; stove and furnace trades were active; sheet metal workers fairly active, and tool makers busy in manufacture of axes, hammers and chisels. The locomotive works at KINGSTON were reported as being still slack. At BELLEVILLE employment was still reported good in this group, bar iron, nail, bolt makers, etc., having apparently no lost time. Portable engine and boiler makers and general foundry workers were busy. Boat and launch builders were also well employed. PETERBOROUGH reported the iron industries all very active during the month, with night shifts at some plants, and with a demand for moulders, core makers and machinists. Electrical workers and tool makers, and all classes of skilled men were in demand in the metal trades. At GALT a shortage of men was reported in all mould shops and stove and furnace plants. Very active conditions prevailed in the pig iron and rolling mills products, plates, bolts, rails, bars, wire rails, etc., also in metal roofing, galvanized iron, tin, copper, aluminium and other sheet metal work. Furnaces and converters were active, also architectural and structural steel and iron plants. Electrical apparatus workers were well employed. At BRANTFORD steady employment was reported in the stationary and portable engine and boiler shops, in the carriage and wagon and in the electrical fixture factories,

which ran full-handed. The gas engine, tractor and windmill factory was slack at the beginning of the month. The stove and furnace plants, the steel product factory and machine shops were all very busy, and farm implement factories worked full time. KITCHENER reported activity in all branches, especially foundries, sheet metal, and electrical fixtures. Bicycle factories were very busy, and portable and stationary engine and thresher factories were fairly active. Moulders continued to be in demand at GUELPH, where active conditions were still reported in the metal trades. At STRATFORD the metal trades were well employed, and boiler makers, electrical and railway repair workers continued active. A chronic shortage of moulders was noted at WOODSTOCK, where the stove and furnace factories were very busy, but sufficient help was available at the wagon and sleigh factories. LONDON reported general activity throughout the month, especially in the tin and enamel shops and stove and furnace factories. The rolling mills were very busy, with all the furnaces working, and thresher and threshing engine workers were active. Steady employment was reported in the iron works and foundries at St. THOMAS. Shortage of steel, especially for auto bodies, caused irregular employment of several hundred men at CHATHAM. Full time and normal conditions prevailed in other metal trades. Mechanics were reported in strong demand at WINDSOR, especially tool and die makers. Great activity, due to heavy foreign orders, prevailed throughout the group, including structural steel works, machine and tool shops, automobile factories and general foundries. The carriage factory at ORILLIA increased its plant, and the agricultural implement, wagon and stove factories continued active. The electro-foundry furnaces closed down about one-third time owing to shortage of raw material. The saw-mill and mining machinery factory needed skilled mechanics. Good conditions prevailed generally at OWEN SOUND throughout this group. The shipyard and railway shops at PORT ARTHUR re-

tained sufficient help to keep the work moving. At WINNIPEG all departments of the metal industry continued well employed, without any material change in the number of employees. Machinists and boilermakers were in strong demand at the end of the month. BRANDON reported some demand for labour at the engine works at the middle of the month. The rolling mills at MEDICINE HAT still remained closed, but another mill which was closed for a short time in December resumed operations. Foundries and other metal works were fairly active here and at LETHBRIDGE. At EDMONTON the machine and railway shops, electrical and sheet metal workers were well employed, the iron workers being normally active. About 1,200 men were laid off temporarily at the shipyards at VANCOUVER until steel arrived, which would be in three weeks, it was stated. Pig iron and rolling mill products, structural iron and steel, bridge and elevator work was reported dull. Locomotive and car repair and stationary and portable engine and boiler work was fairly active. Automobile, cycle and motor engine workers were busy, also the metal roofing, sheet metal and furnace trades. Ship carpenters were reported in demand at PRINCE RUPERT, and at VICTORIA orders were received from the Dominion Government for four wooden barquentines, on which 500 men will be employed. About 450 men were steadily employed at the iron shipyard. Iron foundries were rather slack, but stove foundries were very active.

SYDNEY reported less activity in aerated water and soft drink establishments. Abattoirs and

**Foods, liquors  
and tobacco**

meat packing houses continued steadily active. The sugar refinery at HALIFAX shut down at the middle of the month for repairs and also owing to shortage of raw sugar. At WESTVILLE steady conditions prevailed throughout this group. The milk factory at TRURO continued running full time with capacity help. CHARLOTTETOWN reported exceptional activity

throughout the food group. At St. JOHN the sugar refinery, which closed in December for lack of raw sugar, resumed operations on January 5, but had to close down again on January 19 for the same reason. Work was to start again on Feb. 2. Other branches in this group, excepting soft drinks, were reported steady. MONCTON reported the bakers and biscuit makers very busy, and at FREDERICTON the bakers and confectioners were busy and packing house workers well employed. Flour mills were also active, but soft drink factories were dull. Bakers at BATHURST had a good month. MONTREAL reported normal activity during the month in the flour and feed plants, abattoirs and meat-packing houses. Bakers and confectioners were busy. Soft drink makers were active, especially so at the beginning of the month, but cigarmakers were slack. In QUEBEC bakers and confectioners, tobacco and especially brewery workers were busy, but abattoirs and meat-packing trades were quiet and creameries and aerated water workers were dull. Conditions in SHELBROOKE were somewhat similar, but abattoirs and packing plants were more active. Flour and feed business was reported good. ST. HYACINTHE reported activity throughout this group. At THREE RIVERS a new creamery opened during the month. Bakers and confectioners continued busy, and soft drink, near-beer and tobacco factories were active. OTTAWA and HULL reported a good month for abattoirs, bakers, confectioners and dairy workers. In TORONTO flour and feed establishments and cereal plants were working steadily. Bakers and confectioners were active, and candy makers were in demand. Cigarmakers and brewers were fairly well employed. Fruit and vegetable cannery workers were fairly active. A large number of men were engaged in ice-cutting during the month. Soft drink workers were rather slack. General activity prevailed in HAMILTON throughout the food group. ST. CATHARINES reported slack conditions in the canneries, but flour and feed workers, butchers, bakers, confectioners and

others were busy. In BROCKVILLE activity prevailed in all branches, but flour and feed mills were hampered by irregular service of cars. Cigarmakers were rather slack. PETERBOROUGH reported confectionery workers rather slack, also cigarmakers. Creameries and dairies were active. KINGSTON, GALT and BELLEVILLE reported general activity. At the latter point a new cereal factory opened. BRANTFORD reported the flour mill running full handed, no longer making flour, but grinding chop. Bakers and confectioners had a busy month. Cannery workers were well employed, creameries and dairies ran full handed, and soft drink establishments were busy for the season. At KITCHENER meat cutters were in demand, and girls were wanted for candy making. Flour and chopping mills ran full time. Creameries and dairies were active and breweries fairly busy, but cigar makers worked short time and at the sugar factory only shippers continued at work. Owing to scarcity of grain at GUELPH the flour and feed mills were rather slack, but bakers and confectioners were fairly active. Breweries were also active, but the soft drink trade was dull. At STRATFORD steady employment was reported in all branches. Normal activity prevailed at WOODSTOCK. Female help was in demand for the bakery and confectionery trades at LONDON. Cigar makers were very busy. Many men were employed in ice cutting. Flour mill and confectionery plants at St. THOMAS worked double shifts, and tobacco plants were very busy. Full time with occasional overtime was the rule at the abattoir at CHATHAM, additional help being taken on and prospects being good. Flour and feed plants and meat packing departments, also bakers and confectioners were steadily active, but soft drink workers were rather slack. Cereal plants, breweries, creameries and dairies at WINDSOR were extremely busy. The last cigar factory closed during the month, shortage of help and material being the cause. The salt factories were very busy. Soft drink workers were very slack. The soft drink factories at SAULT STE. MARIE

reported breweries increasingly active and soft drink factories also very busy. WINNIPEG reported no change in this group. Abattoirs and meat packing houses continued with the same number of employees. Creameries and dairies reported no change in employment. Satisfactory conditions prevailed in the confectionery trades. Experienced bakers were in demand, but extra female help was dispensed with. Female help was required for chocolate dipping. Vegetable canners reported slight increase in employment. Steady staffs were maintained in the soft drink establishments. In BRANDON and REGINA activity prevailed in all branches excepting tobacco factories. At MOOSE JAW the abattoirs and meat-packing houses laid off 250 men owing to shortage of butcher cattle and hogs. Creameries reported a light receipt of milk and cream. At PRINCE ALBERT also a considerable number of men were laid off at the abattoir; some of these men being expected to find work in the bush. The flour mills at MEDICINE HAT worked day and night. Bakers, confectioners and creamery workers were active. Brewery workers at LETHBRIDGE were increasingly busy. CALGARY reported normal conditions in the flour and feed, and abattoir and meat-packing trades. Bakers and confectioners, brewery and soft drink factory workers were rather quiet. Employment in the meat packing industry at EDMONTON continued steady, about 450 men being employed. At FERNIE bakers and confectioners were very busy. Breweries were also very active, and dairies had a satisfactory month. VANCOUVER reported slackness at the sugar refinery owing to shortage of raw sugar. Busy conditions were noted in the flour, feed and cereal mills, also in abattoirs and packing houses, baking and confectionery, creamery, dairy and brewery trades. Cigar makers and soft drink workers were rather slack. Fruit and vegetable canning ceased for the season. The meat packing house at NEW WESTMINSTER continued normally active. VICTORIA reported steady conditions in the flour and feed mills, also in the

baking and confectionery trades. Breweries were increasingly active. Cigar makers were slack. Fruit and vegetable canners concluded a prosperous season.

A strong demand for female help for machines at the woollen mills and hat and cap factories was reported from TRURO. **Textiles,** The cotton factory at  
**cordage and** YARMOUTH had 471 em-  
**carpets** ployees on their staff

with little demand for further help. The cotton mills at ST. JOHN continued working steadily, the MILLTOWN plant employing about 580 hands. At MONCTON the underwear factory continued busy with 225 operatives; the woollen mills which had been undergoing remodelling were again in operation. The cotton mill employees at FREDERICTON were very busy. The MARYSVILLE plant had about 538 employees on the staff. MONTREAL reported the cotton, woollen and knitting factories busy, but the tent and sail makers rather slack. The cotton mills at QUEBEC were also very busy and working overtime. The cotton, woollen, hosiery, underwear and textile finishing factories at SHEBRROOKE were busy. Over 1,400 persons were steadily employed during the month in the cotton mills at THREE RIVERS. At TORONTO the woollen, hosiery and knitted goods mills were busy, with large export orders on hand, but operations were limited in some cases by scarcity of wool. The carpet and rug industry was very busy, and tent and awning workers were beginning work for spring. A demand for help was reported from HAMILTON for the cotton hosiery, underwear, knitted goods, silk and linen factories. General activity prevailed throughout the group, including felt, bleaching, rope, tent and carpet factories. Female help continued in demand in the knitting factories at NIAGARA FALLS. At ST. CATHARINES the woollen, knitting and silk operatives were actively engaged. The tent and awning makers at BROCKVILLE continued rather slack. The textile mills at KINGSTON had an active month. Female help was in strong demand at the woollen

mills at PETERBOROUGH, where the knitting workers and carpet weavers were very busy. A shortage of help was also reported from GALT at the cotton and woollen mills. The silk factories were also busy. At BRANTFORD help was in strong demand in the woollen mills, and the silk factories were also very busy. A shortage of men was reported in the cordage factory. At KITCHENER help was in demand at the twine factory, and the felt factory workers were busy. Female help was in demand at GUELPH in the cotton and worsted spinning mills, also knitters in the hosiery and knitted goods department. The linen and carpet mills were also very busy. STRATFORD reported a constant demand for female help in the woollen, hosiery and knitting factories, and a similar strong demand was reported from WOODSTOCK for the textile, underwear and knitted goods factories. At LONDON more female help was required for the hosiery factories which were all working overtime. The knitting factory at St. THOMAS continued busy and the pad and textile factory at CHATHAM ran steadily. At WINNIPEG the knitting factories retained all their hands, though work was rather slackier than in the previous month. The bag and the tent and awning industries also gave steady employment. VANCOUVER reported the knitting factories busy, but tent, awning and sail makers were rather slack.

Steam laundries at SYDNEY continued active. Female help was reported from

**Clothing and Laundering** TRURO to be very difficult to secure for the machines in the cap factory. At CHARLOTTETOWN the tailors and garment workers reported the January trade better than any corresponding month for years. Laundry workers were also well employed. St. JOHN reported great activity in the ready-made clothing factories, but the fur makers were quiet. Laundries were busy owing to ocean steamship arrivals. At MONCTON a demand for skilled help was reported in the tailoring shops, and the laundries

were also very busy. More help was required for the clothing trade at FREDERICTON. Steam laundries and cleaning and dyeing plants were busy. MONTREAL reported the ready-made factories getting busy on spring orders. Whitewear workers were active, and laundry workers fairly well employed. At QUEBEC the ready-made clothing factories were working overtime. Women's whitewear, hat and cap, glove and fur workers were also very busy. Steam laundries were quiet. Ready-made clothing workers, also laundries and cleaning establishments at SHERBROOKE were busy. At St. HYACINTHE the hosiery and underwear factories worked overtime, but employment in the ready-made clothing trades decreased towards the end of the month. The cuff and collar workers at St. JOHN'S and IBERVILLE were rather slack, but at SOREL, OTTAWA and HULL the clothing trades were reported to have a satisfactory month. TORONTO reported a strong demand for female help in the ready-made clothing, and similar conditions prevailed in the shirt, hat and cap, and glove trades. Women's whitewear factories and steam laundries were very busy. Help was required at HAMILTON for the shirt and collar and women's wear trades, and for the steam laundries and dyeing establishments. Ready-made clothing, hat, cap, glove and fur workers were also active. At NIAGARA FALLS female help was in demand for the corset, hat and suspender factories and for the steam laundries. The hat industry at BROCKVILLE was fairly busy. Fur workers were also active and glove makers busy. KINGSTON reported good conditions in the ready-made clothing trade. Steam laundries and dyeing establishments were also busy. The shirt factory at BELLEVILLE continued very busy, and the laundry workers were active. The women's whitewear factories at PETERBOROUGH had a busy month. A shortage of help was noted in the laundries and dyeing establishments at GALT, where the ready-made clothing and shirt factories were also busy. At BRANTFORD the overall factory ran full handed; also the ladies' whitewear factory. Female help

was in demand at KITCHENER in the shirt factories, and sewing machine operators were required. Openings for girls and boys were reported in the button factories and operators were required for the button-hole machines. Full time was the rule in the robe and clothing, shirt and collar and glove factories. Steam laundries and dyeing establishments had a good month. Knitters were in demand at GUELPH in the hosiery and knitted goods mills. The women's white-wear and felt hat workers, and the laundry and cleaning workers were all active. Ready-made clothing workers and steam laundries were active at STRATFORD. At LONDON the ready-to-wear men's clothing trade was very busy. More female help was required in the overall and glove factories at WINDSOR and laundries and dyeing establishments were very busy. At ORILLIA the ready-made clothing factory took on additional help. Experienced help was in demand at Winnipeg in the ready-to-wear clothing and shirt industries, and the glove trade took on inexperienced help as well. No more whitewear and cap workers were in demand, but employment was steady. Furriers were slack. Cleaners had a good month without much increased employment. Steam laundries and dyeing establishments were fairly busy at BRANDON, REGINA, MEDICINE HAT and CALGARY. At EDMONTON about 275 workers were steadily employed in the garment factory. VANCOUVER reported the ready-made clothing, shirt and women's white-wear factories busy, but steam laundries, dyeing and cleaning establishments rather slack. At VICTORIA the shirt and overall factories were still fairly active and laundry workers and cleaners had steady employment.

ST. JOHN reported the pulp mill still running steadily. The pulp mill at BATHURST worked to capacity, but no additions to the staff were called for. At SHERBROOKE and THREE RIVERS the pulp mills were busy, the plant at the latter point being enlarged. 900 men were employed

here. At OTTAWA and HULL the pulp and paper mills were all active except where ice conditions held up operations for a time in some mills. The cardboard factory continued busy. The felt and tarred paper workers at HAMILTON were still actively employed. The roofing factory at BRANTFORD ran overtime. At ST. CATHARINES the pulp and paper, beaver board and other pulp product mills gave steady employment. The pulp and paper mills at SAULT STE. MARIE were running day and night. At OCEAN FALLS and POWELL RIVER, B.C., the pulp and paper mills continued very busy; also at VICTORIA where all mills were running to capacity. The rubber roofing, felt and tarred paper plant operated steadily with increasing activity.

At SYDNEY the printers continued active, and at TRURO they were very busy, working overtime and with a demand for more help. CHARLOTTETOWN, ST. JOHN, MONCTON, FREDERICTON all reported steady employment for printers, pressmen and bookbinders. At MONTREAL printers, bookbinders and lithographers had a busy month, and at QUEBEC newspaper and job printers, bookbinders and paper box workers were actively employed. At SHERBROOKE the printers were busy, also at ST. HYACINTHE, where the paper box makers continued active. THREE RIVERS reported a good month for the printers, but at SOREL the printing trades were quiet. The printing plants at OTTAWA and HULL had a good month. TORONTO reported the printing, engraving and lithographing trades active, and bookbinders and paper box and bag makers were in demand. The same active conditions prevailed also at HAMILTON, ST. CATHARINES, BROCKVILLE and KINGSTON. BELLEVILLE reported exceptional activity in the printing trades. PETERBOROUGH reported the printers as busy and at GALT they were also active, while more help was called for at the paper box factory. Printers and paper box workers were busy at BRANTFORD. The

#### **Pulp, paper and fibre**

envelope factory was steadily active, about 300 hands, mostly girls, being employed. At KITCHENER and WATERLOO the printers were very busy, and at GUELPH activity prevailed in the printing and in the paper box industries. Steady conditions were reported in the printing trades at STRATFORD, WOODSTOCK, LONDON and ST. THOMAS. At the latter point the new paper box factory was running night shifts. Machine hands were in demand at the job offices in WINDSOR, where all departments of printing, binding, etc., were very active. WINNIPEG reported a slight demand for bookbinders. The box industry was less active, but without change in the staffs employed. The daily papers were obliged to suspend for a few days owing to paper shortage. Job printers continued well employed, with sufficient help available. At BRANDON the printers were busy, but REGINA and MOOSE JAW reported conditions slack owing to shortage of newsprint, newspapers being reduced in size and stocks being short for job work. MEDICINE HAT and LETHBRIDGE also reported some slackness compared with the previous month. At CALGARY and EDMONTON printers and bookbinders were well employed. Job printing was very active at FERNIE. VANCOUVER reported newspaper and job printers fairly active; publishing and binding trades less active, and paper box and novelty trades slack. At VICTORIA all lines of the printing industries were somewhat quiet. Paper box factories were busy, working overtime.

SYDNEY reported continued activity in the sash, door and planing mills. The

**Woodworking** sash, door and planing  
**and furniture** mills at WESTVILLE had  
a busy month. At

CHARLOTTETOWN coopers were active, but other branches of this group had a dull month. The brush factories at ST. JOHN were working overtime and broom factory was also busy. At FREDERICTON the sash, door and planing mills were active with no indication of the usual mid-winter lay-off. The canoe makers were busier than ever

before. At MONTREAL the wooden box and furniture workers had a fair month, and the piano industry was active. QUEBEC reported the sash, door and planing mills, the wooden box, broom and brush factories all busy. At SHERBROOKE the sash, door and planing mills were quiet, but the chair factory was busy. The sash, door and planing mills were active at ST. HYACINTHE, the wooden box factories were very busy, and the organ makers were well employed. At THREE RIVERS the planing mills had a good month and the wooden toy factory was busy. SOREL reported conditions rather slack. The box factories at OTTAWA and HULL were fairly busy, though not running to capacity. The sash and door factories were active. TORONTO reported the sash, door and planing mills, also the furniture and piano factories as all busy. Brush and broom workers and toy makers were also active. Activity was reported from HAMILTON throughout the group including the sash, door and planing mills, wooden box, broom, furniture and toy trades. At NIAGARA FALLS the planing mills were quiet owing to the check on building due to severe weather. Female help was in demand in the sporting goods factory. ST. CATHARINES and BROCKVILLE reported activity in the planing mills, the furniture workers at the latter point being fairly well employed. At KINGSTON the sash, door and planing mills were active, the broom factory and the piano factory workers having normal employment. Conditions at BELLEVILLE were considered good for the season of the year. The canoe makers at PETERBOROUGH were working overtime. Pattern makers were very busy and planing mills and box factories were active. A shortage of help was reported in the sash, door and planing mills at GALT, and the furniture factories were also busy. At BRANTFORD overtime work was frequent in the sash, door and planing mills and the piano factories worked full-handed. KITCHENER reported a demand for cabinet and machine men in the furniture trade. Active conditions prevailed in the sash, door and planing mills, wooden

box factories, wooden ware and toy, and piano and organ factories. The cooperage plant at WATERLOO was also busy. At GUELPH the sash, door and planing mills were fairly busy and piano, organ and sewing machine makers were active. STRATFORD reported employment good in the planing mills, furniture, chair, cooperage and broom factories. At WOODSTOCK a constant demand for skilled help, machinists, bench hands and finishers was noted in the furniture and chair factories. The sash, door and planing mills at LONDON continued steadily active, and the piano makers were also active. The new furniture factory at ST. THOMAS was busy. WINDSOR reported a shortage of woodworkers, the season being unusually busy. The piano industry was fairly active, though not to the same degree as before the war. At ORILLIA the planing mills steadily added to their staff and a shortage of skilled help was reported in the furniture factory. At WINNIPEG the sash, door and planing mills remained without change in employment, the regular staffs being carried. Upholsterers were in strong demand at the end of the month. The sash, door and planing mills were busy at BRANDON, but quiet at REGINA and MOOSE JAW. At MEDICINE HAT and CALGARY these trades were fairly busy. FERNIE reported a quiet month at the sash and door factories. At VICTORIA the sash, door, and planing mills, and wooden box factories were fairly busy.

The tannery trade at ST. JOHN continued active. At FREDERICTON the shoe factory and larrigan works were running full time and tanneries and leather workers were generally active. MONTREAL reported the boot and shoe workers active; tanneries and rubber factories were busy, and trunk, bag and harness makers were fairly well employed. Workers in the rubber factories were active. The strike reported last month still con-

tinued, but sufficient labour was forthcoming to keep the industry active. At QUEBEC the boot and shoe factories were busy, with capacity help. Leather stiffeners and sheeting makers were also busy, but trunk and bag workers were rather slack. ST. HYACINTHE reported steady activity in the tanneries. Shoe factory workers were still active with signs, however, of a seasonal falling-off. Harness makers were very active. THREE RIVERS reported activity in the boot and shoe trades and at SOREL the tannery and shoe workers had a good month. A continued demand for shoe workers was reported from TORONTO. Trunk and bag, harness and rubber trades had a busy month. HAMILTON reported general activity throughout the leather group. At ST. CATHARINES rubber factory workers had steady employment. Harness and belting trades at BROCKVILLE were fairly active, and the tannery at KINGSTON had a very busy month. PETERBOROUGH reported that the leatherworkers were busy and at BRANTFORD the shoe factories worked full handed. Help was in demand for the shoe factories at GALT. At KITCHENER experienced side lasters on niggerhead machines were in demand at the boot and shoe factories. The tanneries had a busy month, the trunk and bag makers were working full time. The rubber tire factories worked short handed, and help was also in demand at the rubber footwear factories. The trunk and bag factory at WATERLOO was very busy. At STRATFORD the tannery workers were busy and the harness repairers were active. Employment was also good at WOODSTOCK, the local supply of help being fully taken up. At LONDON the tannery and shoe factory was busy to capacity, and at ST. THOMAS skilled workers were in demand at the shoe factories. At BRANDON the tanneries and trunk factories were busy, but at CALGARY the trunk, bag, harness and horse goods workers were slack. VANCOUVER reported the boot and shoe workers actively employed.

**Leather,  
boots, shoes  
and rubber**

The clay products trades at WESTVILLE were in steady operation. Cut stone and

**Clay, glass  
and stone**

granite workers were quiet. ST. JOHN, N.B., reported slackness in the cut stone and granite trades. At MONTREAL the glass factories were reported busy, but at QUEBEC the stone cutters were very slack and the brick and tile making trades were at a standstill. The cut stone and granite workers at SHERBROOKE were fairly active, but the brick yards were quiet. The pottery workers at ST. JOHN and IBERVILLE were unemployed from lack of material. At TORONTO the glass factories had a good month. HAMILTON reported activity in the cut stone and granite, brick, tile and sewer pipe, cement, lime and pottery and porcelain trades. At BROCKVILLE the clay, glass and stone workers were very slack. Granite and marble workers at KINGSTON were reported active, and cut stone workers were fairly well employed. BELLEVILLE reported the cement plant working day and night. Pottery and sewer pipe makers were fairly busy. Activity prevailed in the cut glass factory at PETERBOROUGH, and in the brick, tile and sewer pipe factories at GALT. At KITCHENER the stone cutters and marble workers were still steadily employed, and the brick, tile and sewer pipe makers were fairly active. STRATFORD reported a decline of activity among brick and tile workers. Stone cutters at LONDON continued a very busy season, with good prospects. Cut stone and granite workers at REGINA were quiet. At MEDICINE HAT the brick and tile plants were fairly busy and pottery workers were about normally employed.

At SYDNEY the lubricating oil and grease trades continued steadily employed.

**Paints, oils,  
chemicals,  
explosives**

ed. About 1,215 men were employed at the oil refinery at HALIFAX, but no new men were taken on. The paint and varnish industry at MONTREAL continued normal, and the chemical, drug, and medicine plants were busy. At QUEBEC the cartridge and ammunition

workers had a dull month. SHERBROOKE reported fair employment in the gunpowder, also in the acid, extract, drug and medicine factories. The paint establishments at THREE RIVERS had an active month. At TORONTO the paint, varnish and soap factories were active, and the chemical and drug trades were busy. HAMILTON also reported activity in the soap, powder and cartridge, and acid and drug factories. The paint and varnish plants at BRANTFORD continued busy, and the oil and grease workers at KITCHENER had a good month. At WINDSOR more female help was in demand in the toilet soap and perfume factories. The paint and varnish trades were also busy preparing for the spring rush. Soap factories at WINNIPEG continued without change in staffs. The soap factory at REGINA closed down for reorganization on changing ownership, and will remain shut until April. The linseed oil mills at MEDICINE HAT continued very busy, running day and night shifts. VANCOUVER reported the Ioco oil refinery busy. Paint, varnish and soap makers were rather slack. At VICTORIA the paint and soap factories were increasingly active, and chemical and explosive workers were also well employed.

The earnings of the Canadian Pacific Railway during December were \$17,-

025,583, as compared

**Railways,  
shipping and  
'longshore work**

with \$15,750,854 in December, 1918. The number of persons employed by the C.P.R., G.T.R. and C.N.R. on railway operation, including general offices, train and engine crews, station forces, sleeping, dining and parlour car employees, showed a net increase of 700 persons only during the month of January, the number of employees at the end of the month being 65,650, as compared with 66,350 at the end of December. In the middle of the month, however, the total fell to 65,300, but a slight recovery was made during the last two weeks. The net decrease during the month was accounted for by reductions of 500 and 350 persons re-

spectively for the C.P.R. and C.N.R., and an increase of 150 persons for the G.T.R. SYDNEY reported that during January the railways, steam and electric, continued active. Railway repair shops, also transfers, liveries and garages were steadily active, but navigation and 'longshore work was slack. At WESTVILLE the railwaymen were well employed, and street railways increased their staffs. Repair shops were busy. Transfers, liveries, etc., were quiet. At CHARLOTTETOWN railroad conductors, locomotive engineers and firemen, trainmen, telegraphers, trackmen, freight handlers, and livery and express men, were all well employed. ST. JOHN reported exceptional activity in the steam railways. Street railways were also very busy. The port was congested with shipping, twenty more liners arriving between the opening of the winter port and February 1 than in the corresponding period last year. As the vessels, however, were mostly in ballast and taking grain cargoes, there was little extra work for 'longshoremen. Transfers, liveries and garages were busy. At MONCTON employment was good on the Canadian National Railways, and at FREDERICTON railway workers were busy. At MONTREAL the railways were well manned and had a large volume of business. Railway repair shops had plenty of work. QUEBEC reported very heavy freight traffic on the steam railways, but passenger traffic not so heavy. Street railways were slack as usual at this season. Increased employment was noted in the railway repair shops. Navigation and 'longshore work was practically at a standstill. Transfer, livery and garage work was dull. At SHERBROOKE the railways were very busy in their passenger department, but less so in freight. Railway repair shops were well employed, and transfers, liveries and garages were fairly active. THREE RIVERS reported transportation workers generally active. Railway employees and teamsters at ST. JOHN'S and IBERVILLE had an active month, and employment was also satisfactory at SOREL. At TORONTO the steam

railways experienced the usual seasonal difficulties due to severe weather and snowstorms interfering with traffic during the latter part of the month. Street railways were less busy. Railway repair shops had plenty of work, and garages were busy. HAMILTON reported activity on the steam and electric railways. 'Longshoremen were slack, except those getting boats ready for spring. At NIAGARA FALLS freight movements by rail were heavy, though a temporary embargo, designed to relieve congestion due to snow blockades, restricted traffic for a time. Teamsters and delivery drivers were in demand. ST. CATHARINES reported railway work active, and at BROCKVILLE the railways and repair shops were busy, and liveries unusually busy. Activity prevailed in the steam and electric railways and repair shops at KINGSTON, also in the transfers, liveries and garages. All sections of railway work were reported brisk at BELLEVILLE, BRANTFORD, GALT and KITCHENER. The G.T.R. repair shops at STRATFORD and LONDON were active throughout the month. The railways worked under difficulties due to snow. ST. THOMAS reported the railway and shop employees busy. Garages were reported very active at SAULT STE. MARIE. At PORT ARTHUR and FORT WILLIAM the shipyard and railway shops employed enough men to keep the work moving. Freight sheds, coal docks, elevators and all 'longshore work had definitely closed down, each of these industries having only a retaining staff looking after machinery and doing the necessary work on rail transport. WINNIPEG reported a demand for skilled mechanics for railway repair work. Railway telegraph linemen were also wanted. Street railway staffs were unchanged. At BRANDON there was activity in the steam and street railways, repair shops, transfers and garages. Railway employees at REGINA were active. On the street railways service was reduced for a period owing to lack of power. At MOOSE JAW the railways took on a few more men. MEDICINE HAT reported great activity in all departments of the C.P.R. At CALGARY the railways were

fairly busy, but repair shops were quiet. Transfers, liveries and garages were normal. VANCOUVER reported the steam railways less active than in the summer months, but the electric railway was busy. Repair shops were busy. Navigation and longshore work was rather slack. Transfers and garages were busy. VICTORIA reported coasting steamer trade quiet, the adverse money exchange rate stopping travel to California. Railway repair shops were active, and garages continued busy.

FREDERICTON reported continued preparations for opening the antimony mines at Lake George.

**Mining (metalliferous) and Quarrying** At QUEBEC stone quarrying was stopped by severe weather. At

THETFORD MINES the asbestos industry closed down for the first week, causing unemployment. Later in the month miners were short at the Bell mine, causing shortage of raw material at the mills. Severe weather also hampered operations. The mica industry shut down for about twelve days, but resumed later, about 230 men being involved. At COBALT the month's record for the silver-producing mines compared favourably with the opening month of 1919, when the price was \$1.01½ per ounce, as compared with current quotations of \$1.35 per ounce. Ore shipments for the month amounted to 19 cars containing approximately 1,445,578 pounds of ore; this compares with 14 cars containing approximately 1,052,925 pounds of ore in December. Bullion shipments for the month amounted to 311 bars containing 337,373.78 fine ounces of silver, as compared with 509,776.04 fine ounces in December. The gold camps at PORCUPINE and KIRKLAND LAKE were very active. The indications are that the output of these camps during 1919 amounted to close on \$10,000,000. At NELSON and TRAIL the smelters, refineries and concentrators continued active, though hampered by shortage of ores and water, practically all the men being employed. Considerable ore was reported to be coming to NELSON from Sullivan mines

at KIMBERLEY, where about 200 men were said to be at work, although picketing still continued. PRINCE RUPERT reported that the Premier Mines at STEWART were still slack owing to labour disputes.

A scarcity of skilled miners was reported from Cape Breton. SYDNEY reported the output of the Dominion Collieries during January as 276,-

000 tons against 275,000 tons in December. The output of coke was 25,800 tons with 120 coke ovens working, compared with 15,500 tons in December. The output of the Nova Scotia Steel and Coal Company at SYDNEY MINES was 55,000 tons in January, compared with 56,000 tons in December. 5,800 tons of coke were produced with 150 ovens, 40 ovens undergoing repairs. Skilled miners were in demand at GLACE BAY at the beginning of the month. WESTVILLE reported the miners operating steadily with 1,200 men on the payroll, about 500 employed at Thorburn and 700 at Westville. Production totalled about 38,930. The strike at the Minto collieries at FREDERICTON still continued, the Company, however, producing about 100 tons daily from stripping operations with steam shovels. A number of strikers left for other local collieries or for Nova Scotia. In the western provinces a number of unemployed miners at ESTEVAN were awaiting the reopening of the mines. Towards the end of the month there was a demand for men at the employment office in REGINA for the coal mines of Saskatchewan. At LETHBRIDGE all the mines were reported to be working to capacity. CALGARY reported the mines in that district fairly busy, with some lack of experienced men. At DRUMHELLER and RED DEER there was a demand for experienced miners, also in the EDMONTON district. At FERNIE the mines were reported fairly active, with experienced miners in demand. A half-day shut-down occurred during the month through a dispute with the One Big Union. Coke loaders were in demand at the beginning of the month. The coke industry, however, was completely closed down,

though at MICHEL a small number of ovens continued to operate. NANAIMO reported the mines of Vancouver Island as working to capacity, with staffs slightly increased, all restrictions on export being removed.

The value of building permits issued in 35 cities during December amounted

to \$4,945,539, as compared with \$6,936,438 in the previous month, and \$1,642,362 in December, 1918.

Building and construction were reported dull throughout the Maritime Provinces in January, with some demand, however, for labour for railway construction. Any activity at SYDNEY consisted of finishing work started in summer. At HALIFAX carpenters, plumbers and inside workers were in slight demand; painting was at a standstill, and there was much unemployed general labour. CAMPBELLTON reported some slight activity at the close of the month. At FREDERICTON the Marysville dam was completed early in the month, releasing forty men. Regular building was very slack. Building operations practically ceased at CHARLOTTETOWN, AMHERST and NEW GLASGOW. At MONCTON building was confined to interior finishing, but in the first week there was a slight demand for carpenters and bricklayers. The Housing Commission plan to erect a large number of houses. About 1,400 men were employed in this district in construction for the Canadian National Railways. St. JOHN reported a slight demand for carpenters and labourers. The Housing Board called for tenders for 15 houses. At BATHURST construction work on the dam and power house at Bathurst Mines progressed favourably. This will give employment for about 200 men until summer. Additional carpenters and men for special work were taken on during the month by the contractors. MONTREAL reported the building trade quiet with a number of uncompleted contracts which will provide work for some time. At QUEBEC there was slight activity in alteration to an industrial plant. SHER-

BROOKE reported a cessation of building except finishing work. At St. HYACINTHE about 400 men were employed at a new factory. Building at THREE RIVERS was fairly active, but hampered by the heavy cost of material. A new technical school and a new paper mill were in course of construction. Conditions at SOREL were very quiet. A small amount of building was in progress at THETFORD MINES. Some outside work was done at OTTAWA and HULL when weather permitted, and a great amount of interior work. At TORONTO the building trade showed a considerable falling off owing to severe weather, many men being laid off. HAMILTON reported the building tradesmen actively employed with the exception of bricklayers and masons. Weather conditions hindered building at NIAGARA FALLS, but carpenters were all employed, though other trades were slack. Additional men were employed on the Hydro-Electric power works. Severe weather halted outside work at St. CATHARINES and BROCKVILLE, but inside work continued. Building at KINGSTON was at a standstill, but at BELLEVILLE and PETERBOROUGH slight activity still continued. At BRANTFORD building still continued active, though hampered by shortage of material. Operations at GALT were delayed by bad weather. KITCHENER reported continued activity among bricklayers and carpenters, this being likely to continue through winter. At GUELPH and STRATFORD conditions were quiet, but carpenters were still active on indoor work. At WOODSTOCK building practically ceased, and at LONDON interior work only was in progress. WINDSOR reported a continuance of activity on construction. Preliminary work started at SAULT STE. MARIE on the erection of a new camp, 200 men being engaged. At WINNIPEG skilled mechanics were fairly well engaged considering the season, but considerable unemployment existed among unskilled workers. BRANDON reported employment good for the winter season, and at PORTAGE LA PRAIRIE work on the Hydro-Electric resumed. A number of building trade mechanics continued in employment on inside work,

but carpenters, painters and plasterers were being laid off. At MOOSE JAW construction was held up by the weather. Carpenters and bricklayers were slack at SASKATOON, though plumbers were fairly busy. Building fell away during the month at MEDICINE HAT, LETHBRIDGE and CALGARY, but considerable activity was reported still from EDMONTON in all the building crafts. At NELSON a demand for carpenters and labourers was reported for repair work on bridge trestles. Some new work started during the month at PRINCE RUPERT, but there was little demand for labour. VANCOUVER reported the building trades as slack, though some activity still continued. At NEW WESTMINSTER construction work was dull. VICTORIA reported building and construction as showing some improvement, with great activity ahead. At NANAIMO some new buildings were under construction.

The C.N.R., C.P.R. and G.T.R. showed a reduction of 1,000 persons in their railway construction (including maintenance of way) staffs during the month of January, the number of employees being 26,500 at the end of the month, as compared with 27,500 at the end of December. This decrease was more than accounted for by a reduction of 1,100 persons in the staff of the C.N.R. The G.T.R. showed an increase of 100 persons, and the C.P.R. reported the same staff at the end of January as at the end of December. During the middle of January the C.P.R. payroll showed about 300 persons less than at the beginning and end of the month, which accounted for the combined staffs of these three companies being some 300 persons less in the middle of the month than at the end.

Lumbering operations in the Maritime Provinces continued steadily. Early in

**Lumbering** the month the majority of camps in New Brunswick about completed their cutting and started hauling to river banks. The value of the lumber yield in Nova Scotia for 1919 totalled \$19,000,000, or more than double the value

of the previous annual yield. The probable lumber cut in New Brunswick is estimated at about 325 million feet, which will be a record cut. The snowfall in the middle of the month assisted operations. HALIFAX continued to supply men to the surrounding camps. Experienced men were in demand for the woods around NEW GLASGOW, but later the camps were working to capacity, and were well supplied with men. At SYDNEY men were asked for, but few applied. CAMPBELLTON reported men being laid off early in the month, absence of snow making it impossible to haul logs to the rivers, but later the heavy snowfall increased activities. BATHURST reported the lumber camps well filled and less shifting among the men. At FREDERICTON the lumbermen reported a good month in the woods, the lumber cut being a record, with sufficient help on hand. QUEBEC reported great activity in the surrounding camps, with snow sufficient for the work. Hauling was in full swing in the lumber camps at SHERRBROOKE. The sawmills were fairly active. At OTTAWA and HULL renewed difficulty was reported in securing men for the woods, but the camps were busy. The lumber camps near PETERBOROUGH employed all available men, and the largest cut for years was looked for. The mills were being prepared for spring work. A shortage of experienced woodsmen was reported from OWEN SOUND. At SAULT STE. MARIE lumbering operations were somewhat hampered owing to great depth of snow. Men were in demand at all times not only in log camps but for cedar and pulpwood camps. The demand for woodsmen continued strong at PORT ARTHUR and FORT WILLIAM, a number of men arriving from Winnipeg and Toronto. The camps at Cameron Falls were comparatively free from labour troubles, but local disputes occurred where the One Big Union was strong. There was a strong demand for bush men, tie makers and cordwood cutters at WINNIPEG for surrounding districts, the shortage being general throughout Manitoba, Saskatchewan and Alberta. At FERNIE lumbering was very active,

camps running with full crews, with some demand for sawyers, swampers and hookmen. At NELSON and CRANBROOK operations were hampered for a time by want of snow, but great activity prevailed later. VERNON reported occasional shortage of help, the logging camps being busy. The lumber mills were quiet. At KAMLOOPS the demand for labour slackened. Some camps were quarantined on account of smallpox. PRINCE RUPERT showed increasing activity in the surrounding camps throughout

the month. At VANCOUVER a demand for tie makers and stationmen was noted at the middle of the month. The saw and shingle mills were busy. NEW WESTMINSTER reported a busy month at the saw mills and shingle mills, which had orders enough to keep working at capacity for months. At VICTORIA the lumber and logging industries were very active. Loggers were in demand for new camps. NANAIMO reported activity in the logging camps, but little demand for lumbermen.

## INDUSTRIAL DISPUTES INVESTIGATION ACT, 1907

### PROCEEDINGS FOR THE MONTH OF JANUARY, 1920, WITH TEXT OF BOARD'S REPORT

**D**URING the month of January the Department received a report from the Board established to deal with the dispute between the Dominion Coal Company, Limited, Glace Bay, N.S., and certain of its employees, being members of District No. 26, United Mine Workers of America. Two applications were received for the establishment of Boards and further appointments were made in connection with applications which had been received during previous months.

#### Applications received

During the month of January applications for Boards were received as follows:

(1) From the Canadian General Electric Company, Ltd., Peterborough, Ont., in connection with a dispute with certain of its employees, being armature winders, members of Local Union No. 261, International Brotherhood of Electrical Workers. As this industry did not fall within the scope of the Industrial Disputes Investigation Act, a Board could be established only by the joint consent of the disputants. This consent was granted by the employees and a Board was established, composed as follows: His Honour Judge E. C. S.

Huycke, Peterborough, Ont., chairman, appointed by the Minister in the absence of a joint recommendation from the other two members, Messrs. J. G. Merriek and F. Bancroft, Toronto, nominees of the company and employees respectively.

(2) From the employees of various coal dealers, members of the Retail Merchants' Association of Edmonton, being members of Local No. 514, Teamsters, Chauffeurs, Stablemen and Helpers' Union. As this industry did not fall within the scope of the Industrial Disputes Investigation Act, a Board could be established only by the joint consent of the disputants. This consent had not been received from the employers at the close of the month.

#### Other proceedings under the Act

During the month of January other proceedings under the Act took place as follows:

(1) The Board established to deal with the dispute between the Nova Scotia Steel and Coal Company, Limited, Sydney Mines, N.S., and certain of its employees, being members of District No. 26, United Mine Workers of America, was completed by the appoint-

ment of His Honour Judge G. Patterson, New Glasgow, N.S., as chairman, on the joint recommendation of the other two Board members, Professor Howard Murray, Halifax, and Mr. J. C. Watters, Inverness, nominees of the company and employees respectively.

(2) The Board established to deal with the dispute between the Niagara, St. Catharines and Toronto Railway Company and certain of its employees, being motormen and conductors, barn and shop men, powerhouse men, etc., members of Division 846, Amalgamated Association of Street and Electric Railway Employees of America, was completed by the appointment of His Honour Judge Colin G. Snider, Hamilton, Ontario, as chairman, the appointment being made by the Minister in the absence of a joint recommendation from the other two members, Messrs. George

D. Kelley, Ottawa, and J. A. McAninch, Merritton, Ont., nominees of the company and employees respectively.

(3) On the employees' application, and with the consent of the employer, a dispute affecting the rates of wages, etc., in the mines of the Inverness Coal and Railway Company, Inverness, N.S., was referred to the Board of Conciliation and Investigation established to deal with a similar dispute in the mines of the Nova Scotia Steel and Coal Company, Sydney Mines, N.S. The Board in question was composed as follows: His Honour Judge G. Patterson, New Glasgow, chairman, appointed on the joint recommendation of the other two Board members, Professor Howard Murray, Halifax, and Mr. J. C. Watters, Inverness, nominees of the company and employees respectively.

#### **Report of Board in Dispute between the Dominion Coal Company, Limited, Glace Bay, N.S., and certain of its employees.**

A REPORT was received from the Board established to deal with the dispute between the Dominion Coal Company, Limited, Glace Bay, N.S., and certain of its employees, being members of District No. 26, United Mine Workers of America. The Board was composed as follows: Dr. Clarence MacKinnon, Halifax, chairman, appointed on the joint recommendation of the other two members, Col. W. E. Thompson, Halifax, and Mr. J. C. Watters, Inverness, nominees of the company and employees respectively. The Board's report was unanimous and was accompanied by a copy of a signed agreement between the disputants.

#### **Report of Board**

In the matter of the Industrial Disputes Investigation Act, 1907, and of a dispute between the Dominion Coal Company, Ltd., employer, and certain of its employees, members of

the United Mine Workers of America, District Number 26.

To the Minister of Labour:

Sir,—

We have the honour to submit the following report and are happy to inform you that a complete and satisfactory agreement has been effected between the parties concerned.

The question at issue arose from a desire on the part of the miners for a standardization of the scale of wages among the various mines in the Maritime Provinces in so far as this was practicable, and a schedule was presented to the Dominion Coal Company by the men which in their judgment would accomplish this purpose within its areas. The operators did not feel themselves in a position to accept this schedule unless accompanied by certain guarantees. Application was accordingly made for a Board of Conciliation, which was con-

stituted under your department and began its operations on December 5th, 1919.

The Board, interpreting its chief function to be that of conciliation, decided first to bring the disputing parties into direct negotiation with each other. In this effort they were happily seconded by the amicable and conciliatory spirit and mutual confidence exhibited on both sides from the beginning. Everyone was deeply anxious to secure an equitable adjustment of the difficulties and to stabilize industrial conditions as much as possible. The suggestion of the Board that the scale of wages should be fixed by the operators and miners' committee in conference by themselves, was cordially accepted by both parties.

These conferences met daily for nearly six weeks with only a brief interval at Christmas time. An entirely new schedule covering all classifications of work (more than 300) in mines and machine shops was agreed upon, together with some modifications in the conditions of labour. This new schedule granted a generous advance in the rate of pay and brought it up to the increased standard of living. The Board did not remain in session during all the time of these conferences, but adjourned whenever it felt assured that the chief difficulties had been overcome. It convened again, however, to receive a report and to adjust the final agreement. This was unanimously reached and was signed by the representatives of the Company and the Miners' Committee on January 15th, 1920, and referred to the local Unions for ratification. As soon as such ratification has been given, the new scale will go into operation and will take effect from January 1st, 1920. The agreement covers a period of one year, with the proviso that in the event of a change in the cost of living, or disturbance in the economic situation, or disparity in the scale of wages of other companies, either party could ask for revision at the end of each four months' period.

Attached are (1) full text of agreement, and (2) minutes of meetings.

We have the honour to be,

Sir,

Your obedient servants,

(Sgd.) CLARENCE MACKINNON,  
Chairman.  
(Sgd.) J. C. WATTERS.  
(Sgd.) W. E. THOMPSON.

Memorandum of Agreement made and entered into this 15th day of January, A.D. 1920, between the Dominion Coal Company, Limited, and District Number 26 of the United Mine Workers of America, representing the employees of the said Dominion Coal Company, Limited.

*Whereas*, disputes having arisen between the said The Dominion Coal Company, Limited, and its employees as to wages and conditions of labour;

*And, whereas*, the said Dominion Coal Company, Limited, and the said employees, acting through the United Mine Workers of America, District No. 26, appointed duly authorized representatives to represent them respectively before the said Board of Conciliation, to consent to and sign any agreement, and such agreement shall be binding upon the parties hereto subject to the ratification of the Local Unions;

*And, whereas*, after many consultations with the said Conciliation Board and conferences between the representatives of the parties hereto, an agreement has been arrived at;

*Now this Agreement witnesseth* that the said parties hereto agree to accept and be governed by the Schedule of Wages and Working Conditions as set out in the Schedule hereto annexed and that the same shall remain in force for the period of one year from the first day of January, A.D. 1920, and to continue in force thereafter subject to thirty days' notice from either party;

*Provided, however*, that should there be any change in the cost of living or any disturbance in economic conditions, or any disparity in the Schedule of Wages paid by any other Coal Company in the Province of Nova Scotia, this Schedule may be open for revision at the instance of either party to this agreement at the end of each four months' period during the existence of this Agreement.

It is further understood and agreed that the above proviso shall not be considered to apply to any Coal Company within the Province of Nova Scotia which produces less than two hundred tons of coal per day or operating upon a seam of coal less than four feet in thickness.

In witness whereof the parties hereto have signed this Agreement under the hands of their representatives being accredited and duly au-

thorized in that behalf by the said parties hereto.

Signed and delivered in duplicate at Halifax the day and year first above written.

For Dominion Coal Company, Limited:

(Sgd.) H. J. McCANN.

(Sgd.) ALFRED J. TONGE.

(Sgd.) M. BLUE.

For the United Mine Workers of America,  
District Number 26:

(Sgd.) ROBERT BAXTER.

(Sgd.) J. B. McLAHLAN.

(Sgd.) WM. HAYES.

## COMMISSIONER APPOINTED TO ENQUIRE INTO THE ALLEGED LOCKOUT OF CERTAIN EMPLOYEES OF THE FIRM OF GUILLET AND SON, MARIEVILLE, QUE.

**D**URING the month of October information reached the Department of Labour of an alleged lockout of certain of the employees in the straw hat department of the firm of Guillet and Son, Marieville, Quebec, on account of union affiliation; also that another group—the felt hat department—had also been locked out a few days after the other employees in question.

An officer of the Department of Labour visited Marieville with a view of bringing about some settlement, but was unsuccessful in effecting any adjustment of the difficulty.

At the end of January the dispute was still in existence, and the workers affected, it is claimed, were unable on this account to obtain employment elsewhere, and were experiencing much hardship and privation.

In view of these circumstances Mr. Joseph Perrault, architect of Montreal, was appointed a Commissioner, under the authority of the Inquiries Act, to investigate and report upon the causes and circumstances which had led up to the dispute, and to make any recommendations which he might see fit looking towards an adjustment. The text of the order-in-council in this matter is as follows:

P. C. 203.

Certified copy of a report of the Committee of the Privy Council, approved by His Excellency the Governor General on the 29th January, 1920.

The Committee of the Privy Council have had before them a report, dated 27th January, 1920, from the Minister of Labour, recommending that Mr. Joseph Perrault, Architect, of Montreal, P.Q., be appointed Commissioner under the provisions of Part 1 of Chapter 104 of the Revised Statutes of Canada, 1906, commonly called the Inquiries Act, to investigate and report upon the principal causes and circumstances which led in the month of October last to an alleged lockout of a number of the employees of the firm of Guillet and Son, hat manufacturers, of Marieville, P.Q., the said lockout being apparently still in existence and the workers affected being, as it is claimed, unable through the continuance of this dispute to obtain employment elsewhere.

The Minister further recommends that the Commissioner has the right to determine the manner of conducting the proceedings in respect of such inquiry and to make any recommendations which he may see fit looking to the adjustment of the above mentioned dispute, the report of the Commissioner to be submitted to the Governor General in Council for any action which may be deemed practicable and expedient.

The Minister further recommends that all fees and expenses payable to the Commissioner or to witnesses called in connection with the inquiry shall be governed by the provisions as to such matters of the Industrial Disputes Investigation Act, 1907, as if the Commission had been a Board of Conciliation and Investigation established under that statute.

The Committee concur in the foregoing recommendations and submit the same for approval.

(Sgd.) RODOLPHE BOUDREAU,  
Clerk of the Privy Council.

## STRIKES AND LOCKOUTS IN CANADA DURING JANUARY, 1920

**T**HIRTEEN strikes, involving about 1,344 employees, were reported as having commenced during January. There were in existence at some time or other during the month 28 strikes, involving about 3,366 workpeople. The total time loss on account of industrial disputes was estimated at 57,944 working days, as compared with 48,960 in December, 1919, and 20,737 in January, 1919. The time loss occasioned by the 13 strikes which began in January was 13,243 working days, while a loss of 44,701 is charged to the 15 strikes that commenced prior to January. Termination was reported in the case of three

disputes which commenced prior to January. Ten of the disputes commencing during January terminated during the month, leaving the following 15 strikes, affecting approximately 2,347 workpeople on record January 31: lumber workers, Hylo, Alta.; miners, Kimberley and South Minto; pottery workers, St. John's, Que.; machinists, St. John, N.B.; moulders, Brantford; moulders and coremakers, Sherbrooke; moulders and patternmakers, Toronto; shipbuilders, Sorel; garment workers, Montreal; millinery workers, Marieville and Montreal; rubber workers, Toronto; waterworks employees, Montreal, and glass workers, Thorold, Ont.

### Disputes by Industries

The following is a review of the disputes by industries in the order in which they appear in the statistical table. A brief summary is given of the more important strikes.

**LUMBERING.**—Only one strike is recorded in this group. This was the strike of lumber workers at the North West Lumber Company's camp at Hylo, Alta. It commenced about December as a result of a reduction in wages, and, according to the men's assertions, because of generally unsatisfactory camp conditions. The last information concerning this strike was that it remained unterminated at the end of the month.

**MINES, SMELTERS, QUARRIES, CLAY PRODUCTS, ETC.**—The latest strike in this group occurred at Mountain Park, Alta., on December 29, when 250 miners of One Big Union affiliation quit work. This strike resulted owing to the refusal of

the miners to recognize Order No. 141 of the Director of Coal Operations, which provided for a 14 per cent increase to those miners only who were affiliated with the United Mine Workers of America. The strike terminated after 26 days' duration, with the officials of the United Mine Workers of America reorganizing the area of this dispute. The refusal of the miners to recognize Order No. 141 with respect to the signing of the check-off to the United Mine Workers of America also resulted in a one-day strike at the Brule Mines, Alta. The strike of the Minto miners, which commenced on December 6, remained unterminated as did the strike of the metalliferous miners at Kimberley, B.C. The approximate situation of this group for January was 776 employees involved and a time loss of 12,476 working days.

**METALS, MACHINERY AND CONVEY-**

ANCES.—The lockout of moulders at Brantford, and the strikes in the moulding trade at Sherbrooke and Toronto which commenced on May 1, September 23, and May 1, respectively, were still unterminated, although in all three disputes most of the original strikers had secured work elsewhere. The strike of shipbuilders at Sorel which commenced on August 12 was also unterminated. Four strikes in this group commenced during January. The most important of these was the strike of 120 machinists, involving five firms, at St. John, N.B. This strike commenced on January 27. The men demanded a minimum of 68 cents per hour and an eight-hour day, instead of the former minimum of 50 cents per hour and a nine-hour day. Later developments of this dispute would seem to indicate that the principle of union recognition was also a factor. This group closed for the month with eight disputes unterminated, involving 943 employees and an approximate time loss of 21,202 working days.

CLOTHING.—Five strikes, involving 786 employees with a time loss of about 11,796 working days, were in existence in this group during January. The strike of millinery workers at Marieville and Montreal was unterminated, although a settlement appeared likely to result at the close of the month. A strike of 450 employees of the Gutta Percha Rubber Company in Toronto was the largest in this group during January. It commenced on January 21, the employees demanding a flat increase of 30 per cent and abolition of the team work system, and it was still unsettled at the end of the month.

WOODWORKING.—There was only one strike during the month in this group—

that of the employees in the plant of J. H. Connor and Son, Limited, Ottawa. The strike was precipitated as a result of the discharge of an employee, the other workers striking in protest. Most of the strikers had secured work elsewhere by the end of the month.

PRINTING AND PUBLISHING.—A strike of job printers and pressmen in nearly all the shops in Hamilton occurred during the month. The strike commenced on January 2, when the employees' demands for an increase of from \$28 to \$35 and subsequently \$37 per week was refused. However, work was resumed three days later on a basis of \$33 per week pending further negotiations. The negotiations did not prevent a second strike, which resulted on January 27 and terminated on January 29. It was settled by compromise, the printers resuming work at \$34 per week with a further increase effective at the end of a year.

FOODS, LIQUORS AND TOBACCO. — A three-day strike of Hebrew bakers occurred at Toronto on January 24, when 30 employees in several firms were refused an increase of \$6 per week. A compromise was effected on a basis of a \$3 per week increase, and work was resumed three days later.

PUBLIC UTILITIES. — One shift of stokers of the United Gas and Fuel Company, of Hamilton, went on strike for an increase of 50 cents per day. The company engaged a new shift and work was steadily resumed two days later, on January 16. The company asked the consumers to consent to an increase in the price of gas. This was generally agreed to and an increase of 50 cents per day was thereby given the employees.

MUNICIPAL EMPLOYMENT.—After nego-

tiations extending back to July, 1919, and resumed in December, a strike of the waterworks employees, City of Montreal, resulted on New Year's Eve, when 250 city engineers, firemen and aqueduct workers refused to accept a proffered schedule of wages. The demands of the employees consisted of a wage schedule ranging from 58½ cents to 75 cents per hour and a 48-hour week. Under the former schedule the wages ranged from 30 cents to 50 cents per hour with a week of from 56 to 70 hours. Public institutions as well as homes were seriously incommoded by the shortage of water. After the first day operations were gradually resumed at the various pumping stations but a normal supply of water was not provided until about

the middle of the month. The Quebec Legislature appointed a Commission of Investigation to fix the responsibility for the strike, but the report of this body was merely a judicial review of evidence and it did not allocate blame, being neutral in its tenor. Indications at the end of the month pointed towards an approaching settlement.

MISCELLANEOUS. — The most recent strike under this classification was that of 75 glass workers at Wallaceburg, Ont., who stopped work on January 9, on the refusal of their demand for increased wages and shorter hours and as a protest against the discharge of an employee. After several days' duration work was resumed on January 15, a partial increase being granted.

### STRIKES AND LOCKOUTS DURING JANUARY, 1920.

Industry or Occupation.	Particulars.	No. of employees affected.	Time loss in working days.
<b>Strikes commencing prior to January, 1920</b>			
<b>LUMBERING.</b> — Lumber workers, Hylo, Alta....	Commenced December 1. Against a reduction in wages. Un-terminated.	100	2,600
<b>MINES, SMELTERS, QUARRIES, CLAY PRODUCTS, ETC.</b> — Coal miners, Brule Mines, Alta.	Commenced December 29. Refusal to sign "check-off" to United Mine Workers of America. Settled by negotiations; men resumed work without being obliged to sign "check-off." Work resumed January 2.	260	260
Coal miners, Mountain Park, Alta.	Commenced December 29. Refusal to accept order of Director of Coal Operations. Work resumed January 27, pending re-organization of union by U. M. W. A.	250	5,250
Miners, Kimberley, B. C. ....	Commenced September 12. For increased wages. Un-terminated.	75	2,000
Miners, South Minto, B. C. ....	Commenced December 6. For increased wages and improved working conditions. Un-terminated.	150	3,900
Pottery workers, St. John's, Que.	Commenced November, 1913. Against a reduction in wages. Un-terminated.	41	1,066
<b>METALS, MACHINERY AND CON- VEYANCES.</b> — Moulders, Brantford, Ont. ....	Locked out May 1. Demand for increased wages. Un-terminated.	5	130
Moulders and coremakers, Sherbrooke, Que.	Commenced September 23. For increased wages. Un-terminated.	36	936
Moulders and patternmakers, Toronto, Ont.	Commenced May 1. For increased wages and shorter hours. Un-terminated.	90	2,340
Shipbuilders, Sorel, Que. ....	Commenced August 12. For increased wages and shorter hours. Un-terminated.	650	16,900

## STRIKES AND LOCKOUTS DURING JANUARY, 1920—Continued.

Industry or Occupation.	Particulars.	No. of employees affected.	Time loss in working days
<b>CLOTHING.—</b>			
Garment workers, Montreal, Que.	Commenced October 20. For recognition of Union. Un-terminated.	20	520
Millinery workers, Marieville, Que.	Commenced October 25. For increased wages and shorter hours. Unterminated.	56	1,456
Millinery workers, Montreal.	Commenced November 27. For increased wages. Unterminated.	200	5,200
<b>MISCELLANEOUS.—</b>			
Glass workers, Thorold, Ont....	Commenced June 18. For increased wages and shorter hours. Unterminated.	80	2,080
Musicians, St. John, N.B.....	Commenced November 4. Against employment of non-unionist. Settled by negotiations; work resumed January 9.	9	63
<b>Strikes commencing during January, 1920</b>			
<b>METALS, MACHINERY AND CONVEYANCES.—</b>			
Armature winders and connectors, Peterborough, Ont.	Commenced January 2. For increased wages. Work resumed January 6 pending Conciliation Award.	24	72
Foundry workers and machinists, London, Ont.	Commenced January 27. For increased wages. Settled by negotiations; demands granted. Work resumed January 29.	12	24
Machinists, St. John, N.B.....	Commenced January 26. For increased wages and shorter hours. Unterminated.	120	720
Moulders, St. John, N.B.....	Commenced January 15. For increased wages. Men returned to work pending settlement of machinists' strike. Work resumed January 22.	6	30
<b>WOODWORKING.—</b>			
Woodworkers, Ottawa, Ont....	Commenced January 26. Against discharge of employee. Strikers obtained work elsewhere about January 31.	32	192
<b>PRINTING AND PUBLISHING.—</b>			
Printers, pressmen and feeders, Hamilton, Ont.	Commenced January 2. For increased wages and shorter hours. Men returned to work pending further negotiations to be carried on with International organizers. Work resumed January 5.	75	150
Printers, pressmen and bookbinders, Hamilton, Ont.	Commenced January 27. For increased wages and shorter hours. Settled by negotiations; demands partially granted. Work resumed January 29.	200	400
<b>CLOTHING.—</b>			
Shoe workers, Merriton, Ont...	Commenced January 24. Owing to stoppage of bonus system. Settled by negotiations, work resumed January 27.	60	120
Rubber workers, Toronto, Ont..	Commenced January 21. For increased wages and abolition of of team work. Unterminated.	450	4,500
<b>FOODS, LIQUORS AND TOBACCO.—</b>			
Bakers, Toronto, Ont.....	Commenced January 24. For increased wages. Settled by negotiations; demands partially granted. Work resumed January 27.	30	90
<b>PUBLIC UTILITIES.—</b>			
Stokers, Hamilton, Ont.....	Commenced January 14. For increased wages. Settled by replacement of strikers and work resumed January 16.	10	20
<b>MUNICIPAL EMPLOYMENT.—</b>			
Waterworks employees, Montreal, Que.	Commenced January 1. For increased wages and shorter hours. Unterminated.	250	6,500
<b>MISCELLANEOUS.—</b>			
Glass workers, Wallaceburg, Ont	Commenced January 9. For increased wages, shorter hours and against discharge of employee. Partial increase granted and work resumed January 15.	75	375

## STRIKES AND LOCKOUTS IN THE UNITED KINGDOM DURING DECEMBER, 1919

THE following details with regard to strikes and lockouts in the United Kingdom during December, 1919, based on returns from employers and workpeople, are taken from the January issue of the British *Labour Gazette*.

**NUMBER, MAGNITUDE AND DURATION.**—The number of trade disputes beginning in December was 61, as compared with 48 in the previous month and 51 in December, 1918. In these new disputes nearly 29,600 workpeople were directly and about 3,500 workpeople indirectly involved (*i.e.*, thrown out of work at the establishments where the disputes occurred, though not themselves parties to the disputes). In addition nearly 72,000 workpeople were involved, either directly or indirectly, in 46 disputes which began before December and were still in progress at the beginning of that month. The total number of disputes in progress in December was thus 107, involving about 105,000 workpeople, as compared with over 93,000 workpeople involved in disputes in progress in November, 1919, and nearly 150,000 in December, 1918.

The following table classifies these disputes by groups of trades, and indicates

Groups of Trades.	Number of disputes			Number of workpeople involved in all disputes in December.	Aggregate loss of working days during December.
	Started before 1st December.	Started in December.	Total.		
Mining and Quarrying.....	6	6	12	13,400	45,000
Engineering & Shipbuilding.....	10	9	19	61,900	1,463,000
Other metal.....	3	1	4	3,500	33,000
Clothing.....	4	4	8	10,800	36,000
Transport.....	1	8	9	3,000	14,000
Other trades.....	22	33	55	12,500	97,000
<b>Total.....</b>	<b>46</b>	<b>61</b>	<b>107</b>	<b>105,100</b>	<b>1,688,000</b>

the number of workpeople involved (whether directly or indirectly) at the establishments concerned and the approximate time lost during December in all the disputes in progress:

Of the 1,688,000 working days lost in December, by all disputes in progress, about 1,544,000 were lost by disputes which began before December and were still in progress at the beginning of that month, and only 144,000 by disputes which began in the month. The total aggregate duration of all disputes in progress in November, 1919, was 1,782,000 days, and in December, 1918, was 1,174,000.

**CAUSES.**—Of the 61 new disputes, 36, directly involving about 13,300 workpeople, arose on demands for advances in wages; 5, directly involving 1,000 workpeople, on other wage questions; 8, directly involving 12,900 workpeople, on questions respecting working hours; 9, directly involving nearly 1,600 workpeople, on questions respecting the employment of particular classes or persons; and 3, directly involving about 800 workpeople, on other questions.

**RESULTS.**—During the month settlements were effected in the case of 31 new disputes, directly involving about 20,100 workpeople, and 16 old disputes, directly involving about 2,200 workpeople. Of these new and old disputes, 19, directly involving over 13,600 workpeople, were settled in favour of the workpeople; 5, directly involving nearly 900 workpeople, in favour of the employers; and 23, directly involving nearly 7,800 workpeople, were compromised. In the case of 6 other disputes, directly involving over 2,700 workpeople, work was resumed pending negotiations.

## THE BRITISH INDUSTRIAL COURTS ACT, 1919

**T**HE present article contains a summary of the Industrial Courts Act, 1919, of Great Britain, which received the Royal Assent on November 20. The Act has three main provisions: (a) In place of the Interim Court of Arbitration, which came into existence with the passing of the Wages (Temporary Regulation) Act in November, 1918, it sets up a permanent Court of Arbitration termed the Industrial Court, to which industrial disputes may be referred, if both parties to a dispute consent. (b) It empowers the Minister of Labour in cases of dispute, either before or after a strike or lockout has occurred, to appoint a Court of Inquiry which will make public an impartial account of the merits of the dispute. (c) It continues in force until September 30, 1920, the rates of wages prevailing at the time of the Armistice and new "substituted" rates in accordance with the Wages (Temporary Regulation) Acts, 1918 and 1919, but power to create further new "substituted" rates having statutory effect ceased.

A dispute will be referred for settlement under this Act only after exhaustion of available means for conciliation

already existing. Should the parties to a dispute desire, the matter may be referred to a single arbitrator appointed by the Minister of Labour, or to a special Board of Arbitration composed of members selected by the parties from panels of persons appointed by the Minister of Labour. The Minister may also appoint a conciliator to promote the settlement of any difference reported to him. Disputes regarding "prescribed" or "substituted" rates of wages may be referred to the Industrial Court if reported to the Ministry of Labour by one party only, but in all other cases the consent of both parties to a dispute is required before reference is made to the Industrial Court or to other forms of arbitration under the Act. For the purpose of dealing promptly with urgent matters a rule was made under the Act providing that "The Court may be divided into two or more Divisions as the President may direct, and any case referred to the Court for settlement may be heard and determined as the President may direct, either by one of such Divisions or by a single member of the Court nominated by him."

## ALBERTA COAL MINING INDUSTRY

### Report of Commission of Investigation

**T**HE report of the Commission appointed in June last by the government of Alberta, with wide powers to investigate the coal mining industry in that province in all its bearings, has recently been presented. The Commission was composed as follows: John T. Stirling, chief provincial inspector of mines (chairman); W. F. McNeil, representing the operators; Harvey Shaw, representing the Industrial Commission, Ed-

monton; Walter Smitten, representing the Alberta Federation of Labour; and John Loughran, representing District 18, United Mine Workers of America. The sessions opened at Edmonton on October 6, the itinerary including Drumheller, Wayne, Edson, Lethbridge, Blairmore, concluding at Edmonton on November 26. The initial meeting had been called for June 10, but owing to strikes at that time it was postponed

until July 29. A further postponement was then found necessary owing to conditions existing among the United Mine Workers.

The report is as follows:

To His Honour the

Lieutenant-Governor in Council.

The undersigned commissioners appointed by your Honour by commission bearing date the fourth day of June in the year of our Lord One Thousand Nine Hundred and Nineteen, in accordance with the powers contained therein, beg leave to report that they have held sessions at Edmonton, Calgary, Drumheller, Wayne, Edson, Lethbridge and Blairmore, and have examined seventy-four witnesses, being, in the estimation of your commissioners, a fair representation of all persons interested in the coal mining industry, including the general public.

Your commissioners have made inquiry into and upon all matters pertaining to or concerning the coal mining industry of the Province of Alberta, and have considered various resolutions, correspondence and exhibits, which have been submitted bearing on the questions under investigation. All of these are herewith respectfully presented for your consideration, together with a copy of the evidence taken.

Your commissioners herewith submit their report, which has been made from the evidence submitted, and are of the opinion that the following matters have an important bearing on the coal mining industry.

#### EXTENSION OF MARKETS.

Many mines only operate one half of the year or less. If more continuous operation is obtained, the result will be a reduction in the price of coal to the consumer and steadier employment to the workman.

#### WORKING AGREEMENTS AND METHOD OF HANDLING DISPUTES.

Provisions for making working agreements, the settling of disputes and such matters that employer and employee deal with, are not satisfactory.

#### HOUSING CONDITIONS AND SANITATION.

At many mines the living and housing conditions and matters pertaining to health and sanitation are not in a satisfactory condition.

#### EDUCATIONAL FACILITIES.

In some camps the educational facilities are inadequate.

#### LOSS OF CAPITAL INVESTMENT.

Much capital expenditure has been lost on account of failure to obtain reliable information about properties and marketing conditions be-

fore operations are commenced; and also owing to lack of sufficient capital being provided to carry on operations to a successful issue.

#### LOSS OF MARKET.

A considerable loss of market has been sustained owing to:

- (a) Cessations of work.
- (b) Shortage of railway cars.
- (c) Misrepresentation as to size and quality of coal.

#### SUB-LEASING.

Sub-leasing of coal leases issued by the Federal government has the effect of unnecessarily increasing the cost of coal to the consumer.

#### FREIGHT RATES.

Existing freight rates militate against the marketing of Alberta coal in Manitoba and the United States.

#### PURCHASING, MINE EQUIPMENT AND POWER.

Mine equipment and power, under the present system, are too expensive.

#### CONSERVATION OF COAL.

Large quantities of coal have been and are being lost through improper mining methods, as well as through cessations of work.

#### HOSPITALS.

In many mining camps the hospital facilities are inadequate.

#### OWNERSHIP OF NATURAL RESOURCES.

As the natural resources are not vested in the crown in the right of the province, but in the crown in the right of the Dominion, or in private ownership, it is difficult for your commissioners to determine what should be done with many of the questions which have been brought before them. Your commissioners are of the opinion that for the best interests of the mining industry in this province, steps be taken at as early a date as possible to have the natural resources vested in the crown in the right of the province.

Your commissioners further submit for your consideration the following recommendations, and unanimously recommend that the same be provided for, as far as possible, by legislation at the coming session of the legislature.

#### RECOMMENDATIONS.

1. (a) That employees be required to use every effort to see that all coal is mined properly and free from impurities, so that the best product will be obtained from the working face.
- (b) That employers be required to see that all coal is properly prepared and graded before shipment.
- (c) That railway cars are properly cleaned before being loaded.
- (d) That better facilities for more prompt

dispatch of cars from the mines to the point of consumption be obtained.

(e) That all invoices for coal sold, either by owners or dealers, shall have inserted on them the size and kind of screen over or through which such coal passes, and the name of the mine from which the coal is supplied.

(f) That in order to get correct weights, better provision be made for the taring of railway cars.

(g) That steps be taken to establish testing stations in different provinces, particularly in Manitoba, so that the buying public may be given information as to the uses and value of different coals.

(h) That a complete system of advertising Alberta coal be undertaken.

(i) That attention be given to the question of storage of coal by both consumer and dealer.

2. That a permanent Commission be appointed and given power by legislation to make working agreements and provide for the settlement of disputes.

3. That living and housing conditions and matters pertaining to health and sanitation be dealt with by the said Commission.

4. That the said Commission co-operate with the Department of Education with a view to seeing that satisfactory educational facilities are provided for all children of school age.

5. That before mining operations are commenced, the question of the advisability of opening a mine in any particular field, as well as the question as to the amount of capital required to open in that field, be referred to and approved by the said Commission, and that the administration of the Regulation passed by Order-in-Council P. C. 2303, by the Federal Government, a copy of which is herewith attached, be vested in the said Commission.

6. That all matters pertaining to loss of market be placed under the jurisdiction of the said Commission.

7. That sub-leasing of coal lands leased by the Federal Government be prohibited.

8. That the services of an expert be obtained to investigate the question of freight rates, including the question of a preferential rate on slack coal, and a reduced rate on coal during the summer months previous to the movement of grain, and that the report of such investigation be submitted to the said Commission, with a view to bringing the facts before the Railway Commission for adjustment.

9. Your Commissioners are of the opinion that considerable saving would be attained if owners would establish some central purchasing agency, thereby standardizing equipment; also that a considerable saving would be attained if the power used were obtained from central power plants located in the various fields. The carrying out of these suggestions, in the opinion of your Commissioners, would not only be a saving to the consumer, but, in addition, would tend to increase the market.

10. As this Province has within its borders the largest known coal resources in the world, the conservation of this heritage should be zealously guarded. Your Commissioners therefore recommend that you obtain authority from the Federal Government for the same Commission to be given full powers for the safe-guarding of this national asset.

11. That districts be formed, and proper hospital facilities be provided in the various mining fields.

12. That legislation be enacted at the coming session, making provision for the appointment of a Commission which would be representative of:—

(a) Owners.

(b) Workmen.

(c) Consuming public.

(d) Provincial Government.

That such Commission, in addition to the matters above mentioned, have such authority as may be given to it from time to time by Regulation.

That such Commission also be made responsible for the proper equipment and running of mines to ensure safety.

Evidence has been submitted with respect to Old Age Pensions and Compulsory Health Insurance, but your Commissioners have not obtained sufficient evidence to reach a final conclusion, and recommend that the matter be further investigated.

Dated at Edmonton this twenty-third day of December, A.D. 1919.

(Sgd.) JOHN T. STIRLING,  
Chairman.

(Sgd.) WALTER SMITTEN.

(Sgd.) JOHN LOUGHRAN.

(Sgd.) W. F. McNEILL.

(Sgd.) HARVEY SHAW.

REGULATION REFERRED TO IN RECOMMENDATION  
No. 5.

"The lessee shall before opening any mine on the lands described in the lease, and before extracting any coal therefrom, submit to the Ministry plans and specifications showing in detail the manner in which it is proposed to open up, develop and operate such mine, and if the location contains more than one seam of coal, detailed information shall be furnished as to the particular seam which it is proposed to develop. No work shall be commenced before such plans and specifications have been approved by the proper officer of the Department. The procedure to be adopted in opening up and operating a mine on the lands leased, as well as the particular seam of coal which shall first be operated, shall at all times be in accordance with the provisions of regulations approved by the Minister, and failing to comply with the requirements of such regulations shall render the lease subject to cancellation in the discretion of the Minister."

## SOCIAL WELFARE CONGRESSES IN CANADA

**D**URING the months of November, December and January social welfare congresses were held in various provinces of the Dominion. The meetings took place at Charlottetown, P.E.I., on November 9-11; at Sydney, N.S., on November 13-14; at Edmonton, Alta., on December 4-6; at Regina, Sask., on December 8-10; at Winnipeg, Man., on December 10-12; and at Montreal, Que., on January 14-16.

The proceedings of the various congresses are briefly summarized below.

**CANADA AND QUEBEC:** The Social Service Congress of Canada which was held at Montreal in conjunction with the Social Service Council of Quebec dealt with many subjects. These included child welfare, women and children in industry, unemployment, immigration, etc. A report on immigration was presented by a special committee and the principles embodied therein were accepted by the Council and referred back to the committee for revision. The substance of the report was to the effect that Canada should shape her immigration policy with a view to her own national welfare, and that the volume of immigration must be limited by the possibilities of Canadianizing the newcomers. A resolution was adopted in favour of an eight-hour working day, collective bargaining and the right of every worker to an income adequate to insure a fair standard of living. By another resolution the right of every man accused of a criminal offence to a trial by jury was affirmed, and the hope was expressed that the Dominion parliament would reconsider the legislation passed last session under which British-born citizens and aliens alike, if

charged with sedition, may be deported from the country without trial by jury.

**PRINCE EDWARD ISLAND:** Discussions took place on rural and industrial life, child welfare and delinquency, public health and sanitation, and mental and social hygiene. Resolutions were passed asking for an industrial farm for delinquent boys; and for certain amendments to the criminal law with regard to offences against morality, including the better protection of female employees.

**ALBERTA:** A committee on reconstruction submitted a report to the Alberta congress in which recommendations were made that the governments of the province and the Dominion should take steps to guarantee steady and remunerative employment for all adult workers in the country; that some system of insurance should be introduced to provide against unemployment, accident, disease and old age; that a system of free and competent medical and nursing attention for children be established; that prime consideration should be given in all legislation to making conditions of work safe, sanitary and agreeable; that housing facilities should be adequate and wholesome, and special care should be taken for the well-being of children; that the right of all classes of workers to organize should be recognized, and the problems of industrial and commercial life should be worked out collectively with due regard to the interests of all concerned. The report was adopted by the congress. Other subjects discussed included stricter enforcement of the Liquor Act and amendments to it; tuberculosis, and social welfare legislation.

**SASKATCHEWAN:** A number of matters of industrial interest were brought before the Social Welfare Congress of Saskatchewan. Addresses were delivered on the following subjects: "The Housing Problem in Town and Country in relation to the Conservation of Family Life"; "Industrialism in Saskatchewan with Special Reference to Seasonal Unemployment"; "Conservation of Human Resources." The following resolutions were passed among others: That the government be urged to convert, as fast as possible, the jails into redemptive stations providing work for the prisoners whose wages would be sent to their families; that the Department of Education be commended for its policy of night schools; that the government be asked to amend the Education Act to enable school boards to provide community centre equipment; that leaders of public opinion be recommended to give special attention to the maintaining and developing of morale in the matter of respect for law and law enforcement.

**MANITOBA:** At the Social Welfare Congress of Manitoba, which was held in joint session with the graduate nurses' association, the subjects of public health, school hygiene and child welfare were discussed. Resolutions were passed asking that the incoming executive take measures towards the creation of a provincial bureau of child welfare, and that a survey be made in all districts with a view to promoting child welfare; that proportional representation in government be advocated as a method of political reform; that the incoming executive appoint a committee to investigate police systems and methods of training, with a view to establishing a higher ideal and identifying the police more closely with the interests of the community; that

education for citizenship should be undertaken by the Social Service Council, and that the Dominion Government be urged to amend the Criminal Code to provide further protection for female employees from immoral conduct on the part of their employers.

The officers of the Dominion and provincial organizations are:

**CANADA:** President, Rev. Canon Tucker, London; secretary, Dr. John G. Shearer, B.A., D.D. Business address: Room 504, Confederation Life Building, Toronto.

**PRINCE EDWARD ISLAND:** President, Rev. R. H. Stavert; secretary, Mr. R. C. Sidenius. Business address: Young Men's Christian Association, Charlottetown, P.E.I.

**NOVA SCOTIA:** President, Canon C. W. Vernon, Halifax, Nova Scotia; secretary, Dr. H. R. Grant. Business address: New Glasgow, N.S.

**ONTARIO:** President, Rt. Rev. J. F. Sweeney, D.D., Toronto; secretary, Gilbert Agar, B.A. Business address: Room 610, Confederation Life Building, Toronto.

**ALBERTA:** President, Mrs. L. C. McKinney, M.L.A., Claresholm, Alberta; general secretary, A. W. Coone. Business address: 714 Tegler Block, Edmonton, Alberta.

**SASKATCHEWAN:** President, R. L. Magee, M.L.A.; secretary, Rev. W. J. Stewart, M.A.; treasurer, James Balfour, K.C. Business address: 45 Canada Life Building, Regina, Sask.

**MANITOBA:** President, R. W. Craig, K.C.; general secretary, D. B. Harkness. Business address: 265 Portage ave., Winnipeg, Man.

## JOINT RAILWAY CONTROL AND STANDARDIZATION OF WAGES IN GREAT BRITAIN

### Proposed Representation of Labour and the Public in Management

**F**OLLOWING the termination of the British railway strike on October 6, last, (an account of which appeared in the November, 1919, issue of the *LABOUR GAZETTE*), the Minister of Transport, Sir Eric Geddes, outlined in the House of Commons on December 9, a plan for the future control of railways in Great Britain, based upon negotiations between representatives of the National Union of Railwaymen and the Government. According to the plan proposed, Labour is to share in the management of the railways through its own representatives on the new directing board which would be created. The plan provides also for the representation of the Public on one of the proposed boards.

It will be remembered that one of the terms of the settlement of the strike was that negotiations would be resumed on the understanding that they would be completed before the end of the year. These negotiations proceeded subsequently, along two distinct lines—joint railway control and standardization of wages. At first, however, the wage question (the ostensible issue which led to the strike), was scarcely discussed in the resumed negotiations. It was shelved, temporarily, but was a point of contention in later conferences.

In order to make the Government's proposal clear, it should be stated that, prior to the war each railway was controlled by its general manager, under the orders of its board which represented only shareholders. During the war, all railways were controlled by the Board of Trade through an executive committee, exclusively composed of general managers. At present, and for the next two years, all the railways are under the control of the newly-created Ministry of Transport. Now, the Government proposes that this department shall exercise this control through an "Advisory Com-

mittee" (replacing the executive committee), on which shall be placed three railwaymen, two representing the National Union of Railwaymen and one representing the separate Society of Locomotive Drivers and Firemen. These three representatives of Labour on this Advisory Committee are to have advisory, executive and administrative powers equal to those of the general managers who will form the rest of the committee.

Further, the proposal includes the formation of a joint board, called a "Central Board," composed of five general managers and five representatives of the trade unions (with power on each side to set up a sixth), to negotiate all matters concerning conditions of service. If this Central Board fails to adjust a dispute on wages and working conditions, then the matter would be referred to a tribunal, called the "National Wages Board," comprising four representatives of the railways, four appointed by the employees, and four delegated to look after the interests of the general public. Of the representatives of the public, one would be a trade unionist, not connected with the railways, and one other would represent the co-operative societies. This body would have an independent chairman appointed by the Government.

The right to strike was not withheld from the employees, who, however, agreed that no strike should take place on disputes arising out of matters of wages and conditions until one month after the question in dispute had been referred to the National Wages Board.

The Government later announced the second part of its railway programme, which had reference to the standardization of wages. The National Union of Railwaymen opposed this new wage schedule, and for a time it appeared likely that the new conciliation machinery would be rejected entirely, because of

the dissatisfaction of the National Union of Railwaymen over the basis of the wage rates. The Government's plan (announced December 15), regarding wages, was that sixty shillings a week was to be the average minimum wage. Under this plan, should the cost of living increase before next September, wages would be raised one shilling for every five per cent in the rise in prices. After September there would be a sliding scale varying with the cost of living.

The N. U. R. refused to accept these wage conditions. The Union accepted the principle of standardization, but wanted it based on the highest rate of wages instead of the average rate. The sliding scale was rejected on the ground that other factors are involved besides the cost of living. The Union also demanded increases retroactive to August and the inclusion of the Irish railwaymen in the settlement.

The Government was asked to revise again the wage schedule. On January 15, the revised proposal was submitted to the Union. The main principles of the original proposal were not modified. The Government again adhered to the sliding scale with the wages based on the average, not the maximum, pay. Concessions were made, however, in the form of bonuses for female employees and for some male employees. The Government agreed to extend the plan to Ireland and to consider individual cases where the new adjustment would involve hardship. The men agreed to drop their demand that the plan be made retroactive to August last.

The railway workers approved these last terms of the Government by a majority of only two votes. Meanwhile, the campaign for the nationalization of mines, railways and possibly all essential industries, is being continued.

## ANNUAL REPORT OF UNITED STATES DEPARTMENT OF LABOUR

**T**HE report of the United States Secretary of Labour, Mr. W. B. Wilson, for the fiscal year ending September 30, 1919, has recently been issued. The report reviews the general causes of the present unrest throughout the world, and suggests that the remedy for the high cost of living lies not in increased wages but in increased productivity, making more material available for wages while at the same time reducing the opportunities for "profiteering." The recognition of the principle of collective bargaining is stated to be one of the essentials to industrial peace. The report reads in part as follows:

### Causes of high prices.

The whole world is face to face with the most difficult peace-time problem it has ever had to deal with. The wastage of war has been tremendous. There has been not only the loss of millions of lives and the permanent disability of other millions of people, but also an extra-

ordinary destruction of the material resources of the world. The power of replacement of the things destroyed has been seriously impeded by the conditions that constitute the aftermath of war. Industry has been disarranged by the processes of readjustment to the needs of peace, and commerce has been handicapped by insufficient shipping facilities, rates of foreign exchange, and domestic uncertainty. Many countries are without stable government, and financial inflation in all commercial countries of the world has played havoc with the relative values of money, wages, and commodities.

The effect of these things has been reflected in the high cost of living and the consequent demand for higher wage rates to meet the increasing burden of the family budget. Yet increases in the wage rate do not always give relief. There are but two ways by which the general standard of living of the wage earner can be improved. One is by increased productivity, making more material available for wages. The other is by taking the means of increased compensation out of the profits of the employer. If wages are increased and profits remain the same, the burden is passed on to the consuming public in the form of an increased cost of living and comes back to the wage-worker himself. No portion of improved living

standards can come out of the profits of the employers unless there is profiteering.

And what gives the opportunity for profiteering? The very conditions that we are confronted with to-day—the destructive agencies of war, the disarrangement of industry and commerce, and the unrest and high nervous tension of our people, resulting in a shortage of supply as compared with demand. The whole world is interested in returning to the highest productive efficiency, having due regard to the health, safety and opportunities for rest, recreation and improvement of those who toil. The more productive we are the sooner we shall abolish opportunities for profiteering. There can be no profiteering where there is a free flow of material from producer to consumer. It is only where the production is not sufficient for the needs of the people or where artificial obstructions impede proper distribution that there is any possibility of profiteering.

### Collective bargaining.

We are all interested in industrial peace. But there can be no permanent industrial peace that is not based upon industrial justice. Just as international wrongs may accumulate to the point where war is necessary to bring relief, so industrial wrongs may provoke industrial conflict as an alternative to further endurance of the wrongs imposed. Nor is it permissible that either side to an industrial controversy be the sole judge of what constitutes justice. The means must exist by which all men may know that justice has been secured. We have found ways of regulating all the other relations of mankind. Human intelligence can devise some acceptable method of adjusting the relationship between the employer and employee fairly.

In mutual counsel lies the stability of industrial relations. Just as the peace of nations is promoted by frank and friendly intercourse, so may the peace of industry be maintained by the same methods. But this intercourse cannot come about unless there is first recognized the right of collective bargaining. In the past this right has been conceded by some employers, but vigorously combatted by others. The public interest demands that it be universally recognized, for the primary interest of the public is in peace. The denial of organization is a denial of the only means of peaceable settlement that wage earners have. At a time when labour organizations of a revolutionary or lawless type are especially in the public eye, it is particularly important to point out that the responsibility for the development of such organizations must, in the long run, fall upon the employer who denounces the organization of lawful trade unions.

In an imperfectly developed state of society or in minor instances this failure to recognize the rights of others injures only the persons immediately concerned. But with the increase in the size of productive enterprises and the corresponding increase in the numbers of em-

ployees, many industrial disputes menace many whom, for want of better name, we may call the innocent bystanders. Modern strikes and lockouts tend more and more to affect not only the employer and worker, but all who come within range of the economic controversy. At no time has this been more important than at present.

The right of any man to cease working for another for any reason that is sufficient to himself is the basic element of human liberty. The right of any person to refuse to operate his plant at any time he desires to do so is the exercise of a property right guaranteed by the Constitution. It does not follow that because these rights exist it is necessary to exercise them. They must, nevertheless, be safeguarded. Having done that and having devised the machinery by which justice can be secured and by which everybody at interest has the opportunity of knowing that justice has been secured, it is not likely that the right to cease work will be exercised by sufficient numbers or the right to cease operating industrial plants will be carried to such an extent as seriously to affect the welfare of the rest of the people.

### Conciliation division.

Following the signing of the armistice the good relations between employers and wage earners were much disturbed. The readjustment of industry, the re-employment of demobilized soldiers, and the transfer of workers from war industries to normal production, have all contributed to the general unrest not only in our country, but throughout the world.

The success which has attended the department's efforts in the great majority of disputes has been most gratifying. The volume of work is indicated by the number of persons involved. 1,011,960 workmen were directly and 1,336,072 indirectly affected.

Among the more important adjustments were an agreement negotiated in the oil industry by which collective bargains covering 15,000 workmen will continue in force until June 30, 1920; an adjustment of a serious strike of longshoremen and harbour workers in New York harbour; the adoption of a plan to end jurisdictional disputes in the building trades; and the negotiation of a new agreement between the meat packers and 50,000 workers in Chicago.

During the fiscal year the Department of Labour has assigned commissioners of conciliation to 1,780 cases, made up of 587 strikes, 1,113 disputes and threatened strikes, 63 lockouts, and 17 walkouts. Of these it has succeeded in adjusting 1,223, not including 219 referred to the National War Labour Board. In only 111 instances have the commissioners failed to make settlements.

### Bureau of immigration.

Alien arrivals in the United States for the year numbered 245,647. Of this number 8,626

were excluded, making the number of aliens admitted into the country 237,021. Only 141,132 of these were immigrants, however, an increase of about 30,000 over last year's figures.

During the fiscal year 810,097 seamen were examined, 261,551 identification cards were issued, and 4,053 seamen were certified for loathsome or dangerous contagious diseases and removed to hospitals for treatment.

There have been expelled from the country under departmental process during the past year 3,068 aliens, compared with 1,569 in 1918. Adding together the 8,626 aliens excluded at the ports and returned to countries of origin, the 3,068 arrested and expelled from the country, and the 34 Chinese aliens whose deportation was ordered by courts or commissioners under the exclusion laws, it is shown that the total number of aliens deported during the year was 11,728, compared with 8,916 in 1918.

#### Departmental recommendations.

During the war the department was authorized to set up machinery for investigating working conditions, and where advisable to recom-

mend standards for their improvement. It is sufficient to say that, although this organization was primarily created for the purpose of stimulating war production, the results of its activities have been such as to assure the value of its services in times of peace. It is, therefore, strongly urged that early legislation be enacted with a view to reviving and continuing the activities of the Working Conditions Service.

The duty of encouraging the wage-worker to prepare himself for more profitable employment is clearly within the scope of this department. It has been proved, not only in this country but in others as well, that the most effective method of increasing and improving the workers' capacity for production is through training opportunities within the industries themselves. It is believed that increased skill on the part of the workers, and its consequent stimulus toward greater production, is even more important in peace than in war. And it is felt that the work formerly conducted by the United States Training Service is so urgently needed by industry throughout the country as to warrant continuation of its activities. I recommend, therefore, the enactment of legislation to accomplish that end.

---

## SECOND INDUSTRIAL CONFERENCE OF THE UNITED STATES

THE Industrial Conference called by President Wilson after the failure of the National Industrial Conference which met in October, issued a preliminary statement on December 29, in which was introduced a tentative plan for the adjustment of industrial disputes. The conference proposed to divide the United States into twelve districts, in each of which a regional board would be set up for the prevention and settlement of trade disputes. The members of these boards would be chosen from panels of employers and employees prepared by the Secretary of Commerce and the Secretary of Labour, with an impartial chairman appointed by the President, and, where necessary, a vice-chairman appointed by the National Tribunal described below. The names on the panels would be entered in order determined by lot, and the selection from the panels for service on the regional boards would be made in rotation by the regional chairman. The mem-

bers of the board to adjudicate any particular dispute would be selected from the panels, somewhat after the manner of selecting a jury, each side being entitled to a specified number of peremptory challenges. There would also be a National Industrial Tribunal composed of nine members chosen by the President and confirmed by the Senate. Three would be representatives of employers nominated by the Secretary of Commerce, three, representatives of employees nominated by the Secretary of Labour, the remaining three representing the public. When any industrial dispute arises which cannot be settled by existing machinery, the plan provides that the regional chairman may, on his own motion, unless disapproved by the National Industrial Tribunal, request each side concerned in such dispute to submit it for adjustment to the regional board, and he must do so if requested by the Secretary of Commerce, the Secretary of Labour, or the Industrial Tri-

bunal. If no unanimous decision is reached by a regional board, the dispute must be referred either to an umpire or to the National Tribunal. A decision of a regional board, an umpire, or the National Tribunal, would have the force of an industrial agreement.

The conference re-convened on January 12, for the purpose of hearing the views of all persons interested in the plan who wished to present them, but no information was made public as to the proceedings of the conference during the month.

## CONFERENCE OF ORGANIZED LABOUR IN THE UNITED STATES

### Sequel to the United States National Industrial Conference

IT will be remembered that the United States Industrial Conference, called by President Wilson, which met in Washington, D.C., on October 6, last, was broken up on October 23, owing to the withdrawal of the labour representatives as a protest against the attitude of the employers' group towards collective bargaining. Following this, a special labour conference, called by the American Federation of Labour, was held in Washington on December 13, for the purpose of formulating a reconstruction policy and a Declaration, or "Bill of Rights," on behalf of labour. Nearly 300 delegates were in attendance, comprising besides the executive officers of the American Federation of Labour and the Railroad Brotherhoods, the president and secretary of each of the 112 national and international unions, and representatives of several national organizations of farmers. The conference was the third of its kind held by organized labour, the first being in 1914 and the second in 1917.

The use of the injunction by the Government in the coal strike, and the refusal of the employers' group at the President's conference to recognize the right of labour to organize, and the right to collective bargaining through representatives of the workers' choosing, led to the following paragraph being included in the Declaration subsequently adopted by the Conference:

Workers are free, not slaves. They have the constitutional right to cease working. The

strike is a protest against autocratic management. To penalize strikes or to make them unlawful is to apply an unwarrantable and destructive method when a constructive one is available. . . . Legislation which proposes to make strikes unlawful or to compel wage-earners to submit their grievances or aspirations to courts or to government agencies is an invasion of the rights of the wage-earners and when enforced makes for industrial serfdom or slavery. We specifically denounce the anti-strike provisions of the Cummins Bill and all similar proposed legislation as un-American, as being vicious in character, and establishing by legislation involuntary servitude.

The attitude of the conference with respect to the use of the injunction process was outlined in the declaration as follows:

The paramount issues that concern all the people of the United States, and in particular the wage earners, are the perversion and the abuse of the writ of injunction and the necessity for full and adequate protection of the voluntary associations of wage earners organized not for profit. Government by injunction has grown out of the perversion of the injunction process. By the misuse of that process workers have been forbidden to do these things which they have a natural and constitutional right to do. The injunction as now used is a revolutionary measure which substitutes government by judicial discretion or bias for government by law. It substitutes a trial by one man, a judge, in his discretion, for a trial by jury. This abuse of the injunctive process undermines and destroys the very foundation of our free institutions. . . . We declare these abuses in the exercise of the injunction writ are clearly violative of the constitution.

The main features of the Declaration are summarized in the official organ of the American Federation of Labour as follows:

The great victories for human freedom must not have been won in vain.

Right to strike must be maintained.

Steel trust's labour policy is autocratic.

The labour injunction is a revolutionary measure; it violates the federal constitution.

Government employees must be protected in their right to join A. F. of L. unions.

Anti-strike legislation would establish involuntary servitude.

Federal judges should be elected by the people; they have no constitutional right to invalidate laws.

Anti-trust legislation has been used to outlaw unions and has not protected the people against monopolistic outrages.

The system of fixing wages solely on the basis of family budgets and bread bills was denounced.

Inflation of money and credits and profiteering manufacturers, dealers, middlemen and speculators are responsible for high prices.

High prices can be reduced by the deflation of currency, prevention of hoarding and unfair price fixing, Rochdale system of co-operation and the publicity of income tax returns and dividend declarations.

The ideal of America should be the organization of industry for service and not for profit alone.

There cannot be a full release of productive energy under an autocratic control of industry. There must be a spirit of co-operation and mutuality between employers and workers.

Collective bargaining is the first step in the development of our industrial machinery for service.

Credit is social and should be controlled by the government, not by private financiers.

Continue government administration of railroads for at least two years after January 1, 1920, that a thorough test of this theory, under normal conditions, may be made.

Ratification by the Senate of the Treaty of Peace.

The attempt of reactionaries and autocrats to classify the men and women of labour with those who are not in accord with the fundamental principles of our country was resented.

There is a great community of interest between all who serve the world, and all workers, whether of the city or country, "have a common path to tread and a common goal to gain."

The above issues "require the action of our people upon both the economic and political field" and "we urge that every practical action be taken by the American Federation of Labour, with the co-operation of all other organized bodies of workers, farmers and sympathetic, liberty-loving citizens of the United States to carry into effect the principles and purposes set forth in the declarations of this conference.

The Conference voted unanimously that the Government should retain control and operation of the railroads for at least two years after January 1, 1920. Both the Cummins and the Esch bills were condemned as "a move of Wall Street bankers and brokers to mortgage the workers to the railroad executives and managers." It was demanded that the Government be given a further period under peace conditions "to demonstrate whether operation for service rather than for exploitation will prove the better system."

The National Board of Farm Organizations made no official pronouncement defining the attitude of the farmers in regard to any programme of legislation.

## SEVENTH ANNUAL CONVENTION OF ALBERTA FEDERATION OF LABOUR

THE seventh annual convention of the Alberta Federation of Labour was held in Calgary, on January 5-7, about seventy delegates being in attendance.

The report presented to the convention by President Frank Wheatley and Secretary-Treasurer Walter Smitten outlined various amendments to certain

labour laws, which amendments were passed by the Alberta legislature during the past year in response, it was claimed, to the suggestions of the last convention. The Workmen's Compensation Act had been amended with a view to having its application more clearly defined; funeral benefits were raised to \$100; total disability benefits to \$10 per week, with an

additional amount of \$2 for the first dependent and an additional \$1 for each other dependent, with a maximum of \$16 per week; the compensation board was given powers to compel employers to deduct from the wages of workers such sums as in their opinion were deemed necessary for medical aid; the scope of the Act was widened to include all workers on railroads outside of those already coming under certain specified heads. The report pointed out that a large number of workers still remained outside the provisions of the Act, such as farm help, hotel and restaurant employees, janitors, store clerks, etc. The Coal Mines Act had been amended to provide for the appointment of an examining board for the province on which there should be two working miners, and whose duties should be to examine candidates for the position of mine-manager, overman and fireboss; wages were required to be paid twice each month on specified dates. New provisions were also made in regard to the competent inspection of safety lamps by certificated persons; the two persons appointed by the workmen to inspect a mine must be, or have been, practical miners.

The Mothers' Allowances Act had been amended to provide for the appointment of an inspector by every city or town, to consider applications for assistance from widows (or wives of insane persons) who have custody of children under the age of 15 years in the case of boys, and 16 years in the case of girls. The superintendent of neglected children, upon receipt of the Inspector's report may recommend to the attorney-general that such weekly instalments as may be deemed necessary for relief be paid, one-half to be borne by the authorities of the city or town concerned.

The Factory Act was amended by the creation of a commission in each of the four cities, composed of a representative of the government, a representative of the employers, and a representative of the workers, whose duty it shall be, upon request being made by the employees in any industry, to inquire into and make recommendations as to the maximum

hours to be worked and the minimum wages that should be paid. The report pointed out, however, that no request for an inquiry had so far been received, owing, it was stated, to the fact that the workers coming within the scope of the Act were still unorganized.

Reference was made in the report to the western conference held at Calgary last spring, when the One Big Union received an impetus, as follows: "We are more than ever of the opinion that our recommendation to the Medicine Hat convention dealing with this matter was correct, and that only through the regularly constituted channels of our organizations can we do good business, and a meeting such as was held last March without any duly constituted authority, is dangerous." The action here referred to was a resolution passed at the last annual convention as follows: "Believing that the interest of the workers in allied craft unions would be better served by closer relationship we recommend that our members use every effort to bring about a consolidation of activities by an amalgamation of different allied international organizations."

Delegate Fred Sneed, Vice-President for Lethbridge, reported that the One Big Union had been the cause of a little disruption in labour ranks in that city, where coal mining was the chief industry. Vice-President Farmilo, Edmonton, reported that although temporary chaotic conditions had been brought about through One Big Union activities, the finances of the Federation were in a healthy condition, that a large number of unions had retained affiliation, and that the inroads made into the United Mine Workers by the O.B.U. had not wrecked the international movement. Delegate Smitten, a member of the commission appointed by the Provincial Government last June to inquire into the whole coal mining situation in the Province, submitted his report to the convention on the work of the commission. (The report of the Commission is reproduced elsewhere in this issue.)

The following amendments to the

Workmen's Compensation Act were recommended by the Convention:—

“Recommended that the Alberta Federation of Labour get in touch with the U.F.A., with a view to getting their assistance towards extending the scope of the Act to include the agricultural industry.

“Recommended that the Act be amended so as to include all building done by farmers and owners of buildings. Also that all casual labour come within the scope of the Act.

“That the question of poisonous fumes, gases and acids in shops be dealt with by the Act and that the board have power to compel employers to equip their plants with such appliances as will prevent injury to the health of employees from these causes, and also to prevent the employment of anyone in shops or places where danger of such injury exists.

“That first aid appliances of a kind to be approved by the board be installed in all places of industry that come within the scope of the Act.

“That we endorse resolution No. 6 submitted by Bankhead Local U.M.W. of A. *re* centralizing all medical aid fees but would recommend it to be extended to include all industries.

“That we endorse the resolution asking for the inclusion of hotel and restaurant employees within the scope of the Act and further that all workers in all industries be included.

“That we endorse resolution submitted regarding increased indemnities under the Act and specially recommend that the present maximum of \$2,500 be deleted, and no maximum stated.

“That the whole of clause 35 dealing with residents other than Canadians be deleted.”

Among other resolutions the Convention went on record as being “unalterably opposed to universal military training.”

The demand of the Teachers' Alliance was supported, for a \$1,200 minimum wage, and for the privilege of consultation with the school boards on educational questions.

The Provincial Government will be petitioned to reconstruct the Election Act to provide for proportional representation.

A Mechanics Lien Act will be drafted by the Federation executive.

A resolution was adopted strongly condemning the employment of “stool pigeons” in an alleged system of espionage said to be practised by the Dominion Department of Justice in order “to disrupt and disorganize labour in Western Canada,” and demanding that all such agents be at once withdrawn.

A resolution was passed that the incoming executive ask the government that all labour legislation be placed under the administration of the Workmen's Compensation Board until a department of labour has been created, and that the onus of prosecution be lifted from the workers and become a function of the Board.

The following resolution, suggested by the declaration made by Mr. Justice Metcalfe, presiding judge at the Winnipeg strike trials, to the effect that sympathetic strikes were illegal, defined the attitude of the convention on the question of the legality of strikes, and was passed with eight dissentients, the delegates, however, declining to act upon a suggestion that a general 48-hour strike be called to protest against the judge's pronouncement:

“Whereas, the trial and sentence of R. B. Russell, of Winnipeg, for encouraging and assisting in a sympathetic strike has demonstrated that the Government of Canada are determined to use every means in their power to prevent labour from exercising its economic power; and, whereas, the strike is a weapon of defence, and if surrendered by labour must ultimately reduce labour to a state of servility; therefore, be it resolved, that this Convention of the Alberta Federation of Labour inform the Provincial and Federal Governments that this body will not recognize any law that prohibits the right of the worker to strike sympathetically, or otherwise; and that the Dominion Trades and Labour Congress be request-

ed to take a stand on behalf of the whole Canadian labour movement, and a further request made to the effect that the several Governments so amend their laws in a manner that would remove any doubt as to the legality of labour's action in so doing, and that the incom-

ing executive be instructed to co-operate with other organized bodies to this end."

President Frank Wheatley and Secretary-Treasurer Walter Smitten were re-elected, and Edmonton was chosen as the meeting place for the next convention.

## REPORT OF THE EMPLOYMENT SERVICE OF CANADA FOR THE FOUR WEEKS' PERIOD, DECEMBER 7, 1919-JANUARY 3, 1920

**R**EPORTS from Employment Offices to the Dominion Headquarters of the Employment Service of Canada, Department of Labour, show a further falling-off in the number of placements during the four weeks from December 7 to January 3, the number of placements recorded being 15,923 as compared with 23,981 during the preceding four weeks.

The following table presents in summary form by provinces a record of placements from the beginning of March to January 3. As has been indicated in previous issues of the LABOUR GAZETTE, regular placements refer only to those applicants for whom the employment found was likely to be of more than one week's duration, while casual placements refer to those applicants for whom the employment found was likely to be of less than one week's duration. It will be observed that the number of placements from the beginning of the record until January 3rd was 259,783, or at the rate of 5,904 per week, while the number of casual placements for the same period was 37,905, or a weekly average of 861. From March 1, 1919, until January 3, 1920, the number of vacancies notified to the Service was 375,359. The number of applications for employment totalled 370,171.

During the period under review, December 7 to January 3, the regular placements were distributed as follows:

Week ending December 13—	4,630
Week ending December 20—	4,764
Week ending December 27—	2,808
Week ending January 3—	3,721

The following table shows in detail the work of the various offices during the four weeks from December 7 to January 3. At the beginning of the period there were 8,362 unplaced applicants as compared with 7,005 unplaced applicants at the beginning of the preceding four weeks, while at the same time there were 13,107 unfilled vacancies as compared with 16,868 vacancies at the beginning of the preceding period, indicating that there was an increase in the number of unplaced applicants, and that these applicants were in a less favourable position regarding opportunities for employment than at the beginning of the preceding period, the number of vacancies having decreased materially. During the four weeks, 36,899 new applications and re-applications were registered, while during the same time 22,194 vacancies were notified, an excess of applications over vacancies of 14,705. The corresponding figures for the preceding four weeks' period were 38,381 and

32,585, or an excess of applications over vacancies of 5,796. It is probable that the situation as reflected in present returns will continue to exist in a greater or less degree until the revival of outdoor construction activity in the spring.

The accompanying chart shows graphically the number of applications and vacancies registered as well as the number of placements made over the period of the record. The chart indicates that

during March and first half of the month of April applications, vacancies and placements retained a constant relation to one another. After that the vacancies, that is the demand, approached the applications, that is the supply, more closely. Indeed, toward the end of April the vacancies equalled the applications. This increase in vacancies, however, was largely due to the spring demand for farm help, and as the ser-

vice found it very difficult to persuade workers to leave the cities for farm employment, placements, while they were considerably increased, did not maintain the same relation to vacancies as formerly. About the end of May demand increased sufficiently to exceed applications, and except for brief periods in June and July demand continued in excess of supply until the middle of October. In August the demand for harvesters in the west brought the number of vacancies in one week to 19,250; in that week 13,436 persons applied for employment and 12,561 placements were made. This was the record week of the year. From this peak, demand declined until the middle of September when a marked recovery began, due to the early opening of bush operations in the east. In two weeks of October applications for employment slightly outnumbered vacancies, and in the second week of

November, on account of the release of numbers of men from railroad and construction operations and farm work, supply mounted above demand, where it has since remained and in all probability will remain throughout the winter.

Since December 20 the chart indicates a steadily increasing number of applicants to have been registered, the number registered during the week ending January 3 being 12,140, representing the largest number of applications since the harvest period. The increase may be attributed largely to registration under the Federal Emergency Appropriation. The number of vacancies reported to the Service, on the other hand, showed a marked falling-off, especially during the last two weeks of the record, representing largely curtailment of activity at the close of the holiday season, and the beginning of the usual stocktaking and inventory period.

## EMPLOYMENT CONDITIONS IN CANADA DURING THE PERIOD DECEMBER 13-JANUARY 10, AS REPORTED BY EMPLOYERS

**W**EEKLY reports from employers to the Dominion Headquarters of the Employment Service of Canada, Department of Labour, during the four weeks from December 13 to January 10, show that further decreases in the volume of employment were registered during that period, especially noteworthy declines being registered during the second and third weeks.

The following chart shows weekly the percentage increases or decreases in the volume of employment over the full period of the record of March 22 until January 10. As formerly the chart presents a series of percentages, each percentage recording the increase or decrease in the volume of employment

during that week as compared with the preceding week. As the number of firms reporting varies from week to week no attempt should be made to read the chart as a cumulative record. The chart indicates that substantial decreases in the volume of employment were registered in three weeks of the period, the week ending January 10 being the only week in which an increase was reported. The changes recorded were:

Week ending Dec. 20—a decrease of .3 per cent.

Week ending Dec. 27—a decrease of 2.1 per cent.

Week ending Jan. 3—a decrease of 1.9 per cent.

Week ending Jan. 10—an increase of 1.1 per cent.

While the increase during the week ending January 10 was a substantial one, it represents only a partial recovery from the losses registered during the first three weeks of the period. These losses represented largely curtailment of staffs with the close of the holiday season and during the usual stocktaking period.

Reports from the various districts indicate that conditions were substantially the same throughout Canada. The Maritime Provinces reported decreases during the first two weeks of the period and increases during the latter two weeks. Quebec registered decreases during the first three weeks and an increase in the last week of the period. Ontario registered increases in the first and last weeks and decreases on December 27 and January 3. The Prairie Provinces reg-

istered an increase on December 20 and decreases on December 27, January 3 and 10.

Summarizing the returns by industrial groups, Clay, Glass and Stone Products; Leather and Leather Goods; Vehicles; Woodworking and Railway Operation registered increases in the first and last weeks and decreases during the weeks of December 27 and January 3. Commercial and Mercantile registered an increase during the first week and decreases during the remaining weeks of the period. Building and Construction; Quarrying and Mining; Lumbering; Pulp, Paper and Printing; Textiles and Miscellaneous registered decreases during the first three weeks followed by recovery on January 10. Railway Construction; Food, Drink and Tobacco registered decreases during all four weeks.

## UNEMPLOYMENT IN TRADE UNIONS AT THE CLOSE OF DECEMBER, 1919

THE present article on unemployment among the members of local trade unions deals with unemployment as at the end of December, 1919, and is based on returns received from 1,434 labour organizations with a total membership of 174,203. For all occupations reported 4.98 per cent of the members were unemployed as compared with 3.58 per cent in November, 1919, 2.76 per cent in December, 1918, 2.42 per cent in December, 1917, 2.17 per cent in December, 1916, and 8.7 per cent in December, 1915. Unemployment as used here has reference to involuntary idleness due to economic causes. Persons

occupied in work other than their own trades, or who are idle because of sickness or as the direct result of strikes or lockouts are not considered as unemployed. The chart given below shows the percentage of unemployment by quarters for 1916, 1917 and 1918, and by months for 1919.

The chart shows the closer application of the labour force in Canada year by year during the war. From a trade union unemployed percentage of eight on December 31, 1915 (percentage for March, 1916, not available), employment except for seasonal slackness continued to expand, culminating in an unemploy-

ed report of only one-half of one per cent in midsummer, 1918. The chart shows plainly the rise in unemployment following the armistice, when there was added to the usual winter slackness unemployment caused by the cessation of war orders, the demobilization of Canada's army and the general uncertainty in regard to future prices and markets. After registering a trade union unemployment percentage of 5.6 in February and March, 1919, the highest since December 31, 1915, the curve of unemployment declined steadily to slightly over two per cent at the end of September, which may perhaps be considered almost normal in peace times. With the approach of winter the curve had begun to mount slightly, and at the end of October it stood at 2.5 per cent, rising in December to 4.98 per cent. If the chart is turned upside down, it may be read as an employment rather than an unemployment curve, which in some ways is more satisfactory.

That the percentage out of work is larger in December than in the previous month is due partly to seasonal inactiv-

ity and partly to conditions consequent upon the holiday period.

Unemployment in the manufacturing and mechanical industries as reported by 365 unions having a combined membership of 51,429 was less prevalent than in the preceding month and also than in December, 1918 and 1915. The percentage of members reported as being idle, however, was larger than in December, 1917 and 1916, the percentage unemployed in December, 1919, being 2.79 per cent as compared with 3.16 per cent in November, 1919, 2.89 per cent in December, 1918, 2.77 per cent in December, 1917, 2.3 per cent in December, 1916, and 3.1 per cent in December, 1915. The percentage unemployed in the metals, machinery and conveyances group was smaller than in November, 1919. It was, however, larger than in December of preceding years. The tradesmen in this group were still affected by conditions in the shipbuilding industries and by the continued shortage of steel. There was less activity for workers in the food, tobacco and liquors group than in any previous month on record. This

slackness was partly caused by seasonal inactivity particularly in the meat packing industries. Textiles, carpets and cordage report a slightly larger percentage of unemployment than in November, 1919. The percentage in December, 1918, however, was considerably larger. In December of 1917, 1916 and 1915, no union members in these industries were reported as unemployed. Workers in the clothing industry were more fully engaged than in November and also than in any corresponding month in the record. The same is true also of employees in the leather, boots, shoes and rubber industries, with the exception of December, 1915, when no unemployment in this group was reported. The pulp, paper and fibre workers showed a smaller percentage unemployed than in the preceding month, but the percentage was larger than in December of previous years. There was a slight increase in the percentage unemployed as reported by the printing, publishing and paper goods tradesmen in comparison with November, 1919, and also in comparison with December of the three previous years. In 1915, however, the unemployed percentage was considerably larger. Reports from 13 unions of furniture and woodworkers indicated better conditions than in November and also than in any previous December of the record, with the exception of December, 1918, when no unemployment was reported. Glass bottle blowers and oil refinery workers reported higher percentages of unemployment than in November, and also than in December of previous years. Jewelry workers continued to be fully engaged. In addition to the members actually unemployed, considerable short time was also reported by unions of machinists, engineers, boilermakers and iron shipbuilders, blacksmiths, pattern makers, glass bottle blowers, paper makers, bookbinders and printers.

Reports from 604 organizations of transportation workers having a total membership of 70,891 indicated that 5.03 per cent were unemployed as compared with 3.87 per cent in November, 1919,

1.48 per cent in December, 1918, .70 per cent in December, 1917, 1.52 per cent in December, 1916, and 3.0 per cent in December, 1915. There was more unemployment among steam railway employees (whose returns constitute nearly 75 per cent of the entire group membership reporting) than in the previous month and also than in December of previous years with the exception of December, 1915. This slackness was largely due to the continued laying-off of maintenance of way employees for the winter months. Some trainmen, locomotive engineers and firemen, carmen, road employees and maintenance of way employees also reported considerable short time. Street and electric railway employees were less fully employed than in November and also than in any previous December on the record with the exception of December, 1915. Navigation workers continued to show a large percentage of unemployment, partly due to seasonal slackness. On the Pacific Coast, workers in this group were also affected by dullness in the shipbuilding industries. Teamsters and chauffeurs were more fully employed than in November, 1919, but the percentage out of work was larger than in December of previous years.

In the mining, quarrying and refining of ores group, reports were received from 31 unions with an aggregate membership of 11,543 and show that 2.10 per cent were unemployed as compared with 1.14 per cent in November, 1919, 1.24 per cent in December, 1918, 2.09 per cent in December, 1917, .65 per cent in December, 1916, and 5.9 per cent in December, 1915. Employment for miners and mill and smeltermen showed less activity than in the preceding months, but quarry workers continued to be well engaged.

The percentage out of work in the building and construction group as reported by 231 organizations having a combined membership of 22,917 was 12.06 per cent as compared with unemployed percentages of 5.82 in November,

1919, 8.68 in December, 1918, 9.58 in December, 1917, 5.24 per cent in December, 1914, and 28.3 per cent in December, 1915. The increase in the percentage out of work in this group was partly caused by the extremely cold weather prevailing throughout the country at the end of December, which made outside work practically impossible. Continued slackness in the shipyards in British Columbia also added materially to the number unemployed, particularly among carpenters and joiners. Bricklayers, carpenters and joiners, electrical workers, tile layers, lathers and roofers, and bridge and structural iron workers showed more unemployment than in November, 1919, and also than in December, 1918. The percentages out of work, however, among bricklayers, masons and plasterers, electrical workers, tile layers, lathers and roofers and bridge and structural iron workers have been exceeded in December of previous years. Granite and stone cutters were more fully engaged than in November and in any previous December except in 1916. Plumbers and steamfitters showed less unemployment than in the preceding month, but the percentage out of work was larger than in December of any previous year on record except 1915. Painters, decorators and paperhangers had less employment than in November, 1919, or in December, 1917 and 1916, but the percentages in 1918 and 1915 were larger than that for 1919. Steam shovel and dredgemen showed considerably more members out of work than in November. With the exception of 1917 the percentages reported in December of previous years were considerably larger than that reported in 1919. Hod carriers and building labourers showed more unemployment than in any month except December, 1918, but the number out of work was not large. Considerable short time was reported by bricklayers, masons and plasterers, carpenters and joiners and electrical workers.

In the public employment group, as

reported by 72 unions having a total membership of 6,154, the percentage out of work was .91 as compared with unemployment percentages of .47, .47, .17, .11 and 0, respectively, in November, 1919, December, 1918, 1917, 1916 and 1915.

Unemployment in the group of miscellaneous trades, as indicated by returns received from 129 unions with 11,075 members, was more prevalent than in November and any December of the record with the exception of December, 1915. Slight increases in the percentage of idleness were reported by retail clerks, hotel and restaurant employees and unclassified workers in comparison with November and also with December of previous years. There was more unemployment for musicians and theatre employees in December, 1915, only. Barbers and stationary engineers and firemen recorded smaller percentages of unemployment as compared with November, 1919. In comparison, however, with December of preceding years, the percentages were larger in December, 1915, only. In addition to the members entirely unemployed considerable short time was also reported by musicians, stationary engineers and firemen, and unclassified workers.

The percentages reported idle in the different group occupations are indicated in Table I on page 160.

Table II summarizes the returns by provinces. In Ontario only was the percentage of unemployment smaller than in November, 1919. In comparison with December, 1918 and 1917, Nova Scotia and Ontario show a smaller percentage of idleness. Increases were shown in all the other provinces.

The percentages reported idle in some of the larger industrial centres are indicated in Table III.

The tabular statement on pages 162-163 presents the returns in some detail:

TABLE I.—PERCENTAGES OF UNEMPLOYMENT IN TRADE UNIONS BY GROUPS OF OCCUPATIONS

Occupation.	Dec., 1919	Nov., 1919	Oct., 1919	Sept., 1919	Aug., 1919	July, 1919	June, 1919	May, 1919	April, 1919	Mar., 1919	Feb., 1919	Jan., 1919	Dec., 1918	Sept., 1918	June, Mar., 1918	Dec., 1917	Sept., 1917	June, Mar., 1917	Dec., 1916	Sept., 1916	June, Dec., 1915

## EMPLOYMENT IN THE BUILDING TRADES DURING DECEMBER, 1919, AS INDICATED BY BUILDING PERMITS

**E**MPLOYMENT in the building trades as indicated by the value of building permits issued in 35 cities showed a decrease during December as compared with the preceding month, the total value of building permits falling from \$6,936,438 in November to \$4,945,539 in December, a decrease of \$1,990,899, or 28.7 per cent. Nova Scotia was the only province to record an increase in this comparison.

As compared with the corresponding month in 1918 there was an increase of 201.1 per cent, the value for December, 1918, being \$1,642,362. In this com-

parison all the provinces recorded substantial increases.

Of the larger cities, Montreal, Toronto, Winnipeg, Edmonton and Vancouver recorded declines as compared with the preceding month. In comparison with December, 1918, these cities reported large increases.

Of the smaller centres, Halifax, Sydney, Moncton, Sherbrooke, Westmount, Kingston, London, St. Thomas, Moose Jaw, Saskatoon and Victoria all recorded substantial increases both as compared with November, 1919, and with December, 1918.

### ESTIMATED COST OF BUILDING WORK AS INDICATED BY BUILDING PERMITS ISSUED IN THIRTY-FIVE CITIES.

## EMPLOYMENT IN THE BUILDING TRADES IN THE YEARS 1910-1919 AS INDICATED BY BUILDING PERMITS

IN the table on the following pages and in the chart given below is shown the volume of employment in the building trades since 1910 as indicated by the value of building permits issued in 35 cities with populations of 15,000 or over. The estimated cost of the building work in these cities in 1919 was \$77,113,413 as compared with \$36,838,270 in 1918, an increase of \$40,275,143, or 109.3 per cent. In reading these figures, however, the increases in the cost of building materials and in wages should be taken into account. According to figures prepared in the Department the price of these materials has advanced at least twenty per cent within the past year, and wage rates in the building trades have also advanced materially. The unsettled labour conditions

its peak in 1912 was followed by slackness consequent upon the curtailment of all but absolutely necessary building during the war. The post-bellum revival in 1919 was quite remarkable in its extent, but was tardy in getting underway, the value of building permits not showing any unusual increases until the early summer.

The accompanying table shows that increases over 1918 have been registered in the eight provinces for which figures are available. The largest actual increase — \$22,107,822 — was recorded by Ontario. Substantial increases, however, were shown in Quebec, Nova Scotia, New Brunswick and Alberta. All the cities included, except Peterborough, reported marked gains. The largest total for any one city was registered by Toronto with \$19,617,838. Montreal follows with \$10,-

which prevailed throughout most of the building season in different parts of the country, taken in conjunction with the increased costs, made the year somewhat abnormal for the building industry, and comparisons with figures for the pre-war years are therefore scarcely justifiable. The chart shows the value of building permits by months since January, 1910, and the curve indicates that the extreme activity in employment during the building boom in the years before the war with

033,901; Halifax, with \$5,194,805, and Hamilton with \$5,087,462. In addition, permits to the value of over a million dollars were issued at Moncton, Quebec, Three Rivers, Brantford, Kitchener, London, Ottawa, Port Arthur, Windsor, Winnipeg, Regina, Saskatoon, Calgary and Vancouver.

Grouping the returns by districts, it is apparent that the Maritime Provinces with \$8,573,052 had 11.1 per cent of the total value of building permits issued

in Canada as compared with \$3,794,383 in 1918, an increase of \$4,778,669, or 125.9 per cent. The figures show that in all the provinces the pre-war level of employment in the building trades was not exceeded except in Nova Scotia. The total for the two cities in that province was 78.9 per cent higher than in 1918, and 337.4 per cent larger than the previous high mark in 1916. Halifax, with a total of \$5,194,805, largely accounted for the increase, the activity, as in 1918, representing to a considerable extent new construction to replace that destroyed in the disaster of December, 1917. In New Brunswick a high level of employment in the building trades was also indicated, the largest percentage increase over 1918 being reported in this province. Moncton, with permits issued to the value of \$2,132,176, reported a larger total than in any previous year. In St. John, however, the increase was less noticeable.

Quebec and Ontario together issued 72.3 per cent of the value of the building permits, the total for these two provinces being \$55,751,685 as compared with a total of \$25,329,366 during 1918. This district accounted for 75.5 per cent of the increase throughout the country. The Province of Quebec, which registered the only large decline in 1918 over 1917, reported for 1919 an increase in building permits of \$8,314,497, or 121.3 per cent. Montreal recorded an increase of \$5,151,028, or 105.5 per cent, as compared with 1918. Substantial increases were also recorded by the other cities in this province. The fifteen cities in Ontario, with a total of \$40,584,834, registered 52.6 per cent of the total value of the building permits issued in Canada. The percentage increase over 1918 in this province was 119.7. The value of the building permits issued in Toronto was 48.3 per cent of the total for the province. Hamilton, Ottawa, Windsor and London reported large totals, while substantial percentage increases were shown in all the other cities with the exception

of Peterborough where a slight decline was registered.

As might have been expected, in the western provinces the falling off in building has been very much more marked than in the East, although some improvement has been indicated in the past two years. The prairie provinces, which in 1912 accounted for about 42 per cent of the total value of building permits issued in Canada, issued in 1919 only about 13 per cent of the total. The total increases in Manitoba, Saskatchewan and Alberta constitute only about 10 per cent of the total increase of the building permits issued. This, however, is no doubt in part a reflection of the unsettled labour conditions which prevailed, especially during the early summer. Saskatchewan reported the most substantial total issued in the prairie provinces and Alberta showed the largest percentage increase. Winnipeg had the largest total of any of the western cities. Manitoba, however, recorded the smallest total of the three provinces and also the smallest percentage gain. Calgary, Regina and Saskatoon registered large totals and also large increases over 1918.

The total for British Columbia (\$2,904,284) represents not quite 4 per cent of the value of building permits issued in Canada as compared with 15.7 per cent in the record year of 1912. In 1918 British Columbia registered a slightly larger proportion of the total, the percentage being 5. There was in 1919, however, an increase of \$1,055,995, or 57.1 per cent, in this province in comparison with 1918, the figures for that year being \$1,848,289. British Columbia reported a larger actual and percentage increase than Manitoba, while both these figures were smaller than those registered in Saskatchewan and Alberta. Vancouver with \$2,271,411 recorded the largest total of the cities in British Columbia, but the percentage increase over 1918 was practically the same in the three municipalities.

### EMPLOYMENT FOR CIVIC EMPLOYEES IN FIFTEEN CITIES. DURING THE YEAR, 1919

THE accompanying tables show the volume of employment, both contract and municipal work, afforded work-people temporarily employed by fifteen city corporations during the year 1919, as compared with 1918, and indicate that increases of 1,226 persons or 14 per cent in the number of employees and \$1,646,687.08 or 23 per cent in the wages paid, were recorded, in comparison with the preceding year. During the year the 15 cities employed on an average 9,964 persons, and the payrolls amounted to \$8,744,743.55 as compared with an average of 8,738 persons and an aggregate payroll of \$7,098,056.47 during 1918.

Taking the returns by cities, it is evident that Montreal reported the largest number of persons employed by any one

city. With the exception of St. John and Montreal, increases in comparison with 1918 were recorded by all the cities for which figures are available, the most substantial increases being reported by Toronto, Winnipeg and Ottawa.

As to wages, increased aggregates were reported by all the cities included, except St. John, Montreal and Victoria. The increases, however, are probably as much due to increased wage rates as to there having been more work for these temporary employees. Montreal showed the largest amount of wages, the totals for Toronto and Winnipeg coming next. The largest increase in wages as in the number of persons engaged, was registered by Toronto, with Winnipeg and London having the next largest gains.

TABLE I.

EMPLOYMENT (BOTH CONTRACT AND MUNICIPAL WORK) AFFORDED WORKPEOPLE TEMPORARILY EMPLOYED BY FIFTEEN CITY CORPORATIONS DURING THE YEAR 1919 AS COMPARED WITH 1918

City.	Monthly average of employees temporarily employed. 1918	Monthly average of employees temporarily employed. 1919	Amount of wages paid employees temporarily employed. 1918	Amount of wages paid employees temporarily employed. 1919

Edmonton.....	313	430	302,063.81	453,786.81
Vancouver.....	442	554	413,372.31	556,851.43
Victoria.....	207	209	221,724.83	220,621.12
<b>Total.....</b>	<b>8,738</b>	<b>9,964</b>	<b>\$7,098,056.47</b>	<b>\$8,744,743.55</b>

With the exception of the first three months in the year, increases were registered throughout 1919 in comparison with the preceding year. The totals rose steadily from May until August, the largest number of persons being employ-

ed during that month, from which time the figures declined continuously. In 1918, the largest number of employees was registered in February, the figures for that month exceeding those for August, the peak month in 1919.

The amount of the wages paid in 1919, following the number of employees, was smaller during the first three months of the year than in the corresponding months of 1918. From February, 1919, however, the wages rose steadily to July.

Declines from the total for that month were registered during August and September. In October, the figures exceeded any reported, except for the peak month. Decreases were recorded during the last two months of the year.

TABLE II.

EMPLOYMENT (BOTH CONTRACT AND MUNICIPAL WORK) AFFORDED WORKPEOPLE TEMPORARILY EMPLOYED BY FIFTEEN CITY CORPORATIONS BY MONTHS DURING THE YEAR 1919 AS COMPARED WITH 1918.

Month.	Number of employees temporarily employed by months during 1918	Number of employees temporarily employed by months during 1919	Amount of wages paid employees temporarily employed by months during 1918	Amount of wages paid employees temporarily employed by months during 1919

## MINIMUM WAGES FOR WOMEN IN BRITISH COLUMBIA

IN accordance with the provisions of the British Columbia Minimum Wage Act, conferences of representatives of employers and employees were held during December, 1919, to decide and recommend minimum wage rates for women workers in the fishing and the fruit and vegetable industries of the province. Orders of the British Columbia Minimum Wage Board based on the recommendations of these conferences were gazetted on January 15, 1920, and will come into effect on February 28.\*

The orders of the Board regarding the fishing industry are, in brief, as follows:

The minimum wage for every experienced female in this industry who is of the age of eighteen years or over (except women to whom a special license may be issued under section 10 of the Minimum Wage Act) shall be at the rate of \$15.50 per week. The minimum wage for every inexperienced female who is of the age of eighteen years or over (except women to whom a special license may be issued) shall be at the following rate: Not less than \$12.75 for the first four months, \$13.75 for the second four months, and \$14.75 for the third four months.

According to definition "fishing industry" includes the work of females engaged in the washing, preparing, pre-

\*For previous Orders see LABOUR GAZETTE, FEBRUARY, 1919, p. 178; May, 1919, p. 606; October, 1919, p. 1237.

serving, drying, curing, smoking, packing or otherwise adapting for sale or use, or for shipment, any kind of fish except in the case of canned fish. The term "experienced female employee" means a female employee who has worked in the fishing industry for a period of at least twelve months. "Inexperienced employee" means a female employee who has worked in the fishing industry for a period of less than twelve months.

The following is a synopsis of the orders of the Minimum Wage Board regarding the fruit and vegetable industry:

The minimum wage for every experienced female employee engaged in the fruit and vegetable industry, who is of the age of eighteen years or over (except women to whom a special license may be issued), and who is employed on a time-rate basis, shall be the sum of \$14 for a week of forty-eight hours. The minimum wage for every inexperienced female in this industry, who is of the age of eighteen years or over, and is employed on a time-rate basis, shall be the sum of \$10 a week for the first month, \$11 a week for the second month, and \$12 a week for the third month. Where payment of wages is made on a piece-rate basis instead of a time-rate basis in the preparation of any product, the minimum

piece rates shall be such as will produce the wages mentioned above. In an emergency period, the hours of labour for an employee may be extended to ten hours a day or up to sixty hours in any one week. The minimum wage for an employee during the time of labour in any day in excess of eight hours, and up to and including ten hours a day, shall be such as will produce a wage of thirty cents an hour. The minimum wage, whether on time-rate basis or a piece-rate basis, for an experienced female employee who is of the age of eighteen years or over, during the time of labour in any day in excess of ten hours, shall be such as will produce a wage of forty-five cents an hour.

In this order, the expression "fruit and vegetable industry" includes the work of females engaged in canning, preserving, drying, packing, or otherwise adapting for sale or use, any kind of fruit or vegetable. "Experienced female employee" means a female employee who has worked in the industry for at least three months; "inexperienced female employee" means a female employee with less than three months' experience. "Emergency period" means a period of ninety days in any twelve months during which the hours of labour for female employees may be extended.

## RECENT INDUSTRIAL AGREEMENTS

THE following is a summary of the more important industrial agreements recently received by the Department. While the conclusion of every industrial agreement implies the acceptance, to a greater or less degree, of the principle of collective bargaining, it should not be overlooked that in a number of cases the agreement was reached only after the employees had been on strike. The agreements are arranged by industrial groups.

### Building and Construction

GRANITEVILLE, QUE. — THE PAVING CUTTERS' UNION, BRANCH No. 60, AND THE QUARRY MASTERS.—Agreement in effect from January 1, 1920, to December 31, 1920.

Eight hours shall constitute a day's work, which shall be paid at the rate of 75 cents per hour, and the following rates per M.: blocks  $3\frac{1}{2}$  to  $4\frac{1}{2}$  wide,  $4\frac{3}{4}$  to  $5\frac{1}{4}$  deep, 9 to 13 long, \$30;  $3\frac{1}{2}$  to  $4\frac{1}{2}$  wide,  $4\frac{3}{4}$  to  $5\frac{1}{4}$  deep, 8 to 10

long, \$27;  $3\frac{1}{2}$  to  $4\frac{1}{2}$  wide,  $4\frac{1}{2}$  to 5 deep, 7 to 10 long, \$27;  $3\frac{1}{2}$  to  $4\frac{1}{2}$  wide, 4 to  $4\frac{1}{2}$  deep, 7 to 10 long, \$25.20; 4x4 cubes, \$16.80; 4x3 cubes, \$18; flange blocks,  $3\frac{1}{2}$  to  $4\frac{1}{2}$  wide,  $4\frac{3}{4}$  to  $5\frac{1}{4}$  deep, 9 to 10 long, \$45;  $3\frac{1}{2}$  to  $4\frac{1}{2}$  wide,  $4\frac{3}{4}$  to  $5\frac{1}{4}$  deep, 5 to 6 long, \$40.

LONDON, ONT.—THE OPERATIVE PLASTERERS' AND CEMENT FINISHERS' INTERNATIONAL ASSOCIATION, No. 159, AND THE MASTER PLASTERERS.—Agreement in effect from March 1, 1919, to March 1, 1920.

Eight hours shall constitute a day's work for five days of the week and four hours on Saturday. All overtime and work on Sundays and holidays shall be paid at the rate of time and one-half.

The rate of wages shall be  $62\frac{1}{2}$  cents per hour, and foremen in charge of work shall receive not less than 40 cents per day additional.

GRIMSBY, ONT.—THE UNITED BROTHERHOOD OF CARPENTERS AND JOINERS, LOCAL No. 1969, AND VARIOUS LOCAL CONTRACTORS.—Agreement in effect from May 1, 1919, to April 30, 1920; notice of any desired change must be given by either party before December 31.

Eight hours shall constitute a day's work the first five days of the week and four hours on Saturday. Time worked over these hours shall be paid for at time and one-half, and work on Sundays and holidays at double time.

The minimum wage rate for journeymen shall be 60 cents per hour, and for foremen at least five cents additional per hour.

WINNIPEG, MAN. — THE DISTRICT COUNCIL OF CARPENTERS, LOCAL UNION No. 172, AND THE MILLMEN'S SECTION OF THE BUILDERS' EXCHANGE.—Agreement in effect from August 1, 1919, to May 1, 1921.

Nine hours shall constitute a day's work until November 1, 1919, after which eight hours shall constitute a day's work, work to be performed between 7 a.m. and 5 p.m. except on Saturday, when work shall cease at noon. Time and one-half shall be paid for all overtime except Sundays and holidays for which double time shall be paid.

The following minimum wage rates shall be paid: Per hour—Benchmen, stickermen, shapermen, trimmen, millwrights, wood turners and all round machine men, August 1, 1919, to April 30, 1920, 70 cents; May 1, 1920, to May 1, 1921, 75 cents; less capable benchmen, August 1, 1919, to April 30, 1920,  $62\frac{1}{2}$  cents; May 1, 1920, to May 1, 1921,  $67\frac{1}{2}$  cents; competent machine men, August 1, 1919, to April 30, 1920, 60 cents; May 1, 1920, to May 1, 1921, 65 cents; all other employees employed around the mill except teamsters and labourers, August 1, 1919, to April 30, 1920, 45 cents; May 1, 1920, to May 1, 1921, to be adjusted on or before May 1, 1920.

#### Domestic and Personal (including amusements)

QUEBEC, QUE.—THE INTERNATIONAL ALLIANCE OF THEATRICAL STAGE EMPLOYEES AND MOVING PICTURE OPERATORS, LOCAL No. 523, AND VARIOUS LOCAL EMPLOYERS.—Agreement in effect from September 1, 1919, to September 1, 1920.

*Stage Employees.*—The hours of labour in combination, vaudeville theatres and stock houses or other places of amusement for regular hands shall be as follows: Any day with arrival of show in morning, 8 a.m. to noon, 1 p.m. to 5 p.m.; balance of week 10 a.m. to noon, 1.30 p.m. to 4 p.m. When matinees are given, the hours shall be 1.45 p.m., night, from 30 minutes before opening of show, work to finish with the striking of scenes used in last act. Extra or added attractions whether put on prior to, during or after the performance shall be paid for at overtime rate. Rehearsals and taking in or putting out electrical apparatus stored in the theatre shall be paid at overtime rate. The regular overtime rate shall be 50 cents per hour. In combination and vaudeville theatres or other places of amusement in which six or eight performances per week are given, each permanent employee shall be entitled to one afternoon off per week, and in theatres giving twelve performances a week, to one morning off per week.

Wage scale: Per week—Carpenters, \$28; assistant carpenter, electrician, property man, fly-man, \$26. All extra men engaged as grips and fly-men and lamp-operators shall be paid \$1.50 per performance.

*Moving Picture Operators.*—The hours of labour shall be as follows: Vaudeville theatres, Monday, report for spot cues at rehearsal; balance of week, 1.30 p.m. to 7.30 p.m. Continuous vaudeville: report for cues at rehearsal; balance of week thirty minutes before performance starts; two and a half hours for supper. Moving picture houses, 2 p.m. to 5 p.m., 7.30 p.m. to 11 p.m. Any theatre playing two performances a day, operator to report thirty minutes in advance.

The minimum wage rate shall be \$25 per week of six days. Screening of pictures shall be considered as extra work and shall be paid at the rate of \$2 per picture. Entertainments such as churches, lodges, lectures, one operator, five hours or less, shall be paid \$5 per performance; for putting up or taking down machine, booth, etc., \$1 per hour. Overtime on week days shall be paid for at the rate of 75 cents per hour and Sunday work \$1 per hour.

#### Food, Liquors and Tobacco

MOOSE JAW, SASK.—THE INTERNATIONAL UNION OF FLOUR AND CEREAL WORKERS AND THE ROBIN HOOD MILLS, LIMITED. — Agreement entered into April 1, 1919, provides the following schedule for eight-hour day workers: Per hour—Operating millers, operating engineers, 72½ cents; head packers and assistant foremen, 67½ cents; machine tenders, flour packers, ear checkers, firemen, 62½ cents; smutters and oilers, feed packers, 60 cents; truckers and loaders, 57 cents; sweepers, 52½ cents; ashmen, common labour, 50 cents; women labellers, machine tenders, loaders and other female labour, 50 cents maximum, 37½ cents minimum, depending on nature of work and skill of worker; head teamster, \$125 per month.

Overtime shall be paid for at the rate of time and one-half and work on Sun-

days and holidays (when plant is in operation) at double time. Repair work on Sundays and holidays (when plant is not in operation) time and one-half.

Ten-hour day workers are paid the same rates per hour as the rates paid eight-hour day workers with overtime after ten hours. The following schedule gives rates for ten-hour workers not covered in the eight-hour schedule given above: Per hour—(1) Package department: charge hand, 67½ cents; box maker, first, 62½ cents, second, 60 cents, experienced box maker's helper, 57½ cents, inexperienced box maker's helper, 55 cents; tube makers and lidmakers, 62½ cents. (2) Elevator: charge hand, 67½ cents; elevator operator, 62½ cents; oiler, grain sampler, 60 cents; wheat shovellers, 57 cents; inexperienced common labour, 50 cents. (3) Cooper shop: head setter up, 62½ cents; cooper helpers, 55 cents; inexperienced common labour, 50 cents. (4) Local warehouse, sackroom, yard: charge hand, 67½ cents; store keeper, 62½ cents; truck drivers, yard man, 60 cents; teamsters, sackman's helper, 57 cents; coal shovellers, stenciller, 55 cents. (5) Miscellaneous ten-hour men: Machinist engineer, 72½ cents; warehouse and loading foremen, 67½ cents; sackman, stockkeeper, boiler washer, pipe fitters, blacksmiths (temporary), 62½ cents; boiler washer's helpers, 57 cents.

The work in these departments usually varies with the busy and dull seasons, and it is understood that such work shall be on an 8-hour basis during the dull period of the year, and on a 10-hour basis during the busy period.

VANCOUVER, B.C.—THE BAKERY AND CONFECTIONERY WORKERS' INTERNATIONAL UNION, LOCAL NO. 179, AND VARIOUS CONTRACT SHOPS.—A conference was held in accordance with Section 11 of the existing agreement, which states that in the event of an increase in the cost of living the union shall have the right to call a conference with a committee of the employers for the purpose of increasing the scale of wages. As a result of the conference the wages were changed as follows: Per day—Foremen,

from \$5.50 to \$6; dough mixers and ovenmen, from \$5 to \$5.50; bench hands, from \$4.50 to \$5; helpers, from \$4 to \$4.50. These changes became effective on January 1, 1920.

VANCOUVER, B.C.—THE CIGARMAKERS' UNION, No. 357, AND VARIOUS LOCAL EMPLOYERS.—Agreement adopted May 13, 1918, and in effect till April, 1920, contains piece rates for the various classes of work.

Manufacturers who do not employ a journeyman for his full time shall not be allowed an apprentice. One apprentice for one man; two apprentices for ten men; one returned soldier for five men employed; two returned soldiers for twenty men employed, in addition to the regular apprentice law, and no more. When journeymen are laid off, apprentices are to be laid off in proportion. No manufacturer shall hire new men while those in the shop are working on a limit. No limit shall be placed on one day's work.

When any shop has laid off for one week or more, the manufacturer shall not be allowed to hire any new men until the shop has worked for two full weeks, dating from commencement of week. The same shall apply when the men have been working on a limit for two weeks or more.

#### Leather

BRANTFORD, ONT.—THE BOOT AND SHOE WORKERS' UNION, LOCAL No. 136, AND VARIOUS EMPLOYERS.—Agreement in effect from April 19, 1919, to April 19, 1920.

Forty-seven hours shall constitute a week's work, 7.30 a.m. to noon and 1 p.m. to 5 p.m. the first five days of the week, and 7.30 to noon on Saturdays. Overtime shall be paid for at the rate of time and one-half, Sundays and holidays at double time.

Apprentices in all departments shall be paid as follows: Per hour—First three months, 12½ cents; second three months, 15½ cents; after six months, 17½ cents; thereafter to be increased according to efficiency till maximum is reached.

Wage Scale: (1) Cutting department: Per week—outside cutters, \$27; balking, \$12; Per hour—lining cutters, 38½ cents; trimming cutters, 27½ cents. (2) Stitching department: Per week—Vamping, \$21; skiving, \$16; making linings, edge stitch, \$15; closing, \$14.50; eye-letting, \$14; folding, \$13.50; stitching back stays, stitching foxings, stitching eyelet row, \$13.20; checking off, staying, fitting, \$12; finishing table, \$11 and \$8. (3) Lasting room: Per hour—assembling, 45 cents; pulling over, 50 cents; side lasting, 50 cents; No. 5 bed machine, 50 cents; Per week—Picking out lasts, \$13, piece rates per dozen and per 100 pairs from 11 cents to \$2.50. (4) Bottom finishing: Per week—Finishing bottoms, \$25; buffing, \$20; finishing heels, \$14. (5) Sole leather department: Per week—first operator, \$19.50; second operator, \$15. (6) Treeing department: Per week—Repairing, patent, \$18.15, tan, \$16.50, dull, \$14; packing, \$12; piece rates at 2¼ and 3 cents per pair, 6 cents per dozen, and 88 cents per 60 pairs.

#### Metals and Machinery

MONTREAL, QUE.—THE AMALGAMATED ASSOCIATION OF SHEET METAL WORKERS, LOCAL No. 116, AND VARIOUS EMPLOYERS.—Agreement in effect from September 1, 1919, to June 30, 1920.

Eight hours shall constitute a day's work, between 8 a.m. and 5 p.m. for the first five days of the week and 8 a.m. to noon on Saturdays. All work done from 5 p.m. to midnight and on Saturdays from noon to midnight shall be paid for at the rate of time and one-half, from midnight to 8 a.m. and on Sundays and holidays at double time. Minimum rate of wages shall be 60 cents per hour.

#### Printing and Publishing

MONTREAL, QUE.—THE INTERNATIONAL BROTHERHOOD OF BOOKBINDERS, LOCAL No. 91, AND THE GRAPHIC ARTS SECTION OF THE CANADIAN MANUFACTURERS' ASSOCIATION.—Agreement in effect from July 1, 1919, to June 30, 1921.

Forty-eight hours shall constitute a week's work, eight hours per day, be-

tween 7 a.m. and 6 p.m. except Saturday when work shall cease at noon.

The minimum wage shall be as follows: Per week—Journeymen, July 1, 1919, to June 30, 1920, \$30; July 1, 1920, to June 30, 1921, \$31. Journeywomen, July 1, 1919, to June 30, 1920, \$13; July 1, 1920, to June 30, 1921, \$13.50. All overtime shall be paid for at the rate of time and one-half. Overtime shall be during the first four hours after quitting time, but no one shall work more than three hours at a time-and-one-half rate on any particular day. After these hours double time. The night shifts shall receive fifteen per cent over the day scale; overtime to be paid on the same basis as day scale.

The scale of wages for apprentices shall be as follows: Per month—male, first year, first six months, \$7, second six months, \$8; second year, first six months, \$9, second six months, \$10; third year, first six months, \$11, second six months, \$12; fourth year, first six months, \$13, second six months, \$15; fifth year, first six months, \$18, second six months, \$21; after fifth year, journeymen's wages. Female, first year, first six months, \$6.50, second six months, \$7; second year, first six months, \$7.50, second six months, \$8; third year, first six months, \$9, second six months, \$10; after third year, journeywomen's wages.

OTTAWA, ONT.—THE INTERNATIONAL TYPOGRAPHICAL UNION, No. 102, AND THE EMPLOYING PRINTERS.—Agreement in effect from July 1, 1919, to May 31, 1921.

Forty-eight hours shall constitute a week's work, work to be completed between the hours of 7 a.m. and 6 p.m. each week day except Saturday when work shall cease at noon. The night shift shall also consist of forty-eight hours per week and shall be completed in five nights. Not more than ten hours shall be worked on any one night. No member on night work shall be required to work more than five hours without intermission for lunch.

When three shifts are employed, two

of them shall be considered night work. If day men are required to transfer to night shift they shall be paid at night rate for a full week's labour. For less than a full week, the overtime day rate shall be paid. If night men are transferred to day shift they shall be paid night rate for a full week's labour. For less than a full week the overtime night rate shall be paid.

Wage Scale: Per week—hand compositors, floor men, stonemen, make-ups, linotype and monoline operators, \$32; linotype and monotype machinists and machine tenders, typecasters on typesetting machines, and proofreaders who are practical printers and members of the Union shall receive not less than the prevailing compositors' scale and be governed by the conditions of the composing room. The rate for night shift shall be 25 per cent over day rates. Overtime shall be paid for at time-and-one-half for first three hours on wages paid, over three hours double time and on Sundays and holidays. When required to work lunch hour, members shall be paid said hour and continuous time at overtime rate until relieved.

Apprentices' minimum scale of wages: Per week—First two years, at the option of the office; third year, first six months, \$11, second six months, \$12; fourth year, first six months, \$14, second six months, \$17; fifth year, first six months, \$19, second six months, \$22.

FORT WILLIAM, ONT.—THE INTERNATIONAL TYPOGRAPHICAL UNION, Local No. 417, AND VARIOUS NEWSPAPERS. — Agreement in effect from November 1, 1919, to October 30, 1920.

Forty-eight hours shall constitute a week's work, eight hours per day, six consecutive days, between 6 a.m. and 6 p.m. for day work. Forty-two hours shall constitute a week's work, seven hours per night, between 6 p.m. and 6 a.m.; not less than thirty minutes shall be allowed for lunch. All work over eight hours in any one day, or over seven hours in any one night, shall be paid for at time and one-half for the first three hours, after that double time.

Work on Sundays and holidays except Labour Day at time and one-half, Labour Day at double time.

Wages: Per week—Ad., stone and job men, linotype and monoline operators, day work, not less than \$35, night work, not less than \$38. Apprentices, first two years, at the option of the office; third year, \$15; fourth year, \$20; fifth year, \$25.

SASKATOON, SASK. — THE INTERNATIONAL TYPOGRAPHICAL UNION, LOCAL No. 663, AND VARIOUS LOCAL EMPLOYERS. — Agreement which expired October 31, 1919, revised and in force from November 1, 1919, to October 31, 1921.

Eight hours shall constitute a day's work, between 7 a.m. and 6 p.m., and seven and one-half hours a night's work between 7 p.m. and 6 a.m. The middle shift shall work seven and one-half hours and shall receive night scale of wages. Overtime shall commence when time is called, and for the first three hours shall be at the rate of time and one-half, after that double time. When a member is called back either before or after his regular day's work, he shall receive one dollar extra for said call-back, provided that in no case shall he receive less than one hour's pay at overtime rate in addition to the compensation for call-back. Any work done on Sundays and holidays shall be paid for at double minimum wage scale: Per week—Make-ups, bankmen, proofreaders, operators, machinists and all employees engaged in hand composition and distribution, November 1, 1919, to October 31, 1920, day shift \$42, night shift \$45; November 1, 1920, to October 31, 1921, day shift \$44, night shift \$47. Apprentices, first year, 33 $\frac{1}{3}$  per cent of journeymen's scale; second year, 42 per cent of journeymen's scale; third year, 53 per cent of journeymen's scale; fourth year, 78 per cent of journeymen's scale; fifth year, 80 per cent of journeymen's scale.

Machine learners: The term for apprenticeship for beginners on linotype and monotype machines shall be thirteen weeks at the following scale: Per week

—first three weeks, \$22; next five weeks, \$28; last five weeks, \$35.

The situations of employees who enlisted may be filled during their absence provided that upon reporting for duty the situations formerly held by these employees shall be restored to them.

LETHBRIDGE, ALTA. — THE INTERNATIONAL TYPOGRAPHICAL UNION, LOCAL No. 551, AND VARIOUS EMPLOYERS. — Agreement in effect from July 1, 1919, to June 30, 1920, and if any change is desired by either party, notice must be given sixty days prior to the expiration of the agreement.

Eight hours shall constitute a day's work between 7 a.m. and 6 p.m. and seven and one-half a night's work between 7 p.m. and 6 a.m. Overtime up to four hours shall be paid for at time and one-half. Overtime extending over four hours shall be paid for at double rate. Work performed on New Year's, Good Friday, Victoria Day, Civic Holiday, and Thanksgiving Day shall be paid at time and one-half, provided this shall not apply to morning papers published every week day, or to night staffs on afternoon papers who work six nights a week. Double time shall be paid for all work performed on Dominion Day, Labour Day or Christmas and Sundays except in case of morning papers or night staffs on afternoon papers. A regular employee called to work outside of regular hours shall receive one dollar extra for call besides overtime pay.

Scale of Wages: Per day—Make-ups, admen, bankmen, journeymen engaged in hand composition or distribution, operators of typesetting machines, machine tenders (machinists), day work, \$40, night work, \$42; machinist-operators (one machine), day work, \$43, night work, \$45. Machinist-operators shall receive 50 cents for each additional machine taken care of. Apprentices shall be paid for the first two years, at the option of the office; third year, not less than 40 per cent of journeymen's wages; fourth year, not less than 66 $\frac{2}{3}$  per cent of journeymen's wages; fifth year, not less than 75 per cent of journeymen's wages.

NEW WESTMINSTER, B.C.—THE INTERNATIONAL TYPOGRAPHICAL UNION, LOCAL No. 632, AND VARIOUS LOCAL EMPLOYERS.—Agreement in effect from January 1, 1920, to December 31, 1923, and thereafter until terminated by either party by a previous three months' notice.

Seven and one-half hours shall constitute a shift's work, day shift between 7 a.m. and 6 p.m. and night shift between 7 p.m. and 6 a.m.

Wage Scale: Per shift—Day shift, \$6.75; night shift, \$7.35. Men working second shift commencing at 3 p.m. shall be paid at the same rate as day men. The foreman shall be paid at least 50 cents extra per shift. Machinist-operators shall be paid at least 50 cents per shift extra for the first four machines. If more than four machines are put in operation a regular machinist shall be employed. All work performed part day and part night shall be paid for at the scale of wages for which the larger part of the time has been worked.

Overtime shall be paid for at the rate of time and one-half and work done on Sundays and holidays at double time. All work done on morning newspapers on New Year's Day, Good Friday, Empire Day, Dominion Day, Thanksgiving Day, Labour Day and Christmas Day, five hours shall constitute a shift, to be paid for in full wages.

Apprentices shall be paid as follows: Per week—First two years at the option of the office; third year, first six months, \$13.50, second six months, \$16; fourth year, first six months, \$19, second six months, \$22; fifth year, first six months, \$27, second six months, 30.

Learners on typesetting machines shall be paid the following wages (no learner to work more than six days nor average less than four days per week): Per week—First four weeks, \$20; next three weeks, \$25; following three weeks, \$30; last three weeks, \$35.

VANCOUVER, B.C. — THE INTERNATIONAL TYPOGRAPHICAL UNION, LOCAL No. 226, AND VARIOUS BOOK AND JOB EMPLOYERS.—Agreement which is the result of negotiation and conciliation between

the parties concerned is to be in effect from January 1, 1920, to December 31, 1920, and thereafter unless thirty days' notice to re-open same has been given by either party.

Forty-eight hours shall constitute a week's work, eight hours per shift, day shift between 7 a.m. and 6 p.m., night shift between 6 p.m. and 4 a.m.

Wage Scale: Per week—compositors, stonemen and proofreaders, day work, \$40.50; night work, \$44.10. Machinists, machinist-operators and operators in job offices shall work for the same wages and hours as those prevailing in news rooms.

Overtime shall be paid for at time and one-half and work on Sundays and holidays at double time.

Apprentices, Wage Scale: First two years, at the option of the office; third year, at least one-third of journeymen's wages; fourth year, at least one-half of journeymen's wages; fifth year, at least two-thirds of journeymen's wages.

VANCOUVER, B.C. — THE INTERNATIONAL TYPOGRAPHICAL UNION, No. 226, AND THE VANCOUVER PRINTING AND PUBLISHING COMPANY.—Agreement in effect from January 1, 1920, to December 31, 1922, is the result of negotiation and conciliation, and the wages and hours the result of arbitration in accordance with the arbitration contract between the International Typographical Union and the American Newspaper Publishers' Association.

Six days or six nights shall constitute a week's work, seven and one-half hours per day, between 7 a.m. and 6 p.m., and seven and one-half hours per night between 6 p.m. and 7 a.m.

Wage Scale: Per hour—Day work, 90 cents; night work, 98 cents.

Overtime shall be paid for at the rate of time and one-half. The foreman shall receive overtime only at the option of the employer. All work done on Sundays, Christmas Day, Labour Day, and Dominion Day, on both morning and evening newspapers, shall be at double price. All work done on Good Friday, Victoria Day, Thanksgiving Day and New Year's Day shall be paid for at

time and one-half, provided that it shall be permissible to work on the last four named days and for five hours for a full day's pay at the option of the publishers. Employees called back after one hour shall receive one dollar for such call-back in addition to the prescribed rate of pay.

**Apprentices, Wage Scale:** First two years at the option of the office; third year, at least one-third of the journey-men's wage; fourth year, at least one-half of the journeymen's wage; fifth year, at least two-thirds of the journeymen's wage.

**Machine learners:** The period of learners on machines shall be seventeen weeks and the wage scale as follows: First three weeks, 40 per cent of scale; second three weeks, 50 per cent of scale; third three weeks, 66⅔ per cent of scale; next four weeks, 75 per cent of scale; last four weeks, 85 per cent of scale.

#### **Vehicles for Land and Water Transportation**

OTTAWA, ONT.—THE INTERNATIONAL

**BROTHERHOOD OF BOILERMAKERS, IRON SHIPBUILDERS AND HELPERS, CAPITAL LODGE, No. 394, AND VARIOUS EMPLOYERS.**—Agreement in effect from May 1, 1919, to April 30, 1920.

A day's work shall be eight hours and forty minutes commencing at 7.20 a.m. and ceasing at 5 p.m.; Saturdays from 7.20 a.m. till noon. Forty-eight hours shall constitute a week's work for men on night work, said hours to be divided equally five nights, and all time worked over forty-eight hours to be paid at the rate of time and one-half. For day work overtime shall be time and one-half from 5 p.m. to 10 p.m. and double time after 10 p.m. for new work both inside and outside the shop.

All repair work done outside of shop, inside or outside the city, shall be paid at the rate of 10 per cent over and above rate of wages, and double time all overtime. Work on Sundays and holidays shall be paid for at double time.

**Scale of Wages:** Per hour—Boilermakers, 65 to 68 cents; improvers, 50 to 60 cents; helpers, 45 to 47 cents.

### **FURTHER REGULATIONS AFFECTING WESTERN COAL MINES**

**THREE** new orders have been received from the Director of Coal Operations for Alberta and Eastern British Columbia.\* Order No. 142 contains a list of companies at whose mines the agreement made on December 18 between the Western Coal Operators' Association and District 18 of the United Mine Workers of America will be effective. A copy of this agreement is given in the January issue of the *LABOUR GAZETTE* on page 72. Order No. 143 contains a request for information regarding earnings of contract miners in District 18. Order No. 144 relates to a dispute at the Pacific Pass Mines

of the North American Collieries with regard to cost of living awards.

**ORDER No. 142.**—In accordance with the agreement between the United Mine Workers of America and the Western Coal Operators' Association, which was confirmed by Order No. 141, it is directed that the terms and conditions as set out in this order shall be in force at the following mines: Alberta Block Coal Company, Ltd., Drumheller, Alta., Atlas Coal Company, Ltd., Drumheller, Alta., Bankhead Mines (C.P.R. Co.), Bankhead, Alta., Corbin Coal and Coke Co., Ltd., Corbin, B.C., Drumheller Land Company, Ltd., Drumheller, Alta., Excelsior Collieries, Ltd., Wayne, Alta., Galt Mines (C.P.R. Co.), Lethbridge,

\*For details of previous orders see *LABOUR GAZETTE*, January, 1920, p. 73, and various preceding issues.

Alta., Hamilton Coal Company, Ltd., Wayne, Alta., Hy-Grade Coal Company, Ltd., Drumheller, Alta., Jewell Collieries, Ltd., Wayne, Alta., Mountain Park Coal Co., Ltd., Mountain Park, Alta., Newcastle Coal Company, Ltd., Drumheller, Alta., Newcastle Junior Coal Co., Ltd., Drumheller, Alta., Premier Coal Company, Ltd., Drumheller, Alta., Rosedale Coal & Clay Products, Ltd., Rosedale, Alta., Rosedeer Coal Mining Co., Ltd., Wayne, Alta., Scranton Coal Company, Ltd., Drumheller, Alta., Western Commercial Coal Co., Ltd., Wayne, Alta.

ORDER No. 143.—In order to obtain definite knowledge regarding earnings of contract miners throughout District 18, a regulation was issued requesting the mining companies to forward to the of-

fice of the Director of Coal Operations each month, until further notice, information showing (1) the number of contract miners employed at each mine, (2) the average earnings per shift of all contract miners employed, less charges for explosives, etc.

ORDER No. 144.—A dispute arose at the Pacific Pass Mines of the North American Collieries, Limited, Lovett, Alta., regarding the payment of cost of living awards to employees working over eight hours per day. It was ruled by the Director that Order No. 124 provides that nine hours' pay shall be paid for eight hours' work, and that it also provides for the payment of the cost of living increases (92 cents per day) in the same manner from the date it was issued.

### FAIR WAGE CONTRACTS, JANUARY, 1920

**D**URING January the Department of

Labour received for insertion in the LABOUR GAZETTE the following information relative to 9 fair wage contracts, 5 of which were awarded by the Department of Public Works, and 4 by the Department of Railways and Canals. All the contracts contained the usual fair wage clause which provides for the prompt payment of such wages as are current in the district in which the work is to be performed, and for observance on the various works under contract of the prevailing hours of labour, and which otherwise prevents abuses and secures the legitimate rights of the labour element.

A statement was also received as to supplies ordered by the Post Office Department, subject to the Regulations for the Suppression of the Sweating System, the securing of fair wages, etc.

#### DEPARTMENT OF PUBLIC WORKS.

Extension to Breakwater, Scotch Cove (White Point), N.S. Name of contractors, A. W. Girroir & W. F. MacKinnon, Antigonish, N.S. Date of contract, De-

cember 22, 1919. Amount of contract: schedule of prices.

Wharf, Le Pas, Man. Name of contractors, M. J. Wylie & Lionel Berry, Winnipeg, Man. Date of contract, November 1, 1919. Amount of contract: schedule of prices.

Dairy building (Experimental Farm), Ottawa, Ont. Name of contractors, R. Taylor & J. Lackey, Ottawa, Ont. Date of contract, January 13, 1920. Amount of contract, \$29,680.00.

Addition to administration building in connection with Dalton sanatorium, North Wiltshire, P.E.I. Name of contractor, Peter G. Clarke, Summerside, P.E.I. Date of contract, January 15, 1920. Amount of contract, \$7,500.00.

Addition to the office building of Department of Soldiers' Civil Re-establishment, Ottawa, Ont. Name of contractors, Grant Bros., Ottawa, Ont. Date of contract, January 27, 1920. Amount of contract, \$5,692.30.

#### DEPARTMENT OF RAILWAYS AND CANALS.

Making rubber stamps.....	239 20
Supplying stamping materials, pads and ink.....	801 43
Supplying mail bag fittings.....	2,867 00
Repairing motors.....	84 60
Repairing scales.....	28 85
Making up and supplying letter carriers' uniforms.....	8,934 59
New mail bags supplied.....	1,119 20
Mail bagging.....	26,359 64
Mail clerks' boxes, and letter boxes, repaired	101 75

#### PRICES RETAIL AND WHOLESALE IN CANADA, JANUARY, 1920

THE prices movement continued upward both in retail prices of foods and in the wholesale prices of many commodities. The chief increases were in grains, fodder, livestock, meats, potatoes, flour, bread, sugar, textiles, metals, building materials and in raw furs.

In retail prices the average cost of a family budget of staple foods in some sixty cities rose to \$15.30 at the middle of January as compared with \$14.73 in December, \$13.78 in January, 1919, and \$7.73 in January, 1914. The chief increases were in sugar and potatoes, but there were also advances in meats, eggs, butter, milk, bread and flour.

In wholesale prices the index number rose to 338.4 for January, as compared with 322.7 for December, 286.5 for January, 1919, and 136.5 for January, 1914.

The chief increases appeared in the groups: Grains and Fodder, Animals and Meats, Fruits and Vegetables, Miscellaneous Foods, Textiles, Metals, Building Materials, and Raw Furs. In Dairy Products, eggs and butter and cheese declined slightly.

The weekly budget for a family of five, including staple foods, laundry starch, coal, wood and coal oil, and rent, is based upon the estimated importance of the various commodities included, these being slight modifications of those employed in similar calculations by various official bodies. For some articles comparatively large quantities are included, owing to the omission of other important foods of the same class. For instance, the only fruits are evaporated apples and prunes, and the only fresh

vegetable is potatoes. As market conditions affecting these usually affect the prices of other fruits and vegetables somewhat similarly the relative proportion of expenditure on the various foods therefore tends to be maintained. In fuel and lighting the quantities are estimated on a similar principle, anthracite coal being used chiefly east of Manitoba and soft coal and wood in the western provinces, while no allowance is made for the quantities required in the various localities owing to climatic conditions, nor for the difference in quality. It is estimated that these calculations represent from 60 to 80 per cent of the expenditure of an ordinary family, according to the total income.

The index number of wholesale prices is based upon the quotations of 271 commodities, one having been dropped in 1915, and is the simple average of the percentages which the current prices of the several commodities bear to their average prices for the base period, 1890-1899, these being therefore made equal to 100.

The accompanying tables and notes give details as to the prices movement during the month and as compared with the same month in the previous year. The table of retail prices shows the prices of some 30 foods at the middle of the month in 60 localities in Canada having a population of 10,000 or over. Quotations are obtained by the correspondents of the LABOUR GAZETTE from dealers doing a considerable trade with workingmen. All prices are for delivered goods. The rates for rent are for six-roomed houses in districts occupied by workingmen.

### Retail Prices

Meats were upward, there being slight increases in some of the cities. Mutton averaged the same, while salt pork and lard were slightly lower. Eggs averaged slightly higher, fresh eggs being up 4c. and storage eggs 1c., but prices were down in some of the cities and up in

others, according to local conditions, etc. Milk advanced at Three Rivers, Brockville, Belleville, St. Thomas and Calgary, but fell at Winnipeg and Saskatoon. Butter averaged higher, both for creamery and dairy, but the prices fluctuated, being higher in some of the cities and lower in others. New cheese averaged slightly higher. Bread was slightly higher owing to advances in a number of the cities. In flour the increase was greater, being nearly 1c. per pound on the average. Rolled oats, rice and beans were slightly higher. Canned vegetables were steady. In sugar there was a considerable advance, averaging about 2c. per pound. Potatoes also rose considerably, advances occurring in nearly all of the cities. Anthracite and bituminous coal both showed advances, there being slight changes in a number of the cities. In wood and coal oil there were also slight advances. In rent no changes were reported for the month, but there were numerous reports of increases to take effect in the spring.

### Wholesale Prices

GRAINS AND FODDER.—Manitoba wheat was steady at the higher prices for millers determined by the Wheat Board at the end of December. At the end of January the prices of winter wheat in all the provinces were advanced by the Board 25c. per bushel. Barley at Winnipeg rose from \$1.65 to \$1.78 per bushel. There was a similar advance at Toronto. Oats advanced at Winnipeg from 93c. to 95c., but receded later. Oats at Toronto rose from 98c. to \$1.00 per bushel. Corn and flaxseed fluctuated, but averaged slightly higher. Peas advanced from \$2.75 per bushel to \$3.00. Rye advanced to \$1.90, but fell back to \$1.78. Hay rose \$1.00, reaching \$26.00 per ton at Montreal. Straw advanced \$1.50, reaching \$17.00 per ton.

ANIMALS AND MEATS.—Cattle fluctuated at Winnipeg between \$12.00 and \$13.00 for the higher grades, averaging slightly higher than in December. At Toronto, choice butchers rose from \$13.75

cCalculated per bag from price per 100lb. fSlabs and millwood. hLignite. eCalculated per cord from price quoted. gStove lengths. kIncluding \$1.00 for delivery. †Not included in average.

per hundred pounds to \$14.25. Dressed beef was steady at the higher prices reached at the end of December. Veal advanced 1c. per pound. Hogs fluctuated, but averaged higher than in December. Dressed hogs advanced from 24c. per pound to 26c. Bacon was steady at 38c., to which the price had fallen at the end of December. Lard advanced 2c. per pound, reaching 31c. Sheep, mutton and lamb advanced. Turkeys eased off from the high prices reached toward the end of the year.

DAIRY PRODUCTS. — Finest creamery butter at Montreal rose to 67½c., but eased off to 66c. Cheese fell, however, from 30c. to 27c., heavy stocks being reported, with a light demand for export. Fresh eggs fell from \$1.10 to 85c. per dozen, but storage eggs advanced from 60c.-61c. to 61c.-63c.

FISH. — Dry cod advanced slightly and salt mackerel rose from 10c. per pound to 12c. Fresh whitefish fell to 11½c. from 15c.

FRUITS AND VEGETABLES. — Apples rose from \$7.00 per barrel to \$8.00. Lemons eased off to \$5.00 per box. Potatoes rose from \$2.60 per bag to \$3.00 at Toronto and from \$2.75 to \$4.50 at Montreal. Onions and canned corn were slightly higher.

MISCELLANEOUS FOODS. — Bread advanced at Toronto from 6½c. per pound to 7½c. Similar advances occurred in a number of other cities owing to the increase in the price of flour as a result of the increased price of wheat set for millers in December. Flour advanced from \$11.00 per barrel to \$13.25. Sugar rose \$2.20 per hundred pounds, reaching \$14.71. Molasses and maple sugar were also higher.

TEXTILES. — A line of beaver cloth rose from \$4.55 per yard to \$5.50. Raw cotton advanced from 38c. per pound to 40.25c. Manufactured cottons advanced nearly 5 per cent. Raw silk advanced from \$13.60 to \$16.40. Spool silk ad-

vanced from 85c. per dozen to 90c. Machine silk advanced 10 per cent. Jute was slightly lower, but hessians advanced. Flax sewing twine was higher.

HIDES, LEATHERS, BOOTS AND SHOES. — Horse hides, tallow, and sole leather advanced.

METALS AND IMPLEMENTS. — Pig iron was steady at the advanced price reached in December. Iron bar, black sheets, galvanized sheets, scrap iron, and steel bar advanced. Antimony, copper, lead, nickel, silver bar, spelter, solder, and tin advanced. Coil chain and crow-bars advanced.

FUEL AND LIGHTING. — Anthracite coal declined at Montreal from \$10.90 per ton to \$10.85. Gasoline advanced from 32c. per gallon to 34c. at Toronto. Coal oil rose from 21½c. per gallon to 24½c.

BUILDING MATERIALS. — Lumber advanced considerably, pine rising over \$10.00 per thousand for some grades. Oak and birch also advanced. At Victoria, B.C., rough lumber and shiplap rose from \$30.00 per thousand to \$35.00; flooring from \$55.00 per thousand to \$80.00; and shingles from \$5.40 per thousand to \$7.50. Red lead, nails, copper wire, white lead, turpentine, benzine, prepared paints, shellac, varnish, and window glass advanced, but linseed oil and putty declined.

HOUSE FURNISHINGS. — Glassware and crockery advanced between 10 and 12 per cent. Sad irons recovered to \$2.05 per set after the decreases in the winter and summer of 1919.

DRUGS AND CHEMICALS. — Bleaching powder rose from 3½c. per pound to 4c.

MISCELLANEOUS. — Malt advanced 5c. per bushel to \$1.95. In raw furs there were considerable advances, especially in mink and muskrat skins. Paper advanced to \$4.00 per hundred as compared with \$3.45 in January, 1919. Rubber was slightly easier at 46½c. per pound.

# INDEX NUMBERS OF WHOLESALE PRICES BY GROUPS OF COMMODITIES FOR JANUARY, 1920, DECEMBER, 1919, & JANUARY, 1919, 1918, 1917, 1916, 1915, 1914 & 1913.

(Average price 1890-1899=100.)

† Preliminary figures. \* Nine commodities of the market, fruits, vegetables, etc. One line of spelter was dropped in 1915.

## PRICES IN THE UNITED KINGDOM AND IN OTHER COUNTRIES

THE accompanying tables and the following notes give the latest statistics available as to prices movements in the United Kingdom and in other countries.

### United Kingdom

The British *Labour Gazette*, published by the Ministry of Labour, in its January issue reported that the average increase in the retail prices of foods from July, 1914, to January 1, 1920, was 136 per cent, as compared with 134 per cent at the first of December and 130 per cent at the first of January, 1919. The chief increase for the month was a rise of  $1\frac{1}{4}$ d. per lb. in cheese. The increase in the cost of living since July, 1914, for the average workingman's family was estimated to be 125 per cent. The increases in rents were reported to be comparatively slight, but the prices of clothing were found to be between three and four times as high as in July, 1914. Coal was up 65 per cent and gas slightly more. Lamp oil had trebled in price and matches had risen still more, so that the whole fuel and light group showed an average increase of about 85 per cent. Of the average increase in all items since 1914, amounting to 125 per cent, it was estimated that about 6 per cent represented increased taxes. While the retail prices of foods had risen 136 per cent during the war it was estimated that expenditure on food had increased only 115 per cent, owing to changes in consumption, substituting one food for another, etc. In wholesale prices the index numbers showed continued increases, advances occurring in all groups. The index number of the Board of Trade for the year 1919 averaged 296.3 as compared with 267.4 for 1918 and 116.5 for 1913.

### United States

The index numbers of the Bureau of Labour Statistics showed increases up to November, both in retail food prices and in wholesale prices. The index numbers

for January 1, calculated for *Bradstreet's* and *Dun's Review* showed steep increases during December in all groups, except in meat, dairy and garden produce.

### Belgium

The Belgian Ministry of Industry, Labour and Supplies has published in its official journal, *Revue du Travail*, for December 15, tables of prices of the principal foods and necessities of life at Brussels.

The retail prices quoted were secured mainly from the records of a large co-operative society in Brussels. Sufficient information as to average family consumption not being available, the general index number was not weighted and is therefore the simpler average of the index numbers for the several commodities.

The following table shows the movement of prices during the current year, the index numbers being based on prices in April, 1914:

INDEX NUMBERS OF RETAIL PRICES OF HOUSEHOLD NECESSARIES IN BELGIUM, JANUARY-NOVEMBER, 1919.

(Prices in April, 1914—100)

a. Calculated from annual index number prior to war and price level Aug.—Dec. 1914. b. Four chief centers only. c. 6 months ending September. d. 6 months ending March. e. Quarter beginning in specified month. \* Previous month.

the last quarter of 1919 were 4.4 per cent higher than in the third quarter, and 201 per cent higher than in 1914. In Paris retail prices in December, 1919, were 1.7 per cent higher than in November, and 185 per cent higher than in July, 1914.

#### Italy

Retail food prices in Rome, in November, 1919, were reported by the Municipal Office of Labour, Rome, to be 2.1 per cent higher than in October, and 146 per cent higher than in 1914. Including other household necessities, the general level of prices was reported to be 137 per cent above 1914 levels. The Municipal Labour Office of Milan reported the cost of maintaining the pre-war standard of living, in December, 1919, to be 1.8 per cent higher than in November, and 254 per cent higher than in 1914, food being up 298 per cent, clothing 274 per cent,

heat and light 120 per cent, and rent 8.3 per cent above the pre-war level.

#### Holland

The municipal office of Amsterdam reported the cost of food in November, 1919, to be 0.6 per cent lower than in October, but 102.4 per cent above prices in 1913.

#### India

The Department of Statistics at Calcutta reported the retail prices of the principal articles of food, in November, 1919, to average 53 per cent above prices in July, 1914, the chief increases appearing in sugar at 190 per cent, cheese 114 per cent, mustard oil 89 per cent, butter 77 per cent, potatoes 48 per cent, other vegetables 39 per cent, fruits 56 per cent, milk 25 per cent, fish 25 per cent, tea 25 per cent, rice 33 per cent, flour 41 per cent, and pulses 65 per cent.

## COST OF LIVING AND REGULATION OF PRICES IN NEW ZEALAND

### Third Annual Report of the New Zealand Board of Trade

IN its Third Annual Report the New Zealand Board of Trade reports on its work for the year ending March 31, 1919, and reviews the principles of regulation of prices, profits, etc., with recommendations as to further measures. The report therefore deals with the transactions of the Board during the year, the control of trade and industry, including rationing, price fixing, regulation of profits and of competition, nationalization of industries, etc., and the questions of inflation and monetary stabilization.

It will be remembered that the Cost of Living Act, 1915, of New Zealand, provided for the appointment of a commission called the "Board of Trade" to deal with conditions of

trade, industry, prices, cost of living, etc., and to enforce an anti-combines statute entitled "The Commercial Trusts Act, 1910," the scope of which was at the same time extended. The Minister of Industries and Commerce was ex-officio President of the Board, and during his absence one of the other ministers acted as President. The other members were three in number, appointed for three years by the Governor in Council. The duties and powers of the Board as defined by the Act were as follows:

#### Duties and Powers of the Board

The Board of Trade is empowered:

- (a) To investigate and report to the Governor upon any case in which it is al-

leged that there has been an infringement of any of the provisions of the Commercial Trusts Act, 1910;

- (b) To inquire into and report to the Governor upon matters affecting the cost of living, or upon any other question referred to it by the Governor relating to the supply, demand or price of commodities;
- (c) To inquire into and report to the Governor upon any complaint that the price of any class of goods is unreasonably high;
- (d) To consider, inquire into and report upon any question relating to the trade, commerce or business of New Zealand which may be referred to it by the Governor;
- (e) To institute inquiries in reference to markets for goods produced or manufactured in New Zealand, to report the result of such inquiries to the Governor, and to make recommendations to the Governor in regard to trade with other countries;
- (f) To make recommendations to the Governor for legislation in relation to matters referred to it for consideration; and,
- (g) Generally to advise the Governor as to how the trade, industries and commerce of New Zealand can be best encouraged, developed and protected.

The Board was appointed early in 1916, and during the first two years of its existence it dealt with wheat, flour and bread, butter, meat, fish, timber, sugar, eggs, galvanized iron, bacon, footwear, gas, etc. During the first year complaints were made as to infringements of the Commercial Trusts Act, 1910, but during the second year there were no complaints. During the third year, among complaints as to high prices, there was included a complaint as to agreements among cement manufacturers in supplying the market in certain districts.

In addition the Board advised the Government as to the control of importation and exportation of commodities, including regulation of the prices, and it was charged with enforcing cer-

tain regulations adopted on its recommendations. The Board determined the prices paid to farmers for the wheat crop each year and purchased the crop for the Government, fixing the prices of flour and bread. One of its members was Wheat Controller, who purchased wheat in Australia and handled the imports. An interesting project was the establishment of an "Equalization Fund" in connection with the control of the butter trade and prices. In 1917 complaints were made to the Board as to the high prices prevailing and as to further advances expected, two shillings per pound being predicted, as the export market was high. After investigation as to conditions of local supply and export, the Board recommended that wholesale prices for home consumption should be fixed, that gross profits of retailers should be fixed at the same rate as before the war, and that exportation of butter and cheese should be allowed only under license and Government control. The Government adopted this course and established an Equalization Fund for the purpose of reimbursing producers of butter for home consumption for any loss sustained as compared with prices obtainable by exporting, as two-thirds of the output was exported.

#### Report of Board.

The report of the Board for the twelve months ending March 31, 1919, reviews the work of the Board and analyzes the cost of living and high prices particularly as to causes and remedies. The opening paragraphs of the report are as follows:

As was the case last year, the work of the Board for the period under review has consisted mainly in inquiries into matters affecting

the cost of living, and especially upon questions relating to the supply, demand, or price of commodities, and into complaints that the prices of particular classes of goods are unreasonably high. Special attention was paid during the year to the importation, sale, and distribution of petrol; to a scheme for the standardization of footwear; to the placing of restrictions on the export of timber; and to a comprehensive inquiry into the coal industry.

Two hundred and sixty complaints were received regarding the high prices of commodities. These complaints were investigated, and, wherever in the opinion of the Board it was deemed desirable, adjustments of prices have been made. In addition the Board received eighty-one depositions and examined 242 witnesses.

A wide range of commodities has been under the control of the Board, and no upward movement in prices has been sanctioned without full investigation. In addition to fifty-seven main grocery items comprising household essentials, the Board has kept control of manufacturers' prices in grocery lines, such as soap, condensed milk, sugar, candles, jams, matches, baking-powder, canned meats, &c.

The prices of bacon, wheat, flour, bread, bran, pollard, hides and skins, and petrol, have been fixed by Order in Council; and, by arrangement with the federated sawmillers throughout the Dominion, no increase in the price of timber has been made since the 1st of November, 1918.

Generally speaking, the applications made by merchants and tradespeople for increases in prices have been well founded, but in a few instances the Board has refused to grant such applications where, after close investigation of the evidence and balance-sheets submitted, the circumstances did not appear to warrant the granting of the increases. The consumers' interests have been closely watched by the Board in dealing with prices.

A summary of the more important proceedings of the Board during the twelve months ending March 31, 1919, follows:

#### WHEAT, FLOUR and BREAD.

As in previous years the Government,

through the Board, purchased all the wheat grown at fixed and guaranteed prices, 4,925,162 bu. at 5s. 10d. per bu. and upward according to date, etc., and bought further supplies in Australia 2,000,000 bu. and later an additional 2,000,000 bu. at 5s. 7½d.

For the 1918-19 crop the price was fixed at 6s. 6d. per bu., etc. As the prices of flour and bread were adjusted according to the price of wheat, a small subsidy was paid to millers in view of the increase in wheat prices and in other costs in order to slightly lower the price of flour to £15 per ton and therefore keep down the price of bread, at 10d.-11d. per 4 lb. loaf according to locality.

#### SUGAR.

As in previous years an arrangement was made with a large company to provide the entire sugar supply for New Zealand at a fixed price, higher than in the previous year, owing to a crop failure in Fiji and the higher cost of refining, but lower than in any other country in the world.

#### TIMBER.

Exports of timber were restricted to ensure the necessary supplies for users in New Zealand, and an advisory committee was appointed to assist the Board of Trade in administering the regulations under the Commissioner of State Forests, the minister in charge. Each mill was given a quota as its share of the production for Dominion use and was allowed to export the rest of its production, the millers being allowed to adjust their respective quotas among themselves, with the consent of the minister. Abuses of these privileges led to the enforcement of stricter regulations.

Prices were also investigated and no undue profits were discovered, but saw-millers agreed not to raise the prices in force November 1, 1918, without the consent of the Board.

### COAL.

A special inquiry was made into the production and sale of coal and a special report was issued.\* It was found that the average cost of production during 1917-18 was 15s. 4d. per ton at the mine, of which 7s. 1d. was for labour. The increase during the war in cost of production averaged 31 per cent, or 3s. 7d. per ton, of which 1s. 10d. was in labour cost. Costs of railway freights advanced 21 per cent and coastal shipping 50 per cent. Some of the mines were found to be producing at a loss and the others at slight or moderate profits, none exceeding 10 per cent, and averaging only 5.1 per cent. Profits on distribution of coal were found to be moderate owing to the action of local Coal Committees set up by the Ministry of Munitions and Supplies, to the force of public opinion, and in some cases to pressure brought to bear on retailers by mine operators and large distributors to prevent increases at times of scarcity. The following recommendations were emphasized:

- (1) The necessity for State encouragement of scientific research and its application to the problem of coal-mining and the utilization of the small coals of the Dominion. A much fuller advantage may be taken of the work done and the advice given by the State Geological Department, and the University colleges should receive generous financial assistance in the development of research.
- (II) The equal importance of an improvement in the industrial organization of labour at the mines and in its general social environment, particularly in re-

spect of housing and better educational facilities.

- (III) Systematic technical education in the domestic use of coal so as to diminish considerably the present great waste due to ignorance of the possibilities of small and mixed coals, and of the proper methods of stoking ovens and grates.
- (IV) Discouraging every form of inflation of the currency, which inevitably leads to rising prices at the expense of the poorer members of the community.

### EARNINGS AND COST OF LIVING OF MINERS.

It was found that the cost of living had risen by at least 30 per cent, and that the miners had received increases in wages by way of bonuses, 10 per cent early in 1916, and at the middle of 1917 an additional 7½ per cent for coal cutters paid by the ton, etc., and 10 per cent for men on day wages. These increases in wage rates hardly equalled the increase in the cost of living, but, owing to better working conditions, the absence of slack periods, etc., earnings increased to about the same degree as the cost of living, and in the case of coal cutters earnings increased faster as the best seams were being worked, making greater savings possible. The expenditure for tools had increased by £10 per year per man. A bonus of 25 per cent to coal cutters and 30 per cent to other workers in September, 1918, it was estimated, would increase the "real wages," that is, the quantity of goods and services a man could obtain for the same amount of work as before.

An investigation into the cost of living made in 1910-11 by the Department of Labour indicated that an average family spent its income in the following percentages: food 34 per cent, rent 20 per cent, fuel and light 5 per cent, boots and clothing 13 per cent, miscellaneous

\*See LABOUR GAZETTE, October, 1919, p. 1187.

28 per cent. On this basis the Board found that the cost of living for miners had risen by September, 1918, on an average 35 per cent by items as follows: food 50 per cent, rent 5 per cent, fuel and light 20 per cent, boots and clothing, 65 per cent, miscellaneous 25 per cent. The report stated:

“We take the view that the order of reference does not require us to express our opinion upon the question whether the wage rates ought to be raised whenever and because the cost of living increases.”

#### STANDARDIZATION OF FOOTWEAR.

The boot manufacturers appointed an efficiency committee to co-operate with the Board, and samples of the lines to be standardized were selected, considered and distributed among manufacturers. The Government fixed the prices of hides and leather at the rates for purchase by the Imperial Government and it was “confidently expected that as a result of this fixation of price both leather and boot prices could be stabilized.” The prices submitted by the manufacturers, however, were considered unreasonable by the Board, and the Government was advised to call for tenders for the grades and samples of boots selected. It was found that further legislation would be necessary. In the meantime the Board proposed to license manufacturers to produce the proposed standard lines on terms approved by the Board.

#### CONTROL OF PRICES OF GROCERIES.

Owing to the frequent fluctuations in prices of groceries, many of which were imported, arrangements were made that grocers would not raise prices without the consent of the Board. Manufactur-

ers of certain lines made similar arrangements. These schemes were found to work satisfactorily and without friction.

#### GASOLINE.

In July, 1918, a scheme was devised for the equitable distribution of gasoline, prices being fixed according to locality, rationing being provided for when necessary. Until December, 1918, supplies were insufficient and great care had to be exercised. The Department of Munitions and Supplies administered the regulations.

#### BACON AND HAMS.

Packers' prices were fixed by Order in Council at the rates ruling December 1, 1917, and later retail prices were fixed at 1s. 6d. per lb. with 1d. added for slicing. The Board had power to allow higher prices where necessary owing to special circumstances.

#### POTATOES.

From February to May, 1918, the export of potatoes was prohibited, first on the recommendation of the Department of Agriculture, and the ban was continued on the recommendation of the Board of Trade after an investigation, in which it appeared that, owing to short supplies for the time being, export to Australia would cause prohibitive prices in New Zealand if allowed.

#### FISH.

Few complaints were made as to prices or supplies as the Board kept closely in touch with the industry for which it had taken measures in previous years to secure supplies of tackle, etc. The City of Auckland had its own trawling vessels. With the end of the war no further diffi-

culty was expected. A Commission was appointed by the Board under the Cost of Living Act to investigate the conditions of fishing, prices, etc.

#### MILK.

Prices were changed from time to time according to market conditions, the price reaching 6d. per quart in some cities, and the supply was still short. At Wellington the city council took over the milk trade, securing economies in delivery, etc. The Board watched this experiment closely, co-operating with the city in securing supplies, etc.

#### CEMENT.

Complaints were made as to the high prices of cement, but on inquiry the Board found that the prices were justified, in fact the plants were losing money, some had gone into liquidation, many were closed down, production was greater than the demand owing to the small amount of building going on, and there had been substantial increases in manufacturing costs. An arrangement among the mills as to districts for sales for each was found to be due to difficulties in obtaining shipping and was considered quite proper.

#### Control of Trade and Industry

With regard to trade and industry, the Board discussed at length the principles of government control and regulation, making recommendations for application to New Zealand, as appear in the following extracts:

Under section 6 (g) of the Cost of Living Act the Board is empowered to advise the Governor as to how "the trade, industry, and commerce of New Zealand can be best encouraged, developed, and protected." Now that the war has been brought to a successful ter-

mination it seems appropriate to the Board, in conformity with the powers conferred upon it by this section, to discuss the broad outline of a policy for the encouragement, development, and protection of New Zealand's trade and commerce, and to endeavour to define the limits within which the Government should control industry. There are discernible in the discussion on this question two distinct schools of thought—one school advocates an extension of Governmental interference with industry, and another school urges that Governmental interference with trade should immediately cease. There is a consensus of opinion, however, that some measure of control should continue through the difficult reconstruction period until such time as trade and industry attain normal conditions. The Board proposes to discuss the question as to what extent the Government control of industry should become part of our permanent economic policy, and what are the lessons to be learned through our experience of Government control of trade and industry during the war.

Governmental control of industry during the war period can be appropriately considered under three distinct heads—(a) Administrative control, (b) rationing, (c) price regulation. . . .

#### ADMINISTRATIVE CONTROL.

In the case of New Zealand the Government's main interference was in—

- (a) Acting as intermediary for the Imperial Government in the purchase of our main products, such functions being undertaken by the Imperial Supplies Department;
- (b) Its encouragement of wheat-production, and its control of the sale and distribution of wheat among the various mills;
- (c) And, less directly, in its various prohibitions of export with a view to controlling the destination of various products and of preventing the home market from being denuded of supplies, as in the case of the establishment of the Butter Equalization Fund and the regulations imposing restrictions on the export of timber.

The necessity of acting as intermediary for the Imperial Government will cease when the Imperial Government is no longer the main

purchaser of our primary products, and this trade should then revert to normal conditions through the channels that existed in pre-war days, or through new channels inaugurated by the initiative of the industries concerned.

The control of wheat-growing and gristing is on a different footing, and it is a question of policy as to whether direct Governmental control should continue in its present form—guaranteeing a price in advance to growers and controlling the distribution and profit in manufacturing, a scheme which eliminates every element of speculation, exploitation, and profiteering—or whether it would be safe to rely for our main food product on the unimpeded operation of the law of supply and demand.

The Board is of opinion that, as the present scheme has worked satisfactorily, and at no cost to the Government, it should be continued at least during the period of reconstruction. . . .

#### RATIONING.

Whether rationing is to find a place as part of our permanent peace policy is intimately bound up with the question of price-control. Ordinarily, if prices are determined by the law of supply and demand, everybody buys for every purpose as much of a thing as he can afford—that is, as much as he wants at the price—and this process exhausts the whole supply. Prices which are determined in free competition on the open market tend to secure an equilibrium between production and consumption. . . .

A system of rationing to be effective and fair must provide for—

- (a) The rationing of material among different forms of industry;
- (b) The rationing of material that is allowed to a particular industry among the businesses and firms engaged in that industry, so that none of them is treated unfairly relatively to the rest; and,
- (c) The rationing of the finished product among ultimate consumers, so that all may be placed on an equal footing. . . .

Serious and perplexing as the problems presented above are, nevertheless they must be faced and answered if prices are to be controlled by authority in such a way that the

demand at the fixed price is in excess of the supply, for the alternative is wild confusion. If, however, prices are not to be controlled in this sense rationing is unnecessary. The choice, therefore, between adopting and rejecting rationing as a permanent peace policy depends upon whether or not it is desirable to fix prices at a lower level than the free play of the market would establish, as the price-fixing authority must either fix the same price as would be established by the free play of the market or it must fix a different price. In the former case its work would be superfluous, and in the latter case its price would be wrong unless it could show that the market is not free and open, and that therefore the true market price cannot be established without its intervention. The Board is not concerned at present with the results that would follow if the fixed price was higher than the market price, except to point out that in this event the price-fixing authority would need to devise a scheme for dealing with the surplus. What we are concerned with are the results that follow if a price is fixed lower than the market price—or, in other words, at a level that induces demand to exceed supply.

#### PRICE REGULATION.

The main object of price-fixing during the war was the prevention of “exploitation and profiteering.” The persons restrained by the regulations were not in general monopolists. Their opportunity to make large profits was not created by restrictive action on their part—that is, there was no rigging of the markets; commodities were not withheld from sale with the object of creating an artificial scarcity; sellers did not even exercise foresight by laying in stocks. The opportunity came mainly by chance. Traders happened to possess at a particular time during the war stocks of goods for which there was a sudden demand, or a sudden shortage of supply brought about by the changing conditions of the war. Had no restrictive action been taken by the State these people would have been in the position to make enormous profits. Even when maximum prices were fixed they sometimes made larger profits than usual. Nevertheless, the limitation of price meant that at the legal price the demand

was in excess of the supply. Is price-control of this character desirable as a permanent peace policy?

Prices are divisible into two main classes—  
(a) competitive prices, (b) monopoly prices.

#### COMPETITIVE PRICES.

Under conditions of competitive trade, when abnormal profits are being made in any industry or business, more capital and enterprise tends to flow into that industry or business. The output is thereby increased, and on account of the increased output prices fall and profits are reduced to normal. High price performs a twofold function: on the one hand it stimulates production, on the other it conduces to economy in consumption. Where competition exists to the full extent, price, distribution and profits regulate themselves. Taking good years and bad years together, exploitation and profiteering cannot exist if competition is free and unimpeded—that is to say, when it is possible for capital and labour to flow quickly into industries whose prices are rising.

Any general permanent policy of anti-profiteering price-regulation applied to ordinary competitive trade would act differentially against those industries whose profits fluctuate. They would be deprived in their good years of part of their profits, and would receive no help in their period of bad fortune. Hence in the long run capital and enterprise would tend to desert such industries for industries in which the profits were more nearly the same every year.

But there is no reason to suppose that industries in which the profits are fluctuating are socially less desirable than others. Consequently this arbitrary diversion of production from the channels into which economic forces would tend to direct it would almost certainly involve a misdirection of effort and a real loss to the community.

Broadly speaking, we therefore conclude that permanent Government control over the price of commodities produced under competitive conditions is not necessary as a preventive of profiteering and exploitation, because for competitive industries as a whole, good times and bad times being taken together, competitive condi-

tions are themselves an adequate preventive, while from the standpoint of the public such regulations hamper production. Moreover, this type of price-control, for the reason set forth in the preceding section, would force the Government to undertake the enormously difficult task of rationing in peace-time. Hence, in the opinion of the Board, the case against a permanent policy of price-fixing in competitive industries is conclusive. The Board discusses in later chapters the policy to be adopted to keep competition free and open, but during the reconstruction period that now exists it may not be possible to keep trade and industry on a competitive basis, and consequently other considerations apply. . . .

#### MONOPOLY PRICES.

The Board desires to emphasize that what it has urged in the preceding section relates solely to permanent price-control over commodities which are produced under competitive conditions, and in which, therefore, artificial limitation of price would cause the demand at the fixed price to be in excess of the supply. In industries subject to monopoly control there is no tendency for prices to be brought down to a level that yields only a normal profit. On the contrary, unless the State intervenes, the monopolist, if he chooses, has the power to fix prices at a level which yields him abnormal profits. Hence monopoly prices can be regulated by State action without creating a situation in which the demand at the regulated price will exceed the supply, and consequently if prices are fixed by regulation for goods under monopoly control the difficult problem of rationing need not be considered. Consequently, where a monopoly exists there is a strong case for State regulation of price, and, as the tendency to combination and monopoly has been stimulated by the experience of the war, monopolistic control is likely to extend more widely over industry in future than it extended in the past, and the field open for Government intervention will be correspondingly increased. The general conclusion is therefore warranted that, while in competitive industries a policy of price-control ought not in any circumstances to be continued as a permanent policy, in monopolistic industries price-control is essential in the

public interests. In this case, or in case the production, distribution or sale of any commodity is so concentrated in private hands as to give a substantial control over prices, the Government should fix prices, due regard being paid to the cost of production, maintenance of an adequate supply, and the prevention of unnecessary waste.

#### ENDS TO BE ACHIEVED.

The ends to be achieved by Government control of industry are twofold: (a) to keep alive competitive industry; (b) to control monopoly. The policies that will accomplish one object will automatically accomplish the other. Owing to the complexity of economic phenomena no one simple remedy can be applied. The remedies that will be suggested by the Board will also accomplish the solution of the cost-of-living problem, so far as such a problem can be solved by a country by legislative action independent of the action taken by the rest of the countries of the civilized world to control monetary standards. This feature of the problem is discussed later in the report.

But it may be urged that it is neither desirable nor practicable to keep alive competitive industry, as the trend of economic development is towards a state of society where capital is concentrated in some form of trust organization and competition eliminated.

Competition in all forms is sometimes condemned on account of the waste that results from excessive or unfair competition, but the waste can be diminished by co-operation in production and distribution, such co-operation resulting in more effective competition. Moreover, as pointed out earlier, competition is the best regulator of prices and profits. In general it results in increased production, as it evokes effort, initiative and efficiency; but this is not free competition as preached by the old school of individualists. The State, we take it, is entitled to regulate conditions under which competition should be carried on, and then having prescribed the conditions, should act as referee and see fair play, so that the winning of the game should result from increased efficiency and not by the use of the club. . . .

#### LIMITATION OF PROFITS.

The power to limit profits is necessary as an integral part of the control of prices, to which reference will be made later; but, without careful safeguarding, a policy of profit-limitation would tend to inefficiency, as no incentive would remain to increase profits by the introduction of improvements in production or distribution. Moreover, the policy might be partially defeated by nepotism or extravagant managerial expenses. The principle, however, has been recognized under the legislation passed last session. The War Legislation and Statute Law Amendment Act, 1918, section 21, provides as follows:

“21. (1) This section shall be read with and form part of the Regulation of Trade and Commerce Act, 1914 (in this section referred to as the principal Act).

“(2) Every person commits an offence against this section who either as principal or agent sells or supplies, or offers for sale or supply, in New Zealand any goods at a price which is unreasonably high if the opportunity of obtaining such price in New Zealand arises by reason of the existence, present or past, of a war in which His Majesty is engaged, or by reason of a scarcity of such goods in New Zealand caused by war conditions, present or past.

“(3) For the purposes of this section the price of any goods shall be deemed to be unreasonably high if it produces more than a fair and reasonable rate of commercial profit to the person selling or supplying, or offering to sell or supply, the goods, or to his principal.

“(4) A fair and reasonable rate of commercial profit is for the purposes of this section such rate as would have been fair and reasonable on similar goods prior to the fourth day of August, nineteen hundred and fourteen, with a fair and reasonable addition for war conditions or freight charges and business expenses.

“(5) Every person commits an offence against this section who being in possession of goods for mercantile purposes hoards and re-

fuses to sell, or make available for sale, such goods, if such hoarding or refusal raises, or tends to raise, the cost of other similar goods to the public.

“(6) Every person who is guilty of an offence against this section is liable on summary conviction to a penalty not exceeding in the case of an individual two hundred pounds and in the case of an incorporated company one thousand pounds.

“(7) This section shall continue in force so long as the principal Act remains in force and no longer.”

The weakness of this section was the failure to provide any machinery clauses for the detection of profits in excess of the profits obtaining in 1914.

#### LEGISLATIVE REGULATION AND CONTROL OF COMPETITION.

The legal regulation and control of competition should aim at maintaining competition in regard to price, quality, or efficiency of service, in order to ensure that monopoly will come into existence only as the result of superior efficiency and not by the abuse of power. Unfair methods of competition should be declared illegal, and it is suggested that the Board of Trade should be empowered to prevent business firms from using unfair methods in commerce, and for this purpose should be endowed with complete powers of investigation. The policy here advocated would draw a clear line of demarcation between the ordinary trade policy of increasing business by superiority of output, cheapness of price, or facilities of service, and an endeavour to crush rivals out of existence by devices the general character of which is summed up in a dictum of the Supreme Court of the United States in the *Standard Oil* case, 1911. The dictum refers to “those contracts or acts which have not been entered into or performed for the legitimate purpose of reasonably forwarding personal interest and developing trade, but on the contrary are of such a nature as to give rise to the inference or presumption that they have been entered into or done with the intent to do wrong to the general public and to limit the rights of

individuals.” For example, a refusal to sell goods to others for cash, either absolutely or except at a price so high as to justify the reasonable belief that the seller desires to discriminate against an actual or an intending buyer as compared with other buyers, or upon terms or conditions which express or imply that the buyer shall not buy from any one but the seller or parties indicated by him, or shall not resell except at a price and upon terms and conditions as dictated by the seller, would come within the dictum referred to.

The cost of investigation should be borne by the Government, not as at present by the person injured, as the object would be primarily to protect the public and not to determine individual rights. The Board should have power to take action on its own initiative as well as on complaints by any member of the public, or by direction of the Government. It would be a mistake, however, to attempt to define in the enacting statute what specific acts would amount to unfair competition. The power of definition should be left to the Board, as unfair competition may take forms so numerous that its prohibition by statute should be in general terms, in order that the Board, guided by its administrative experience, may progressively defeat the perverse ingenuity of those individuals who may seek to render the law nugatory.

There are specific evils which need to be dealt with by ancillary legislation

(a) The abuse of patent rights. This is a subject which requires a detailed study, but some suggestions may be offered:

(1) The advisability of forfeiting patent rights which have been bought up simply to be pigeonholed.

(2) The advisability of enacting that the Government should have the right to purchase any patent at appraised valuation.

(3) The advisability of enacting that patent rights should be granted only on the condition that the use of the patent should be free to any one on payment to the owner of a reasonable royalty, to be determined by a special committee or board.

- (b) The Board should be empowered to constantly watch the operation of any tariff designed to protect local industries, as under the shelter of the tariff wall combines may be formed to exploit the home consumer by charging higher prices than are warranted by the duty imposed. . . .

#### NATIONALIZATION AND DEMOCRATIC MANAGEMENT.

Nationalization implies public ownership, but not necessarily public management (see Report on Coal Industry, H. 44a, page 86). It is not a policy that can be applied indiscriminately. Whether or not it can be applied at all is a question of expediency in each particular case, but in some industries a *prima facie* case already exists for nationalization in some form or another. These are—

- (a) Transport, including such subsidiary services as control of the waterfront.
- (b) Industries which vitally affect the health of the community—for instance, flour milling and milk supply.
- (c) Industries which progressively exhaust the national resources—for example, coal, timber, and possibly oil.
- (d) Where monopoly cannot adequately be controlled by price-regulation. Experience will decide when this occurs. Where the choice is between nationalization and price-control the issue depends on the practicability of the latter method.

Nationalization should provide in any future case that the employees have a voice in directing the business policy and management of the industry nationalized, as the Board believes that this is the way which promises most for the alleviation of industrial strife and misunderstandings, as it will tend to provide better conditions for the worker and an improvement in his status. For, as the late President Roosevelt points out in his last book—"The Foes of Our Own Household"—"the present system is

an attempt to combine political democracy with industrial autocracy," and that this attempt is the root cause of labour dissatisfaction and unrest. Safeguards must be taken, however, to ensure efficiency, encourage initiative, enterprise, and resourceful management, and to accumulate out of the profits of the industry a fund adequate to its future development, so that it will not become a burden on the other industries of the Dominion.

The Board should therefore be given powers, as a result of inquiry or investigation into any trade, industry, or business, to recommend nationalization, and when the Board is of opinion that nationalization is desirable it should thereupon prepare a scheme of nationalization for submission to Parliament.

#### FIXATION OF PRICE.

The practicability of price-fixing has been demonstrated by actual experience during the last four years, but the Board points out that what is now recommended is not an attempt to fix prices generally, but only an attempt to fix prices where, without State regulation, they would be fixed by monopoly in its own interests. The precise form that fixation should take should not be specifically defined, as the Board should have the power to fix (a) a straight-out price, (b) a maximum price, (c) a minimum price, (d) a sliding-scale price, (e) or power to call upon a monopoly to revise its scale of prices; (f) the power to appoint an officer to attend any meeting of traders where price-fixation in the trade is under discussion.

The point at which price-fixation takes place should be left to the discretion of the Board. Whatever prices are fixed should allow a fair return to capital, but in this connection it may be difficult to determine what should be allowed as capital. Should it be (a) a subscribed capital, (b) the cost of plant-replacement, or (c) the market value of shares?

These difficulties must be faced, but need not prove insuperable, as by a careful detailed study by the aid of accountants the Board should be able to achieve a reasonable compromise between

the various parties concerned—the shareholders, the producers, the employees, and the consumers. The fixation of price need not necessarily weaken the incentive to increase efficiency, as the question of limitation of profits does not necessarily arise; for so long as the controlled article is sold at not exceeding the fixed price monopoly can retain any profit it makes, subject to income-tax, and a continuous readjustment of the incidence of taxation. Moreover, there are a few cases where monopoly is in exclusive possession of the market, and competitors should be protected against extinction by the monopoly selling for a period below the cost of production in order that it may afterwards recoup itself by increased prices. Nor would the Board be bound to guarantee profits in the price fixed, but to make reasonable profits possible provided the business concerned maintained a fair standard of efficiency.

Fixation of price goes hand in hand with (a) publicity, (b) public regulation of competition, and these three policies the Board specially stresses as providing an adequate means for protecting the public against what is loosely termed “exploitation and profiteering.”

### Recommendations

The principal recommendation made by the Board was for the establishment of a department of Industries and Commerce of which it would form the directing part with powers somewhat larger than it had hitherto possessed. With regard to the cost of living, the Board discussed the influence of financial conditions, the quantity theory of money, the remedies proposed and recommended for the consideration of the Government, the plan for stabilizing the dollar de-

vised by Professor Irving Fisher of Yale University, Hartford, Conn.

In commenting on the proposals of the Board to deal with the Cost of Living the *Industrial Bulletin*, Nov. 5, 1919, the organ of the New Zealand Employers' Federation, remarks:

Since the Board of Trade Report was published, Parliament has had before it the Board of Trade Bill. We do not propose to discuss this bill at any length and refer to it here mainly with a view to commentary upon the disappointing nature of its provisions.

As the Bill stands, it is stated to have as its object the making of “Better Provision for the maintenance and control of the Industries, Trade and Commerce of New Zealand.” But the main objects of the measure appear to be the provision of means for more stringent control of industries without any compensating element of assistance. In short, the underlying idea is the prevention of profiteering or other undesirable practices while no provision is made for the institution of a real Department of Industries and Commerce from which business men might gain helpful direction and assistance.

Admittedly the “development of industries” receives honourable mention in clause 12 of the Bill, but the spirit and intention of the measure is clearly in the direction of bestowing upon the present Board of Trade greater powers in the fixation of prices. This is certainly a laudable object inasmuch as it may be necessary, at the public expense, to periodically assure and prove to the public that profiteering—apart from land speculation—is a negligible factor in present day affairs, but it is much to be regretted that the Government has failed to appreciate the need for taking steps to balance state interference with some measure of state help in matters commercial and industrial.

## MIGRATION AND SETTLEMENT DURING LAST QUARTER OF 1919

IMMIGRATION. — The following statements furnished by the Department of Immigration and Colonization give details as to the total immigration into Canada during the last quarter of 1919. For purposes of comparison the figures for the previous quarter and for the corresponding quarter in 1918 are also given.

The following table gives the nationality, sex and destination of all immigrants entering Canada during the last quarter of 1919:

HOMESTEAD ENTRIES.—During the last quarter of 1919 there were 275 homestead entries in Manitoba, 422 in Saskatchewan, 596 in Alberta, and 35 in British Columbia, a total of 1,328 for the three months, as compared with 2,336 for the

third quarter of 1919 and 756 for the corresponding period of 1918. The following statement shows the number and nationality of those who took up homesteads in the various provinces during the last quarter of 1919, with a comparison for the same period in 1918:

LANDS PATENTED.—According to the Department of the Interior's statement of letters patent covering Dominion lands in Manitoba, Saskatchewan, Alberta, British Columbia and the Yukon Territory for the last quarter of 1919,

the number of patents was 4,115, and the number of acres was 647,374, as compared with 3,798 patents and 613,593 acres in the third quarter of 1919, and 3,387 patents and 638,252 acres in the corresponding period of 1918.

## RECENT LEGAL DECISIONS AFFECTING LABOUR

**I**N a case arising out of an industrial accident which came before the

**Manitoba  
Workmen's  
Compensation  
Act declared  
invalid**

Court of King's Bench of Manitoba, after an Order relating to it had been issued by the Workmen's Compensation Board, the validity of the Workmen's Compensation Act, under which the Board was constituted, was questioned. In the judgment of the Court it was held that under Section 29 (which was added to the Act in 1919) the Board was given the same power as the Court of King's Bench to compel the attendance of witnesses and their examination under oath, and to compel answers and production of documents; and that a hearing under this section was to all intents and purposes a trial of the questions of law and fact involved upon evidence adduced before the Board. It was further declared that the Board's jurisdiction upon questions arising out of industrial accidents was final and conclusive. It was pointed out that before the passing of this Act such questions could only be determined by the Court of King's Bench or by a County Court, after a trial; and it was the opinion of the Court that the findings upon which depended a claimant's right to compensation, could not be made except in the exercise of the functions of a Superior Court judge. The conclusion was, therefore, reached that the provisions of the Act respecting the appointment of members of the Board and the payment of their salary were *ultra vires* of the province, as being in conflict with the powers of appointing judges and fixing their salaries which were reserved to the Dominion Government and parliament by the British North America Act. An order was therefore made by the Court in accordance with this conclusion.

In connection with this case the Attorney-General of Manitoba has announced that an appeal would be taken

from this judgment with the least possible delay, and that in the meantime the provisions of the Workmen's Compensation Act would be carried out by the Board. (*Manitoba—Kohanko vs. Tremblay et al.*)

An engineer, who was a resident of Manitoba, was in charge of a gaso-

**Jurisdiction  
of Manitoba  
Courts in  
cases of acci-  
dents outside  
of province**

line engine operating a dredge in Alberta, when he received an injury which he claimed was due to the defective construction of machinery. He brought action for damages against his em-

ployer in the courts of Manitoba, on the ground of negligence. The plea was offered by the defence that if the plaintiff was injured as alleged, the negligence complained of was not one which would have been actionable in any court of law in Manitoba, if it had occurred in that province, and therefore no action could be brought before a court in Manitoba in connection therewith. Before any evidence was taken a judgment was delivered on this legal point, and it was held by the Court that the plaintiff's statement of claim did disclose a cause of action, and that the case could be tried in Manitoba. The defendant employer appealed against this judgment, claiming that if there was a cause of action remedy should be sought under the Workmen's Compensation Act, and not in any court. The Court of Appeal decided that the jurisdiction of the Court to deal with this action must be determined by the trial judge after evidence had been taken, and that the case could be tried in a court of Manitoba, provided it was established at the trial that the Workmen's Compensation Act did not apply to it. In order to bring the case under the Workmen's Compensation Act it would have to be shown that the place, or chief place of business of the employer was situate in Mani-

toba, that the usual place of employment of the workman was in Manitoba, and that his employment out of Manitoba lasted less than six months. (*Manitoba — Jones vs. Canadian Pacific Railway Company.*)

A carpenter employed in a woodworking factory at Saskatoon met with an accident, when operating a shaper, which caused the loss of four fingers. He brought action against his employer in the Court of King's Bench of Saskatchewan, claiming damages for personal injuries. It was al-

**If both employer and injured workman are at fault for accident, workman bears all loss**

leged by the plaintiff that the employer was guilty of negligence in not having the machine securely guarded, as required by the Factories Act. In the opinion of the Court the evidence showed that the machine was securely guarded as far as practicable, having been

installed with duplicate guards for both arms of the machine. It was held, however, that the employer was negligent in not instructing the plaintiff as to the use of the guard. It was further found by the Court that the plaintiff was guilty of contributory negligence, and that this was the cause of the injury. This negligence on the part of the workman consisted in (a) Putting the wood up to the knives against the grain of the wood; (b) Holding the wood in a dangerous way with fingers projecting over it on the side toward the knives; (c) Omitting to attach the template to the wood; (d) Neglecting to use the stud, a part of the machine against which the wood might be placed so as to feed it gradually to the knives. It was declared in the judgment of the Court that where both the plaintiff and the defendant are at fault there is no sharing the loss, but the injured person bears it all. The plaintiff's action was therefore dismissed with costs. (*Saskatchewan — Aimer vs. Cushing Brothers, Limited.*)

## NOTES ON CURRENT MATTERS OF INDUSTRIAL INTEREST

### The month in brief

At the beginning of February the percentage of unemployment among members of trade unions was 4.28, as compared with 4.98 at the beginning of January. According to returns received from more than 4,700 firms, the general monthly average of employment for February showed a considerable increase over the average for January, with an upward tendency at the end of the month. According to preliminary figures, the various offices of the Employment Service of Canada received about 36,950 applications for employment, were notified of 28,350 vacancies, and made about 23,000 regular placements and 5,000 casual placements during February, as compared with 51,694 applications, 29,207 vacancies, 23,817 regular placements and 5,128 casual placements in January.

The time loss on account of industrial disputes during February was less than during January, but greater than during February, 1919. There were in existence during the month 24 strikes, involving about 3,145 workpeople and resulting in a time loss of about 49,939 working days. Of these strikes, 14 were on record at the beginning of the month, and 10 were reported as having commenced during the month. At the end of February there were on record 9 strikes, involving about 1,238 workpeople.

The average cost of the weekly family budget of staple foods again rose sharply, being \$15.70 at the middle of February

as compared with \$15.30 in January, \$13.41 in February, 1919, and \$7.75 in February, 1914. The index number of wholesale prices also rose sharply, being 343.5 for February as compared with 336.4 for January, 279.8 for February, 1919, and 136.6 for February, 1914.

### Proceedings under the Industrial Disputes Investigation Act

During February the Department received reports from five Boards of Conciliation and Investigation established to deal with disputes between (1) the Intercolonial Coal Company, Westville, N.S., and certain of its employees, being members of District No. 26, United Mine Workers of America; (2) the Acadia Coal Company, Limited, Sydney Mines, N.S., and certain of its employees, being members of District No. 26, United Mine Workers of America; (3) the Canadian Pacific Railway Company, Eastern Lines, and its sleeping car porters; (4) the Canadian Express Company and certain of its employees, being messengers, clerks, porters, etc., members of the Canadian Brotherhood of Railroad Employees; and (5) the Niagara, St. Catharines and Toronto Railway and certain of its employees, being motormen and conductors, barn and shop men, power-house men, etc., members of Division No. 846, Amalgamated Association of Street and Electric Railway Employees of America.

Three applications were received for the establishment of Boards.

**Appointment of Director of Technical Education**

The September, 1919, issue of the LABOUR GAZETTE contained on page 1114 a summary of the Technical Education Act, 1919, for the promotion of technical education in Canada. The Act is to be administered by the Federal Minister of Labour; and accordingly, in December last, a director of technical education was appointed in connection with the Department of Labour, in the person of Professor L. W. Gill, of Kingston, Ont.

Shortly after his appointment Mr. Gill conferred with the authorities of the Province of Ontario respecting the grant in aid of technical education, and an agreement in accordance with the terms of the Act was reached and the same has been signed by the representatives of the Dominion and Provincial Governments respectively. The agreement defines in broad terms the lines along which technical education should be developed and the amount of control which Federal authority should exercise over the expenditure of the money which has been appropriated for this purpose. In January Mr. Gill went to the West for the purpose of securing an agreement with each of the provincial governments in accordance with the provisions of the Act. He has just returned and reports that the required agreement has been made with the four western provinces, the agreement being the same in each case except for very minor details which had to be framed to meet differences in educational systems, and being along the same lines as the agreement made with the Province of Ontario. Mr. Gill also spent some time in New Brunswick and Nova Scotia conferring with the provincial authorities on matters relating to technical education, and agreements with those provinces are now under consideration and it is expected they will be concluded within a short time.

A brief sketch of Mr. Gill's career previous to his appointment will be of interest. In 1900 he was appointed Professor of General Engineering in the School of Mining, Kingston, Ont., and

later was appointed Professor of Electrical Engineering at Queen's University which post he filled up to the time of his departure for service overseas. During the year 1915 he recruited from the students and graduates of the University a battery of Field Artillery, and on February 3, 1916, proceeded overseas in command of the battery. Early in December, 1918, Mr. Gill was appointed Assistant Director of Educational Services in connection with the Khaki University in England, which position he filled until August, 1919, when the University was disbanded.

**Eight-hour day  
Federal and  
Provincial  
jurisdiction**

Some time ago press dispatches made reference to a proposal which had been discussed between the Federal authorities and certain of the Provincial Ministers for the submission of a reference to the Supreme Court of Canada to determine the jurisdiction of the Dominion Parliament and Provincial Legislatures as regards the enactment of legislation to govern hours of labour in employment. At that time the question was one of purely domestic concern, the discussion in question having occurred in connection with the work of the National Industrial Conference of Canadian employers and workmen which was held at Ottawa in the month of September last. The adoption, however, subsequently in Washington by the International Labour Conference, meeting pursuant to the Treaty of Peace, of a draft convention on the subject of the eight-hour day in industrial employment has changed the situation somewhat. A communication was recently received by the Minister of Labour from one of the provincial governments regarding the question of jurisdiction to enact eight-hour day legislation. The reply of the Minister of Labour was to the effect that the Federal Government concedes the right of the provinces to enact legislation on this subject, but that if the Provincial Legislatures do not see fit to act in the matter, the Federal Government has jurisdiction, under its treaty-making

rights, to enact such legislation, on this or any other subject, as may be necessary to give effect to the provisions of any International Treaty to which Canada is a subscribing party.

**Government  
aid to ship-  
building in  
British  
Columbia**

An Order in Council (P.C. 2565) was passed on December 24, 1919, which provided for advancing a sum of \$700,000 to a joint stock company which was being formed in Victoria, B.C., under the name of the Victoria Shipowners, Limited, for the purpose of building four wooden sailing ships. The advance is to be in the nature of a loan secured by a mortgage of \$175,000 on each vessel, bearing interest at 6 per cent. The Company would be restricted to a dividend of 6 per cent until the mortgage is discharged. The object of this undertaking is to relieve the unemployment situation which is said to be severe at Victoria, owing to a practical cessation of the extensive shipbuilding industry, and owing to the number of returned soldiers in British Columbia estimated at about 12,000 in excess of the enrollment in that province. It is provided that no advances shall be made under this Order-in-Council until an agreement has been entered into by the Company, when incorporated, with the Government in form and terms satisfactory to the Government. It is also stipulated that at least sixty per cent of the whole number of men employed shall be returned soldiers and that as soon as the work is sufficiently advanced, men to the number of 235 shall be employed in the construction of each vessel.

The directors of the Company proposed to raise the balance of the necessary capital which was 30 per cent of the total, by requiring all employees to take shares in the Company. The Dominion Government, however, refused to sanction this compulsory feature, declaring that the option to buy shares must be left as a matter of individual initiative with the employees after work is commenced. Steps were then taken by the

directors to raise the balance of the capital from other sources.

**Legislation  
requested of the  
Manitoba and  
Alberta  
Governments  
by labour  
delegates**

A delegation representing the Winnipeg Trades and Labour Council and Railway brotherhoods waited upon the provincial cabinet of Manitoba on February 2, to present requests respecting legislation. These included the following: Amendments to the Workmen's Compensation Act; amendments to the Industrial Conditions Act; abolition of night work in bakeries; the raising of the school-leaving age to 16 years; a provision to bring domestic servants within the scope of the Minimum Wage Act; a provision by which the amount exempt from garnishee proceedings shall be raised from \$40 to \$75; the enlargement of the scope of the "Mothers' Allowance Act" to include: (a) mothers with one child, (b) mothers whose husbands are totally incapacitated, or suffering from tuberculosis and unable to work, (c) mothers whose husbands are confined in institutions; the abolition of the election deposit; amendments to the Winnipeg city charter and to the Municipal Act to include adult suffrage; an amendment to the Election Act with regard to certain persons voting; an amendment to the Electricians' License Act; free text-books in schools and colleges.

A deputation from the Alberta Federation of Labour met the members of the Alberta provincial government on January 26-27, for the purpose of presenting requests respecting legislation which included the following subjects: Amendments to the Workmen's Compensation Act; the establishment of an 8-hour day and 44-hour week for factory workers and miners, with further amendments to the Factories Act to widen the circle of those included in its scope; amendments to the Child Welfare Act; amendments to the Health Act with regard to proper sleeping quarters in the camps; the enactment of legislation whereby all

printing to be done by public bodies must be given to local firms, provided the price is in conformity with prices of outside firms; enactment of legislation preventing judges from granting injunctions that would prevent workers doing, at a time when a trade dispute is on, what they could do at any other time; the enactment of a model license law for barbers; a minimum wage of \$1,200 a year for school teachers, with the adoption of a model form of contract and provision for teachers to consult with their school board on educational questions.

**Joint Works  
Council plan of  
the Manitoba  
Bridge and  
Iron Works**

In November last, the Manitoba Bridge and Iron Works, of Winnipeg and Selkirk, Manitoba, submitted to its employees a plan which provided for the establishment of joint works councils of their two plants and a general joint council composed of members of the two joint works councils. The plan which was adopted by a large majority vote of the employees follows very closely the Industrial Council plan (which should more properly be designated the joint works council plan) of the International Harvester Company, which was fully set forth in the LABOUR GAZETTE for May, 1919.

**Additional  
firms adopting  
group insurance  
in Canada**

In addition to the Canadian firms mentioned in the January issue of the LABOUR GAZETTE who have adopted group insurance plans for their employees, the following companies have also inaugurated group insurance plans: The Palmer-McLellan Shoepack Company, Limited, Fredericton, N.B.; G. E. Gooderham & Company, automobile distributors, and The Cowan Company, Limited, chocolate factory, Toronto; The Colonial Weaving Company, Limited, Peterborough, Ont.; J. R. Eaton & Sons, planing mills, C. J. Miller & Sons, harness leather factory, The Tudhope Carriage Company, The Canada Wood Specialty Company, and The Orillia Furniture Company, Orillia, Ont.; the

Bank of Hamilton; The Canadian Shovel and Tool Company, R. McKay & Company, departmental store merchants, and The Arcade, Limited, Hamilton, Ont.; The C. H. Smith Company, dry goods, Windsor, Ont.; the Spanish River Pulp and Paper Company, Sault Ste. Marie, Ont.; and the Oneida Community, Limited, Niagara Falls, Ont.

**A housing plan  
in British  
Columbia**

It is reported that the housing plan of the Office Employees' Association of the British Columbia Electric Railway, mention of which was made in the May, 1919, issue of the LABOUR GAZETTE, has so far proved so successful that forty officials have taken advantage of it to acquire homes, and it is also reported that other large business firms of Vancouver are considering the adoption of the scheme. A loan of \$75,000 was made to the Association by the Company when the scheme was first adopted last April. Any office employee of the Company may borrow from this fund either to pay off a mortgage, or to purchase or build a house. The borrower is required to make a deposit of about ten per cent of the loan, but smaller amounts are taken. A monthly rental of slightly more than one per cent of the loan is charged for twelve years, and is deducted from the pay roll. After this period the borrower owns his own home. In the meantime all taxes and water rates, and insurance premiums, are paid by the Association. The loans may also be paid off at any time. Repayments on the loans are used to make further loans, and the fund now loaned out amounts to about \$83,000.

**Contributory  
unemployment  
insurance in  
Great Britain**

A bill to amend the existing law with respect to unemployment insurance has been introduced by the British Government. This bill proposes to extend the contributory scheme of unemployment insurance to substantially all persons falling within the health insurance scheme in England, Scotland, and

Wales,—with the exception of those in agriculture and domestic service. In Ireland the bill applies only to work-people who come under the National Insurance (Unemployment) Acts, 1911 to 1919. Any of the excepted industries may be brought within the scheme by order of the Minister of Labour. The amount of unemployment benefit proposed is 15s. per week for men and 12s. per week for women. Insured men will contribute 3d. to the unemployment insurance fund and women 2½d. per week. Lower rates are proposed for workers from 16 to 18 years of age. Employers will give an equal amount, and the state will give one-third of the combined amounts contributed by both employers and employees. Trade unions which pay unemployment benefits may make arrangements to pay their members the State benefit due them under this scheme and later recover from the Ministry of Labour the amount so paid. If approved by the Minister of Labour, industries may set up special schemes which will receive a State grant of not more than one-tenth of the estimated amount of the contributions which would have been payable by employers and employees under the general scheme.

A report on this bill, submitted to the Ministry of Labour, by the British Government Actuary, shows that 8,332,900 men and 3,429,800 women would come under it, of whom 628,300 men and 455,900 women were estimated as between 16 and 18 years of age, and therefore subject to reduced rates of benefits and contributions. The estimated annual income includes: Contributions of employers, £4,217,000; contributions of workers, £4,217,000; contributions of the Exchequer, £2,812,000; from interest on investments, £900,000; total, £12,146,000. The annual expenditure includes £10,059,000 for unemployment benefit; £100,000 for travelling expenses of insured persons going to employment; cost of administration, £1,214,000, or a total of £11,373,000.

**Computation of accident rates** At a meeting of the committee on statistics and compensation insurance cost of the International Association of Industrial Accident Boards and Commissions held at Harrisburg, Pa., on December 3-5, 1919, a resolution was adopted changing the unit for measuring accident frequency and accident severity rates in computing the amounts to be charged employers in the various industries for the compensation fund. The resolution was as follows: "That accident rates, both frequency rates and severity rates, be computed on the basis of 1,000 hours' exposure instead of 3,000 hours' exposure, as heretofore."

It is stated in an article in the United States *Monthly Labour Review*, January, 1920, that in view of the fact that the working time varies widely from plant to plant, from industry to industry, from city to city, from country to country, and from year to year, the committee decided to adopt 1,000 hours' exposure as a unit of convenient size which will remain unaffected by changes in the hours of labour. Frequency rates will be expressed in rates per thousand thousand (1,000,000) hours' exposure, instead of per thousand "300-day workers," and severity rates are to be expressed as days lost per thousand hours' exposure.

**School for Social Research in New York** A New School for Social Research was opened in New York on

October 1, 1919. The school is devoted primarily to the study of public affairs and existing industrial conditions, its aim being to equip students with sufficient practical knowledge to cope with the new industrial and economic problems with which the world is now confronted, to establish and to measure social facts, to train research workers, and to make known the results of investigation in the social sciences. All the courses are arranged to this end, and are given at hours when busy people can attend. The directors and instructors are all prominent educationalists, or specialists in some particular branch of social science. The school at present

occupies premises sufficiently large to provide numerous class rooms, work rooms, offices, and an auditorium to seat 250 persons. The office is at 465 West 23rd Street. The programme of instruction is arranged to meet the needs of two classes of people—regular students and research students—and the work is correspondingly divided into so-called open and closed courses. The open courses, which consist of lectures, discussions and readings, are open to anyone intending to carry on the work and to follow the assigned readings. The closed courses are more restricted, admission to these “conference groups” depending upon the previous training or experience of the applicant. In these closed courses special investigation will be carried on by the students, and the results will be submitted to the conference for discussion. Besides these two courses a special individual course is open to specially qualified students who must first satisfy the instructor of their ability to engage in independent investigation. The standard of all the work in the school is “post graduate” in character, although an academic degree is not required for admission. The school offers no degrees, and the programme varies somewhat from year to year, in accordance with the shifting of public interest. The school year consists of two terms of twelve weeks each, the first commencing in October and closing in December, the second commencing in February and closing in May. The uniform fee for each course is \$20 for each term.

The New School has no endowment but is supported mainly by annual pledges, which at present amount to about \$50,000 a year, and by students’ fees which, on the basis of the first term’s receipts, should yield about \$25,000 per year.

#### Jottings

Arrangements have been completed for the holding of the annual convention of the American Federation of Labour at Montreal next June.

Steps were taken, on February 23, by the Trades and Labour Council of Windsor, Ont., to organize a co-operative bakery.

An industrial census of the Province of Alberta has been undertaken by the Alberta Industrial Development Association as a first step in a campaign for the support of Alberta industries and the promotion of trade in goods manufactured in the province.

At the first annual meeting of the Alberta Industrial Development Association, which took place at Edmonton on February 11, an announcement was made by Hon. J. L. Coté, provincial secretary, that a department of industrial research would be established at the University of Alberta. The provincial government will supply a chemical engineer and will meet other expenses in connection with this department. The investigators at the university, it is stated, will endeavour to find means whereby Alberta may furnish the three prairie provinces with all their fuel, their fertilizers, their salt, and with cheap power.

The Ontario Workmen’s Compensation Board has passed a Regulation bringing under the Workmen’s Compensation Act the operation of theatres and other places for exhibitions by moving picture machines licensed under the Theatres and Cinematographs Act, by adding them to Schedule 1 of the Act. The regulation came into effect on March 1.

By amendments to the Workmen’s

Compensation Act of Quebec which were passed in February, the Act is made to apply to any work whatsoever done during a man's engagement to work for any municipal corporation, and the limit of annual salary to which the Act applies is raised from \$2,500 to \$3,000. The allowance for funeral expenses has also been raised from \$25 to \$50.

The city of Toronto has given notice of an application for legislation enabling it to appoint a Housing Commission and to issue debentures for the purpose of defraying expenses of the Commission and providing funds for building loans. It is proposed that the houses erected by the Commission shall be sold on a first mortgage at such price and on such terms as the Commission may determine, but the rate of interest on any unpaid balance shall not exceed the rate at which the Corporation may borrow.

An industrial census of the United States was begun on March 1 by the United States Census Bureau. These statistics when compiled will show accurately the economic situation of the country, including the number of employees in the various industries, the hours of labour, and wages paid. Hereafter the industrial census will be taken every two years instead of decennially. In Canada a similar industrial census has been taken annually since 1917, the results of which have been reviewed from time to time in the LABOUR GAZETTE. Elsewhere in the present issue appears a summary of the First Annual Report of the Dominion Bureau of Statistics, under which the censuses are taken.

According to the annual report of the United States Workmen's Compensation

Publicity Bureau, four states in the Union, namely, Alabama, Missouri, North Dakota, and Tennessee, enacted compensation laws for the first time in 1919. In twenty-nine states and one territory amendments were made to existing laws. Compensation acts are now in force or are about to go into effect in forty-two states and three territories. As yet no compensation laws have been enacted in six states; Arkansas, Florida, Georgia, Mississippi, North Carolina and South Carolina.

Over 1,200 trade unions were known to the British Department of Labour to be in existence at the end of 1918. This number includes trade unions registered under the Trade Union Acts and other existing associations of employees which deal with conditions of employment. The total membership was over 6,620,000, an increase of 19 per cent over the previous year. The increase of male members was over 750,000 or 16 per cent, and of female members 320,000 or 36 per cent. The greatest increase occurred in the unions of agricultural labourers and builders' labourers. Tailoring and other clothing trades also showed a considerable increase.

A decree has been issued by the French Government instituting a National Council of Manual Labour which will deal with questions relating to the recruiting of labour with special reference to the employment of foreign work-people. The council is composed of ten representatives of employers; ten representatives of labour, and representatives of the ministries of the government which are interested in the question of alien labour.

## INDUSTRIAL CONDITIONS DURING FEBRUARY, 1920

## I.—General Review

The increase in the total volume of employment, which was noted as setting in throughout Canada in the latter part of January, continued during the first week of February, and the new level was maintained with minor fluctuations until the third week, when a backward movement was recorded, with recovery in the closing week of the month. The general monthly average of employment for February, however, showed a considerable increase over the average for January. In the Maritime Provinces a downward tendency continued from the previous month into the first week of February, the turning point being reached in the second week when a decided gain was made which was fairly well maintained. In Quebec the upward movement was maintained until the middle of the month when it took a slightly downward curve. Conditions in Ontario registered a steady improvement except in the second week. In the Prairie Provinces a decline was noted during the second and third weeks, but the month closed with an upward tendency. British Columbia opened the month with a marked increase, which, however, was not maintained beyond the first week.

In the metals and machinery group a steady increase was noted throughout Canada until near the end of the month when a drop began. The vehicles (land and water) group was less steady, showing a small general gain, but with alternating periods of gain and loss in Ontario, Quebec and the Prairie Provinces, increases in the Maritime Provinces and a decrease in British Columbia. The increase noted in January in the food group was not maintained in February, a decline being recorded in the general average of employment; an upward

tendency, however, showed itself in the closing week. In the textile group the month opened with a general average gain, which took a downward turn in the second and third weeks, part of this decline being attributed to prevalent sickness among the workers in the middle of the month; recovery, however, was evident in the closing week. The pulp, paper and printing industries continued at the same general level in regard to employment, with occasional variations. In the woodworking group a general rise in the first week continued from January, but a decline set in during the second week and continued until the closing week, when a slight gain was shown; in British Columbia, nominal gains were recorded throughout the month. Employment in the leather industries rose in general level except in the third week. A marked gain was registered in the clay, glass and stone industries, temporary declines in Ontario and Quebec being offset by the increase elsewhere. A somewhat similar course was followed during the first half of the month in paints, oils and chemicals, the second week showing a marked increase, followed by a general decline in all provinces in the third and recovery in the fourth week. Railway operation showed local variations, the general level rising during the first week, declining during the second week, and recovering later. In quarrying and mining the month opened with a general gain in the first week, followed by a decline in the second and third weeks, the month closing with an increase; a general decrease in the western provinces was attributed to weather conditions. Building and construction continued to record a marked decline. Railway construction showed the usual seasonal slackness, much employment, however, being afforded in snow clearing. The lumbering industry continued to show gains during the

first week, when a decline began to set in owing to the curtailment of logging operations; a marked drop was noted in the final week of the month.

The loss of time on account of industrial disputes during February was less than during January, 1920, but greater than during February, 1919.

#### Strikes

There were in existence at some time or other during the month 24 strikes, involving about 3,145 workpeople, and resulting in a time loss of about 49,939 working days, as compared with 28 strikes, 3,366 workpeople and 57,944 working days in January, 1920; and 21 strikes, 1,985 workpeople and 23,418 working days in February, 1919. On February 1 there were on record 14 strikes, affecting 2,038 workpeople. Ten strikes were reported as having commenced during February, as compared with thirteen in January. Five of the strikes commencing prior to February and all of those commencing during February were reported terminated, leaving 9 strikes, involving about 1,238 workpeople, on record at the end of the month.

The movement in prices was again steeply upward as shown by both the

Prices retail prices food budget and the index number of wholesale prices.

The chief changes in foods were seasonal, being in potatoes, eggs, dairy products and meats, but in materials there were substantial increases in some textiles, in hides, in metals, especially in iron, in fuel, and in building materials. Retail prices of foods were higher, chiefly in potatoes, sugar, flour and bread, but there were slight advances in meats, with decreases in eggs and dairy products. Coal and rent also tended higher. Among farm products feed grains and fodder were higher while livestock and meats fluctuated.

The family food budget in some 60 cities averaged \$15.70 at the middle of February as compared with \$15.30 in January, \$13.41 in February, 1919, and \$7.75 in February, 1914.

The index number of wholesale prices rose to 343.5 for February, as compared with 336.4 for January, 279.8 for February, 1919, and 136.6 for February, 1914.

## II.—Industries and Trades.

In the Maritime Provinces conditions continued good throughout this group.

At SYDNEY the output of the Dominion Steel plant during the month was as follows: pig iron, 16,400 tons; ingots, 18,200; rails, 5,800; rods, 5,180; plates, 650; bars, 550; nails and wire, 1,500 tons; two blast furnaces were in operation; the same company's new ship-plate mill was put into regular operation on February 19; the stove, furnace and metal roofing workers continued active. The output of the steel plant at SYDNEY MINES was as follows: iron, 7,000 tons; steel, 9,300 tons; with the exception of one steel furnace which was off for general repairs all the plant was in operation; 1,050 employees were reported on the staff. At NEW GLASGOW the metal trades were generally steady,

the steel industry being active, but the maritime bridge plant below normal. The TRENTON plants worked double shifts all month, with good prospects ahead. In WESTVILLE district the structural steel industry was fairly active; agricultural implement and tractor factories had plenty of work, sheet metal plants were fairly active and the electrical trade was normal. HALIFAX reported some restriction of output owing to shortage of steel in the skate, bolt and bar industries, but there was no reduction in activity from the previous month; the stove and furnace trades showed some improvement. At AMHERST the rolling mills, while not running to capacity, employed a fair staff of operatives and turned out considerable bar iron and steel; the farm tractor, sawmill and papermill equipment, gasoline engine,

portable and stationary engine and boiler, and especially marine engine and marine boiler industries were busy; steadily growing activity was reported in the steel range, stove and furnace factories. CHARLOTTETOWN reported steady conditions in the foundries and machine shops. About 56 men were thrown out of work at ST. JOHN by the closing down of an old established rolling mill, but it is hoped this will re-start under new auspices; tin and sheet metal workers were very busy; the strike among the machinists still continued. At MONCTON the foundry and machine shops which were burned down on January 5 resumed work with enlarged capacity; in another similar establishment the moulding and machinery departments were destroyed by fire on February 17, between 30 and 40 operatives being affected, but it was anticipated that work would re-start shortly. Machinists were in demand at FREDERICTON, foundry and machine shop workers being very busy. MONTREAL reported a steady improvement in the structural steel industry; agricultural implement and tractor factories were busy, and the electrical trades were normal, but engine and boiler and sheet metal workers were rather slack. The metal and repair shops at ST. HYACINTHE were active. At SHERBROOKE architectural and structural iron and steel workers were fairly busy; very active conditions prevailed in the pulp mill machinery and rubber factory machinery works, in the scale and drop hammer plants, railway supply and steel casting factories; the drilling machine factory was fairly active. The iron foundry at THREE RIVERS kept 500 hands in steady employment. Iron workers at ST. JOHN'S and IBERVILLE were working overtime, but at SOREL the metal trades were rather dull. Foundries at OTTAWA and HULL were increasingly active with likelihood of shortage of labour before long. At TORONTO the metal and machinery industries were active, though hampered by steel shortage, causing production below capacity; a similar shortage was reported in some

of the factories of agricultural implements, stoves, furnaces and machinery; electrical equipment workers were busy. HAMILTON reported continued activity in all branches of the metal and machinery group of industries, with shortage of help in many shops. The metal trades at ST. CATHARINES were well employed during the month, employees in the chain and electrical fixture industries working double shifts; electrical workers were well employed, working day and night shifts, and boiler makers continued busy; the chain factory worked double shifts. Activity in the metal working industries continued at NIAGARA FALLS, with demand for experienced help; help of all kinds was required for the silver plating factory. At BROCKVILLE the heater stove and furnace factories were busy, also the workers in the axe, hammer and small and heavy hardware industries. BRANTFORD reported busy and frequent overtime conditions in engine, tractor, stove and range factories, with shortage of help in the farm implement works; steel and machine workers were well employed. BELLEVILLE reported the rolling mills active in the manufacture of bar iron, plates, etc., and foundries were generally busy; a new steel mill began operations during the month; the hardware industry was active. Moulders in the iron foundries at PETERBOROUGH were employed in greater number than at any time for several years; machine shops were also very busy, all working overtime, and some night and day shifts; help of all kinds was in demand at the General Electric Works. At GALT the pig iron and steel furnaces and converters were all busy and rolling mills were actively turning out plates, bolts, rails, bars, wire nails, etc.; machine shops all required more help; workers in the stove and furnace trade, and in electrical apparatus and fixtures, metal roofing, galvanized iron, tin, copper, aluminum and other sheet metal work, were well employed. Foundries and machine shops at KITCHENER were all working full time and electrical and fixture workers had a

very good month; stationary engine and thresher factories continued busy; boys were wanted in the clock industry. General activity prevailed at GUELPH in all the metal trades, moulders being in demand; 150 hands were employed at the stove factory; an addition to the malleable iron factory was completed, the full plant employing 400 men; the hardware trade was also active. At STRATFORD, also, the metal trades had an excellent month. LONDON reported the rolling mills all busy and the wire and iron works operating to capacity. Stove and furnace factories were also very busy, and preparing to enlarge premises; shortage of material hampered operations in the tin and enamel ware shops. A demand for moulders, also unskilled labour, was reported in the iron works at ST. THOMAS; foundry workers were well employed. The metal trades at CHATHAM all worked full time, except for one or two days owing to shortage of steel. At WINDSOR die makers and machinists of all kinds were in demand; the bridge and structural steel factories were working to capacity, having cleared out the shell factory entirely and taking on considerable extra help; more help was required for the manufacture of building materials; stove factories were busy and the manufacture of steam specialties was very active, though somewhat hampered by the shortage of copper for valves; brass and copper workers had a good month; sheet metal plants were active. Foundries and machine shops at OWEN SOUND had normal employment. Industry at ORILLIA was disorganized by prevalent sickness and also by shortage of steel. Machine shops at SAULT STE. MARIE were busy and the steel factory ran steadily with a full force of men. Some demand for moulders and planer hands was reported in FORT WILLIAM and PORT ARTHUR. WINNIPEG reported employment steady throughout the metal group; electric workers were well employed, with prospect of a busy season ahead. The rolling mills at MEDICINE HAT continued quiet, the REDCLIFF mill working part

time; machine shops and foundries were increasingly active. At LETHBRIDGE the iron foundry was brisk with good prospects for the future. The iron workers at EDMONTON had steady employment and electrical and sheet metal workers were fairly busy. At VANCOUVER the pig iron and rolling mills were rather slack, but a slight improvement was noted in the structural iron trade; stove and furnace and metal roofing and sheet metal work was fairly active, mostly on repairs. Iron foundries at VICTORIA were very busy during the month, chiefly on repair work; stove foundries were active and steady trade in sight; the electrical trade was steady; machinists and boiler makers were in demand.

At SYDNEY the boat and shipbuilding and repairing trades were quiet; railway repair shops were active.

**Vehicles (land and water)** The shipbuilding industry at NEW GLASGOW was somewhat spasmodic, but the carshops were busy with large orders ahead. At HALIFAX the shipyards were steadily active with a demand for men at the end of the month, and the prospect of a busy season. Work on portable steam boilers and engines fell off slightly, most of this class of work done being marine. Shipbuilders at the TRENTON plant were busy and in WESTVILLE district the car shops were busy, taking on some more unskilled labour; engine and boiler makers and automobile factories were busy. The car shops at AMHERST showed some activity due to small orders for new cars, besides remodelling and repairs; the motor works and repair shops were active. The surrounding shipyards at PARKSBORO', SPENCER'S ISLAND, DILIGENT RIVER, FOX RIVER, PORT GREVILLE, EATONVILLE, WALLACE, and other points, were at work on wooden vessels. At MONCTON the Canadian National Railways shops were normally active, with considerable repair work on locomotives and cars. MONTREAL reported busy conditions in the automobile trade, but engine and boiler workers were rather slack; rail-

way repair shops were busy. Boat and shipbuilding and repairing regained activity at QUEBEC, shipyard No. 4 at Lauzon re-opening and resuming work on wooden vessels with increased staffs with a view to completion before navigation opens; additions to staff were also reported in steel shipbuilding and repairing, vessels sent down from the Lakes being rebuilt; repairs on vessels in the docks were in full progress; railway repair shops were very busy. At SHERBROOKE repair shops were fairly active. One shipyard at THREE RIVERS did not employ all their men owing to shortage of raw material; the other yard employed 600 men steadily; garages were busy on repairs to autos and trucks. Some activity was noted in the shipbuilding yards at SOREL. Car workers at OTTAWA and HULL continued in normal employment with good prospects ahead. Conditions in the shipbuilding trade at TORONTO showed improvement, staffs being increased, with good prospects for steady employment; automobile factories were active, though in some cases hampered by shortage of steel; railway repair shops were in steady operation. HAMILTON reported continued activity in locomotive, car and portable engine factories, also in the boat building, carriage, cycle and motor trades. Women were in demand for the automobile accessory factory at NIAGARA FALLS. Motor boat workers at BROCKVILLE were fairly active, and motor car builders were busy. Railway repair shops were active at KINGSTON. Automobile workers at BELLEVILLE had a busy month in view of the coming season; portable engine and boiler makers were busy. Engine and boiler, auto and marine engine makers and repairers were also well employed at GALT. BRANTFORD reported the carriage and engine builders working full-handed. Portable engine shops at KITCHENER continued busy. At GUELPH motor body and carriage factories, spring and axle and gasoline engine workers were active. Woodworkers were in demand at the carriage-top factory. The G.T.R. car-

shops at LONDON were busy. At STRATFORD the Grand Trunk locomotive shops were very busy and engine and boiler makers were well occupied. Automobile factories at CHATHAM ran full time and some overtime. Railway shop workers at St. THOMAS were very busy. The shipbuilding yards at GODERICH opened up during the month. The automobile factories at WINDSOR, though handicapped by shortage of material, were working overtime in several departments, a strong demand for men being reported in some classes of work; the engine works also had a good season. The machine shops at OWEN SOUND were busy on the manufacture of marine machinery. Shipbuilding was reported active at PORT ARTHUR and FORT WILLIAM. WINNIPEG reported a strong demand for railway and repair shop mechanics; locomotive and car shops continued without change in the number of employees; in the automobile industry the repair shops continued to be busy. Railway repair shops at BRANDON, REGINA and CALGARY were active. At VANCOUVER locomotive, car and repair work was fairly active; steam engine and boiler workers were fairly well employed. Boat and shipbuilding was slack, waiting steel orders, but when steel arrived employment was expected to be good. Some demand for machinists and boilermakers was reported at VICTORIA. The iron ship yard was busy, good progress being made with the two ships under construction.

SYDNEY reported continued activity in the abattoirs and packing houses and

<b>Food, liquors and tobacco</b>	in the baking and confectionery trades; aerated water workers continued slack. The sugar
	refinery at HALIFAX started again at full time after a temporary shut-down, and continued active throughout the month, beginning additions to their plant; abattoirs and packing houses were active, but in a less degree than last year, owing to the loss of army and navy contracts; baking was somewhat slacker owing to

reduction of work in construction camps; soft drink workers had a fair month. Flour and feed plants, abattoirs and meat packing houses in WESTVILLE district were steadily employed; bakers and confectioners were active, creameries and dairies fairly busy, but soft drink workers were rather slack. The sugar refinery at DARTMOUTH had 295 on their staff. At AMHERST employment was fair in the food group, flour mills workers being generally active, bakers being normal, and soft drink workers as busy as usual at this season. The tobacco factory at TRURO worked full time. Great activity was reported from CHARLOTTETOWN, especially among bakers, butchers and confectioners. At St. JOHN sugar refinery workers were busy on re-opening of plant, notwithstanding scarcity of sugar; bakers and confectioners had normal employment; creameries and dairies were busy, and aerated water factories and breweries were fairly active. Biscuit and general bakers at MONCTON were steadily employed; the Farmers' Co-operative Creamery was busy, continuing the activity of the previous year. At FREDERICTON bakers and confectioners were well employed and meat packing plants were active; a new canning factory was expected to open about March 1, employing 100 hands. Bakers at BATHURST had a good month. MONTREAL reported activity in the flour and feed plants, abattoirs and meat packing houses; soft drink and brewery workers had a good month, but cigar makers were slack; scarcity of sugar somewhat curtailed the output of confectionery plants. At QUEBEC, as usual in winter, abattoirs were dull and packing houses active; bakers and confectioners were active half the month, but slack for the remainder; brewery workers had a busy month. The flour mill at St. HYACINTHE was very busy; tobacco workers were well employed, but aerated water factories were rather dull. SHERBROOKE reported busy conditions in the abattoirs and meat packing houses, also in the breweries; soft drink workers were fairly busy, but creameries and dairies were quiet. Bakers at THREE RIVERS

had an active month; the new creamery was very busy; cigar makers were fairly active; aerated water factories were quiet. At St. JOHN's and IBERVILLE the bakers had a good month. Similar conditions prevailed at SOREL in the baking and confectionery trades and among the meat workers. At OTTAWA and HULL abattoirs, bakers and confectioners, creamery and dairy workers were normally active. TORONTO reported the baking and confectionery trades busy, but biscuit and candy makers had more orders than they could handle owing to the prevailing shortage of women and girls; fruit canning establishments were busy with the opening of the orange season; flour and cereal plants operated steadily; abattoirs and packing houses were quiet and a number of employees were laid off; soft drink and brewery employees were working below capacity; cigar makers had a fair amount of employment. At HAMILTON activity was reported as general throughout all departments of the food group. Bakers were busy at NIAGARA FALLS, and at St. CATHARINES workers in flour, feed and other cereal-products, bakers, confectioners and all branches of the food group were well employed. At BROCKVILLE the uncertainty of securing cars was stated to have hampered the operations of the flour and feed mills; bakers and confectioners were busy, but creameries and dairies experienced some shortage of milk supply. KINGSTON reported activity throughout the food group. At BELLEVILLE the large demand for flour and cereal products kept the mill employees actively engaged, the other trades in this group being also well employed. Overtime work was frequent at PETERBOROUGH in the flour, feed and cereal mills; meat packing houses were rather slack, but creameries were busy. Shortage of help was reported at GALT among bakers and confectioners; workers in the flour and feed, creamery and dairy, and soft drink industries were also busy. At BRANTFORD girls were required for the cigar factory; the sugar refineries, pork packing houses and canning factory worked full handed; activity at the

flour mills was confined to grinding chop. At KITCHENER a continued shortage of girls was reported in bakeries and confectioneries; bakers were not buying flour at the new rate, causing some slackness in the flour mills; shortage of milk was reported in creameries and dairies; the sugar refinery was active only in the shipping department; soft drink and brewery workers were fairly active; the distillery was active only in the bottling department; cigar makers were fairly active, but one more small shop closed up entirely during the month. The brewery at WATERLOO was busy. At GUELPH the flour and feed mills ran to capacity; brewery and malt workers were active, but soft drink factories were quiet; bakers and confectioners were fairly busy. STRATFORD reported steady conditions continuing in all departments. Female help was in demand at WOODSTOCK for confectionery work; conditions were normal in the baking business. A continuous shortage of female help was reported also at LONDON in the biscuit and candy trades; cigar makers were busy. At ST. THOMAS the flour mill and confectionery trades were busy, and cigar makers were normally active. At CHATHAM the sugar refinery opened during the month, employing 400 men, many of these having to be secured from outside points; the tobacco plant was running part overtime and was very busy. Increasing activity was noted at CHATHAM in the cereal factories. At WINDSOR the bakeries were extra busy; the Trades and Labour Council was organizing a co-operative bakery, which would probably buy out some existing bakeries; creameries and dairies were very busy, but hampered by milk shortage; breweries and distilleries were working full-handed, but soft drink workers were slack; female help was in demand at the salt refinery. OWEN SOUND reported fair activity throughout the group. The brewery at SAULT STE. MARIE was reported very active. At WINNIPEG confectioners had a fair month, with staffs unchanged, but not quite so busy as in January; vegetable

cannery workers were busy, but the industry was affected by sugar shortage; abattoirs and meat packing plants reported no change in employment; breweries and soft drink establishments were normally active, with the same number of employees. The flour mills at PORTAGE LA PRAIRIE were closed down for one week for cleaning. Some demand for cooks was reported from BRANDON; the mineral water factory was working on a reduced scale. At REGINA the flour mills were running full handed; abattoirs were hampered by shortage of live stock; help was in demand in the baking and confectionery trades; soft drink factories were busy for the season, and creameries were fairly active. Abattoirs and packing plants at MOOSE JAW were quiet owing to the short supply of butcher cattle and hogs, and laid off a considerable number of their men. At MEDICINE HAT the flour mills were running day and night, bakers and confectioners were fairly busy, and creameries about normal; brewery work recovered but the soft drink industry was slack. The flour mills at LETHBRIDGE worked short time, closing down for several days; brewery workers lost a few days through shortness of orders. At CALGARY flour and feed plants, abattoirs and meat packing houses were busy; bakers and confectioners were normally employed, but soft drink and brewery workers were rather slack. Employment in the meat packing plant at Edmonton was fairly steady, 440 men being on the payroll. At FERNIE bakers and confectioners, also breweries and soft drink workers, were unusually busy for the season; dairy workers were well employed. VANCOUVER reported active conditions in the flour, feed and milling industries; sugar refinery work was rather slack owing to shortage of sugar, which also affected the confectionery trade; breweries, creameries and dairies were busy, soft drink factories fairly active, but fruit and vegetable canneries very slack. At VICTORIA feed and cereal mills were operating steadily; bakers and confectioners continued to do a brisk

business; creameries, dairies, aerated water and soft drink establishments were normally active; breweries were increasingly busy.

Employment conditions in the textile trade were generally good in the Maritime Provinces during the month. The rope and twine industry at HALIFAX was reported as improved. At AMHERST the woollen mills were running to capacity and at NEW GLASGOW employment was reported good. Female help was in demand at TRURO for the textile mills and underwear factory. The cotton factory at YARMOUTH had 513 on the staff, an increase of 42. The cotton mills at ST. JOHN also continued running steadily, the MILLTOWN plant employing over 600 before the end of the month. At MONCTON the woollen mills and underwear factory continued in steady operation. The cotton factory at MARYSVILLE was rushed with orders. MONTREAL reported the woollen and knitting factories busy though hampered by shortage of material, and tent and sail makers actively preparing for spring. At QUEBEC the cotton mills were very busy, but worked at a disadvantage owing to the cold weather causing low water and limiting water power; the tent and sailmaking trades were very dull. The knitting and woollen mills at ST. HYACINTHE were very busy, and the felt factory was also working steadily. SHERBROOKE reported activity in the cotton and woollen mills, and in the hosiery, underwear, knitted goods, the textile finishing and braid factories. The cotton factory at THREE RIVERS continued steadily employing about 1,400 hands, further extensions to employ 200 more being expected. The silk industry at ST. JOHN'S and IBERVILLE was steadily active. At TORONTO the woollen and knitting mills continued busy in all branches, with a demand for experienced knitters; a number of Belgians were brought over to operate special machinery at one knitting mill; a marked shortage of weavers was reported in the

carpet factory; tent and awning factories were busy. HAMILTON reported a shortage of help throughout the textile trades, especially in the cotton hosiery, underwear and knitted goods departments; general activity prevailed in the cotton, woollen, silk, linen and felt factories, and in the rope, twine, tent and carpet industries. At NIAGARA FALLS female help was still in demand at the knitting factories. Female help was in demand at ST. CATHARINES for the knitting mills, also for the haircloth and silk factories; expansions of the woollen plants were almost completed. The tent and awning industry at BROCKVILLE continued slack. At KINGSTON the cotton and woollen workers were well employed. Female help was in demand in the textile industry at PETERBOURGH; the woollen mills ran overtime and the carpet factories were also very busy. A similar shortage of help was reported from GALT, in the cotton, woollen and silk mills. BRANTFORD reported a shortage of help in the cordage factory; the woollen underwear and blanket factories were very busy. The felt factory at KITCHENER was very busy, and additional help was wanted at the twine factory. Female help was in demand at GUELPH for the hosiery, knitted goods, worsted spinning and carpet factories; the linen mills were active, and a cotton mill which changed hands was expected to employ more help. More women were also required for the woollen and knitting factories at STRATFORD, WOODSTOCK and LONDON, overtime work being frequent. The knitting workers at ST. THOMAS had a busy month. The wool spinning and blanket weaving factory at OWEN SOUND closed down for about a week, but had plenty of work, though at times short of yarn; the tent and awning plants were busy. A demand was reported from FORT WILLIAM for cotton weavers. At WINNIPEG the bag companies had a quiet month, but the same staffs were retained; knitting workers had increased employment, but this industry was hampered by shortage of material; tent and awning factories were busy with repairs, also making up stock,

and staffs were increased. VANCOUVER reported the knitting factories busy, and tent, awning and sail makers well employed.

At SYDNEY steam laundries continued active. A marked shortage of female

help still existed at  
**Clothing,** TRURO for the hat and  
**boots, shoes** cap factory. The ready-  
**and laundering** to-wear clothing factory  
 recently started at AM-

HERST was busy, tailors generally being active; boot and shoe makers were very busy. At HALIFAX tailors, both ready-made and custom, were steadily active; steam laundries, dyeing and cleaning establishments were active, but with slight falling off in the laundry line. Steam laundries in WESTVILLE district were fairly active; boot and shoe workers were quiet. CHARLOTTETOWN reported dressmakers and tailors exceptionally busy; dyeing establishments were also very active and laundry workers well employed. At St. JOHN ready-made clothing tailors were busy; the hat, cap and fur trades were quiet; steam laundry workers were well employed. At MONCTON tailors and dressmakers were very busy; the cap factory operated steadily; family seamstresses and dressmakers were in great demand; steam laundries continued busy. Tailoring establishments at FREDERICTON were looking for help; steam laundries were active; shoe and larrigan makers had a busy month. MONTREAL reported ready-made clothing factories busy on spring orders; hat and cap factories worked overtime after the strike was settled; whitewear workers were well employed, a new factory giving employment to 150 additional hands, mostly women; laundries were fairly active; boot and shoe workers were active, though material was short; the strike in the rubber factories came to an end. Boot and shoe factories at QUEBEC had a very busy month, with prospects of steady employment. At SHEBROOKE tailors in ready-made clothing were very busy, and laundry-workers there and at St. HYACINTHE, St. JOHN'S, IBERVILLE and THREE RIVERS were well

employed; shoe workers at the latter point had a busy month. Shoemakers and clothing workers at SOREL had satisfactory employment. At OTTAWA and HULL all clothing industries were busy to capacity, and expect this condition to last until July or August. TORONTO reported a marked shortage of women workers, especially experienced operators for the clothing industry, including ready-made clothing, shirt, overall, neckwear and glove trades; the hat and cap, fur and whitewear industries had an active month; boot and shoe workers were in demand, employment having increased due to the high rate of exchange with the United States, which encouraged the demand for Canadian-made shoes; steam laundries had plenty of work. A continued shortage of help was reported at HAMILTON in the shirt, collar and women's wear industries and in the steam laundries and dyeing establishments; the boot and shoe, ready-made clothing, hat, cap, glove and fur industries were also active. Female help was in demand at NIAGARA FALLS for the corset, hat and suspender factories. Steam laundries at St. CATHARINES were very busy. BROCKVILLE reported activity in the hat and glove industries, and at KINGSTON employment continued good in the ready-made clothing industry and in the steam laundries and dyeing establishments. The shirt trade at BELLEVILLE was active in view of the coming season; steam laundries and cleaning plants were busy. PETERBOROUGH reported activity in the women's whitewear and children's clothing factories. Operators were in demand in the shirt factory at GALT, also in the boot and shoe factories; steam laundries and cleaning and dyeing plants were all busy. At BRANTFORD the overall and shirt factory was working overtime, silk glove and silk underwear workers were well employed, and the shoe factory worked full handed. Power machine operators were in demand in the shirt and collar factories at KITCHENER; boys and girls were wanted for the button factories; glove factories continued busy; boot and shoe and rubber factories ran full time, though handicapped by

epidemic of sickness among the operatives. At GUELPH female help was in demand at the women's whitewear and hat factories; steam laundries and dyeing establishments were active. Activity prevailed at STRATFORD in the ready-made clothing factories; laundries were fairly busy. Extra tailors and dress-makers were in demand in the ready-to-wear industry at LONDON and more female help was required for the steam laundries; overtime work was the rule in the boot and shoe factories. Skilled boot and shoe workers were in demand at ST. THOMAS. New laundry hands were taken on at CHATHAM. Girls were required at WINDSOR for the machines at the overall factories; the shirt factories were rushed, though somewhat delayed by shortage of material; employment was good in the button factories. The clothing trades at OWEN SOUND had an active month. WINNIPEG reported ready-to-wear material short but workers busy, with the same staffs as in January; experienced tailors were well employed; the shirt industry also continued steady, and the cap factory increased its staff; experienced glove makers were in demand, employment showing some gain; experienced help was also wanted in the whitewear trade; furriers had a quiet month; cleaners were unusually slack, the usual seasonal improvement not being evident. Help was in demand in the steam laundries at REGINA, and at MEDICINE HAT and CALGARY this industry was fairly active. At VANCOUVER the clothing industry was busy in all lines preparing for the spring trade; custom clothing trade, including tailoring, dressmaking and millinery, was not very busy, this being the between-season period. The shirt and overall factories at VICTORIA continued active; steam laundries and dyeing establishments did a normal business.

The pulp mill at ST. JOHN continued active. At BATHURST the pulp mill workers were increasingly busy, making a gain in output of six tons during the month, and an advance of fifteen tons in the month's shipments. The pulp and paper mills at SHERBOOKE had a busy month. At THREE RIVERS activity continued throughout the month, 900 men being steadily employed by one pulp and paper mill, and 700 men at the other. All the pulp and paper mills at OTTAWA and HULL continued busy. The felt and tarred paper factory at HAMILTON continued active. Workers at ST. CATHARINES in the pulp and paper mills, beaver board and other pulp products were still in steady employment. The felt roofing factory at BRANTFORD worked continuously day and night. The pulp and paper mills at SAULT STE. MARIE continued running at full pressure. The pulp and paper mills at OCEAN FALLS and POWELL RIVER, B.C., were steadily busy. At VICTORIA the pulp and paper mills continued working to full capacity, and the rubber roofing factory was still active.

SYDNEY reported continued activity in the newspaper and job printing shops, without change in staffs. Printing and publishing at HALIFAX was very brisk in all lines, both news and job departments, with shortage of compositors and pressmen. In WESTVILLE district printers and bookbinders were all reported to be busy. At TRURO experienced help was in demand, printers working overtime. Printers at CHARLOTTETOWN had a busier month than in January. At ST. JOHN newspaper printers were busy and job printers normal; binders were active, and paper box workers busy on spring orders. Activity was reported at MONCTON and FREDERICTON in all branches of the printing and book-binding trades. MONTREAL reported printers, bookbinders and lithographers as well employed. At QUEBEC the print-

#### **Pulp, paper and fibre**

#### **Printing, publishing and paper goods**

ing and bookbinding establishments had a busy month, and paper box and bag makers were also active. Printers and binders at SHERBROOKE, ST. HYACINTHE and THREE RIVERS were actively employed. Normal activity prevailed at OTTAWA and HULL in the printing and publishing houses and binderies. At TORONTO printers were well employed, binderies were busy and looking for additional help; engravers and lithographers and paper box and bag makers had a busy month. Activity continued at HAMILTON in newspaper and job printing, engraving and lithographing, and in the paper box factories. At St. CATHARINES newspaper and job printing establishments and binderies continued busy, and at BROCKVILLE activity in these lines, especially job printing, was above normal. KINGSTON and BELLEVILLE reported continued activity among printers and bookbinders. At PETERBOROUGH, however, the printing and allied trades were less active than in January. Newspaper and job printers were very busy at GALT, especially the former; the paper box factory also continued active. The paper box factory at BRANTFORD worked full handed. At KITCHENER and GUELPH the printers were reported to be all working, and the paper box factory still continued very busy. At STRATFORD also these industries were active. WOODSTOCK reported normal activity in the newspaper, and busy conditions in the job printing trades, but without demand for more printers. LONDON reported no unemployed printers; existing paper box factories were busy, and a new corrugated paper box plant started operations during the month. Newspaper and job printers and paper box makers at St. THOMAS continued in steady employment. Additional help was taken on at CHATHAM in the printing shops and binderies. Scarcity of newsprint hampered the newspaper trade at WINDSOR; job printers were rushed with work; the box factory was busy, and installed a press to do their own printing and die work. At OWEN SOUND printers, binders and paper box workers were busy.

At WINNIPEG employment continued good in all departments of the printing industry; newspapers were curtailed by paper shortage for several days, but employees were not affected; job printers were well employed; bookbinders continued busy, with demand for female help; paper box factories were well employed, without change in staffs, though affected by shortage of material. Printers and binders at BRANDON, REGINA and MEDICINE HAT were busy, with no apparent unemployment. Printing showed a falling off at LETHBRIDGE, but at CALGARY, EDMONTON and FERNIE steady activity was reported. At VANCOUVER newspaper work was fair, but job printing and binding were not so good; paper bag and box makers were not very busy. VICTORIA reported quiet conditions in the printing and allied trades, but paper box factories were active.

The sash, door and planing mills at SYDNEY were rather quiet during February, but at HALIFAX these industries were active, with large orders on hand, although production was slightly handicapped owing to difficulty in getting sufficient stock; broom and cooperage workers were steadily employed. In WESTVILLE district the sash, door and planing mills had a fair month, and furniture workers were active. The various woodworking industries at AMHERST were busy for this season; the piano factory ran to capacity and extended the gramophone department; the casket factory ran to capacity. The mattress factory at TRURO also employed capacity help. A new plant opened at KENTVILLE for the manufacture of builders' supplies, house and office furniture, etc. At CHARLOTTETOWN work in this group was rather quiet, but upholsterers had a very good month. At St. JOHN the sash, door and planing mills ran steadily; wooden box makers were very busy; broom makers were partly unemployed as the snow blockade hindered the arrival of corn; brush makers had a good month. MONCTON

reported good conditions at this season in the sash, door and planing mills, and at FREDERICTON the mills were working full time and gave no indication of the usual mid-winter lay-off. At MONTREAL wooden box and furniture workers had a fair month and the piano industry was active. QUEBEC reported that the planing mills were busy; two new furniture factories will shortly open, one having been partly burned just after beginning work; the other being situated at St. ROMUALD; broom and cooperage workers were rather slack. Conditions at SHERBROOKE in the sash, door and planing mills, and in the chair factory were good. At St. HYACINTHE wooden box and chair factories were busy. THREE RIVERS reported employment good in the sash, door and planing mills, and the wooden toy factory was also busy. The planing mills at St. JOHN'S and IBERVILLE were very busy, but at SOREL the woodworkers were rather slack. At OTTAWA and HULL the sash, door and planing mills and box factories continued with the same activity as in the previous month. TORONTO reported activity in the woodworking group, the sash, door and planing mills working on large orders in preparation for the building season; piano and gramophone factories were very busy on foreign orders. Activity continued at HAMILTON in the planing mills, and in the box, brush and broom, furniture and toy factories; a shortage of help was noted in this group, one furniture factory introducing female help for the first time. The planing mills at NIAGARA FALLS were quiet, but the sporting goods factory was busy. At St. CATHARINES continued activity was reported in the planing mills. At BROCKVILLE the planing mills were very busy in anticipation of the building season; the office furniture factory was very busy, an extension being planned. The sash, door and planing mills were also active at KINGSTON; the broom-makers and piano makers were fairly active. The sash, door and planing mills at BELLEVILLE were busy preparing for the approaching building season;

furniture workers were fairly well employed. Cabinet makers and woodworkers were in great demand at PETERBOROUGH; the planing mills and wooden box factories were busy. Help was in demand at GALT in the planing mills and furniture factories, and at BRANTFORD overtime work was necessary to cope with orders for the spring trade. A shortage of skilled help was reported at KITCHENER for the furniture factories which worked overtime; sash, door and planing mills and wooden box factories were very busy; broom factories were fairly active, and the woodenware and wooden toy factory workers were well employed; the piano and organ factory ran full time. The cooperage at WATERLOO was very busy. At GUELPH the sash, door and planing mills were active, with bench carpenters in demand; piano and sewing machine makers had steady employment. A demand for skilled cabinet makers and bench hands was reported at STRATFORD; furniture and chair factories were affected partly by shortage of material, but were generally active; sash, door and planing mills were actively preparing for spring trade. A shortage of skilled help was reported at WOODSTOCK in the woodworking group; the furniture factory was very busy; employment continued steady in the organ industry, but without any demand for more help. At LONDON the planing mills and wooden box factories were busy; the barrel factory was rushed, but piano makers were slightly hampered through shortage of material. All sash, door and planing mills at WINDSOR were rushed, and additions were made to the staffs in all woodworking industries; the piano factory was very quiet. The furniture trades at OWEN SOUND were actively employed; the planing mill was active and the wooden box and casket factories were normal. At WINNIPEG no change was reported at the sash, door and planing mills. At BRANDON these industries were busy. At REGINA and MEDICINE HAT they were fairly active, but at CALGARY and FERNIE they were quiet. VANCOUVER reported the sash,

door and planing mills, and wooden box factories fairly busy; furniture and allied trades and the wooden toy industries were rather slack. At VICTORIA the sash, door and planing mills, and wooden box factories were fairly active.

HALIFAX reported activity in the trunk, leather, bag and harness trades, but production was slightly curtailed owing to delay in securing materials. At AMHERST the trunk and bag industries employed more help than ever before; the harness trade was also active owing to its connection with the lumbering industry. ST. JOHN reported activity in the tannery, and good conditions in the harness trade. Leather workers at FREDERICTON were reported to be well employed. At MONTREAL tannery workers were busy; the trunk, bag and harness trades were fairly active. Tanners at QUEBEC had a very busy month. At ST. HYACINTHE the tannery was steadily active, and harness makers were well employed. The tannery at SOREL was fairly active. Leather workers at THREE RIVERS were well employed. At TORONTO the trunk, bag, harness and horse goods trades were fair, in spite of considerable difficulty in getting materials; rubber workers were well employed. A demand for female help was reported in the rubber factories at ST. CATHARINES, full time being worked. HAMILTON reported activity in the trunk, bag and harness, and in the leather and belting industries. Harness workers at BROCKVILLE and leather workers at PETERBOROUGH were fairly active. The tanneries at KITCHENER ran full time; trunk and bag factories reported trade good; rubber factories as well as the tire factory were very busy, though hampered by sickness among the employees. Great activity prevailed in the rubber factories at GUELPH. The tanneries at STRATFORD and WOODSTOCK continued busy, the local supply of help being fully taken up. At LONDON tannery workers were unusually busy, and

the harness and leather trades were well employed. The tannery at OWEN SOUND was normally active. At BRANDON the tannery, trunk and bag makers were well employed, but at CALGARY workers in the trunk, bag, harness and horse goods industries were rather slack.

At WESTVILLE cut glass and granite workers were slack, but pottery workers were busy all the month.

**Clay, glass, stone, cement, etc.** AMHERST reported no activity in the manufacture of clay products, but monument workers

were busy. The cut stone trade at ST. JOHN continued dull. At MONTREAL the glass factories were in steady operation. The cut stone and granite trades at SHERBROOKE were fairly active, but the brickyards were quiet. The artificial stone plant at THREE RIVERS worked steadily. Glass factories at TORONTO continued in steady operation. The cut stone and granite trade at KINGSTON was fairly active, and at BELLEVILLE the pottery and porcelain workers were fairly busy. A demand for help was reported at GALT for the brick, tile and sewer pipe, lime, cement and plastering trades. KITCHENER reported the stone cutters and marble workers employed full time, but brick and sewer pipe plants only partly active. The brick yards at STRATFORD were dull owing to weather conditions. Cut stone workers at LONDON continued busy. At WINDSOR the cement block plant was rushed day and night. The marble works at PORTAGE LA PRAIRIE re-opened, with steady work in prospect. Brick and tile plants at MEDICINE HAT reported business fairly good, but hampered considerably by cold weather; the pottery factory was fairly busy.

At SYDNEY chemical workers were active in the manufacture of tar, naphtha, carbolic acid, creosote, dead oil, naphthaline and pitch. HALIFAX reported activity throughout this group, production not being curtailed; the staff

employed at the oil refinery was slightly reduced from that of the previous month. At MONTREAL the paint and varnish industry was normal; chemical, drug and medicine plants were active. Cartridge and ammunition workers at QUEBEC continued slack. At SHERBROOKE the gunpowder factory was fairly active, but the acid, extract, drug and medicine plants were busy. The paint mills in the district of THREE RIVERS ran steadily during the month. At TORONTO paint and varnish and soap workers were active; drug and medicine plants had a busy month. HAMILTON reported active conditions in the toilet and laundry soap and in the acid and drug trades; powder and cartridge plants were fairly busy. The varnish and paint workers at BRANTFORD were very busy. At WINDSOR female help was in demand at the soap and perfume factory; the extract and pharmaceutical factory was busy, with female help in demand. At SAULT STE. MARIE the chemical factory was short of help. Soap factories at WINNIPEG gave steady employment, without changes in staffs. The oil refinery at REGINA ran full time with full staff; the soap factory still remained inactive. VANCOUVER reported the Ioco oil refinery busy, also the paint and varnish factories. At VICTORIA the paint and soap factories continued to operate steadily; powder and explosive factories were active, with an increased number of employees. The powder factory at NANOOSE BAY, Vancouver Island, was very busy.

The earnings of the Canadian Pacific Railway during January were \$13,914,-

569, as compared with \$13,028,328 in January, 1919. The number of persons employed by the Canadian Pacific Railway, Grand Trunk Railway, and Canadian National Railways on railway operation including general offices, train and engine crews, station forces, sleeping, dining and parlour car employees, showed small change during the month of February, the number of employees at

the end of the month being 66,000 persons as compared with 65,650 at the end of January. This increase was due to 350 additional employees on the staff of the Canadian Pacific Railway.

Shipping and 'longshore work was very brisk throughout the Maritime provinces in February. SYDNEY reported continued activity on railways, steam and electric; transfers, liveries and garages were also steadily active; navigation was quiet except at the port of LOUISBURG, which was busy. At HALIFAX railway travel was curtailed by weather conditions but street railways were busy from same cause; shipping and 'longshore work was brisk; transfers and garages were fairly active. In WESTVILLE district the steam railways had a large volume of business and electric railways had a good month, but transfers and garages were rather slack. Freight traffic on the railways at CHARLOTTETOWN continued to expand, but the car ferry service was much hindered by storms and broken ice, tying up freight on the Tormentine side; all regular railway employees, however, were busy, with much activity in sight. Steam railways at St. JOHN were hampered by cold and storms, and traffic on the street railways was suspended for a time, owing to snowdrifts; shipping and 'longshore work was about normal, freight handlers, however, working on short time for some days; transfers and garages were fairly active, and liveries were busy. A demand for labourers for the railways was reported from CAMPBELLTON. At MONTREAL the railways were well manned and had a large volume of business; the Harbour Commissioners who had closed their shops for the past two months re-opened them, giving work to a number of men. Steam and electric railways at QUEBEC had a very busy month keeping the tracks clear of snow. At SHERBROOKE, normal activity prevailed in the steam and electric railways, and in transfers, liveries and garages. Transportation companies at THREE RIVERS were very active, both the C.P.R. and G.T.P. giving much employment for men and teams. Railway and garage workers at St.

JOHN'S and IBERVILLE, and at SOREL, had a good month. At TORONTO steam railway employees were busy, though traffic was much retarded by heavy snowfalls and blockades, causing delay in deliveries; passenger traffic was rather lighter than usual at this season; street railway men had plenty of work. HAMILTON reported electric railways active, but steam railways less active; teamsters were in demand for transfer work. Transportation at NIAGARA FALLS and ST. CATHARINES was greatly hampered by snowstorms, and the railways employed many extra men. At BROCKVILLE also railway conditions were similarly delayed but transfers and liveries benefitted, taking the place of automobiles. Steam and electric railways were active at KINGSTON. At BELLEVILLE activity was reported in railway work, especially in the freight departments, and transfers and garages had a good month. At GALT, BRANTFORD, KITCHENER and LONDON, the railways, steam and electric, also transfers, liveries and garages, were reported as busy, in spite of difficulties in keeping the roads open; the LONDON street railway reduced the number of cars operating and laid off some of the crews. Traffic men at ST. THOMAS were fairly busy throughout the month, and at CHATHAM the steam railways showed increased activity, but the electric lines to Erie Beach and Wallaceburg were impeded by shortage of fuel and snow blockades. At OWEN SOUND navigation was dormant, but railways and transfers were very busy. WINNIPEG reported street railway transportation well up to the average, without much material change in number of employees. Similar conditions prevailed at REGINA in transportation work. Railway work at MOOSE JAW was rather slack, but at MEDICINE HAT it was brisk. At CALGARY railway employment was about normal, and transfers, liveries and garages were busy. VANCOUVER reported street and electric railways fairly busy: navigation, including 'longshore work, was slightly better than the previous month; transfers and garages were busy. At VICTORIA travel on coasting steamers

continued moderately active; 'longshore work was fair; auto liveries and garages were active for the season of the year.

Considerable employment was found at FREDERICTON in stone quarrying. The chrome iron industry at SHERBROOKE was quiet; the copper mines were dormant, but the asbestos mines were busy; the granite quarries were quiet, but the gravel pits were active. The quarry workers at BELLEVILLE were fairly well employed. At COBALT the ore shipments from the silver mines amounted to twelve cars containing approximately 915,377 pounds of ore, as compared with nineteen cars containing approximately 1,445,578 pounds of ore in the month of January; bullion shipments for the month were comparatively heavier, a total of 427 bars containing 516,871.84 fine ounces being shipped, as compared with 311 bars containing 337,374.73 fine ounces in the previous month. Information from the gold camps at PORCUPINE and KIRKLAND LAKE confirmed earlier reports that an abundant supply of labour was available, a condition not experienced since 1917, and one which should greatly increase gold production. The nickel mines at COPPER CLIFF, Ont., absorbed a number of miners. The strike situation at Sullivan Mines, KIMBERLEY, B.C., remained practically unchanged, the shortage of muckers and miners still continuing; the output, however, was said to be back almost to normal; the Sullivan Mines at KIMBERLEY and the Paradise Mines at INVERMERE were the scene of the only placer operations in the Fernie and Cranbrook district. The concentrator at TRAIL was down during the month owing to shortage of water; the refinery and smelters for the NELSON and TRAIL district continued in operation, with prospect of extension to include a new water system, and enlargement of copper refinery and rolling copper mill and concentrator. The mines at ROSSLAND closed at the end of the month, all employees being taken on for construction work at Trail. Strike

conditions at the Premier Mines remained unchanged, but early activity at STEWART and ALICE ARM was looked for. Miners were in demand but were difficult to secure at VANCOUVER owing to strike conditions.

Collieries in the Maritime Provinces worked to capacity. A considerable demand continued in CAPE

**Mining (Coal)** BRETON for experienced miners, shooters and loaders. SYDNEY reported the output of the Dominion Collieries at 248,500 tons against 276,000 tons in January, the decrease being due to fewer working days in the month, and also to a one-day walk-out to protest against changing shot-firing from the day to the night shift. The output of coke was 25,000 tons, with 120 coke ovens working, compared with 25,500 tons in January. The number of workers was about 4,300. The output of the Nova Scotia Steel and Coal Company at SYDNEY MINES was 49,500 tons, compared with 55,000 tons in January. 8,450 tons of coke were produced from 190 ovens. During the month the Scotia Colliery reached the maximum output of 2,200 tons of coal per day. WESTVILLE reported a total production in the local mines of 39,271 tons, of which 8,684 tons were from the Albion, 13,324 tons from Acadia No. 1, and 8,505 from Acadia No. 3. The Acadia Coal Co. at STELLARTON had about 1,500 men on the payroll. AMHERST reported the mining industry as active with a demand for men which seemingly could not be supplied. At the MINTO collieries coal stripping operations were hampered to some extent by heavy storms; the strike still continued although the striking miners had mostly found employment at other mines. Considerable unemployment continued at ESTEVAN, Sask., among the coal miners. At LETHBRIDGE a great falling-off in employment was reported in the lignite mines; in the two large local mines (Galt collieries), the miners worked only three days a week, and some of the smaller mines worked shorter time; this condition was attributed to lack of orders; the

bituminous mines worked steadily, taking on additional men. CALGARY reported that the surrounding coal mines were quiet, orders having slackened off and many workers being laid off at the lignite mines. Twenty-five per cent of the workers were laid off at DRUMHELLER, all mines working short time, which was expected to continue till about May. Similar reports came from the EDMONTON district, where more soft coal was reported as mined ahead than could be disposed of in the market. Operations and output at the FERNIE mines continued fairly good in spite of some industrial trouble in the district, the mines working about five days a week. Miners and coke loaders were in some demand at MICHEL. NANAIMO reported that most of the mines on Vancouver Island were active, but some worked only half time and were laying off men. The B.C. Coal Mine closed down early in the month, throwing 200 men out of work; the mines of the Canadian Western Fuel Company worked full time, with slight demand for additional labour. The Canadian Collieries at CUMBERLAND worked half time for part of month.

The value of building permits issued in 50 cities during January amounted to \$3,956,247, as compared with \$5,056,198

**Building and construction** in the same cities in December, 1919. Building and construction continued dull throughout the Maritime Provinces in February, resulting in prevalent unemployment, but there were evidences of an early start and a record season's activity. SYDNEY reported a further decline from the previous month. At HALIFAX continued stormy weather precluded new undertakings, but there was some slight activity on inside and finishing work. Conditions were very quiet at AMHERST and CHARLOTTETOWN, and NEW GLASGOW. At St. JOHN plumbers were fairly active at the middle of the month. Considerable work was done at MONCTON on buildings in course of erection. A further decline in building activity was reported at

FREDERICTON, but at BATHURST there was some demand for men for construction gangs, and for construction work at BATHURST MINES. A few plasterers and labourers were employed at CAMPBELLTON. At MONTREAL the building trades were quiet. Some preparatory work for new buildings was started at QUEBEC and the street railway was extending the Limolou line. SHERBROOKE reported considerable activity, especially in industrial building construction. Several buildings were under construction at THREE RIVERS, but at SOREL the building trades were quiet. Construction work at OTTAWA and HULL was unusually active for the season; at the end of the month, however, 175 men who had worked on the new Parliament buildings were let out. Building operations at TORONTO were intermittent with frequent interruption by severe weather, many men of the building trades being inactive, but an unusually busy season was anticipated. At HAMILTON considerable inside work was done, and there was some demand for mechanics. The building trades at NIAGARA FALLS were very quiet owing to the weather, plumbers, however, being very busy; about 2,000 men were working on the Hydro-Electric power canal, but heavy snows hampered the work. St. CATHARINES reported building as fair, but at BROCKVILLE, KINGSTON and BELLEVILLE conditions were very quiet. The building trades at PETERBOROUGH were kept occupied by small jobs, and many carpenters were employed on the new bridge. BRANTFORD reported activity in the erection of private houses, and at KITCHENER bricklayers, mortar men and builders' labourers were in demand. The building trades at GUELPH were fairly well employed, but at WOODSTOCK construction work was at a standstill. Painters and carpenters were busy at LONDON and plumbers were exceptionally active; considerable industrial work was in progress. The building trades at St. THOMAS were quiet, but at CHATHAM limited activity continued. A marked shortage of help was reported at WINDSOR, fully 500 men, it was said, being needed for the

work in progress, both commercial and residential. At PORT ARTHUR and FORT WILLIAM building was at a standstill, but the Hydro-Electric construction camp absorbed a number of unemployed men, and preliminary work was proceeding on the Government harbour scheme. WINNIPEG reported all skilled mechanics in the building industry fairly well employed, with the prospect of a large demand for skilled men when the season opens; many unemployed men were supplied from this centre to the Ontario Hydro-Electric Commission for excavation work at CAMERON FALLS. The Hydro-Electric transmission line at PORTAGE LA PRAIRIE was nearly completed and many men were laid off. Employment in the building trades at BRANDON was unusually good, but at REGINA conditions were quiet, though preparatory work was being started. LETHBRIDGE reported some jobbing activity. At CALGARY the building trades were very quiet, but at EDMONTON increased activity was reported in all lines. At VANCOUVER, while there was an increase in the number and value of building permits, the building trades were not yet busy; the Dominion Government contract for the construction of a dry dock was awarded a local firm, and this will shortly absorb much unemployed unskilled labour. Slightly increased activity was noted at NEW WESTMINSTER. At PRINCE RUPERT the building trades were fully employed, with plumbers and carpenters very busy. Work commenced at VICTORIA on the construction of round houses, etc., for the Canadian National Railways. Considerable jobbing was in progress at NANAIMO; work was started on the alteration of the C.P.R. wharf and installation of elevator.

The number of persons employed by the Canadian Pacific Railway, Grand Trunk Railway, and Canadian National Railways on railway construction, including maintenance of way, showed an increase of 1,700 persons during the month of February, there being 28,200 persons on pay roll at the end of the month as compared with 26,500 at the end of Jan-

uary. These increases were nearly all recorded during the second and third weeks of the month and were accounted for chiefly by additions of 950 employees to the staff of the Canadian National Railways, and 600 employees to the Canadian Pacific Railway staffs.

Nearly all the lumber camps in the Maritime Provinces completed their cuts

**Lumbering** and were preparing for the spring drive ; woodsmen, however, were still in demand with contractors who started late. With an early drive the sawmills were expected to start soon and keep large numbers employed until summer. AMHERST reported lumbering as never more active, with a demand for expert woodsmen impossible to supply, as they were unwilling to start work so late in the season. Similar conditions prevailed at NEW GLASGOW and at CHARLOTTETOWN. At BATHURST, ST. JOHN and MONCTON there was still a call for men for the woods ; the lumber firms took on additional help for hauling. FREDERICTON reported great activity in the lumber camps. Sawings operations started on a small scale at NEWCASTLE, with a slight demand for sawyers and mill hands. At CAMPBELLTON the demand for woodmen ceased during the month. In the QUEBEC district lumbering was in full progress under very favourable conditions. Great activity was reported at SHERBROOKE in the camps for timber, railway ties, telegraph and telephone poles, and in the sawmills and shingle mill. In the OTTAWA and HULL district the lumber camps were all active though there was still a shortage of men willing to go to the bush. PEMBROKE reported a demand for loaders and teamsters, a number of camps finishing the long haul and laying off men. The lumber camps at PETERBOROUGH

were still very active and the saw mills were being prepared for the season's large cut. Most camps at NORTH BAY finished their winter cut and started to haul, which meant a reduction of staffs of about 20 per cent. The saw mills at OWEN SOUND were busy. At SAULT STE. MARIE lumbering operations were very active and at PORT ARTHUR and FORT WILLIAM some demand for woodsmen still continued. At WINNIPEG there was still a strong demand for woodsmen, and at DAUPHIN, PRINCE ALBERT and SASKATOON experienced men were sought for the bush. A similar demand existed for the camps round EDMONTON. Logging operation at FERNIE were hampered by unfavourable weather ; hauling was active at the end of the month, with demand for hookmen, swampers, sawyers and teamsters. Conditions were similar at CRANBROOK, lack of snow delaying logging, but later there was a call for hookmen, teamsters and mill hands ; the Canadian Pacific Railway mill at YAHK was ready to start work. At NELSON also activity increased towards the end of the month. PRINCE RUPERT reported a demand for bushmen, teamsters, fallers and loggers along the Grand Trunk Pacific Railway as far as SMITHERS, with a demand from Queen Charlotte Island. The lumber mills at NEW WESTMINSTER continued busy and two mills re-started. VANCOUVER reported logging operations very active throughout the Province, saw and shingle mills being fairly busy. At VICTORIA also activity continued in all branches of the lumber industry. NANAIMO reported the mills and logging camps in VANCOUVER ISLAND as brisk, all camps working full time excepting one at ALBERNI, where a strike was in effect during the latter part of the month. The saw mill at COURTENAY commenced operations for the season.

**INDUSTRIAL DISPUTES INVESTIGATION ACT, 1907****PROCEEDINGS FOR THE MONTH OF FEBRUARY, 1920, WITH TEXT OF BOARDS' REPORTS**

**D**URING the month of February the Department received reports from five Boards of Conciliation and Investigation established to deal with disputes between (1) the Acadia Coal Company, Limited, Sydney Mines, N.S., and certain of its employees, being members of District No. 26, United Mine Workers of America; (2) the Intercolonial Coal Company, Westville, N.S., and certain of its employees, being members of District No. 26, United Mine Workers of America; (3) the Canadian Pacific Railway Company, Eastern Lines, and its sleeping car porters; (4) the Canadian Express Company and certain of its employees, being messengers, clerks, porters, etc., members of the Canadian Brotherhood of Railroad Employees; and (5) the Niagara, St. Catharines and Toronto Railway and certain of its employees, being motormen and conductors, barn and shop men, powerhouse men, etc., members of Division No. 846, Amalgamated Association of Street and Electric Railway Employees of America; also three applications for the establishment of Boards.

**Applications Received.**

During the month of February applications for Boards were received as follows:

(1) From the employees of various members of the General Cartage and Warehousemen's Association of British Columbia, Vancouver, B.C., being members of Local No. 655, International Brotherhood of Teamsters, Chauffeurs, Stablenen and Helpers. This industry not being one falling within the scope of the Industrial Disputes Investigation Act, a Board could be established only upon receipt of the consent of the employers to this procedure. Such consent was not given. Consideration of the situation, however, by the Minister of Labour, resulted in the reference of the dispute to a Commissioner, appointed

under the Inquiries Act, and in accordance with Section 63A of the Industrial Disputes Investigation Act. Shortly after the close of the month Reverend W. H. Vance, of Vancouver, B.C., was appointed a Commissioner to hold and conduct an inquiry into the dispute and to report and make recommendations to the Minister of Labour with respect to an amicable adjustment.

(2) From certain of the employees of the Consolidated Mining and Smelting Company and the Le Roi No. Two Mining Company, Rossland, B.C. In view of the fact that negotiations on the question of wages and working conditions were in progress affecting these employees, and for other reasons, this application was left in abeyance.

(3) From the Canadian Fish and Cold Storage Company, Prince Rupert, B.C., requesting a Board to deal with a dispute with certain of their employees, being fish packers. At the close of the month the procedure in this case had not been completed.

**Other Proceedings under the Act.**

In the January number of the **LABOUR GAZETTE** reference was made to an application for a Board of Conciliation and Investigation to deal with a dispute between the Grand Trunk Railway Company and certain of its employees, being clerks, etc., members of the Canadian Brotherhood of Railroad Employees, and it was stated that "No Board was established in this case, as, in the Minister's view, on account of an agreement being already in existence between the parties concerned, which did not expire until June 1, 1920, this was not a dispute falling within the meaning of the I.D.I. Act." The foregoing statement was in error as the establishment of a Board of Conciliation and Investigation has been allowed to remain in abeyance to permit of direct negotiations taking place between the parties concerned.

## Report of Board in Dispute between the Acadia Coal Company and certain of its employees.

A REPORT was received from the Board established to deal with the dispute between the Acadia Coal Company, Limited, Sydney Mines, N.S., and certain of its employees, being members of District No. 26, United Mine Workers of America. The Board was composed as follows: His Honour Judge G. Patterson, New Glasgow, appointed on the joint recommendation of the other two Board members, Messrs. John McKeen, Halifax, and J. C. Watters, Inverness, nominees of the company and employees respectively. The report of the Board was unanimous and was accompanied by a proposed schedule of wages.

### Report of Board.

In the matter of the Industrial Disputes Investigation Act, 1907, and of a dispute between the Acadia Coal Company, Limited, hereinafter called the "Company," and certain of its employees, being members of District No. 26 United Mine Workers of America, hereinafter called the "employees."

To the Honourable,  
The Minister of Labour,  
Ottawa, Canada.

The Board of Conciliation and Investigation appointed in relation to the dispute between the above-named company, and its employees, met in the Town Hall, Stellarton, on the 20th day of January last, and with the exception of two short adjournments, sat continuously until the 12th day of February, subsequently, meeting again on February 16th and 17th to draw up their report. Full details of their sittings are given in the special report of the Chairman, which is submitted per concurrent mail. At our first meeting we impressed upon both parties to the dispute, whose representatives were present, the advantage of getting together, and endeavouring to settle

their differences among themselves, offering our services in adjusting those matters upon which, after a full interchange of opinion and argument, they could not come to terms. The suggestion was accepted by both sides in the most cordial manner, and acted upon. For some days, the Company and their employees, through their respective representatives, met in friendly discussion, and agreed upon many of the items in dispute. Then when they could get no further they came before us. We heard all the evidence either side had to offer, and listened carefully to all arguments presented. And no better opportunity will occur than here to congratulate both sides upon the splendid manner in which they conducted their case. Everything said or done was said or done with good feeling, and neither side sought to take advantage of the other, but both seemed anxious for a fair and reasonable settlement.

Reference to the application for a Board will show that the difference or dispute was over the wages paid to the different classifications of workmen employed in or about the mines of the company. Practically, we were asked to draw up a new schedule of wages. Many of these classifications are paid by the day—others are by contract. The parties themselves were able to settle and agree upon a rate for many, perhaps most, of the classifications paid by the day, but upon none of the contract rates could they agree. The Company would consent to no increase in any of these—the employees asked an increase in all.

The following is the schedule we have decided upon for those classifications paid by the day, which includes not only those upon which agreement was reached by the parties themselves, but those referred to us for settlement, and except where specially noted, it is to be taken as applying to all the mines of the Company, and is to go into effect as from February 1st instant.

We were asked to make many and far reaching changes in the contract rates. We are prepared to grant, and as will be afterwards seen, do grant a general increase in all contract rates, but only in two classes of contract work can we give to contractors doing a specific work a special increase. These two are:—

1. Shooting and loading in bords and narrow places. For this, the rate hereafter will be 76 cents per ton.

2. Deadwork—the rate will be 60 cents per hour. If the work does not take twenty minutes, there will be nothing paid for it—if it takes over twenty minutes, though not the full hour, the full rate per hour will be paid.

One other class of contract work, namely, shovelling coal, more particularly when the coal is to be shovelled up hill, seemed to call for special consideration. At the request of the employees, however, this matter was left to be adjusted between the Company and the Local Committee of the employees at Thorburn.

In October, 1918, after investigation the Fuel Controller directed that twenty-seven cents per day be added to the wages of each employee of the Company to partly offset the increase in the cost of living. In the January previous there had been an adjustment of wages to meet the increased cost up to that time, and this twenty-seven cents was intended to meet the rise in the cost of living between January and October. There has been no decrease since October, 1918, rather as everyone knows, a sharp increase, but no change has been made, and the Company has continued to add twenty-seven cents per day to the wages of every man. For the men working on contract, we now direct that this twenty-seven cents for the future be consolidated in their contract rates—and that four and one-half per cent be added to these rates as its equivalent.

In addition, we direct a further increase of four per cent in the contract rates. This increase is to be effective on and from February 1st instant. The total increase in contract rates will thus be eight and one-half per cent, and it is hardly necessary to point out that since January, 1918, or since the last increase in wages, the cost of living has increased by a far larger percentage.

We have not sufficient information to determine how this increase is to be applied among the various classes of contract work. The working out of the details of its application is left to the Company and the Local Committees at the various collieries.

Owing to the special conditions at the Colliery Acadia No. 1, by which the men doing contract work there are able to earn considerably more than the average paid the other contractors of the Company, there will be no increase of any kind in the contract rates at that colliery.

We recommend that the wages of the day labourers and the contract rates as we have settled upon and fixed them should continue in force for one year from the 1st day of February instant, subject to thirty days' notice from either party, with the proviso, that should there be any appreciable change in the cost of

living or any disturbance in economic conditions, or any disparity in the schedule of wages paid by any other coal company in the Province of Nova Scotia, this schedule may be open for revision at the instance of either party to this agreement at the end of each four months' period from January 1st last during the existence thereof.

All of which is respectfully submitted.  
New Glasgow, N.S., February 18, 1920.

(Sgd.) GEORGE PATTERSON,  
Chairman.

(Sgd.) J. C. WATTERS.

(Sgd.) J. McKEEN.

#### **Report of Board in Dispute between the Intercolonial Coal Mining Company, Limited, and certain of its employees.**

A REPORT was received from the Board established to deal with the dispute between the Intercolonial Coal Mining Company, Limited, of Westville, N.S., and certain of its employees, being members of District No. 26, United Mine Workers of America. The Board was composed as follows: His Honour Judge G. Patterson, New Glasgow, appointed on the joint recommendation of the other two members, Messrs. John McKeen, Halifax, and J. C. Watters, Inverness, nominees of the company and employees respectively. The report of the Board was unanimous and was accompanied by a proposed schedule of wages.

#### **Report of Board.**

In the matter of the Industrial Disputes Investigation Act, 1907, and differences between the Intercolonial Coal Mining Company, hereinafter called the "Company" and certain of its employees, being members of District No. 26, United Mine Workers of America, hereinafter called the "Employees."

To the Honourable,  
The Minister of Labour,  
Ottawa.

The personnel of the Board of Conciliation and Investigation in above was the same as that appointed in the matter of differences between the Acadia Coal Company, and certain of its employees. The areas of the two Companies adjoin, and the collieries of the Intercolonial Company are but a little distance from the larger collieries of the Acadia Company. Conditions are so far similar that for some time there has been a working arrangement between the Companies, that the wages and rates paid at each should roughly correspond. Consequently the Board were able to hear much of both these cases at the same time. At all our sittings up to that on February 13th, representatives of both Companies were present, as well as representatives of the employees of both. Our meetings on that day and the following were entirely devoted to a consideration of the wages and rates to be paid by the Intercolonial Company.

As in the case between the Acadia Coal Company and its employees, we impress-

ed upon both sides herein the advantage of getting together, and so far as possible adjusting their differences. In this case too, our suggestion was acted upon and very many, practically all, of the wages to be paid the various classifications of day labourers were agreed upon and settled by the parties themselves. The following is the wage schedule we have drawn up for those classifications paid by the day—it includes, it is perhaps hardly necessary to say, not only those upon which agreement was reached by the parties themselves, but those that were referred to us:

## SURFACE.

Classification.	Present Rates.	New Rates.
Surface Foreman .....	\$3.56	\$3.75
Time and Storekeeper .....	3.63	3.75
Messenger .....	2.49	2.75
Local Coal Weigher .....	3.14	3.25
Local Coal Weigher, No. 5 Mine .....	3.37	3.50
Night Watchman .....	3.37	3.80
Night Watchman, No. 5 Mine..	3.14	3.80

*Screening and Loading—*

Bank Weighman (Drd.) .....	3.87	4.00
Bank Weighman (No. 5) .....	3.56	3.75
*Chainman, No. 2 .....	3.56	3.50
Chainman, No. 1 .....	3.25	3.50
Chainman, No. 4 .....	3.25	3.50
Chainman, No. 5 .....	3.25	3.50
Box Car Loader .....	3.25	3.75
Machinery Oiler (Screen Engr.) .....	3.37	3.80
Horse Drivers .....	2.49	2.75
Car Runners and Shunters .....	3.25	3.35
Other Bank Employees .....	3.14	3.25
Boys .....	2.11	2.11

*Hoisting Engineers, Main Slopes—*

No. 1 Mine .....	3.81	4.60
No. 2 Mine .....	3.81	4.60
No. 5 Mine .....	3.81	4.60
Compressor and Fan Man .....	3.50	4.00
Fan Man only .....	3.37	3.80
Compressor Man only .....	3.37	3.80
*Power House and Elect .....	4.75	4.05

*Firemen and Ashmen—*

Leading Firemen .....	3.37	4.00
Other Firemen .....	3.25	3.80
Ashmen .....	3.25	3.40

*Skilled Mechanics—*

*Machinists .....	4.77	4.60
“ .....	4.13	4.30
“ .....	3.90	4.00
“ .....	3.69	4.00
Machinists' helpers .....	3.37	3.60
“ .....	3.25	3.60

Boys .....	2.49	2.75
Blacksmiths' apprentices .....	2.11	2.40
Blacksmiths .....	3.87	4.30
“ .....	3.37	4.00
“ .....	3.26	4.00
Blacksmiths' helpers .....	3.14	3.40

*Carpenters—*

Carpenters .....	4.20	4.50
“ .....	3.63	4.05
“ .....	3.50	3.80
Hutch repairers .....	3.50	3.80

*Other Surface Labour—*

Boiler Cleaners .....	3.87	4.00
*Stablemen .....	24.16 wk.	....
Lampmen .....	3.87	4.00
“ .....	3.60	3.80
“ .....	2.62	2.80
General Labourers .....	3.14	3.25
“ .....	3.25	3.50
“ .....	3.14	3.40

*Pier—*

Wharfinger .....	3.26	3.35
------------------	------	------

*Train Crews—*

	(per hr.)	
Drivers .....	3.87	.57
Firemen .....	3.25	.51
Brakemen .....	3.25	.51
Conductor .....	3.79	.54
Trackmen, in and about plant		
(1) .....	3.14	3.40
(2) .....	3.14	3.25
Trackmen, when employed on road to pier .....	(1) 3.56	3.60
Tipplemen .....	(2) 3.40	3.50

## UNDERGROUND.

Men with examiners or overmen by night .....	2.36	3.35
<i>Horse Haulage—</i>		
Drivers .....	2.62	3.10
Drivers over 18 years old .....		3.40
*Stablemen .....	3.87	3.60
<i>Mechanical Haulage—</i>		
Engineman (No. 2 Slope and Tail Rope) .....	3.50	4.00
Chainrunners, Main Slope .....	3.50	3.80
No. 2 Slope .....		
Sheet Tenders, Top .....	3.25	3.50
Bottom .....	2.62	3.00
Brakeholders .....	2.36	3.00
	2.49	3.00
Shovers and Pushers .....	3.25	3.40
<i>Ventilation—</i>		
Trappers .....	2.11	2.20
Roadmakers .....	3.87	4.00
Timbermen .....	3.63	3.75
“ .....	3.26	3.75
“ .....	3.41	3.75
Pumpmen .....	3.37	4.00

\*The old date for these classifications will stand so long as this schedule remains in force.

Classification	Present Rates.	New Rates.
<i>Miscellaneous Labour—</i>		
Slope Timbermen .....	3.50	4.50
	3.41	
General Labourers .....	3.25	3.35
<i>Examiners—</i>		
The Examiners at night shall be paid 25c. per night additional.		

The above schedule is to be effective on and from February 1st instant.

The Company and the employees could make no agreement as to any of the contract rates. The employees sought increases in many, indeed in most of these rates, and the Company declined to agree to any increase in any of them. It will be much more convenient to deal with those classifications of contract work in which we have allowed an increase, than with those in which we have not.

(1) Brushing on slants. Formerly this was paid the brushing on level rate. The employees claim it should be paid at the brushing on balance rate. From the statements made by both sides we gather that the work is more difficult than the former, but not so difficult as the latter. We fix the rates for this work as follows: In rock, \$2.25; in coal, \$1.85.

(2) Driving heads in long wall. The rate for driving heads in bords and pillar was formerly \$3.03 per yard. The men claim, and we think they have made out their claim, that this work is of the same or of very much the same character. We fix the rate at \$2.90 per yard.

(3) Deadwork. We fix this rate at 60 cents per hour. There will be nothing paid for putting on a box, or doing anything taking less than twenty minutes. Anything taking over twenty minutes will be paid as for a full hour.

(4) Cutting bottom in roadways. We fix the rate at 90 cents per yard.

All the other claims for increases on specific classes of contract work are disallowed.

In October, 1918, in an effort to meet the increase in the cost of living that had taken place since January, 1918, when the last adjustment of wages was made, the Fuel Controller gave orders that twenty-seven cents per day was to be added to the earnings of every man working in the mines of the Company. The Company now agree to consolidate this twenty-seven cents in the contract rates. Or in other words, as the equivalent of this twenty-seven cents to the contract workers they will add four and one-half per cent to their contract rates.

We grant a further increase of five per cent upon all contract rates, but this increase is not to apply to the tonnage rates on long wall South side No. 2 mine. When the long wall is opened on the North side, special arrangements are to be made. This increase is to go into effect as from February 1st instant.

The working out of the details of the application of both the increases last referred to is left to the Company and the Local Committees of the employees.

We recommend that the wages of the day labourers and the contract rates as we have settled upon, and fixed them should continue in force for one year from the 1st day of February instant, subject to thirty days' notice from either party, with the proviso, that should there be any appreciable change in the cost of living or any disturbance in economic conditions, or any disparity in the schedule of wages paid by any other Coal Company in the Province of Nova Scotia, this schedule may be open for revision at the instance of either party to this agreement at the end of each four months' period from January 1st last, during the existence thereof.

All of which is respectfully submitted.  
New Glasgow, N.S., February 19, 1920.

(Sgd.) GEORGE PATTERSON,  
Chairman.

(Sgd.) J. C. WATTERS.

(Sgd.) J. McKEEN.

## Report of Board in Dispute between the Canadian Pacific Railway Company, Eastern Lines, and its sleeping car porters.

A REPORT was received from the Board established to deal with the dispute between the Canadian Pacific Railway, Eastern Lines, and its sleeping car porters. The Board was composed as follows: His Honour Judge Colin G. Snider, Hamilton, appointed on the joint recommendation of the other two members, Messrs. U. E. Gillen, Toronto, appointed by the Minister in the absence of a recommendation from the company, and Fred Bancroft, Toronto, the nominee of the employees. The report was signed by the chairman and Mr. Gillen, and was accompanied by a proposed schedule of rules and wages. Mr. Bancroft presented a minority report together with certain recommendations, which the employees advised were acceptable to them as a basis of adjustment. It developed, however, that a decision on an important point of the dispute had been omitted in the report rendered by the chairman and Mr. Gillen. The Board accordingly reconvened on February 25 and further reports were rendered, the majority report being signed by the chairman and Mr. Gillen, and the minority report by Mr. Bancroft.

### Report of Board

In the matter of the Industrial Disputes Investigation Act, 1907, and of a dispute between the Canadian Pacific Railway Company, employer, and its Sleeping Car Porters, employees.

To the Honourable  
Senator G. D. Robertson,  
Minister of Labour, Ottawa, Ont.

Sir,—

The Board of Conciliation established by you herein has the honour to report as follows:

On Tuesday the 13th day of January, 1920, at 10.30 a.m. the Board commenced its sittings by appointment at the City Hall in Toronto. All members of the Board were present. The employees'

representatives were in attendance. They are A. R. Mosher, President of the Canadian Brotherhood of Railroad Employees, J. A. Robinson, President of the Order of Sleeping Car Porters, and R. O. Caines, an ex-sleeping car porter of the employer Company. No one attended to represent the employer although due notice of the meeting had been given to W. A. Cooper, the Manager of the C. P. Railway Sleeping, Dining and Parlour Car and News Service. The Chairman issued a notice to W. A. Cooper requiring him to attend. A telegram was received from him saying that he could not attend before the Board on the 13th of January but would attend on the 14th. The Board proceeded to hear the evidence of the dismissed sleeping car porters. Complaint was made before the Board as to the dismissal of seven of these men. Several of them were examined under oath and cross-examined on the 13th as to the circumstances of their service and of their dismissal and of the efforts made to have their cases heard by the officers of the Company. At 5 p.m. the Board adjourned. On the morning of the 14th of January W. A. Cooper attended before the Board and he was given a general outline of what had been said by the witnesses heard on the 13th. Mr. Cooper called the Board's attention to his letter to the Deputy Minister of Labour dated the 20th day of December, 1919, and said that the Employer's attitude had not changed and that he attended in obedience to the Order of the Board and not as representing the Employer. Other witnesses gave their evidence as to the dismissals under consideration and were examined and cross-examined in Mr. Cooper's presence on the 14th of January and the morning of the 15th when the hearing of all the Employees' witnesses in reference to the dismissals was completed. The Board then suggested that Mr. Cooper should confer with the dismissed porters alone

with a view to a settlement. This was agreed to and the Board adjourned until two o'clock to permit this conference to be held. On re-assembling at 2 p.m. Mr. Cooper said to the Board that he had undertaken to re-instate these seven dismissed porters temporarily and to receive the Committee which the Order of Sleeping Car Porters had appointed and to discuss with this Committee in Montreal the permanent re-instatement of these men, and the other matters submitted by the Minister of Labour to this Board of Conciliation. He further said he had hopes from the evidence he had heard that this Board would be relieved from further consideration of this dispute. The Employees confirmed the statement made by Mr. Cooper and at request of all the parties the Board adjourned the investigation to Thursday, the 29th day of January, 1920, at 10.30 a.m., at the same place at Toronto.

On the 26th day of January, 1920, the Chairman of the Board received from Mr. Cooper the following telegram:—"Have had three meetings with alleged 'porters' Grievance Committee pursuant to understanding at last meeting Board—find statements then made by 'porters altogether unjustified according to evidence submitted. Company must therefore maintain their position on dismissals of porters concerned. Pre-sume hearing will proceed as arranged on Thursday, 29th. W. A. Cooper."

On receipt of this telegram the Chairman at once telegraphed to Mr. Cooper and to the Employees to attend on Thursday, the 29th, and bring all witnesses. He also notified the other members of the Board of the nature of these telegrams.

On Thursday, 29th January, 1920, at 10.30 a.m., the Board again met at the City Hall in Toronto and was attended by the representatives of the Employees and other witnesses and by W. A. Cooper, George Hodge, Assistant to the Vice-President of the C.P. Ry., and H. F. Mathews, General Superintendent of the Sleeping and Dining Car Service of the C.P. Ry., Western Lines, all three of whom explained that they attended only

to give evidence if required and not as representing the Employer as a party to these proceedings. Evidence as to these dismissals, terms of employment, meetings had as to rate of wages, schedule of rules, etc., was given by George Hodge and W. A. Cooper under oath and examination and cross-examination at length of both under oath was had, and evidence in reply was given by witnesses for the Employees all confined as far as possible to the dismissal of the seven porters whose reinstatement has been demanded by the employees. The seven porters dismissed are R. O. Caines, C. R. Taylor, R. M. DeFreitas, J. A. Samuel, R. J. Marshall, O. Daniel and J. M. Black.

R. O. Caines who is chairman of the Committee appointed by the Order of Sleeping Car Porters stated to the Board that no discussion had taken place in Montreal with Mr. Cooper since the adjournment for that purpose, and that Mr. Cooper refused to recognize this Committee as properly representative of the men, and that he also refused to see them as a Committee of dissatisfied employees on the subject of the dismissal of the seven porters. Mr. Cooper on being asked as to the correctness of these statements replied that Mr. Hodge would make a statement which would answer this question but no direct definite answer was given.

The taking of evidence and discussions and arguments as to the dismissals occupied the time of the Board all the 29th of January and the morning of the 30th and at the conclusion thereof Messrs. Cooper, Hodge and Mathews said that as they had no further evidence to give as to the rate of wages and schedule of rules demanded by the Employees they would with the Board's consent like to withdraw from all further sittings of the Board and they then withdrew. On the afternoon of the 30th day of January and on the 31st day the Board proceeded with the hearing of evidence, statements and arguments put in by the representatives of the employees, no one for, or having connection with, the Employer being present.

As to the seven dismissed porters the two members of the Board who sign report as follows:

Each dismissed porter who has given evidence under oath has sworn that he has no knowledge of the reason for his dismissal or for the dismissal of any others of the seven whose cases we are considering; that he has applied to the proper officers of the Company for information as to the cause of his dismissal and has never been able to get any answer other than "General unsatisfactory service"; that he is not conscious of misconduct or neglect of duty on his part that might give cause for his dismissal.

W. A. Cooper and George Hodge, officers of the Employer who gave evidence and were fully and carefully questioned and cross-examined having been first sworn, answered all questions asked them excepting the question as to the particular definite reason in each case for dismissing these seven men, and each of these two officers refused to give reasons or particulars for the dismissal of any one of these seven men other or further than was given to these men personally, namely, "General unsatisfactory service." They said that they refused on the ground that it is in the interest of the Company and of the night travelling public that the Employer shall have the right to dispense with the service of a sleeping car porter at any time it is of opinion that it is desirable to do so, and without being required to give any reason for doing so. This they said is because the employment of these men is of a domestic nature and involves close personal relations between them and the sleeping car travellers; that for this reason there is a special clause in the contract of hiring which each porter is required to sign on entering the service and which each one of these seven porters did sign which clause is as follows:

"In consideration of the Canadian Pacific Railway Company, hereinafter called "the Company" taking me into its services as sleeping car porter, I hereby agree to work as such for the Company on any of its different runs so long as my services may be required, it being

understood that my engagement may be terminated by the Company without notice, and without assigning any reason therefor, at any time except during the course of any particular run, and moreover, that it is subject to the terms hereinafter stated."

The two officers also swore that this clause is not contained in the contract signed by any other class of employees, and also that it was in exercise of this right that the Company dismissed these seven men and refuses to assign any reason therefor.

The two members of your Board who sign find themselves unable to make any recommendation in these circumstances. We say that no reason for the dismissal of any one of these seven porters has been disclosed to or discovered by us but we are not prepared to recommend that the railway Company should at all times refrain from acting upon the terms of this contract in this particular class of employment.

The members of the Board who sign recommend the Schedule of Rules and Wages annexed to and forming part of this Report as being fair and reasonable and which in the opinion of those members of the Board should be accepted by the Employer and Employees.

All of which your Board has the honour to report.

Dated this 11th day of February, 1920.

(Sgd.) COLIN G. SNIDER,  
Chairman.

(Sgd.) U. E. GILLEN.

# CANADIAN PACIFIC RAILWAY. SLEEPING CAR PORTERS.

## RULES AND RATES OF PAY.

Effective 16th December, 1919, following will be revised rates of pay for sleeping car porters and rules governing working conditions:

(1) Class.	Rate per month.		
	1st yr.	2nd yr.	and after.
Sleeping and Tourist	\$75.00	\$80.00	\$85.00
Observation Com- partment Buffet Sleeping Car porters .....			92.50

For convenience in executing regulations contained in following paragraphs relative to promotion, reduction, seniority, grievance, discipline or transfer of employees, sleeping car department will be sub-divided into districts, or territories:

(2) District.	Headquarters.
Atlantic, Algoma and Eastern...	Montreal.
Ontario .....	Toronto.
Manitoba and Saskatchewan.....	Winnipeg.
(including employees operating during summer months on trains Nos. 13 and 14).	
Alberta .....	Calgary.
British Columbia .....	Vancouver.

Porters located on above districts, in addition to porters whose services originate at either one of the above places, will have their headquarters at the place where they are located, or where their line or run originates. Porters operating in service over more than one district, irrespective of where their headquarters are located, will be under the jurisdiction of the Superintendent on whose territory they happen to be.

(3) Seniority List. A seniority list for each district will be prepared and posted on the 1st day of January each year in a conspicuous place at terminal points, and any porters whose standing is incorrectly shown will have opportunity of protesting in writing within thirty days, after which no action will be taken. For all seniority purposes, porters operating in service over more than one district will be considered as employees of the district from which run originates, i.e.:

Transcontinental employees—Montreal-Vancouver, trains Nos. 1 and 2, 7 and 8 will be included in seniority list at Montreal.

Transcontinental employees—Toronto-Vancouver, trains Nos. 3 and 4, 9 and 10 will be included in seniority list at Toronto.

(4) Seniority. Employees on leave of absence or who are temporarily off their run will be relieved by employees desiring same, when possible, and will not lose their right to any run which may be bulletined while they are off duty.

(5) During temporary reduction of train service, an employee may, without losing any seniority rights, accept a subordinate position in his own district rather than go to another district in same capacity. Employees, when on Company's request are withdrawn for use in other Departments or when loaned to other companies, will retain their right of seniority when returning to district in which formerly employed.

A porter shall not be loaned to another Company without his consent.

(6) In the event of reduction of train service junior men will be reduced before any general reduction is made; men having others dependent upon them for support will be given preference

of employment, seniority and efficiency governing. Men laid off on account of reduction, if competent and available, will, when staff is increased, be given preference over new men.

(7) Vacant Runs. When permanent runs are vacant or new runs created, or at general change in time from winter to summer schedule, or from summer to winter schedule, particulars will be bulletined for 20 days and runs will be given to senior qualified men applying in writing, subject to merit, fitness and ability.

(8) Loss of Seniority. A man who has been out of the service more than a year, if re-engaged, comes back to all intents and purposes a new employee, and seniority will date only from date of re-engagement.

(9) Transfer of Employees. In the event of employees being transferred at Company's request from one promotion district to another, due to withdrawal of service or inauguration of new lines, seniority of employees so transferred will not be affected, and employees so transferred will rank according to seniority with employees in the district to which transfer is made.

(10) Employees transferred from one promotion district to another at their own request, or from another railroad, will rank as junior men, unless an agreement is made for an exchange with a man having the same seniority on the district to which transfer is desired.

(11) Discipline. This will be administered under merit and demerit system.

(12) Investigations. Investigations will in every instance be made of infractions of the general rules to see that they are strictly lived up to by employees and in order that no injustice will be done to employees in assessing records.

(13) Grievances. Any porter has the right to a hearing if he considers he is unjustly dealt with. He shall present the same in writing within five days of the disciplinary notice. Action will be taken by the Superintendent or other proper officer on the receipt of the written request without unnecessary delay. A decision will be given within five days after the completion of the hearing. If any appeal is taken it must be filed within ten days after notice of the decision is given and a copy furnished to the official whose decision is appealed from. At the hearing the porter shall have the right of assistance from one or more employees as duly accredited representatives. If the final decision is in favour of the porter if he was dismissed or suspended he shall be returned to his former position and paid for all time lost. The provisions of this section are not intended to interfere with or as an expression of any opinion upon the rights of the parties under any individual contract which may have been entered into by a porter with the Company.

(14) White Coats. During the summer season, April 30th to September 30th, porters may wear white coats throughout the day and while

receiving or discharging passengers at way stations. Uniform coats must be worn when receiving or discharging passengers at important terminal stations.

(15) Layover Compensation. At change of time, inauguration of new lines or discontinuing of runs in existence, a bulletin will be posted in each district showing minimum layover or rest period to which employees are entitled or for loss of which compensation will be paid.

#### REGULAR LINE SERVICE.

(16) Home Station. (a) When an assigned layover is reduced due to being called for duty prior to expiration, L.O.C. will be allowed on following basis:

Reduction in L.O.C. Allowance Layover:

1 to 24 hours .....	1 day.
24 to 48 hours .....	2 days.

(b) When standby or guard duty performed during assigned layover, one day to be allowed for any portion of day consumed.

NOTE.—Interpretation of call for duty prior to expiration of layover.

(17) Regular line porters who are required to report on any day other than that on which due out will be considered as having been called for duty, except that employees due out on morning trains may be required to report day previous, but in such instances no L.O.C. will be allowed.

(18) Porters failing to report on date due out shall, unless a very reasonable excuse is furnished, incur a penalty by demerit marks, and await return of run with loss of pay for period his line is filed by another porter, unless his services can otherwise be utilized during the interval.

(19) Terminal Away From Home Station. When porters are required to double out before expiration of regular layover of their regular run, or if assigned to local service or standby or guard duty and not allowed regular layover given to porters whose home station is at this terminal, one day L.O.C. to be allowed.

(20) Explanation. No L.O.C. will be paid to porters for late arrival of train at terminal away from home, but if after arrival his regular layover is cut down, one day L.O.C. will be paid to him for any portion of a day that his layover is shortened. In addition, he will be allowed a full day L.O.C. for doing standby or guard duty during his assigned layover.

#### EXTRA SERVICE

(21) Home Station. Porters on return from extra service are entitled to same layover as that allowed in regular line service, and L.O.C. to be paid on same basis.

#### TERMINAL AWAY FROM HOME STATION.

(22) (b) Porters away from home station on extra service are entitled to same layover as that allowed in a corresponding regular line, and L. O. C. to be paid on same basis.

(c) Porters when held for extra service in excess of assigned layover at either home station or at terminal away from home station are entitled to be paid for the period held.

(d) When one porter operates two occupied cars, as occasionally happens on military trains, porter while entitled to double pay for actual days service is only entitled to layover and L. O. C. for one car.

(23) Deadheading. (a) Porters in charge of deadhead cars or deadheading on pass will be furnished with food free of charge, either by free meal order in Dining Car or by supplies issued on requisition to D. C. Storeroom; value of supplies furnished not to exceed \$1.50 per day.

(b) When deadheading without car porter to be provided with sleeping accommodation in tourist car.

(c) Employees deadheading, if given opportunity for rest in berth en route, are subject to serve immediately. If deadheaded on pass and not furnished with berth accommodation entitled to reasonable time for rest on arrival destination, or payment of L. O. C. to be computed on basis paragraph I.

(24) There shall be no discrimination shown toward or against any porter for being a member of a Brotherhood or Union nor for service on committees representing porters.

(25) Porters on trains to which dining cars are attached shall be given their meals at half rate in dining cars, said meals to be selected by the porters from the passengers' menu for the day and a service of full passenger portents, subject to a minimum charge of twenty-five cents.

(26) When a porter is requested to surrender his equipment wages due him shall be paid within forty-eight hours. If not the Company shall pay in full for all time caused by delay, forty-eight hours grace inclusive, at the regular rates of pay. A porter resigning shall give fifteen days' notice of his intention to resign and his payment shall be governed by the previous clause of his section.

(27) In the event of porters desiring to maintain a paid officer the porter accepting such position will not lose his seniority standing or promotion rights while so engaged.

(28) All white coats for porters shall be supplied at the Company's expense.

(29) Members of porters' committees shall be relieved when required for committee duties, and shall be furnished with the necessary transportation on application, but notice must be given to the Superintendent so that the Company's interest will not suffer. Not more than fifteen days' notice shall be required.

(30) Where a porter is called to the office

during his layover on business not affecting him he shall be paid *pro rata* for the time he is detained.

(31) All men shall automatically become sleeping car porters on assuming such duties, and shall be governed according to the schedule.

(32) Extra men performing relief duties on line runs shall be entitled to all layover assigned to such runs.

(33) This schedule shall become effective on and from the 16th day of December, 1919, and shall continue in force for one year until the 16th day of December, 1920, subject, however, to any change or changes therein that may be made at the conference which Mr. W. A. Cooper has promised to have with a Committee of the company's sleeping car porters before the 1st of May, 1920.

(Sgd.) COLIN G. SNIDER,  
Chairman.  
(Sgd.) U. E. GILLEN.

### Minority Report

In the matter of the Industrial Disputes Investigation Act, 1907, and of a dispute between the Canadian Pacific Railway Co., Employer, and its Sleeping Car Porters, being members of the Order of Sleeping Car Porters, employees.

To the Hon. G. D. Robertson,  
Minister of Labour,  
Ottawa, Ont.

Sir,—

I cannot agree with the whole of the report and recommendations signed by His Honour Judge C. Snider and Mr. U. E. Gillen, members of a Board of Conciliation appointed by you to enquire into the differences between the Canadian Pacific Railway Company and its sleeping car porters, and present a minority report, and recommendations.

The report of the majority members of the Board deals with the dismissal of seven employees first, and the schedule of wages and rules follows. The concluding paragraph in the report on the dismissals states:

"Your Board finds itself unable to make any recommendation in these circumstances. We say that no reason for the dismissal of any one of these seven porters has been disclosed to or discover-

ed by us, but we are not prepared to recommend that the railway company should at all times refrain from acting upon the terms of this contract in this particular class of employment."

The majority members also quote a paragraph from a personal contract signed by each of the dismissed porters, as a reason, inferentially, why no recommendation is made.

From the evidence given, and the documents referred to the Board by the Department of Labour, it is quite clear that there are two factions among the porters. One represented by the parties to this application, namely, the Order of Sleeping Car Porters, and another alleged to be represented by a Welfare Committee. The representatives of the Order of Sleeping Car Porters, a trade union, declare that the welfare committee has no business to discuss wages and conditions with the management, as that should be done by representatives of the organized men. The officials of the company, however, recognize the welfare committee, and claim these employees are authorized to represent many porters, and the officials have conferred with these representatives on such business. The officials have not conferred with the representatives of the Order of Sleeping Car Porters, on wages and conditions. The seven men summarily dismissed were at the time "active members" of this Order or Union. Several of them were members of a grievance committee elected to take up a schedule of wages and conditions which had been presented to the management of the company several months previous to their discharge. Their services ranged from 5 to 12 years with the Company.

The company management had established penalties for infraction of rules or regulations by a merit or demerit system; and in a bulletin signed by the manager of this department of the service outlined under the caption "Grievances," stated that employees having grievances should first discuss them with the welfare committee. This the discharged men refused to do, claiming the right to their own organization and representatives.

The Order of Sleeping Car Porters not meeting with success in an attempt to negotiate a schedule, and these men being dismissed, applied for a Board of Conciliation which was granted. The representatives of the company apparently base their case on the dismissal of these men on the terms of a contract under which the porters were hired. And inferentially it is this which prevents the majority members making a recommendation on the matter. What becomes of the right of the seven men under the Industrial Disputes Act in such a case? The majority report only quotes a paragraph of the contract. The full text is as follows :

# CONTRACT.

## CANADIAN PACIFIC RAILWAY COMPANY.

"1. In consideration of the Canadian Pacific Railway Company, hereinafter called the Company, taking me into its services as ..... , I hereby agree to work as such for the Company on any of its different runs, so long as my services may be required, it being understood that my engagement may be terminated by the Company without notice and without assigning any cause therefor, at any time except during the course of any particular run, and moreover, that it is subject to the terms hereinafter stated.

2. For such services I am to receive only the ruling rate of wages on each run for the time I am on that run, whatever that rate may be, according to the schedule of wages then in force for the different runs.

3. In order to be so engaged, I represent myself to be a first-class ..... in every respect, having been previously employed by .....

4. Should this representation in the opinion of the Company prove at any time to be incorrect, or should I at any time violate the Company's rules or instructions laid down for my guidance, the Company may at once, and whether in the course of the particular run or not and without any notice to me, suspend me from its said service or wholly terminate my engagement without being liable to me for any demand whatsoever.

5. One-third the cost of the uniform and full cost of white jackets supplied me when I enter the service may at the option of the Company be deducted from any wages or moneys due or owing to me by the Company, the said uniform and jackets to remain the property of the Company, the price charged

me being for the use of same while in the service. It is understood that this amount covers only a portion of the full number of jackets which I will require, but the Company will furnish at exchange points the balance up to full complement required. Should I for any reason leave or be dismissed from the Company's service I shall immediately deliver up to the Company in good condition the said uniform and also white jackets up to the number originally furnished me.

6. I agree to be responsible to the Company for the full cost of any uniform winter overcoat supplied me, which cost may at the option of the Company, be deducted from any wages or monies at any time due or owing to me, should I fail to return same in good condition (subject, however, to ordinary wear and tear), to the Company on demand.

7. I am to be responsible for all supplies and movable equipment in any of the said Company's cars while under my charge, and in case of any damage to any such supplies or movable equipment other than that resulting from ordinary wear and tear, or of any loss of the same, the cost of repairing or replacing same may, at the option of the Company, be deducted from any wages or monies due me by the Company, and in case such wages are not sufficient to pay for the same, I shall forthwith pay the deficiency to the Company.

8. I undertake to surrender and deliver to the said Company on demand, every ticket book, whether complete or incomplete, and every punch, key, and form, as well as all other equipment which may be at any time or times furnished me by the Company, and if I omit to do so, no matter what the reason may be, I undertake to pay to the Company, by way of liquidated damages, the respective sums below mentioned in respect of such of the said properties, goods, chattels or effects as I may omit to so surrender and deliver as aforesaid, and the Company may at any time or times withhold from any wages or monies due or owing to me the said respective sums, and if the wages or monies so due to me be not sufficient to satisfy the whole of such sums which I undertake to pay as aforesaid, I shall be liable, and I undertake forthwith to pay the deficiency to the Company, that is to say:

Each Ticket Book, complete or incomplete ..	\$30 00
Each Uniform Overcoat, Winter	30 00
Each Uniform Complete (exclusive of the Winter Overcoat mentioned herein)....	20 00
Each Ticket Punch .....	2 50
Book of Rules and Instructions	5 00
Other miscellaneous Equipment	10 00

9. It is to be entirely optional with the Company whether I am entitled to transportation from or to any point should I resign, be

dismissed or suspended, at any points whether on the line of the Company's Sleeping Cars or otherwise."

Signed at .....  
 .....19.  
 In presence of .....

If the contract referred to prevented the majority from making a recommendation regarding the dismissals, although they admit "that no reason for the dismissal of any one of these seven porters has been disclosed to or discovered by us," it did not prevent them from ignoring the contract in the general rules recommended in the schedule. In Section 24 the members recommend "There shall be no discrimination shown toward or against any porter for being a member of a Brotherhood or Union nor for service on committee representing porters." The discharged porters who gave evidence, claim that the only reason they can assign for their discharge, is their activity in the union. The majority members admit they failed to discover a reason, but the contract is there, hence no recommendation. What can prevent discrimination under such a contract when the majority of a Board are prevented by it from saying whether the dismissals were justified or not? The majority members also make recommendations about supplying white coats at Company's expense, and this also is at variance with the contract. Would it not be fair to assume that the individual contracts which do exist in this service on the C. P. R. are for the purpose of protecting the service against inefficiency, the violation of rules or misbehaviour, and that the contract was not intended or designed to be used in interfering with the porters' rights to organize?

Section 26 of the Industrial Disputes Act states: "The Board's recommendation shall deal with each item of the dispute and shall state in plain terms and avoiding as far as possible all technicalities, what in the Board's opinion ought or ought not to be done by the respective parties concerned." If the production of an individual contract can prevent a ma-

jority of a Board from making a recommendation on such an important matter, then a personal contract of wider scope made by an employee when being hired, might curtail for him even greater rights under the statute. It is significant also that at one stage of the proceedings the manager said he would reinstate these men temporarily, which suggests that the differences were not insurmountable.

In the absence of evidence to show the slightest reason for the discharge of these men, as indicated by the majority report, with which I agree in this respect; I recommend the reinstatement of those amongst the dismissed porters desirous of returning to the service, with seniority rights unimpaired until Manager W. A. Cooper, or proper official, receives the grievance committee of the Order of Sleeping Car Porters, and investigates the causes for the dismissals. If the porters have been unjustly dealt with they should be paid for all time lost, in addition to reinstatement. If there are good reasons for dismissal, none of which have been disclosed, the officials should so inform the committee. It is usual practice in the railway service to allow an employee to appeal all the way from the lowest to the highest officials, if he considers himself unjustly dealt with.

Regarding the wages and rules recommended in the majority report: The present rates of wages are \$75 and \$85 per month, according to the class of service, as indicated in Circular 231. The majority members have recommended the monthly rates of pay adopted by the Canadian National Railways, and which rates became effective January 1st, 1919, for this class of service. The rates recommended became effective over thirteen months ago on the C.N.R. The majority members perhaps intended to give the porters on the C.P.R. as much as the rates adopted by the C.N.R. as of January 1st, 1919. They did not do so however. It is well known that remuneration of employees in all kinds of services is not completely represented by the wage rate per month. There are many other factors to be con-

sidered. In this case the majority members did not recognize the importance of the evidence given by the men's representatives. The representatives stated that the porters on the Canadian Pacific Railway paid for their meals on the train while travelling at half the rates charged to passengers. And the majority have recommended the continuation of this in their schedule. The men also stated positively that the porters on the Canadian National Railways pay a much smaller sum for meals while travelling on the train. The representatives declared that on eastern lines of the Canadian National Railways, the porters get their meals at one quarter the cost to the porters on the C. P. R. According to the evidence the porters are travelling about sixteen days per month. Comparing the cost of meals from the evidence submitted, at a most conservative estimate, it costs the porters on the C.P.R. at least \$16 per month more for their meals than the porters on the C. N. R. eastern lines. Therefore, the majority recommendations on wages do not by any means give the C. P. R. porters what the C. N. R. porters obtained over thirteen months ago. In Section 13 of the majority report, dealing with the appeal of an employee if he considers himself unjustly dealt with, and which is a familiar proceeding in the railway service, the following sentence is added to the section: "The provisions of this section are not intended to interfere with or as an expression of opinion upon the rights of the parties under any individual contract which may have been entered into by the porter with the company." First of all the majority members state in their report that no reason was disclosed or discovered by them for the dismissal of the seven porters. Then after quoting a part of the contract, each porter made with the company when being hired, they state "Your Board finds itself unable to make recommendation in these circumstances."

The men were summarily dismissed, and could not get any specific charges against any one of them. They believe it was union activity. The Minister act-

ing under the Industrial Disputes Act appointed a board to enquire into the matter. Because of an individual contract, the majority members cannot make a recommendation as to whether the dismissals were just or unjust, although the Act provides that a recommendation shall be made on each item, and this was the most important item after the schedule of wages and conditions. Later, in the schedule covering rules, after providing the usual and ordinary railway practice, for an appeal by a man, if unjustly dealt with, they take it away by adding the sentence quoted, knowing full well that each man is required to sign the contract when hiring. If the representatives of a public utility corporation, coming within the provisions of the legislation, presented a personal contract with each employee, and it covered wages, and all other items included in the Act, would the majority then be powerless to do anything under the legislation? If this is so, then the sooner the Act is amended to conserve the rights of employees in public utilities under the legislation, despite any contract required when hiring, then the better. However, I think the judgment of the majority in placing the sentence in the schedule is wrong.

I recommend the following alterations to the schedule of rules and rates of pay, recommended by the majority, and with these changes recommend the schedule for acceptance by both parties as reasonable.

That the porters' wages as set out in circular No. 231, signed by Manager Cooper, be increased by \$25.00 per month for each porter.

That the sentence in Section 13, beginning with the words "The provisions of this section," and ending with "by a porter with the company," be eliminated completely.

I recommend the elimination of Sec. 16, 17, 19 and 20, in the majority report, and the substitution of the following: A, B, C, and D.

A.—Porters running on regular trains shall be paid detention on the following basis:

B.—When trains arrive at terminal station

over three hours late and less than five hours, one half day, five hours and over up to and including twelve hours, one day's pay; over twelve hours to be paid *pro rata* on the minute basis.

C.—Porters called upon to double out, thus foregoing part or all of their lay-over, shall be paid overtime on the basis of one and one-half day's wage for each lay-over day so worked.

D.—Porters required to stay by their cars after arrival at terminals shall be paid on the basis as above.

I recommend that Section 33 of the majority report be changed to the following:—

This schedule shall become effective on and from the 16th day of December, 1919, and continue in force until May 1st, 1920, and thereafter unless thirty days' notice is given by either party desirous of terminating it, to the other party in writing.

Respectfully submitted,

(Sgd.) FRED. BANCROFT.

#### Supplementary Report of Board

In the matter of the Industrial Disputes Investigation Act, 1907, and of a dispute between the Canadian Pacific Railway Company, and its Sleeping Car Porters.

To the Honourable,  
Senator G. D. Robertson,  
Minister of Labour, Ottawa, Ont.

Sir,—

The Board of Conciliation having been called to meet again, at Hamilton, on the 28th day of February, 1920, pursuant to your directions to that effect, given to the Chairman of your Board, by the Acting Deputy Minister of Labour, in a letter of the 23rd day of February, 1920, met at the time and place appointed. All the members attended.

Your Board has the honour to report as follows:

The communication from the Acting Deputy Minister calls attention to the provisions of Section 26 of the Act, and intimates that the Majority Report of the Board does not state in plain terms what in their opinion ought or ought not to be done by the Canadian Pacific Railway Company in regard to the dismissal of seven of its porters whose dismissal and demand for reinstatement was one of the items of the dispute referred to your Board herein.

Your Board having taken this item of the dispute into consideration again and having failed to arrive at a unanimous conclusion, Colin G. Snider and U. E. Gillen, a majority of the Board, adopt as part of this report without repeating it all that was said on this item in the Majority Report herein, bearing date the 11th day of February, 1920, which they, the said Colin G. Snider and U. E. Gillen, had the honour to make to you.

The evidence before the Board was that these seven porters referred to were dismissed for general unsatisfactory service, and that their dismissal was not due to the fact that they were members of the Order of Sleeping Car Porters.

Further that these seven men were among others a total of thirty six sleeping car employees, including conductors as well as porters, that were dismissed during the two months ending October 24th, 1919.

In our opinion the Canadian Pacific Railway acted within its rights under the Contracts of hiring in dismissing the seven porters, and we recommend that such action be approved.

All of which we have the honour to report.

Dated at Hamilton, this 28th day of February, 1920.

(Sgd.) COLIN G. SNIDER,  
Chairman.

(Sgd.) U. E. GILLEN.

### Supplementary Minority Report

In the matter of the Industrial Disputes Investigation Act, 1907, and of a dispute between the Canadian Pacific Railway Company, employer, and its sleeping car porters, being members of the Order of Sleeping Car Porters, employees.

To Hon. Senator G. D. Robertson,  
Minister of Labour, Ottawa.

Dear Sir,—

The Board of Conciliation and Investigation to enquire into the dispute between the C.P.R. and its sleeping car porters, met again at your direction to further consider the item concerning the dismissal of seven porters. Previously, the majority members filed a report on this matter without recommendation, and I filed a report with a recommendation.

In their second report the majority members state:

“The evidence before the Board was that these seven porters referred to were dismissed for general unsatisfactory service, and that their dismissal was not due to the fact that they were members of the Order of Sleeping Car Porters.”

No further evidence was taken since the first report of the majority members was filed as neither of the parties appeared at the subsequent session. The two members of the Board declare that the men were not dismissed for being members of the Order or Union to which they belong. How do they know that? In their first report they state:

“Each dismissed porter who has given evidence under oath has sworn that he has no knowledge of the reason for his dismissal or for the dismissal of any others of the seven whose cases we are considering; that he has applied to the proper officers of the company for information as to the cause of his dismissal, and has never been able to get any answer other than ‘general unsatisfactory service,’ that he is not conscious of misconduct or neglect of duty

on his part that might give cause for his dismissal.”

And the two members of the Board might have added, the porters stated, they believe they were fired for union activity. The majority members also state, referring to the representatives of the Company before the Board:

“The two officers also swore that this clause is not contained in the contract signed by any other class of employees, and also that it was in exercise of this right that the company dismissed these seven men, and refused to assign any reason therefor.”

And, later, the two members state:

“No reason for the dismissal of any one of these porters has been disclosed to or discovered by us.”

The foregoing was in their first report; there has been no additional evidence advanced, and yet in the second report they declare that the evidence shows the men were not dismissed because they were members of the Order of Sleeping Car Porters.

In their second report the two members state that the seven men were among 36 others dismissed during the two months ending Oct. 24th, 1919. The document relating to this was not filed with the Board, was not read by them, and it was distinctly stated that mention of it was not for the purpose of creating an impression against these porters. It is unfair to mention this in the report as it had no foundation as evidence.

Then the majority in their second report state that the C.P.R. acted within its rights in dismissing these porters under the contract they made when hiring, and recommend such action be approved. According to their statements, they did not discover a reason for the dismissal of the men, and because they think the contract is binding they approve of the dismissals. In my opinion the recommendation is illogical, and according to the evidence unfair to the men who asked for an investigation.

All of which is respectfully submitted.

(Signed) FRED BANCROFT.

## Report of Board in Dispute between the Canadian Express Company and its clerks, messengers, porters, etc.

A REPORT was received from the Board established to deal with the dispute between the Canadian Express Company and certain of its employees, being messengers, clerks, porters, etc., members of the Canadian Brotherhood of Railroad Employees. The Board was composed as follows: the Honourable Mr. Justice T. Fortin, Moncton, N.B., appointed by the Minister in the absence of a joint recommendation from the other two members, Messrs. F. H. McGuigan and Fred Bancroft, Toronto, nominees of the company and employees respectively. The report of the Board was unanimous and was accompanied by an agreement signed by both parties to the dispute.

### Report of Board.

In the matter of the Industrial Disputes Investigation Act, 1907, and of a dispute between the Canadian Express Company, employer, and certain of its employees.

To the Hon. G. D. Robertson,  
Minister of Labour, Ottawa, Ont.

Sir,—

The Board of Conciliation and Investigation appointed by you to inquire into the difference between the Canadian Express Company and its employees, held its first session in Montreal, January 21st, 1920. The Board met at various times from this date until February 7th, when final adjustment was reached. The employees in their application for a Board, presented a schedule of wages and conditions containing fifty clauses and covering every department of the service.

The Board heard at length a great mass of evidence on both sides on the questions in dispute. From the commencement of, and throughout the sittings, the Board unanimously and insistently pressed the parties to spare no effort to reach an agreement. Many private conferences

were held by the parties to the dispute from time to time. When they failed to agree and reached a deadlock, the services of the Board was called in to hear and suggest adjustments. As a result of the continued and earnest efforts of both parties, assisted by the Board, an agreement was reached on all the items in dispute and duly signed by the representatives of both parties.

The members of the Board desire to place on record the fairness of both parties during the negotiations. It was due to the spirit of harmony and fairness which prevailed, that an agreement was ultimately reached.

We have the honour to transmit to you attached to this report, the agreement which is signed by the representatives of both parties, all of which is respectfully submitted.

(Sgd.) THOMAS FORTIN,  
Chairman.

(Sgd.) FRED BANCROFT,  
Member.

(Sgd.) F. H. MCGUIGAN,  
Member.

February 7th, 1920.

### SCHEDULE OF RULES AND RATES OF PAY GOVERNING CERTAIN CLASSES OF EMPLOYEES OF THE CANADIAN EXPRESS COMPANY.

#### ARTICLE 1.

The word "employee" appearing in this schedule applies to males and females employed exclusively by the Canadian Express Company, as follows:—

At local Agencies at designated points.

In the office of the Claims Agent.

In the office of the Asst. Auditor of Receipts.

In the office of the Asst. Auditor of Transportation.

In the office of the Asst. Auditor of Way-bills.

In the train service.

It does not apply to Agents, Depot Agents, Chief Clerks in the offices of Claims Agent and Assistant Auditors, nor any person whose duties include the employment of others.

## ARTICLE 2.

The Book of Rules and Instructions issued from time to time by the Canadian Express Company will govern all employees.

## ARTICLE 3.

Guarantee Bonds in such amount as will fully protect the Company's interests shall be furnished by employees covered by this schedule, the Company to pay the bond premiums.

## ARTICLE 4.

No employee shall be disciplined or dismissed without cause. Employees charged with any offence justifying dismissal may be immediately suspended by proper authority for a period of five days, during which time the alleged offence shall be investigated. If desired, the employee may have the assistance of two fellow employees at the investigation and full notice will be given of the evidence and charge against the employee. The decision made as a result of the investigation shall be given to the employee within ten days, and if the employee should be dissatisfied with such decision, he may, within ten days, appeal to higher officers of the Company. If, as a result of investigation, the employee is found blameless, he will be returned to the service and paid for time lost.

## ARTICLE 5.

Employees will not be discriminated against on account of membership in a labour organization, nor for serving on committees representing the employees. Upon written request, a reasonable time in advance, the chairman or secretary of a committee will be relieved for committee work and furnished with transportation, subject to the regulations of the Railways over which this Company operates.

## ARTICLE 6.

The Chairman, Secretary or other members of the committee representing the employees must be employed by the Company, or on leave of absence, in order to take up with the proper officers any questions which may arise as to the interpretation of this schedule or other dispute, and they may, if necessary, appeal to the higher officers of the Company.

## ARTICLE 7.

Employees attending court or investigations by order of the Company will be paid their regular daily rates, granted transportation and allowed reasonable expenses while away from home, for which receipted vouchers will be required.

## ARTICLE 8.

Employees' seniority will date from the time of entering the service, except in case of dismissal or resignation; if laid off through reduction in force, credit will be allowed for time of previous service if re-employed within six months.

## ARTICLE 9.

A.—Right of promotion will extend over and be confined to each Superintendent's division. Promotion shall be based on ability, merit and seniority; ability and merit being sufficient seniority shall govern.

B.—Qualified employees will be considered in line for promotion to Agents' positions. Vacancies will be bulletined for ten days, over the Superintendent's division.

## ARTICLE 10.

New positions or vacancies will be promptly bulletined for a period of five days in the office where they occur. Employees desiring such positions will file their applications with the designated official within that time, and an appointment will be made within ten days thereafter. Such position or vacancy may be filled temporarily pending an assignment. The name of the appointee will immediately thereafter be posted where the position or vacancy was bulletined.

## ARTICLE 11.

When vacancies for messengers or messengers' helpers occur, or new runs are created, bulletin notice will immediately be posted at terminals, and written application for the position must be filed within ten days from the date of bulletin notice.

An employee transferring from one class to another, (train service to office and vice versa), will carry seniority on the basis of 50 per cent, and in addition will have credit for full time of any previous service in the class to which transferring.

## ARTICLE 12.

When change in Railway Time Cards makes a material change in messenger runs, messengers and messengers' helpers so affected will have ten days after effective date of Time Card change to make application for change of run.

## ARTICLE 13.

An employee transferred by order of the proper official shall receive free transportation for himself, family and household effects (subject to the regulations of the Railway Company), and paid during the time necessary to effect transfer at the same rate as for the position vacated.

Employees transferring under seniority rights shall make such move at their own expense.

#### ARTICLE 14.

Employees accepting promotion will be allowed thirty days in which to qualify, and failing, will be returned to former position without loss of seniority.

#### ARTICLE 15.

Employees declining promotion shall not lose their seniority.

#### ARTICLE 16.

Employees off duty on leave, or on account of sickness for a reasonable length of time, will not lose their seniority rights; the Company will decide as to their standing after six months' absence.

#### ARTICLE 17.

In reducing forces seniority shall govern. When forces are increased, employees who have been in the service thirty days will be returned to the service, in order of their seniority. Employees desiring to avail themselves of this rule must file their names and addresses with the proper official. Employees failing to report for duty or give satisfactory reason for not doing so within seven days from date of notification will be considered out of the service.

#### ARTICLE 18.

A seniority roster of all employees (on each Superintendent's division) who have been in the service six months or more, showing name and date of entering the service, will be posted in a place accessible to those affected. The roster will be revised and posted in January of each year, and shall be open to correction for a period of sixty days from the date of posting, on presentation by an employee or his representative of proof of error. The duly accredited representative of employee shall be furnished with a copy of the roster on written request.

#### ARTICLE 19.

Employees covered by this schedule shall be paid not less than the established salary for the position occupied. Minimum rates, and all rates in excess thereof, as herein established or higher rates shall be preserved.

#### ARTICLE 20.

A.—For the purpose of establishing rates of pay for employees specified in this schedule, to the present rates of pay (including scale

rates) add the percentages shown below, subject to the provisions of Paragraph B of this Article.

Present Salaries.	Per cent Increase.
Up to \$50.00	20 per cent.
Over 50.00 to \$55.00	19 per cent.
Over 55.00 to 60.00	18 per cent.
Over 60.00 to 65.00	17 per cent.
Over 65.00 to 70.00	16 per cent.
Over 70.00 to 75.00	15 per cent.
Over 75.00 to 80.00	14 per cent.
Over 80.00 to 85.00	13 per cent.
Over 85.00 to 90.00	12 per cent.
Over 90.00 to 95.00	11 per cent.
Over 95.00 to 115.00	10 per cent.
Over 115.00 to 125.00	9 per cent.
Over 125.00 to 140.00	8 per cent.
Over 140.00 to 150.00	7 per cent.
Over 150.00	6 per cent.

B.—If in applying the increases as shown in Clause A of this Article, the result ends in twenty-five cents or less, eliminate the odd cents; if the result ends in twenty-six to seventy-five cents, treat as fifty cents; if the result ends in over seventy-five cents, treat as the next even dollar.

#### ARTICLE 21.

Rates of pay established by this schedule shall apply to employees paid on the hourly basis. Their pay shall not be less per hour than that established by this schedule for monthly, weekly or daily rated employees performing the same class or kind of labour; nor shall their conditions of service be less favourable.

#### ARTICLE 22.

Should an increase of business necessitate additional force at any office, the employee appointed will receive the same rate as paid for similar service at office of like character and importance.

#### ARTICLE 23.

Employees entering the service who lack the necessary experience or ability to perform the work of their assignment, shall receive \$60.00 per month for the first six months, \$70.00 per month for the second six months of service, and thereafter the rate of the position to which assigned. Similar experience with other Express or Transportation Companies shall be cumulative and count the same as if performed for the Canadian Express Company. Nothing in this paragraph shall be construed to mean that former employees may not be re-employed and paid the established rate of the position to which assigned. This Article does not apply to the Audit Offices, Claim Agent's Office or positions for which graded scales of pay are provided.

ARTICLE 24.

A. Except as hereinafter provided and excluding employees assigned to the train messenger service, eight consecutive hours, exclusive of the meal period, shall constitute a day's work.

B. For employees assigned to the smaller class of agencies where not in excess of five employees are regularly employed (including clerks, transfer employees and drivers) overtime shall be paid for time actually on duty in excess of eight hours within twelve consecutive hours, also for all time in excess of twelve consecutive hours computed continuously from the time required to report for duty to the end of day's work. Time shall be computed as continuous service in all cases where the interval of release from service does not exceed one hour.

ARTICLE 25.

A. Excluding employees assigned to the train messenger service and in the offices of Assistant Auditors and Claims Agent, the first two hours of overtime accruing after eight hours of service within the spread of twelve hours shall be computed *pro rata*, and thereafter (including overtime after twelve hours) at the rate of time and one half on the actual minute basis.

For the offices of the Assistant Auditors and Claims Agent, the time allowed for Saturday afternoon will be deducted before allowing overtime.

B. When sent for to work outside of established hours, employees coming under the provisions of Article 24 shall be paid a minimum allowance of three hours at hourly rates.

Employees required to come on duty after completing day's work and the interval of release from duty exceeds one hour, will be allowed a minimum of 1½ hours at *pro rata* rates.

ARTICLE 26.

Employees (except messengers and helpers) will not be expected to work more than six days per week. If requested to work on a seventh day or night, they shall be paid one and a half times the regular hourly rates—minimum three hours at regular hourly rates.

ARTICLE 27.

Employees assigned to a combination of train messenger and station service will be paid overtime under the provisions of Article 24, section B of this schedule.

ARTICLE 28.

Messengers or messengers' helpers held to fill a position at other than messengers' work

between trips, will be paid at *pro rata* rates at the highest rate of position to which called, minimum of one hour. If called to come on duty for such service, they will be paid the same rate with a minimum of three hours.

ARTICLE 29.

A. Employees assigned to the train service and who perform only such terminal work as is in connection with their run will be paid the schedule rate for such run for 6,000 miles or less; mileage made in excess of 6,000 miles to be paid for at the following rate per mile:—

Messengers. . . . . 1¼c.  
Messengers' helpers . . . . 1c.

B. Employees assigned to the train messenger service and who work only a portion of a month will be paid their full proportion of excess mileage made under Clause A of this Article.

ARTICLE 30.

Messengers and helpers on turn around runs (except runs where the period of relief is two full days or more in each seven day period) shall be paid overtime at the rate of 20c. per hour for all time in excess of an average of twelve hours per day, for each day worked, time to be computed continuously from the schedule departure time of train from home terminal on first trip until schedule arrival time of train at end of final trip.

Example: A turn around run is a run where one or more round trips is made per day.

ARTICLE 31.

Messengers and messengers' helpers will be paid initial terminal time beginning sixty minutes after the time they are required to report, and do report for duty, until scheduled leaving time of train in which car is handled, and final terminal delay time beginning thirty minutes after the time train in which car is handled arrives at terminal or setout point, excepting at Montreal and Toronto where terminal delay time shall not commence until after one hour. Terminal time to be computed on the actual minute basis at 50c. per hour for messengers and 40c. per hour for messengers' helpers.

ARTICLE 32.

In the event of a train not arriving at objective terminal on schedule time, messengers and messengers' helpers will be allowed detention after one hour at the rate of 25c. per hour, time to be computed on the actual minute basis.

ARTICLE 33.

Employees will not be required to suspend

work during regular hours to absorb overtime.

#### ARTICLE 34.

Employees on monthly salary working less than a full month will be paid *pro rata* for the time worked on the basis of the working days in that month, less Sundays.

#### ARTICLE 35.

A. Employees who have been in continuous service for one or more years will be granted two weeks' leave of absence each year, without pay, by making written application to their local agents. Application for leave by messengers will be made to their Superintendent. An extended leave for any employee, if requested, will be granted if practicable.

B. If called upon to work either on Christmas or New Year's, employees will be paid one-half day's pay in addition to the monthly rate.

C. It is understood that where at the present time it is customary to allow employees Saturday afternoons off, that this practice will be continued.

#### ARTICLE 36.

A. Messengers or messengers' helpers will, upon application to their Superintendent, be supplied with a water can.

B. Where the Company requires special stamps (rubber) they shall be supplied free of cost.

#### ARTICLE 37.

A. When a messenger is required to work more than one car containing express matter, he will be supplied with a helper when reasonably necessary.

B. Messengers or messengers' helpers will not be required to ride in cars without heat or light.

#### ARTICLE 38.

Any employee performing relief work (other than relief messenger paid a salary which includes travelling expenses), will be paid the minimum rate for the position, but in no case less than his own rate, and if away from home, allowed reasonable expenses.

Messengers and messengers' helpers dead-heading on Company's orders will be paid for necessary time travelling at the rate of pay of his regular position.

#### ARTICLE 39.

Any employee leaving the service for any cause shall be paid promptly all monies due, and upon request given, by the Superintendent, certificate of service showing capacity in which employed and reasons for leaving the service.

#### ARTICLE 40.

Agency employees will be paid semi-monthly on the 1st and 16th, train employees not later than the 10th and 25th of each month.

#### ARTICLE 41.

Nothing in this schedule shall be construed as reducing the rate of pay of any employee while filling their present position.

#### ARTICLE 42.

This schedule to become effective as to rates from February 1st, 1920, and as to rules, from March 1st, 1920, and shall continue in effect for three months from February 1st, 1920, and thereafter unless terminated by thirty days' notice in writing by either party.

For the Canadian Express Company:

(Sgd.) JOHN PULLEN,  
President.

For the Employees:

(Sgd.) M. J. DUNDAS,  
Gen. Chairman.

Montreal, Que., February 6th, 1920.

### Report of Board in Dispute between the Niagara, St. Catharines and Toronto Railway Company, and its motormen, conductors, etc.

A REPORT was received from the Board established to deal with the dispute between the Niagara, St. Catharines and Toronto Railway Company and certain of its employees, being motormen and conductors, barn and shop men, powerhouse men, etc., members of

Division No. 846, Amalgamated Association of Street and Electric Railway Employees of America. The Board was composed as follows: His Honour Judge Colin G. Snider, Hamilton, appointed by the Minister in the absence of a joint recommendation from the other

two members, Messrs. George D. Kelley, Ottawa, and J. A. McAninch, Merritton, Ontario, nominees of the company and employees respectively. The report was unanimous and contained recommendations as to settlement of the dispute. Advice was received later in the Department that certain clerical errors had occurred in this report and at the close of the month negotiations were in progress looking to the correction of the points at variance. Following the report is a note of the corrections as agreed upon by the Chairman and Mr. Kelley. However, early in the following month word was received that a settlement of the dispute had been reached as a result of negotiations between the parties concerned.

#### Report of Board

In the matter of the Industrial Disputes Investigation Act, 1907, and of a dispute between the Niagara, St. Catharines and Toronto Railway Company, Employer, and certain of its employees, being motormen and conductors, barn and shopmen, power-house men, etc., Members of Division 846, Amalgamated Association of Street and Electric Railway Employees of America, employees.

To the Honourable  
Senator G. D. Robertson,  
Minister of Labour, Ottawa.

Sir,—

The Board of Conciliation and Investigation established by you in this matter has the honour to report as follows:

The Board commenced its investigation in this matter at St. Catharines on the 2nd day of February, 1920, by appointment. All the members of the Board were present. Messrs. Ernest W. Oliver, Arthur J. Hills and Norman S. Cumming attended as representatives of the employer, and Messrs. Edward Sparrow, John H. Dunn and John Milton Fraser, attended as representatives of the employees.

The Board continued in session on the

2nd, 3rd and 4th days of February. Agreement was secured on most of the less important articles of the draft agreement presented by the employees, but the repeated suggestions of the Board for an agreement on the more important articles such as rate of wages, hours to constitute a day's work, pay for overtime, etc., entirely failed. The parties declared it useless on each such item when under consideration to enter into a conference with a view to compromise.

Your Board, therefore, heard all the evidence, statements and arguments offered and considered the documents put in, with the result that

Your Board recommends:

The schedule of wages and rules attached to and forming part of this report, the same being drafted in the form of an agreement, for acceptance by the parties to this dispute as being in our opinion fair and reasonable.

The articles in the draft agreement submitted by the employees which are not included in this schedule of this report, are omitted on the ground that they are of a character that should be in the control of the management of the employer.

All of which your Board has the honour to submit.

(Sgd.) COLIN G. SNIDER,  
Chairman.

(Sgd.) GEO. D. KELLEY,  
For N. St. C. & T. Ry.  
(Sgd.) JOHN McANINCH.

St. Catharines,  
February 4, 1920.

This Agreement made this       day of       , 1920, between the Niagara, St. Catharines and Toronto Railway Company, hereinafter called the party of the first part, and certain of its employees, being members of Division 846 of the Amalgamated Association of Street and Electric Railway Employees of America, and its other employees, hereinafter called the parties of the second part.

Witnesseth that the parties hereto mutually agree to and with each other as follows:

1. The party of the first part agrees to meet and treat and discuss with the properly accredited

ited officers and committees of the parties of the second part all grievances that may arise between the said Company and Employees.

2. The Company has no objections to its Freight and Passenger Trainmen, Barn or Shopmen, Power House Operators, Sectionmen, Trowermen, Bridgetenders, Line Repairmen and Maintenance of Waymen being members of Division 846, Amalgamated Association of Street and Electric Railway Employees of America.

#### PASSENGER SERVICE, HOURS, WAGES AND OVERTIME.

3. Nine hours shall constitute a day's work for all passenger trainmen, to be completed within eleven consecutive hours.

3A. All overtime shall be paid for at the rate of 15 cents per hour for the first hour or part thereof over nine hours and at the rate of time and one-half for all time served over ten hours.

4. No regular motormen or conductors after finishing their run shall be required to do extra work if there are competent extra men available, and the Company will endeavour at all times to provide sufficient extra men so that the regular men will not be required to do extra work, except when it shall be absolutely necessary.

5. The rate of wages to be paid all passenger trainmen shall be as follows:

36c. per hour for the first six months.

39c. per hour for the second six months.

41c. per hour for the second year.

45c. per hour for the third year and thereafter.

After ten years of continuous service a bonus of two cents per hour will be allowed.

6. Trainmen shall have the privilege of choosing the line on which they wish to work every January, June and September, according to seniority of continuous service, having regard to qualifications, with the Company. Passenger men to work week about as at present.

7. Men on sick leave when ready to go to work shall be permitted to report for duty either in person or by telephone on or before two o'clock of the day previous to their starting.

8. Regular trainmen who are called for extra work and are not assigned shall not be held longer than one hour and shall receive two hours' pay at their regular rate.

9. Conductors or motormen shall receive twenty-five (25c.) cents per day or any part of a day for training a student in addition to their regular pay.

10. In cases where trainmen are required to report for work away from their regular reporting place, they shall be paid for such time as it takes to go and come from their regular reporting place at their regular rate. This also applies to trainmen who are required to report at their regular reporting place and are afterwards

compelled to go to another point to get their cars.

11. Passenger trainmen shall act as either motormen or conductors in emergency when ordered to do so by the proper authority of the said Company if the trainman is competent to take the run required.

12. The time of passenger trainmen will commence fifteen minutes before the time of car due to leave terminal station, and fifteen minutes will be allowed passenger train crews to take their cars back to the barn on completion of the run, if the car is taken back to barn. This free time will be allowed but must not be used in computing overtime.

13. All conductors will, on application, be furnished with sufficient change and tickets before starting on runs.

14A. Every trainman in the service of the party of the first part shall wear a uniform suit of material and style to be selected by the Company; such uniform not to cost over (\$40.00) Forty Dollars.

14B. The party of the first part agrees to pay one half the cost of a uniform for each trainman who has been in its employ for a period of not less than one year, and to provide one uniform per year if required for each trainman thereafter paying one half cost thereof. A cap shall be supplied by the Company at its expense.

14C. That the buttons on each uniform shall remain the property of the party of the first part and shall be returned by the employee concerned upon request by the party of the first part.

15. Spare work will be performed by spare men, first in first out, if competent for the service required. Where spare men fail to make twenty days per month, the spare list will be reduced by dropping junior men.

16. Regular trainmen shall not be required to report for duty before 7.30 o'clock a.m. for extra work in cases where they have worked until midnight the previous day.

17. The vestibules of all cars operated by the Company shall be properly heated on or before October 1st, 1920.

18. The accredited representatives of the employees wishing to be off duty on business shall make application to the proper officer for specified leave of absence which shall be granted as soon as relief can be provided.

19. Notice of shortage in conductors' reports shall be furnished to such conductors who by such report are found to be short in their returns to the Company, in each instance as soon as such daily report is checked and shortage noted.

20. On the erection of a new terminal at St. Catharines and Niagara Falls suitable lockers and toilets will be furnished for the employees there and proper toilet facilities will be maintained for employees at Port Colborne, Welland, Thorold, Niagara-on-the-Lake and Merritt.

**FREIGHT TRAINMEN.**

21. The hours of trainmen employed in freight service shall be a minimum of ten hours per day, six days per week, to be completed in the least number of hours possible.

21A. On week days wages of freight conductors and freight engineers during the first, second and third years of their service shall be 47 cents per hour; after the third year shall be 48 cents per hour; after ten years of continuous service a bonus of two cents per hour will be allowed.

22. Brakemen and polemen's wages shall be for first six months 41 cents per hour and after the first year 43 cents per hour.

23. All freight trainmen will receive extra pay at the rate of 15 cents per hour for the first hour or part of an hour after 10 hours' service, and time and one half for all time after 11 hours' service.

24. The crews of all freight motors without cars shall be operated by at least two freight trainmen.

24A. The crews of all freight trains consisting of one or more cars in addition to the motor shall consist of not less than three men, and a fourth man shall be supplied in other cases where the freight is heavy enough to require it.

25. In the event of any shortage of work making it necessary to lay off freight trainmen, seniority rules.

26. Spare work will be performed by spare men, first in first out, if competent for the service required. Where spare men fail to make twenty days per month, the spare list will be reduced by dropping junior men.

27. Freight trainmen shall have the privilege of choosing their runs and rights of work every January, June and September according to their seniority of continuous service with the Company, having regard to their ability to perform the service required.

28. When an extra or regular day or night run is open for a week or more, seniority shall rule in filling such position.

29. Freight train conductors and engineers shall receive 25 cents per day or any part of a day for training a student in addition to their regular pay.

30. The Company will pay for meals of all trainmen who are kept out over ten hours on snow plow work.

**BARN AND SHOP MEN.**

31. The hours of barn and shop men shall be the same as heretofore existing.

32. Time and one-half shall be paid for all overtime, including all time worked on Sundays and legal holidays when they shall be paid double time.

33. As to clauses 40, 48, 45, 46, 55, 58, 59 of agreement as proposed by employees.—

Difficulty is experienced here owing to our being asked not to deal with a

general class or large body of men, but instead either with single individuals or very small groups thereof. In a number of cases the employee possesses special qualifications and would appear to be entitled to special rates of pay. To fix such rate justly can only be done by direct negotiation between the employer and employee, both of whom are well acquainted with the skill and ability possessed and the calls therein.

The Board has not before it information that would enable it to fix rates of pay for these employees and it recommends as it has already done at the hearing herein that the employer and employees settle the same by direct negotiations.

As to Clauses 45 and 46 we recommend that the minimum wage remain at the present rate, leaving it with the Company to deal with any employees' discovery\* of special consideration.

34. That no barn or shop men unless properly qualified to operate cars shall be allowed to change a car on the road when a passenger crew is available.

35. All classes of barnmen and shopmen shall be allowed one (1) hour for dinner regardless of the time they commence dinner and shall be allowed ten (10) minutes, with pay, for the purpose of washing up before closing time.

**BAGGAGEMEN AND WATCHMEN, AND TICKET AGENTS.**

36. Baggage men, watchmen and ticket agents shall receive One Hundred (\$100) Dollars per month. The hours of baggage men, watchmen and ticket agents shall remain as at present.

**SUB-STATION OPERATORS.**

38. We recommend an increase of (\$5.00) Five Dollars per month to the Sub-Station operators.

**LINEMEN AND GROUNDERS.**

39. The hours of linemen and groundmen shall remain as heretofore.

40. The following shall be the wage scale:

Linemen .....	45c. to 50c.	per hour.
Groundmen .....	37c. to 42½c.	per hour.

Time and one-half shall be paid for all overtime.

\*See Note on page 258.

41. When linemen are required to handle freight cars they shall use the line car whenever available.

42. The Company shall supply rubber boots and gloves for line cars to be used only in the service of the Company.

#### TOWERMEN.

43. The hours of towermen shall be as at present.

44. The wages to be paid towermen shall be:

First class .....	\$80 per month.*
Second class .....	90 per month.*

#### SECTION FOREMEN AND MEN.

45. The hours of section men and foremen shall remain as at present.

46. The wages to be paid shall be as follows:

Section foremen .....	\$100 to \$110*
Sectionmen .....	35 to 40*

Time and one-half shall be paid for all overtime.

#### GENERAL CONDITIONS.

47. Double time shall be allowed all employees for all time worked on Labour Day and Christmas Day.

48. We recommend that Section Foremen in the employ of the Company two years or over shall receive one week's holidays, with pay, at the regular rate each year, such holidays to be allowed between the 15th day of June and the 15th day of September.

49. The Employees agree to assist the Company in enforcing the rules covering the operation of the road.

50. Any employee who may be suspended or dismissed from the service shall be entitled to a hearing within three (3) days, and if upon investigation the charge is not sustained, shall be reinstated and paid all time lost through suspension or dismissal at his regular rate of pay. The said employee shall be notified 24 hours in advance of his hearing and also of the charge laid against him, and he shall have the right to produce witnesses, and to have assistance if he so desires.

51. The hours of all other employees not specified in the above sections shall remain as at present.

52. This Agreement shall be binding on both parties hereto on and after the thirty-first day of August, 1919, and until the first day of February, 1921, after which date such agreement may be opened in part by either

party giving thirty days' notice in writing of any desired change they wish to make.

*In witness whereof* the parties hereto have hereunto affixed their corporate seals and the hands of their duly authorized officers.

Signed, sealed and delivered in the presence of:

(Sgd.) COLIN G. SNIDER,  
Chairman.

(Sgd.) GEO. D. KELLEY.

(Sgd.) JOHN McANINCH.

#### NOTE.

The following changes in the preceding agreement have been agreed upon by the Chairman and Mr. Kelley to correct clerical errors and omissions:

To Clause 14B should be added the following:

"If a trainman leaves the employ of the Company within three months after he has received his uniform, he shall be entitled to retain the said uniform upon paying to the company an amount equal to one-half of the total cost of such uniform. If he leaves the employ of the Company after the expiration of three months from the date of his receipt of such uniform, he shall be entitled to retain the uniform without making any payment therefor to the company."

To Clause 24 should be added the following:

"When available. If not available, passenger trainmen may be used."

Clause 32 should be struck out.

Clauses 36 and 37 should be omitted.

Clause 44 should read as follows:

"The wages to be paid towermen shall be:

First Class...\$90 per month.

Second Class...\$80 "

Clause 46 should read as follows:

"The wages to be paid shall be as follows:

Section foremen.\$100 to \$110 per month.

Sectionmen.....35c. to 40c. per hour.

Clause 47 should be omitted.

\*See Note on this page.

## PROCEEDINGS OF THE CANADIAN RAILWAY BOARD OF ADJUSTMENT No. 1.

**T**HE Department has received seven new decisions of the Canadian Railway Board of Adjustment No. 1, including three Supplements. Supplement No. 1 to Case No. 11 has reference to the date of the application of the decision in this case, which affected telegraphers of the Canadian National Railways. Supplement No. 1 to Case No. 34 relates to a controversy as to the interpretation of the decision in this case as applied to the method of boarding maintenance of way employees of the Canadian Pacific Railway. Supplement No. 2 to Case No. 34 has reference to a similar controversy regarding the board of maintenance of way employees on the Western lines of the Canadian National Railways. Case No. 63 has reference to the dismissal of a brakeman on the Grand Trunk Pacific Railway. Case No. 64 has reference to a claim of two conductors of the Canadian National Railways for the difference between the actual mileage made and minimum monthly guarantees. Case No. 65 has to do with the dismissal of a conductor on the Grand Trunk Railway. Case No. 66 relates to negotiations for a schedule between the Brotherhood of Railway Clerks, Freight Handlers and Station Employees, and the Canadian Pacific Railway Company.

### Supplement No. 1 to Case No. 11.—The Canadian National Railways (Western lines) and the Order of Railway Telegraphers

On November 12, 1918, a decision of the Board of Adjustment was rendered in Case No. 11\* relating to a dispute between the Canadian Northern Railway (now the Canadian National Railways) and the Order of Railway Telegraphers with reference to payment for time lost when being transferred from one office to another on the western lines. The decision of the Board was in the form of an interpretation of Ar-

ticle 7 of the telegraphers' schedule. It was contended by the employees that this decision should govern the disposition of every claim upon which it would have bearing that developed subsequent to the effective date of the schedule which was December 1, 1917. The contention of the Railways was that in view of the fact that Decision No. 11 placed an interpretation on Article No. 7 of the Telegraphers' schedule which was not intended or considered when the schedule was adopted, the railways should not be required to carry out the intent of the interpretation prior to the issuance of the Board's decision on November 15, 1918.

The decision of the Board was as follows:

The papers on file when this case (No. 11) was originally heard clearly indicate that an interpretation of Article No. 7 of the Telegraphers' schedule, effective December 1st, 1917, was jointly requested, and not the adjudication of any specific case thereunder.

As the decision of the Board constituted an interpretation of Article 7, it should apply from the effective date of the schedule above referred to; the contention of the employees is therefore sustained.

### Supplement No. 1 to Case No. 34.—The Canadian Pacific Railway (Western lines) and the United Brotherhood of Maintenance of Way Employees and Railway Shop Labourers

A controversy arose between the Canadian Pacific Railway and the United Brotherhood of Maintenance of Way Employees and Railway Shop Labourers with reference to the interpretation of the decision in Case No. 34,\* which had reference to the rate of board charged to maintenance of way employees by the Canadian Pacific Railway and the Canadian National Railways on their western lines. It was claimed by the Company that the decision of the Board was quite clear that

\*See LABOUR GAZETTE, December, 1918, p. 1096.

\*See LABOUR GAZETTE, September, 1919, p. 1044.

in the absence of any agreement, if the company elects to permit the men to board themselves they must do so at their own expense, the company providing the necessary boarding cars; if the company declines to permit the men to board themselves the company must board them at a rate not exceeding \$6.50 per week; if the men do not wish to board themselves, but elect to board with the contractor or to be otherwise furnished with board by the Company, they must pay the regular authorized rate, which was \$7.50 per week. The employees claimed that owing to there being no agreement between the Company and the employees regarding the price to be paid for board, the Company could not charge more than \$6.50 per week, and that if they boarded themselves they should be given the privilege of doing so under conditions similar to those in force on Eastern lines under Maintenance of Way Agreement No. 3, section 9, clause D.

The decision of the Board was as follows:

The Board decides that if the Company insists on boarding the men themselves or by contractors they cannot charge more than \$6.50 per week per man for such board.

If the Company offers the men the privilege of boarding themselves, and they do not exercise such privilege, and it thus becomes necessary for the Company to board the men, the employees shall be required to pay the current rate for board named by the Company, which it was intimated was \$7.50 per week at the present time, and it was not indicated that any increase in this figure was contemplated.

The Board cannot consistently order the application of the terms of clause "D," Section 9, of C.R.W.B. Wage Agreement No. 3 to territories where the practices mentioned have not previously prevailed, in view of the distinct provision of the clause that the conditions apply only where they have previously prevailed.

**Supplement No. 2 to Case No. 34.—The Canadian National Railways (Western lines) and the United Brotherhood of Maintenance of Way Employees and Railway Shop Labourers**

This case, which concerned the Western Lines of the Canadian National Railways and Maintenance of Way employees, was similar to the preceding

one, and a similar decision was rendered by the Board.

**Case No. 63.—The Grand Trunk Pacific Railway Company and the Brotherhood of Railroad Trainmen**

A brakeman on the Grand Trunk Pacific Railway was dismissed by the Company after he had written what the Company charged was a threatening letter, in which he said he would bring suit against the Company with reference to certain claims which had been disallowed. On behalf of the dismissed brakeman, the committee of the Brotherhood of Railroad Trainmen which had charge of his case contended for his reinstatement with payment for all time lost. They alleged that he had been dismissed without any specific charge being made against him, and that he was not paid in full for services performed, and was not paid until forty-one days from the date he was held out of service, although according to Article 30 of the schedule he should have been paid immediately on dismissal.

It was held by the Board that the brakeman, by his own indiscretions in sending improper and indefinite telegrams and letters was responsible for much of the trouble that had occurred, but that at the same time both parties were inconsistent with schedule provisions in handling the case.

The decision of the Board was as follows:

The decision of the Board is that J. H. M.—shall be paid under schedule provisions for the time which he lost from November 10, 1916 (date of his original discharge) to December 22, 1916, the date when he received discharge ticket specified above.

J. H. M.—is also to be reinstated with his original seniority standing, but he shall indicate within thirty days from the receipt of this decision if he desires to return to the service of the Grand Trunk Pacific Railway, and if he elects to return he must actually make arrangements to return within that time.

**Case No. 64.—Canadian National Railways (Western lines) and the Order of Railway Conductors and the Brotherhood of Railroad Trainmen**

Two conductors of the Canadian National Railways made claims for pay-

ment of the difference between the mileage actually made by them and the minimum monthly guarantee during such time as they were regularly set up as conductors. The claim was based on Clause "E" of Article 3 of the Conductor's and Trainmen's schedules, which reads as follows:

"Conductors (Trainmen) employed on through and way freight trains regularly set up, will be paid a minimum of three thousand (3,000) miles and twenty-eight hundred (2,800) miles respectively a month. Detention, switching and overtime may be used to make up these guarantees. Conductors (Trainmen) working only part of a month will be allowed not less than one hundred (100) miles for each day regularly set up.

"This rule does not mean that three thousand (3,000) and twenty-eight hundred (2,800) miles a month is the maximum mileage that Conductors (Trainmen) will be permitted to make."

The first conductor was regularly set up for the first six days of August, 1918, during which time he made 521 miles. His claim was for 79 miles making it up to 600 miles as allowed by the above clause. For the rest of the month he was employed as spare conductor without a guarantee. The second conductor was regularly set up for the first eight days of the same month, during which period he made 476 miles. His claim was for 324 miles to bring it up to 800. For the rest of the month he was also a spare conductor.

It was contended by the Railways that the earnings of these men for their combined service exceeded the monthly guarantee of 3,000 miles as set forth in Clause "E" of Article 3, and that therefore no additional mileage should accrue. Further it was conceded that if the conductors had not made the equivalent of the minimum monthly guarantee, they would have been entitled to the mileage claimed.

The employees in reply contended that the fact that the two men made a sufficient mileage as spare conductors to bring the total mileage for the month

above 3,000 had no bearing on the case, as the guarantee applies only to regular runs. The trainmen desired to become a party to this controversy as the principle involved had equal bearing on their contract, although they had no grievance at the time.

The decision of the Board was as follows:

The Board is of the opinion that the language of Article No. 3 quoted above is open to only one interpretation, and sustains the contention of the employees.

**Case No. 65.—The Grand Trunk Railway System and the Brotherhood of Railroad Trainmen**

A conductor on the Grand Trunk Railway was dismissed on the ground that he had failed to protect his train when it was stalled on a grade between two stations. The conductor had gone ahead with the front part of the train leaving instructions with the rear brakeman to see that the end of the train did not run back, and to keep a good eye out for danger. He, however, did not instruct the brakeman to go out and flag as required by Rule 99. A superintendent of the company found the brakeman in the caboose with the train unprotected. He waited until the conductor had returned and obtained statements from both employees. He reported that the conductor had argued that it was not necessary for a flagman to go out as no train would come up the grade behind him which could not stop in a short distance. The brakeman stated that he had not gone back to flag as he should have done, and that the conductor had told him it was not necessary. Over a fortnight later the brakeman wrote to the superintendent claiming that the conductor had put down two torpedoes for protection and that when the train stopped he himself started back with the flag, but returned to put on the hand brakes, and stayed to wash some dishes, intending to continue flagging afterwards. On request of the men an investigation into the case was held in accordance with Rule 31 of the Trainmen's schedule. The Company offered to re-

instate the conductor but refused to pay him for the time he was held out of service. For this reason the offer of reinstatement was refused.

The Board found itself unable to reconcile the discrepancies between certain statements made at various times in connection with this case, and did not credit the statement that the brakeman had started back to flag and returned to the train to set the brakes. The claim of the employees was therefore denied.

**Case No. 66.—The Canadian Pacific Railway Company (Western lines) and the Brotherhood of Railway Clerks, Freight-handlers and Station Employees.**

The Brotherhood of Railway Clerks, Freight Handlers and Station Employees requested an interview with the Canadian Pacific Railway Company to discuss a memorandum of agreement with regard to a new schedule. The Company granted the interview, but declined to include in the agreement railway clerks and station employees, on the ground that the Company already had an agreement with another recognised organization covering certain employees mentioned in this schedule. The Company was, however, agreeable to discuss and arrange a schedule covering the freight handlers at the larger points on the Western Lines who were under separate agreements, but who had since become affiliated with the above Brotherhood of Railway Clerks, Freight Handlers and Station Employees. The representatives of the employees who appeared before the Board claimed that they had authority from the majority of the employees concerned to represent them in schedule negotiations. The Company made a contrary claim.

The decision of the Board was as follows:

The Board decides that the right of employees to organize is unquestioned.

Therefore, on proper showing by the employees connected with the organization of its

right to represent the classes and employees spoken for, arrangements should at once be completed between the Company and the committee representing the employees to negotiate a schedule.

The positions which the employees' committee claim the right to represent should be included, with the following exceptions:

1st. Existing positions, or new positions that may be created similar to positions that are now specified in other wage schedules, or positions which another organization has claimed and established the right to represent;

2nd. Foremen and other employees acting in a supervisory capacity with authority to administer discipline, also the Chief Clerks, Accountants, Chief and Head Timekeepers, and Personal Secretaries of Superintendents, Master Mechanics, or other officials of equal or superior rank; and also the following which the employees stated they had agreed for the present at least to eliminate:

All employees in the General Offices situate at Winnipeg, Calgary and Vancouver;

Baggage masters at Winnipeg, Calgary and Vancouver;

NOTE: The above decision is based on the assumption that a majority of the employees or staff in any department shall maintain the right to determine if the employees of that department shall be included in the schedule.

NOTE: If after the receipt of this decision a difference of opinion still exists between the parties as to the desire of the majority of the employees concerned to be represented by the Employees' Committee referred to, arrangements shall be made to secure an expression of their desire on the question.

If this becomes necessary, the Board recommends that the parties should jointly prepare a ballot, on which the employees shall vote "Yes" or "No" to the question, as to whether they desire to be represented as stated; these ballots shall be addressed to each of the employees concerned individually, with a note printed upon the ballot requesting them, upon receipt, to vote "Yes" or "No" to the stated question, and thereupon shall mail their ballot to Mr. R. Chapple, Secretary, Canadian Railway Board of Adjustment No. 1, Room 701 Eastern Townships Bank Bldg., Montreal, Que., not later than a specified date. The ballots should, in addition to the signature of the party voting, also show his position and place at which employed. The parties should also jointly forward to the Board a complete list giving the names, position and place of all those to whom ballots have been forwarded. Thereupon this Board will decide as to the right of the Committee to represent the employees affected and advise the parties the result.

## COST OF LIVING ADJUSTMENT OF WAGES OF VANCOUVER ISLAND COAL MINERS

**T**HE Cost of Living Commission, appointed on January 21, 1919, to determine every three months the increase in the cost of living for coal miners on Vancouver Island, and to report the amount by which wages should therefore be increased or decreased, forwarded its report for the quarter ending December 31, 1919,\* to the Department on January 26, 1920. The Commission consisted of Mr. John McAllister, representing the miners, Mr. Tully Boyce, representing the operators and Mr. D. T. Bulger, Fair Wages Officer of the Department of Labour, as chairman.

As in previous investigations, forms were sent out to the merchants and dealers with whom the majority of miners are accustomed to trade in the towns of Nanaimo, Cumberland, Ladysmith, Courtney, South Wellington, Union Bay, Bevan and Cassidy's. The forms contained the same list of groceries, provisions, meats, etc., that was used on previous occasions. The method of computation and adjustment for the quarter under review was the same as used on all previous adjustments, namely, to determine the percentage of increase or decrease, as the case may be, of prices on December 31 over September 30, for groceries, provisions, meats, etc., and to add a further two-fifths of this increase or decrease as an equivalent to cover similar increases or decreases in clothing. An increase of 4.46 per cent. was ascertained, which amounted to an increase in wages of  $13\frac{1}{2}$  cents per day where the base rate was \$3.00 per day, 14 cents per day where the base rate was \$3.15, the increase in wages to become

effective from February 1, 1920, and to apply to all underground service, clerical and office employees.

Sharp increases in prices were found in sugar, syrup, preserves, standard flour and butter, while slight decreases were found in all meats, except fresh beef, with sharp decreases in lard, ham and bacon. The majority of other commodities in the list showed slight increases or remained stationary.

A request was received from the Cumberland Grievance Committee, that the list should be increased to include additional commodities, including clothing, and that the miners should be allowed increases in wages according to the increases in prices of such additional commodities since February, 1914. The commissioners decided that the system adopted of giving a flat increase in wages according to the percentage increase in the prices of the commodities in the list adopted, allowing two-fifths for clothing, etc., was more satisfactory and equitable than would be the case if changed as proposed. The Commission also considered that it was not under their jurisdiction to have regard to increases in prices prior to September 30, 1918. A further request was received from the Cumberland Grievance Committee, that the mining area should be divided into three separate districts, that the increases and decreases in the cost of living should be ascertained for each district separately, and that the wages in each district should be adjusted accordingly. The commissioners decided that this proposal should be considered by the miners and operators, who were parties to the agreement to adjust the wages according to the changes in cost of living.

\*For previous orders see LABOUR GAZETTE, January, 1920, p. 37; and various preceding issues.

## STRIKES AND LOCKOUTS IN CANADA DURING FEBRUARY, 1920

**T**EN strikes, involving about 1,107 employees, were reported as having commenced during February. There were in existence at some time or other during the month 24 strikes, involving about 3,145 workpeople. The total time loss on account of industrial disputes was estimated at 49,939 working days, as compared with 57,944 in January, and 23,418 in February, 1919. The time loss occasioned by the 10 strikes which began in February was 12,490 working days, while a loss of 37,449 is charged to the 14 strikes that commenced prior to February. Ter-

mination was reported in the case of 5 disputes which commenced prior to February. All of the disputes commencing during February terminated during the month, leaving the following 9 strikes, affecting approximately 1,238 workpeople on record on February 29; loggers, Port Alberni, B.C.; miners at Kimberley, B.C., and South Minto, N.B.; pottery workers, St. Johns, Que.; machinists, St. John; moulders, Brantford; moulders and coremakers, Sherbrooke; moulders and patternmakers, Toronto, and shipbuilders at Sorel.

### Disputes by Industries

The following is a review of the disputes by industries in the order in which they appear in the statistical table. A brief summary is given of the more important strikes.

**LUMBERING.**—The only strikes in this group during the month occurred in British Columbia. These were: a strike of 70 loggers at Port Alberni, which commenced on January 20, for union recognition; a strike of 100 loggers at Carriden Bay, because of a foreman's refusal to reinstate two discharged employees; a strike of 38 sawyers at Marpole for increased wages. The Port Alberni strike was terminated at the end of the month, and the other two terminated on February 17, and February 23, respectively.

**MINES, SMELTERS, QUARRIES, CLAY PRODUCTS, ETC.**—The latest strike in this group was that of the coal miners at Saunders, Alta. It commenced on January 31, for a 14 per cent increase and terminated on February 7, on a basis of the District 18 wage schedule. The situation in this industry for the month was 319 employees involved and an approximate time loss of 5,712 working days.

**RAILWAY, CANAL AND HARBOUR**

**CONSTRUCTION.**—Alleging discrimination against certain employees and in support of their demands for increased wages and shorter hours, 177 construction employees at Courtney Bay, N.B., went on strike on February 6. As a result of the mediation of the Department of Labour this strike was settled by compromise on February 6.

**METALS, MACHINERY AND CONVEYANCES.**—A strike of structural iron workers in Montreal commenced on February 2, and terminated on February 23. The strikers, numbering 175, demanded a flat increase of 10 cents per hour, and the employers wished to abolish the 8-hour day and substitute a 9-hour day. The employees compromised on a 7½ cents per hour increase, with the retaining of the 8-hour day. Four strikes (recorded in the tabulation) of long duration were un-terminated at the end of the month. During the month there were in existence 7 strikes involving 1,376 employees and an approximate time loss of 28,374 working days.

**WOODWORKING.**—An increase in the length of the working day caused a strike of 70 employees at Meaford. The firm offered time and a quarter for

overtime: the men demanded time and one-half. A compromise was effected whereby time and one-quarter was paid for five week days and time and one-half for Saturdays. The strike terminated on February 27 after seven day's duration.

**PRINTING AND PUBLISHING.**—Two strikes were recorded for this group during the month. Twenty-one pressmen and typesetters in a Hamilton shop demanded increased wages, shorter hours, and a closed shop. This strike commenced on January 27, and terminated on February 10, a partial increase being granted with a recognition

of the closed shop. Fifty bookbinders went on strike at Edmonton on February 11 for increased wages and shop control. Their demands were partially granted and work was resumed on February 16.

**CLOTHING.**—The strikes of millinery workers at Marieville and Montreal terminated on January 27. The Montreal millinery workers claim that they partially gained their demands for increased wages, but those in Marieville resumed work under conditions existing prior to the strike. A Commission of Enquiry, as was noted in the February issue of the *LABOUR GAZETTE* on page 131, is investigating the case of

### STRIKES AND LOCKOUTS DURING FEBRUARY, 1920

Industry or occupation	Particulars	No. of employees affected	Time loss in working days
<b>Strikes Commencing Prior to February, 1920.</b>			
<b>LUMBERING.</b> —			
Lumber workers, Hylo, Alta.....	Commenced December 1. Against a reduction in wages. Information received by the Department states this strike had terminated about the close of the year.	100	.....
Loggers, Port Alberni, B.C.....	Commenced January 20. For recognition of union. Unterminated.	70	1,680
<b>MINES, SMELTERS, QUARRIES, CLAY PRODUCTS, Etc.</b> —			
Coal miners, Saunders, Alta.....	Commenced January 31. For increased wages. Settled by negotiations, work resumed February 7.	52	312
Miners, Kimberley, B.C.....	Commenced September 12. For increased wages. Unterminated..	75	1,800
Miners, South Minto, N.B.....	Commenced December 6. For increased wages and improved working conditions. Unterminated.	150	3,600
Pottery workers St. Johns, Que.....	Commenced November, 1913. Against a reduction in wages. Unterminated.	42	.....
<b>METALS, MACHINERY AND CONVEYANCES.</b> —			
Machinists, St. John, N.B.....	Commenced January 26. For increased wages and shorter hours. Unterminated.	120	2,880
Moulders, Brentford, Ont.....	Locked out May 1. Demand for increased wages. Unterminated..	5	120
Moulders and coremakers, Sherbrooke, Que..	Commenced September 23. For increased wages. Unterminated ...	36	864
Moulders and patternmakers, Toronto, Ont.	Commenced May 1. For increased wages and shorter hours. Unterminated.	90	2,160
Shipbuilders, Sorel, Que.....	Commenced August 12. For increased wages and shorter hours. Unterminated.	650	15,600
<b>PRINTING AND PUBLISHING.</b> —			
Pressmen and typesetters, Hamilton, Ont....	Commenced January 27. For increased wages and shorter hours. Settled by negotiations; partial increase granted. Work resumed February 10.	21	147

## STRIKES AND LOCKOUTS DURING FEBRUARY, 1920—Continued.

Industry or occupation	Particulars	No. of employees affected	Time loss in working days
<b>CLOTHING—</b>			
Garment workers, Montreal, Que.....	Commenced October 20. For recognition of Union. Information received by the Department states that strikers have secured work elsewhere.	20	.....
Millinery workers, Marieville, Que.....	Commenced October 25. For increased wages and shorter hours.. Work resumed January 17.	56	.....
Millinery workers, Montreal, Que.....	Commenced November 27. For increased wages. Settled by negotiations and work resumed January 27.	200	.....
Rubber workers, Toronto, Ont.....	Commenced January 21. For increased wages and abolition of "team work." Settled by negotiations; men returned to work under same conditions as prevailed prior to the strike. Work resumed Feb. 18.	450	6,300
<b>LEATHER—</b>			
Leather cutters, Quebec, Que.....	Commenced January 28. Against employment of particular persons. Settled by mediation; demands not granted. Work resumed February 22.	27	485
<b>MUNICIPAL EMPLOYMENT—</b>			
Civic employees, Montreal, Que.....	Commenced January 1. For increased wages and shorter hours. Settled by mediation. Work resumed February 7.	250	1,500
<b>MISCELLANEOUS—</b>			
Glass workers, Thorold, Ont.....	Commenced June 18. For increased wages and shorter hours. Information received by the Department states that conditions had ceased to be affected.	80	.....
<b>Strikes Commencing During February, 1920.</b>			
<b>LUMBERING—</b>			
Loggers, Carriiden Bay and Drury Inlet, B.C..	Commenced February 10. Refusal of foreman to reinstate two discharged employees. Settled by negotiations; work resumed February 17.	100	700
Sawyers, packers, common labourers, Marpole, B.C.	Commenced February 14. For increased wages. Settled by negotiations; demands granted. Work resumed February 23.	38	266
<b>RAILWAY, CANAL AND HARBOUR CONSTRUCTION—</b>			
Construction employees, Courtenay Bay, N.B.	Commenced February 6. For increased wages, shorter hours and alleged discrimination against employees. Settled by mediation; work resumed February 28.	177	3,275
<b>METALS, MACHINERY AND CONVEYANCES—</b>			
Structural iron workers, Montreal, Que....	Commenced February 2. For increased wages. Settled by negotiations; partial increase granted. Work resumed February 21.	175	1,350
Wagon and carriage makers, Montreal, Que.	Commenced February 16. For increased wages. Settled by negotiations; demands not granted. Work resumed February 28.	300	3,600
<b>WOODWORKING—</b>			
Machine men and general workmen, Meaford, Ont.	Commenced February 20. For increased wages. Settled by negotiations; partial increase granted; work resumed February 27.	70	350
<b>PRINTING AND PUBLISHING—</b>			
Bookbinders, Edmonton, Alta.....	Commenced February 11. For increased wages. Settled by mediation; demands granted. Work resumed February 16.	32	112
<b>CLOTHING—</b>			
Skirt, dress and waist makers, Montreal, Que.	Commenced February 5. Employees alleged interference with union rules. Settled by negotiations; company accepted union rules. Work resumed February 13.	98	686
<b>FOODS, LIQUORS AND TOBACCO—</b>			
Cigarmakers, Hamilton, Ont.....	Commenced February 26. Against discharge of employees. Settled by mediation; strike terminated February 28.	108	324
<b>MUNICIPAL EMPLOYMENT—</b>			
Firemen, Vancouver, B.C.....	Commenced February 13. For increased wages. Settled by replacement of strikers. Work resumed February 17.	9	27

the strikers at Marieville. A strike of 450 rubber workers at Toronto for a 30 per cent increase in wages and the abolition of team work commenced on January 21. It terminated on February 18, the employees resuming work under the former wage schedule.

FOODS, LIQUORS AND TOBACCO.—The only strike during the month in this group was that of 108 cigarmakers at Hamilton. This strike which commenced on February 25, was caused by the refusal of the firm to re-employ two discharged men. It terminated on February 28, with all employees resuming work with the exception of the two who were discharged.

LEATHER.—A strike of 27 leather cutters in Quebec commenced on January 28, when the company refused to discharge a foreman at the demand of the employees. The latter resumed work on February 22. The firm did not discharge the foreman, but promised that no injustice would result to any worker.

MUNICIPAL EMPLOYMENT.—The strike of the waterworks employees (City of Montreal) which commenced on January 1, terminated as a result of mediation on February 7. Nine firemen in Vancouver went on strike on February 13, for increased wages. They were replaced, and work was resumed on February 17.

---

### STRIKES AND LOCKOUTS IN CANADA DURING 1919

THE year 1919 was one of increased strike activity in Canada, as in other countries. In Canada, both the number of disputes and the time loss was the greatest in the history of the Department of Labour.

There were 298 strikes and lockouts in Canada during the calendar year 1919. Of this number, eight were carried over from 1918, making a net total of 290 strikes commencing in 1919. The number of employees involved in the 298 disputes was 138,988, and the number of employers was 1,913. The total time loss was estimated at 3,942,189 working days, (ascertained by multiplying the number of working days in which the industry was idle by the number of employees involved in the dispute.)

A strike or lockout, counted as such by the Department of Labour, is a cessation of work involving six or more employees and of not less than forty-eight hours duration. Unless a dispute

corresponds to this definition, it is not classified as a strike or lockout, and is not included in the officially published statistics, although, for departmental purposes, it is recorded. There were 41 of these disputes, involving 5,099 employees and a time loss of 4,091 working days during 1919.

There were several outstanding strikes which contributed largely to the total time loss. Among these were: The general sympathetic strike at Winnipeg, from May 15 to June 26, involving 22,860 employees and a time loss of 924,562 working days, the strike of coal miners in District 18, from May 24 to the end of August, involving 6,266 employees and a time loss of 462,879 working days; the general sympathetic strike at Amherst, N.S., from May 19 to June 16, involving 771 employees and a time loss of 17,466 working days; the strike of miners at Kirkland Lake, Ontario, from June 12 to October 16, involving 523 employees and a time loss

of 56,175 working days, and the strike in the building trades at Montreal, from September 2 to November 24, involving 2,000 employees and a time loss of 113,000 working days.

The Winnipeg strike, however, resulted in a considerable time loss apart from its local boundaries. It extended, as a sympathetic strike, to other cities in Western Canada. The number of employees and the time loss in working days in these other cities, as a result of the Winnipeg strike, were approximately 18,430 and 230,130 respectively. Thus the Winnipeg strike and its ramifications involved a total of 41,290 employees and a time loss of 1,154,692 working days, or, roughly, about one-third of the strike total for all Canada.

In about 90 per cent of the strikes not more than 1,000 employees were involved and in about 34 per cent of the strikes not more than 50 employees were involved. As to duration, 44 per cent of the strikes were in existence for ten days and under; 55 per cent were under 15 days' duration, and about 20 per cent were over 30 days' duration. Fifteen strikes were unterminated at the end of the year.

Classified by provinces, Ontario had more strikes than any other province with about 39 per cent of the total. Quebec was second with about 27 per cent, and British Columbia third, with about 14 per cent. The greatest time loss, however, occurred in Manitoba where 1,045,660 working days or a little more than 26 per cent of the total were lost through strikes. This was due to the Winnipeg strike. In Ontario the time loss was 26 per cent of the total, while in Quebec it amounted to about 22 per cent.

The class of industry most affected

during 1919 was Metals, Machinery and Conveyances, in which there were 45 strikes, involving 70,268 employees, and a time loss of 1,993,704 working days. It should be pointed out, however, that these figures for the Metals group include all the employees and the time lost in the general strikes in sympathy with the Winnipeg metal workers' strike. Forty strikes, involving 10,779 employees and a time loss of 287,146 working days, occurred in the Building and Construction group. Twenty strikes, involving 12,196 employees and a time loss of 714,340 working days occurred in the Mines, Smelters, Quarries and Clay Products trades. The above three industrial groups sustained the greatest time loss through strikes.

Classified by causes, 223 of the 298 strikes recorded involved wages. Of this number, 75 were solely for increased wages, 99 for increased wages and shorter hours, 41 for increased wages and other changes and 8 were because of a reduction in wages. Twelve strikes and lockouts involved union recognition, or were in protest against the employment of non-union labour. There were sixteen sympathitec strikes.

The record shows that 157 of the strikes terminated in favour of the employees and 88 in favour of the employers; 23 were compromise settlements, while 30 were indefinite and un-terminated.

As regards methods of settlement, 154 strikes terminated as a result of direct negotiations between the parties in dispute, 41 terminated through the efforts of conciliation or mediation (chiefly of the Department of Labour), 7 by arbitration, and 5 by the operation of the Industrial Disputes Investigation Act. In 31 strikes, the employees resumed work on their employers' terms, and in 28 strikes the strikers were replaced.

TABLE I.—RECORD OF LABOUR DISPUTES BY YEARS.

YEAR.	No. of Disputes.		Disputes in existence in the year.		
	In existence in the year.	Beginning in the year.	Employers involved.	Employees involved.	Time loss in working days.
1901.....	104	104	273	28,086	632,311

## STRIKES AND LOCKOUTS IN THE UNITED KINGDOM DURING JANUARY, 1920

THE following details with regard to strikes and lockouts in the United Kingdom during January, 1920, based on returns from employers and workpeople, are taken from the February issue of the *British Labour Gazette*.

### LUMBER, MAGNITUDE AND DURATION.—

The number of trade disputes beginning in January was 86, compared with 61 in the previous month, and 105 in January, 1919. In these new disputes over 24,000 workpeople were directly, and over 7,000 workpeople indirectly, involved (i.e., thrown out of work at the establishments where the disputes occurred, though not themselves parties to the disputes). In addition nearly 88,000 workpeople were involved, either directly or indirectly, in 56 disputes which began before January, and were still in progress at the beginning of that month. The total number of disputes in progress in January, was thus 142, involving about 119,000 workpeople, as compared with about 105,000 workpeople involved in disputes in progress in December, 1919; and about 460,000 in January, 1919.

The following table classifies these disputes by groups of trades, and indicates the number of workpeople involved (whether directly or indirectly) at the establishments concerned, and the approximate time loss during January, in all the disputes in progress.

Of the 1,793,000 working days lost in January, by all disputes, about 1,609,000 were lost by disputes which began before January, and were still in progress at the beginning of that month, and only 184,000 by disputes which began in the month.

CAUSES.—Of the 86 new disputes, 43, directly involving about 7,300 workpeople, arose on demands for advances in wages; eight, directly involving 2,300 workpeople, on other wages questions; nine, directly involving about 4,000

Groups of Trades	Number of disputes			Number of workpeople involved in all disputes in January.	Aggregate loss of working days during January.
	Started before 1st January	Started in January	Total		
Building .....	6	16	22	2,493	24,000
Mining and Quarrying .....	6	14	20	19,200	81,000
Metal, Engineering and Ship-building .....	14	16	30	73,600	1,469,000
Textile .....	2	17	19	5,900	15,000
Transport .....	3	6	9	7,000	49,000
Other Trades .....	25	17	42	10,600	155,000
Total, January, 1920 .....	56	86	142	118,900	1,793,000
Total, December, 1919 .....	46	61	107	105,000	1,688,000
Total, January, 1919 .....	36	105	141	460,000	2,918,000

workpeople on details of working arrangements; 17, directly involving nearly 7,200 workpeople, on questions respecting the employment of particular persons or classes; seven, directly involving nearly 1,000 workpeople, on questions of Trade Union principle; and two, directly involving about 2,300 workpeople, on other questions.

RESULTS.—During the month settlements were effected in the case of 49 new disputes, directly involving about 12,500 workpeople, and 27 old disputes, directly involving about 54,400 workpeople. Of these new and old disputes, 30, directly involving 5,400 workpeople, were settled in favour of the workpeople; 20, directly involving 49,200 workpeople, in favour of the employers; and 26, directly involving about 12,300 workpeople, were compromised. In the case of 22 other disputes, directly involving over 8,400 workpeople, work was resumed pending negotiations.

## STRIKES AND LOCKOUTS IN THE UNITED KINGDOM DURING THE YEARS 1905-1919

THE following table from the January issue of the British *Labour Gazette* shows the total number of disputes reported to the British Department of Labour as causing a stoppage of work in each of the years 1905-1919, together with the total number of workpeople directly or indirectly involved and the aggregate number of working days lost in the establishments where disputes occurred:

Year.	No. of disputes beginning in year.	No. of workpeople involved in disputes beginning in year.	Aggregate duration in working days of all disputes in progress during year.
1905 .. .. .	358	94,000	2,470,000
1906 .. .. .	486	218,000	3,029,000
1907 .. .. .	601	147,000	2,162,000
1908 .. .. .	399	296,000	10,834,000
1909 .. .. .	436	301,000	2,774,000
1910 .. .. .	531	515,000	9,895,000
1911 .. .. .	903	962,000	10,320,000
1912 .. .. .	857	1,463,000	40,915,000
1913 .. .. .	1,497	689,000	11,631,000
1914 .. .. .	999	449,000	10,111,000
1915 .. .. .	706	453,000	3,038,000
1916 .. .. .	581	284,000	2,600,000
1917 .. .. .	688	861,000	5,964,000
1918 .. .. .	1,252	1,097,000	6,237,000
1919 .. .. .	1,413	2,570,000	34,483,000

From the above table it will be seen that the year 1919 contained more industrial disputes, with greater resultant time loss, than any previous year in the period 1905-1919, with the exception of 1912, when one dispute in the coal-mining industry was responsible for a time loss of 31,000,000 working days. During the war years it will be noted that Bri-

tish industry was characterized by greatly reduced strike activity.

### Summary of Trade Disputes in the United Kingdom during the years 1918-1919

The number of trade disputes reported to the British Department of Labour as causing a stoppage of work in 1919 was 1,413. The number of workpeople involved (including those thrown out of work at the establishments where the disputes occurred, though not actually parties to the disputes) in these disputes in 1919 was about 2,600,000. This is the highest total yet recorded and nearly equals the combined totals for the four previous years. The aggregate duration of the disputes was over 34,000,000 working days, or nearly twice as much as the total loss in working days in the whole period 1915-18. This aggregate was, however, nearly equalled in 1893 and was exceeded in 1912, in both of which years there were great general strikes on wages questions in the coal-mining industry.

The following table, from the British *Labour Gazette*, summarizes by trades the number of disputes reported, the number of workpeople involved and the aggregate duration of disputes in working days for 1918 and 1919 respectively.

The principal disputes of the year occurred in the coal-mining, engineering and shipbuilding, textile and transport industries. In the coal-mining industry, 150,000 workpeople in Yorkshire ceased work for 13 days in January to enforce a simultaneous interval for surfacemen's meals, and again in July for 29 days

Groups of Trades.	Number of disputes beginning in 1918	1918 Number of workpeople involved in all disputes in progress	Aggregate duration in working days of all disputes in progress	Number of disputes beginning in 1919	1919 Number of workpeople involved in all disputes in progress	Aggregate duration in working days of all disputes in progress
Building.....	134	56,000	458,000	150	25,000	575,000
Coal mining.....	147	368,000	1,165,000	212	906,000	7,441,000
Other mining and quarrying.....	18	13,000	109,000	32	5,000	138,000
Engineering and shipbuilding.....	300	169,000	840,000	188	304,000	9,592,000
Other metal.....	86	85,000	575,000	126	83,000	1,813,000
Textile.....	67	264,000	1,701,000	61	490,000	8,167,000
Clothing.....	70	24,000	321,000	77	29,000	245,000
Transport.....	67	59,000	265,000	129	574,000	3,883,000
Woodworking and furnishing.....	82	43,000	273,000	62	25,000	988,000
Other trades.....	188	38,000	413,000	277	119,000	1,381,000
Local authority service.....	193	13,000	117,000	99	21,000	257,000
Total.....	1,252	1,132,000	6,237,000	1,413	2,581,000	34,483,000

owing to dissatisfaction with the amount of advance in rates of wages which was proposed in compensation for a reduction in working hours recommended in the Sankey report. At the end of March 100,000 miners in various districts were idle for six days in support of a national application for an advance in wages. In the engineering and shipbuilding trades 150,000 workpeople stopped work in January and were idle for periods ranging, in different districts, from one to eight weeks on the reduction of the working week from 53 or 54 hours to 47 hours, owing partly to dissatisfaction at the new arrangement of working hours and partly to the non-provision of any increase in the rates of wages of piece-

workers and lieu-workers. In September between 40,000 and 50,000 ironfounders, coremakers and dressers ceased work for increases in wages, and were still idle at the end of the year. In the cotton trade about 450,000 operatives struck work for 18 days in June and July in support of an application for reduced working hours and increased rates of wages. In the railway services about 500,000 operatives were idle from September 27 to October 5, inclusive, owing to dissatisfaction at the new standardized rates proposed for various grades. The majority of the other disputes occurring in 1919 arose either on demands for advances in wages or on questions of working hours.

## “LESSONS FROM THE BRITISH RAILWAY STRIKE”

The article that follows, reprinted from *The Outlook*, December 31, 1919, was written by Dr. Worth M. Tippy, Secretary of the Commission on the Church and Social Service (which is one of the commissions of the federal organization of Protestant denominations in America known as the Federal Council). Dr. Tippy, according to *The Outlook*, is especially qualified to write on the lessons of the railway strike in Great Britain as he was on the ground at the time, and brought to his observation a wide experience in the study of social conditions and in the service of social improvement.

**T**HE recent strike of the employees of the British railways was the most critical situation in the industrial history of Great Britain. It combined two drastic features—the tying up nationally of a key industry which paralyzed all industry, and what is known in Great Britain as the “lightning strike.” It was given on a day’s notice. The men frankly hoped to force their demands by the paralysis of industry and the imminence of starvation.

I do not desire to go into the merits of the points at issue beyond saying that the railway men had serious grievances, and had been greatly irritated by the dilatory and evasive tactics of the Government, but rather to point to certain outstanding results of the conflict which have value to America, and to express my admiration for the self-control and good humour of the people of Great Britain, including the men themselves, the Government, and the people at large, during those trying days.

There is no doubt that the strike was forced at the last moment by extremist leaders of the unions. Mr. Cramp said in the opening days of the strike that the centre of gravity in Great Britain had passed from Parliament to the trade union headquarters. He soon learned that this was not true, and that once an issue was drawn public opinion would solidify on the other side. Mr. Thomas, a very able and experienced leader, was on the point of resigning when the issue was forced, but fortunately he kept to his post.

The incidents of the strike itself were intensely dramatic. Probably nothing cost the railway men more in public con-

fidence than the stoppage of trains at a certain hour wherever they might be, while the crews were taken away in automobiles, leaving passengers, including mothers with babies, and trains of live stock stranded in the country. People were more aroused by the helplessness of dumb beasts than by the privations of human beings, who, after all, had freedom of movement and could finally help themselves. The provisions by which the Government met the need of transportation are familiar. I saw the milk lorries in Hyde Park and the improvised headquarters at Grosvenor House. Nobody could have anything but appreciation and admiration for the measures by which the Government protected the people, including the families of the strikers themselves, unless he were narrowly class conscious and were willing that the people should starve.

Two or three outstanding effects became quickly apparent, and their significance is so great that one is inclined to think that the strike was a blessing to Great Britain. The first was that when the men once got into the strike they drew back as from an abyss. They realized as they had not before what it meant to array themselves against the nation, and I think also that they saw clearly that a strike of that character cannot go far unless it results in a surrender or a compromise without precipitating extreme action with probable revolutionary fighting. Mr. Thomas said after it was over that the nation had been nearer to civil war than it had ever been before. Henceforth in Great Britain those who propose the lightning

strike for a national key industry, or a general strike of national industries, will look into this abyss and count the cost before the act.

That the workers of Great Britain sought an understanding with the Government, that the committee of fifteen representing the other two organizations of the triple alliance, instead of bringing in the miners and the transport workers and precipitating a general strike, became a committee of conciliation, is an evidence of the good sense and patriotism of the British workers.

The second result of the strike was that it united the unorganized mass of citizens who seem never able to act together, that it gave them the will to defend themselves and the nation as a whole, and revealed a way that lifted up a new ethical standard of public welfare which any economic group will be slow to violate in the future.

But possibly the greatest lesson that the people learned was that there must be a new day in the social life of Great Britain—a day in which the workers are given greater economic independence, greater recognition in the social life of Great Britain, and vastly greater influence in the control of industry and of the Government. There must be a higher standard of living for the workers than that which obtained before the war. If these things are not recognized, and especially if they are obstructed, the organized workers will force their recognition by one means or another. It seemed to me quite clear, after a wide reading of the public press and from many private conferences, that in their demands for a higher standard of living and a far greater control in the industries the men had the sentiment of Great Britain with them.

The general strike on a nation-wide scale or a national strike in a key industry such as the railways, and especially the lightning strike, are terrible weapons. They should be used only as a last resort and in industrial controversies where the right is clearly on the side of the workers. Otherwise the general

strike becomes a social menace and the people will be forced in self defense to unite against it.

I became convinced as I watched the British strike that there can be no unlimited right to strike when it ties up a nation. It is wrong for one group to inflict such hardships upon the entire population to gain its own ends, even if those ends are just. Some other effective way must be found to protect the workers. That way is to be found along the line of legislative action, collective bargaining, participation of labour in management, and the education of public opinion. If the state limits the use of the strike, it is bound to secure to labour an effective legalization of its rights.

That labour itself in Great Britain realizes some of these things is shown by the words of Mr. Thomas, who led the strike, before a meeting of workers in Albert Hall on Sunday night, October 6, in which he announced the settlement.

Mr. Thomas said that when the strike was called he knew that there could be nothing more dangerous or more calculated to imperil the life of the state than to enter into a war in which one section of the community was at war with the community as a whole. He recognized that in a challenge to the state, whichever side won, disaster must follow. If those who challenged won, then the only alternative would be the end of constitutional government. If, on the other hand, the state won, then there must follow bitterness and ill feeling, which would be a danger to the community. He recognized that citizenship was greater than any sectional interest, and therefore, when the fight began, he determined to make it a struggle on a purely economic question. The railway men had no quarrel with the Constitution of the country, but, although they were nominally servants of the Government, they were as much entitled to demand from the Government the same fair conditions of labour as workers were entitled to demand from any private employer.

## THE KANSAS COURT OF INDUSTRIAL RELATIONS

New Law to Safeguard in the Public Interest the Production in Essential Industries.

A NEW law establishing a Court of Industrial Relations came into force in the State of Kansas on January 25 last. This law has some points of resemblance to the British Industrial Courts Act, 1919,\* and to the Australian Act constituting a Federal court of arbitration.† The Kansas measure, however, is more definite in its aim and more drastic in its method than any previous recent legislation. It is based on the principle that in all disputes between capital and labour the interests of the public must remain paramount and cannot be sacrificed to the strategy of either contending party. Particular emphasis is placed upon the right of the public to have food, fuel, clothing, and means of transportation, and upon the principle that no industry or group of employers or workers should be permitted to interfere with these needs.

According to Judge W. L. Huggins, chairman of the newly-appointed Court, the provisions of the law are neither few nor radical. "They are founded," he states, "upon the old English common law, which is the basis of legal codes in every state of the Union except Louisiana. The principle upon which the court was founded was enunciated by Sir Matthew Hale, two and a half centuries ago, who declared that the industries which affect the welfare of the people may be regulated by law in the interest of the people."

The effects of the new law are being watched with interest throughout the United States, although it is pointed out that Kansas is not an industrial state, and that even if the law should meet with success in that state where the strong farming element is behind the new Court, it would be sure to be strongly opposed in other states where labour unions

are more powerful. In Kansas, however, the newly established court has already been voluntarily approached by labour unions seeking to have their wage agreements reviewed. Among these were the building trades' and teamsters' unions at Topeka, and the woodworkers' unions at Atchison.

The Court of Industrial Relations consists of three judges appointed by the Governor for a term of three years each, and supersedes the Public Utilities Commission. The following industries are specifically declared to be "affected with a public interest and therefore subject to supervision by the State for the purpose of preserving the public peace, protecting the public health, preventing industrial strife, disorder and waste, and securing regular and orderly conduct of the business directly affecting the living conditions of the people of this State and in the promotion of the general welfare," namely:

1. The manufacture or preparation of food products.
2. The manufacture of clothing and all manner of wearing apparel in common use by the people.
3. The mining or production of fuel.
4. The transportation of all food products and articles or substances entering into wearing apparel or fuel.
5. All public utilities and common carriers as defined by law.

The duty of the Court is to see that these industries are "operated with reasonable continuity and efficiency in order that the people of this state may live in peace and security, and be supplied with the necessities of life," and that their operation is not wilfully hindered by any person or association of persons. Industrial disputes are treated as follows: In the case of a controversy arising between employers and workers or groups

\*See LABOUR GAZETTE, February, 1920, page 137.

†See LABOUR GAZETTE, July, 1919, page 804.

of workers in any of the specified industries, if it shall appear to the Court that this controversy may endanger continuity or efficiency of service, or produce industrial strife, disorder or waste, the Court of Industrial Relations may, upon its own initiative, summon all parties concerned to appear before it for investigation into the cause of the dispute, the conditions surrounding the workers, the wages paid to labour, the return accruing to capital, the rights and welfare of the public, and other matters. Such an inquiry may also be instituted upon the complaint of either party, upon the complaint of any ten citizen taxpayers of the community in which such industries are located, or upon the complaint of the Attorney General of the State. After this inquiry the Court is to announce its findings at once to all interested parties, stating "the terms and conditions on which the said industry should thereafter be conducted in so far as the matters determined by the said court are concerned."

The Court may, in order to ensure the desired continuity of operation, order such changes as are necessary to be made in the management of the industry, working and living conditions. Always regarding industrial conditions from the standpoint of "public welfare" the Court will see that the workers have fair wages and healthful surroundings, and that capital invested shall produce a fair rate of return. Parties who feel aggrieved by the orders of the Court may appeal to the Supreme Court, but any such action must be taken within thirty days of the date of the order to which objection is taken.

As to collective bargaining, any union, or association of workers which may incorporate under the laws of the state is recognized as a "legal entity," and the right of such corporations to bargain collectively for their members is recognized and conceded. At the same time individual members of unincorporated unions also may bargain collectively by appointing representatives in writing, and this written appointment shall be made a permanent record of the Union.

Special protection against discharge or discriminative treatment, is afforded employees who give evidence before the Court. Employees in turn are expressly forbidden to retaliate upon employers by boycott, propaganda, or other means, for any action taken by the latter on the order of the Court, or because the latter has invoked the jurisdiction of the Court.

In regard to the limitation of industry from the side of the employers, it is made "unlawful to cease operations for the purpose of limiting production and transportation or to affect prices, for the purpose of avoiding any of the provisions of this Act," but the Court may, on the application of any concern to limit or cease operations, grant such application as they consider to be in good faith. Where industries are subject to seasonal fluctuations the Court may make such rules for their operation as will secure the best service to the public interest consistent with the right of employer and employee.

It is forbidden to either side to conspire or confederate with others to defeat the orders of the Court, and for the purpose of limiting the operation of the essential industries. Nothing in the act is to be interpreted as restricting the right of any individual employee to quit his employment at any time. Unlawful action begins when employees conspire to quit their employment for the purpose of hindering any of the industries governed by the act, "engage in picketing, or intimidate by threats or abuse, any persons with intent to induce them to quit, or deter others from accepting employment within such industries."

Violation of the act is a misdemeanour punishable by a fine not exceeding \$1,000, or imprisonment not exceeding one year, or both; but any officer of any corporation engaged in any of these industries or an official of any labour union employed in these industries who shall wilfully violate any of the provisions of this act, shall be deemed guilty of a felony and punishable by a fine not to exceed \$5,000, or imprisonment at hard

labour for not more than two years, or both.

In case of the suspension or limitation of operation of any of the essential industries contrary to the law, if the Court considers that the public welfare is endangered, the Court may then "take proper proceedings in any court of competent jurisdiction to take over control, direct and operate said industry," provided that a fair return shall be paid to the owners and a fair wage to the workers during the time of such operation.

The Court may also serve as a board of arbitration when appealed to by mutual consent between parties in a dispute other than those already provided for.

Any order of the Court as to wages "shall be deemed *prima facie* reasonable and just," and workers are entitled to sue for the recovery of any sum below the new minimum accruing from the date of the service of summons. The justices of the Court may also hold any inquiries in or out of the State for the purpose of familiarizing themselves with industrial problems.

### FIRST ANNUAL REPORT OF THE DOMINION BUREAU OF STATISTICS

THE first annual report of the Dominion Statistician (No. 10f-1920), recently issued, gives an account of the origin, purpose and organization of the Dominion Bureau of Statistics. The Bureau came into being under the Statistics Act, on May 24, 1918. Previous to that date, says the report, "a considerable body of statistical publications had grown into existence: in certain sections of the field good work was being done, in many others not so good; there was much duplication, at the same time that there were numerous gaps, often at critical points; finally, there was a total lack of general plan or provision for consistent progress. The embarrassment which this occasioned with the rapid growth of the country and the increasing perplexity of its problems, many of which called in the most insistent way for statistical treatment, will be appreciated." In the short period of its existence the Bureau of Statistics has been concerned with preparing the field for a consistent general survey, and as the result of the work already accomplished "it is believed that the bureau now embraces the fundamental subjects of what might be termed a national system of statistics." The Act of 1918 applied to the prevailing confusion the remedy of

centralization conferring on the new Bureau what may be regarded as complete jurisdiction in statistics. Its duties are to collect, abstract, compile and publish statistical information relative to the commercial, industrial, social, economic and general activities and conditions of the people.

The report opens with an interesting historical survey, beginning with that taken by the Colony of New France in 1666. This is stated to have been the "first census of modern times" in any country.

The British North America Act specifically mentioned Census and Statistics as being under the jurisdiction of the Dominion, and in 1868 the Act constituting the Dominion Department of Agriculture placed census and statistics under that department. The census of 1871 was taken, however, under a special act. Another change was made in 1879, when the Census and Statistics Act established the statistical system which survived until 1918. This was mainly a Census Act and took little cognizance of general statistics. In general each department published its own statistics, these being gathered together in the Statistical Year Book, which came into existence in 1886. In 1905 Canada, following the

precedent of the United States, made the Census Office a permanent institution. The Year Book was remodelled in that year, statistics of provincial origin being omitted, owing to the extreme difficulty of comparison, but the review of departmental statistics was retained. New work was soon undertaken, including postal censuses of manufactures, dairying and agriculture, and later a crop reporting service.

Turning to the organization that has been effected under the Act of 1918, the report states:

"At the close of its initial year the Bureau was embraced in eleven main divisions. Division I, devoted to Administration, was, as the name implies, in executive and general control. The actual field of statistics was apportioned among the remaining divisions as follows: Division II, Population (Demography)—The Census; Division III, Agriculture; Division IV, The Industrial Census (fisheries, furs, forestry, dairy factories, mines, central power stations, general manufactures and construction); Division V, Exports and Imports; Division VI, Transportation (Land and Water); Division VII, Internal Trade, Prices, etc.; Division VIII, Finance

(Public and Private)—Wealth, Debt, Taxation; Division IX, Administration of Justice; Division X, Education; Division XI, General Statistics—The Canada Year Book."

The work of each of these divisions is described in detail in the present report. The value of centralization may be illustrated in the new treatment of vital statistics, which promises for the first time to make general conclusions available in regard to Canada as a whole. Returns of births, deaths and marriages are collected by the several provinces, but their reports hitherto covered different periods, and differed on many points in their method. The Bureau of Statistics provided the remedy by suggesting uniform standard legislation to be carried out by each Province, bringing all the returns into line, and it is hoped that this legislation will be completed during the present year. Similar good results are to be looked for from the general adoption in provincial and departmental statistics of a new standard classification of industries, which is provided by the Bureau in connection with the Industrial Census. By such services the Bureau fulfils the purpose it sets itself of giving "a related view of economic and social phenomena."

## ANNUAL REPORT OF QUEBEC DEPARTMENT OF PUBLIC WORKS AND LABOUR

THE annual report of the Department of Public Works and Labour of the Province of Quebec, for the year ending June 30, 1919, includes the report of Mr. Louis Guyon, Deputy Minister of Labour, and other reports on Inspection of Industrial Establishments and Public Buildings, Provincial Employment Bureau, Trade Disputes, Examination of Stationary Engineers, and Fair Wages.

The reports draw attention to the more important of the new labour laws to be put into effect during 1919-1920. These

are: (1) An act amending the Quebec Industrial Establishments Act relating to child labour,\* (2) An act providing for the fixing of a minimum wage for women,\* and (3) regulations to enable the enforcement of the act providing for the protection of public buildings against fire, and the creation of a Board of Examiners similar to that in existence

\*The Quebec Industrial Establishments (Amendment) Act respecting Child Labour and the Quebec Women's Minimum Wage Act were printed in the LABOUR GAZETTE, April, 1919, pp. 495-496.

for the examination of stationary engineers.

A slight increase was noted in the number of children under age found working in industrial establishments. This increase was mainly confined to boys between 14 and 15 years working with machinery at lower wages than would be accepted by men.

During the year 27 fatal, 130 serious and 671 slight accidents were reported to the Department, being an increase of 9 fatal and 36 serious accidents, and a decrease of 297 slight accidents over the previous year. The greatest number of accidents in any one month occurred in the month of August, 1918, and the least number in March, 1919. The report states that the accidents in the great majority of cases were due to the inexperience and imprudence of the victims; and that in certain shops where both Canadian and

foreign workers are employed, three foreigners were injured to one Canadian.†

The report on employment offices states that in the five offices operated during the year by the province in co-operation with the federal Department of Labour, the number of unemployed registered was 12,876; the number of vacancies notified by employers was 11,135; the number of persons referred to employers, 8,871; the number reported as placed was 5,688. Some 230 establishments were visited and requested to make use of the employment offices. With respect to the re-establishment of soldiers, 8,189 ex-soldiers registered, 4,875 were referred to employers, and 3,797 reported back that they had received employment.

---

†Similar experiences in other provinces and in the United States have been reported from time to time in the LABOUR GAZETTE.

## COMPENSATION FOR INDUSTRIAL DISEASES

### Legislation in the United Kingdom, Canada, the United States and France

THE principle of compensation for diseases arising out of and in the course of employment was first introduced in Great Britain in the Workmen's Compensation Act of 1906.\* Under the previous Acts of 1897 and 1900, compensation was limited to injuries sustained through accident in certain trades. Besides enlarging its application to include industrial diseases the new Act extended the principle of compensation to all classes of persons engaged under con-

tract of service, including domestic servants and sailors. A "Workman" is defined as "any person who enters into a works under a contract of service or apprenticeship with an employer, whether by way of manual labour, clerical work, or otherwise, and whether the contract is expressed or implied, is oral or in writing." Lowly paid professional people such as house surgeons and hospital nurses are included in the scope of the act, but certain classes are excluded, such as policemen, persons in the naval and military services, profit-sharing fishermen, and non-manual workers

---

\*The British Compensation Statistics for 1908, the first complete year in which industrial diseases were included, was reviewed in the LABOUR GAZETTE for November, 1909 (page 671).

whose remuneration exceeds £250 a year. Describing the operation of this Act in respect to diseases, Professor Thomas Oliver in his book, "Diseases of Occupation," (Methuen, London, 1908) says: "A workman is entitled to compensation if he is incapacitated by a disease contracted in his trade and due to his employment exactly in the same way as if

he had been thrown *hors de combat* by an accident." The Act contained a schedule enumerating the compensable diseases and the occupations causing them, other diseases being subsequently added to the list in 1907 by the Home Secretary on the recommendation of a Departmental Committee. The diseases scheduled in the Act of 1906 were as follows:

DESCRIPTION OF DISEASE.	DESCRIPTION OF PROCESS
Anthrax .....	Handling of wool, hair, bristles, hides and skins.
Lead poisoning or its sequelae.....	Any process involving the use of lead or its preparations or compounds.*
Mercury poisoning or its sequelae .....	Any process involving the use of mercury or its preparations or compounds.
Phosphorus poisoning or its sequelae.....	Any process involving the use of phosphorus or its preparations or compounds.
Arsenic poisoning or its sequelae .....	Any process involving the use of arsenic or its preparations or compounds.†
Ankylostomiasis .....	Mining.

\*Handling of lead, its preparations or compounds.—Added in 1907.

†Handling of arsenic, its preparations or compounds.—Added in 1907.

In considering suggested additions to this list the committee excluded all ailments resulting from accidents (these being already provided for), those which led to incapacity for work of less than one week, and those which could not be proved by individual cases as being specific to the employment. The last-named limitation is illustrated in its results by the fact that the committee was unable to recommend the inclusion of bronchitis in the schedule, for although workmen exposed to certain kinds of dust and to the fumes of certain gases are specially subject to this disease, yet in practice it is impossible in individual cases to distinguish bronchitis which is

industrial in its origin. A large part of the committee's inquiry was directed to the investigation of the diseases variously known as "miners' phthisis," "stonemasons' phthisis," "potters' rot," "grinders' rot," and the like. It was found that ordinary tubercular phthisis prevails excessively among workers in gritty dusts, yet it was very difficult to differentiate between industrial and normal cases, and the long preliminary period before the disease fully declares itself would make its inclusion in the schedule very doubtful in its effects. The schedule was finally extended by the following additions:

DESCRIPTION OF DISEASE.	DESCRIPTION OF PROCESS.
Poisoning by nitro- and amido-derivatives of benzene (dinitro-benzol anilin and others) or its sequelae .....	Any process involving the use of nitro- or amido-derivative of benzene, or its preparations or compounds.
Poisoning by carbon bisulphide or its sequelae.	Any process involving the use of carbon bisulphide or its preparations or compounds.
Poisoning by nitrous fumes or its sequelae....	Any process in which nitrous fumes are evolved.
Poisoning by nickel carbonyl or its sequelae....	Any process in which nickel carbonyl gas is evolved.
Poisoning by gonioma kamassi (African boxwood) or its sequelae .....	Any process in the manufacture of articles from gonioma kamassi (African boxwood).
Chrome ulceration or its sequelae .....	Any process involving the use of chromic acid or bichromate of ammonium, potassium, or sodium, or their preparations.
Eczematous ulceration of the skin produced by dust or caustic or corrosive liquids, or ulceration of the mucous membrane of the nose or mouth produced by dust .....	
Epitheliomatous cancer or ulceration of the skin or of the corneal surface of the eye, due to pitch, tar or tarry compounds.....	Handling or use of pitch, tar or tarry compounds.
Scrotal epithelioma (chimney-sweeps' cancer)...	Chimney sweeping.
Nystagmus .....	Mining.
Glanders .....	Care of any equine animal suffering from glanders; handling the carcase of such animal.
Compressed air illness or its sequelae .....	Any process carried on in compressed air.
Subcutaneous cellulitis of the hand (beat hand).	Mining.
Subcutaneous cellulitis over the patella (beat knee) .....	Mining.
Acute bursitis over the elbow (beat elbow)....	Mining.
Inflammation of the synovial lining of the wrist joint and tendon sheathes.....	Mining.
Cataract* .....	Glassworking.
Cramp* .....	Telegraphists.

\*Brought under the Act on December 2, 1908.

In order to claim compensation a workman must produce (1) a certificate from the local certifying factory surgeon, (2) or prove that he had been suspended from his usual employment on account of having contracted one of the diseases scheduled, and (3) in the event of death, proof will have to be given by friends or dependents that death was due to one of the diseases mentioned above.

Professor Oliver calls attention to a possible causal connection between injury and tuberculous lung disease on which medical men must give an opinion in view of the Workmen's Compensation Act. He says: "If an accident received at work is the cause of tuberculous disease of a subjacent organ, which disease, but for the accident, would not have arisen, the claims for compensation advanced by the injured person or his relatives are not without a reasonable foundation." The same authority points out that cancerous tumours often develop after an accident, close to the site of the injury, "and that one is the direct sequence of the other there is not the least doubt." The inference to be drawn is apparently that diseases thus connected with accidents come under the category of industrial diseases and are therefore subject to the provisions of the Workmen's Compensation Act. Cases of long latent lead poisoning in which the injuries or fatal effects may reveal themselves after lying dormant for many years are also discussed from the same point of view, though the warning is added that "the greatest care will have to be exercised both in pressing and opposing such a claim." In general, compensation for industrial diseases is granted under British law in all cases where a direct causal connection can be shown between the employment and the resulting injury.

#### Compensation in Canada

Ontario was the first Province in Canada to follow the precedent of the United Kingdom in providing compensation for workers who contract certain specified industrial diseases in the course

of their employment. The Ontario Workmen's Compensation Act of 1914 adopted from the British Act of 1906 the original schedule of six diseases as given above, viz., anthrax, lead poisoning, mercury poisoning, phosphorus poisoning, arsenic poisoning, and miner's ankylostomiasis. With respect to lead and arsenic poisoning, the amendment to the British Act covering the handling of lead and arsenic were not included in the Ontario Act, but an amendment was inserted in 1917 adding miners' phthisis to the list. The Act contains the following clause, which in the main is repeated in the subsequent acts of the other provinces adopting the principle of compensation for industrial diseases, that "Where a workman suffers from an industrial disease and is thereby disabled from earning full wages at the work at which he was employed, or his death is caused by an industrial disease and the disease is due to the nature of any employment in which he was engaged at any time within twelve months previous to the date of his disablement, whether under one or more employments, the workman or his dependents shall be entitled to compensation as if the disease were a personal injury by accident and the disablement were the happening of the accident, subject to the modifications hereinafter mentioned, unless at the time of entering into the employment he had wilfully and falsely represented himself in writing as not having previously suffered from the disease."

The Ontario Act lays the burden of payment of compensation (where it is payable individually) on the employer "who last employed the workman during such twelve months in the employment to the nature of which the disease was due." If, however, the disease is of such a nature as to be contracted by a gradual process, any other employers who during such twelve months employed the workman at the same occupation shall make a joint contribution as determined by the Board. By an amendment of 1917 compensation is not payable

where the disease has been contracted outside of Ontario, and unless the claimant has resided in the Province for three years prior to his first disablement.

Nova Scotia enacted a similar law in

1915, the section above quoted being adopted from the Ontario Act, the words "in writing," however, being omitted from the last clause. In 1919 the Nova Scotia Act was amended to include also the following diseases:

DESCRIPTION OF DISEASE.	DESCRIPTION OF PROCESS.
Subcutaneous cellulitis of the hand (beat hand).	Mining.
Subcutaneous cellulitis over the patella (beat knee) .....	Mining.
Acute bursitis over the elbow (beat elbow) ....	Mining.

Manitoba and British Columbia followed suit in 1916 by including in the scope of new Workmen's Compensation Acts the six occupational diseases listed in the British Act of 1906 and in the Ontario Act of 1914. In the Workmen's Compensation Act of Alberta, 1918, miners' phthisis is added to the other six diseases classed as industrial and subject to compensation, as though due to the happening of an accident. A similar act in New Brunswick in the same year also included industrial diseases as entitling workers to compensation "as if the disease were a personal injury by accident." No schedule of compensable diseases, however, is included in the act.

#### Compensation in United States

In the United States the scope of Workmen's Compensation for industrial accidents has been enlarged from time to time by the wider interpretation of Federal and State laws. Disabilities on the borderline between accidents and diseases, frost-bite, sunstroke, blood-poisoning, angina pectoris, hernia, etc., are often included, but occupational diseases as such are not generally, as in Great Britain, regarded as themselves of necessity entitling workers contracting them to compensation, unless such diseases can be connected with some definite injury received in the course of employment. There is, however, "something of

a tendency in favour of the inclusion of occupational diseases as entitled to consideration in a system undertaking to provide against the untoward consequences of industrial activities."\* Practice varies throughout the States. The Federal Act of 1908 provided compensation for employees "injured in the course of employment," without inserting the qualifying words "by accident." Interpreting this law, however, the Attorney-General of the United States said "the word 'injure,' as used in the statute, is in no sense suggestive of disease, nor has it ordinarily any such signification." On the other hand the Solicitor for the Department of Labour, construing the same statute, said the intention was clearly to provide compensation for loss of time caused by incapacity arising from employment, and the Commission administering the Act held that not only accidents but any bodily injury or disease causing unemployment, were covered by the Act.

In Connecticut the Supreme Court disallowed a claim under the laws of that state, for compensation for lead poisoning. But in this decision the court was not unanimous, one judge holding that the term "personal injury," as used in the Act, included all injuries whether arising from accident or from disease. The latter view was held also by a State

\*U.S. Bureau of Labour Bulletin No. 243, 1918.

district commissioner in allowing compensation to a plumber for the complaint known as "housemaid's knee," caused by working in a kneeling position for a considerable time. Lead poisoning, typically a disease of occupation, was held by the commissioner of industries of the State of Vermont to be non-compensable, and in Rhode Island a claim for compensation for neuritis contracted at work was over-ruled on the ground that this was an occupational disease and was not due to accident. In Massachusetts, on the other hand, the use of the term "personal injury" without the qualifying words "by accident" was held by the supreme judicial court so to broaden the law as to cover any bodily harm due to conditions of employment, compensation being no longer restricted to injuries caused by external violence or physical force. Thus lead poisoning, blindness due to the action of poisonous fumes, occupational neurosis due to the vibration of floors where a worker sat, neurosis sustained by a cigarmaker in the pursuit of his trade—such ailments have been regarded in this state as entitling workers to compensation. In some of these cases, however, judgment was reversed later by the Supreme Court. The Michigan law uses wording similar to that of Massachusetts, and the Industrial Accident Board of the state held that it should be so interpreted as to include occupational diseases such as lead poisoning. The Supreme Court of the State, however, took the opposite view, holding that "accidental injury" could not cover "occupational disease." The industrial commission of Ohio, interpreting the law of that state, restricted its application to injuries "other than those which can be classed as diseases," on the ground that the word "injury" in its ordinary and popular sense is understood to mean bodily harm and disability resulting from "some sudden and unexpected event." This adverse opinion was reversed by a trial court but was subsequently confirmed by the Supreme Court of the State. A similar view was taken by the courts in Texas, though the com-

pensation law there makes no mention of "accident" in its definitions. The state industrial commission of Colorado have held that industrial disease is not compensable, but in Illinois an undoubted case of industrial disease (numbness from constant vibration) was granted compensation. New Jersey refused compensation to a claim for an eczema due to acid used in a bleachery on the ground that this injury was "not due to an accident." A similar ruling was given in Wisconsin, where compensation was refused in lead poisoning cases, on the ground that this disease did not "follow so quickly and proximately from some specific condition in the employer's business that it could be included within the meaning of the word 'accident.'" Pennsylvania courts took an identical view of the claims of a worker for compensation for anthrax without evidence of any wound or cut, and of another worker for palsied wrist caused by inhaling acid fumes. In California compensation is not confined to injuries due to external, violent or accidental means. For example, the Industrial Commission has awarded benefits in the case of a traffic policeman who developed flat feet or broken arches from constant standing on the hard pavement. In those states where the compensation laws are interpreted as applying only to injury through accident considerable difficulty is evident in fixing the point at which a disease may be said to be due to an accident as its proximate cause. On this point it is said (U.S. Bulletin: Bureau of Labour Statistics, No. 203):

"It is a common rule that where, on account of pre-existing conditions, as of varicose veins, hardening of arteries, or incipient or latent tubercular, cancerous, etc., conditions, the employee is peculiarly liable to serious results from comparatively slight injuries, the employer takes his employee subject to the physical conditions he is in at the time he enters the employment; and even though the injury was in reality but an aggravation of existing conditions compensation must be paid where the injury actually caused

the disability of a person otherwise able to continue in employment."

#### France

By an amendment of October 25, 1919, certain specified occupational diseases were included in the accident insurance law of France. The employer is made responsible for such sickness occurring within a period of one year from the date on which the employee quits work; but that responsibility lessens in proportion to the length of time intervening

between that date and the date when incapacity starts. If during that interval the incapacitated worker has other employment in the same class of work, the last employer becomes jointly responsible. Employers becoming liable for compensation may relieve themselves of their liability by depositing the capitalized value of the pensions awarded with the National retirement fund. The diseases covered include all those due to poisoning by lead and its compounds and by mercury.

### THE "BUILDING TRADES PARLIAMENT" OF THE UNITED KINGDOM

#### Interim Report on Organized Public Service in the Building Industry

IN November, 1916, before the formation of the Whitley Committee, the twelve principal trade unions of the building industry in the United Kingdom laid before the building trades employers a constructive proposal for the general improvement of the industry, and for the advancement of industrial democracy. This proposal was approved on its merits, and in May, 1918, there was established in the United Kingdom an "Industrial Council for the Building Industry (Building Trades Parliament)". The Council, as described in the preface to its constitution,\* is "the outcome and expression of a desire on the part of organized employers and operatives in the Building Industry to render their full share of service towards the creation of a new and better social order." The building trades in the United Kingdom employ nearly one million men.

Shortly after its formation, the Council received official recognition by the British Ministry of Labour, and was entered in the official records as a Whitley

industrial council. It is claimed for it, however, that it has a wider purpose than that underlying the Whitley scheme, for while the latter seeks "a permanent improvement in the relations between employers and workmen," the Building Trades Parliament seeks "a new and better social order." The Council—or Parliament, as it is popularly called—consists of 132 members; sixty-six elected by the twenty-two trade unions of the building industry, approximately in proportion to their numerical strength, and sixty-six elected by the seventeen associations of building trades employers, roughly in proportion to the number of operatives normally employed by their members. It is claimed to be the only industrial council that has omitted the word "joint" from its title; that has set out to "realize the organic unity of the industry as a great national service"; and that takes decisions by a majority vote of the whole council, instead of requiring a majority of the council on both sides, which is the ordinary Whitley Council practice. This, according to Malcolm Sparkes, one of the originators of the plan, is a fundamental matter. "The Whitley councils," he

\*For Constitution and Rules, see "*Management and Men*," by Meyer Blomfield (The Century Co., New York, 1919).

says in *The Nation*, January 24, 1920, "as at present constituted, have recognized as permanent the very barrier between the two existing 'sides' in industry that the industrial parliament scheme was designed to break and that the Building Trades Council has already broken, at any rate to some extent."

Another unique feature of the Council is its absolute exclusion of labour disputes. Its functions are purely constructive. Disputes are dealt with, as heretofore, by the Building Trades Conciliation and Demarcation Boards, or by any other method deemed advisable, not excluding strikes. Neither does the Council arbitrate; but "although it cannot touch disputes," says Mr. Sparkes, "it can always bring forward constructive measures to remove their underlying cause."

Various committees have been appointed by the Council to consider and report upon various phases of the building industry. A synopsis of one of these reports follows.

#### **Report of Committee on Scientific Management and Reduction of Costs**

In August last, the Committee on Scientific Management and Reduction of Costs, composed of eight employers and eight operatives, presented an interim report on Organized Public Service in the Building Industry.\* The report is signed by all the operatives and three of the employers, the remaining five employers, while agreeing with some of the proposals, not seeing their way to sign it without reservations.

Early in their enquiry the committee became impressed with the immense possibilities lying latent in the self-governing idea of their Industrial Council, and at their first meeting they resolved unanimously to review the whole structure of the industry and endeavour to make recommendations of real service.

\*Organized Public Service in the Building Industry; being the Interim Report of the Committee on Scientific Management and Reduction of Costs appointed by the Industrial Council for the Building Industry. (Industrial Council for the Building Industry, 48 Bedford Square London, W.C.)

They saw the building industry as a great self-governing democracy welded together for organized public service, "uniting a full measure of free initiative and enterprise with all the best that applied science and research can render." They considered the whole trend of modern industrial development as already setting in this direction, the defects of other methods of control having been demonstrated by actual experience of control by the State and the "benumbing hand of bureaucracy," control by the municipality, by co-operative joint stock companies, and by individual private enterprise. "The great task of our Industrial Council," states the report, "is to develop an entirely new system of industrial control by the members of the industry itself—the actual producers, whether by hand or brain—and to bring them into co-operation with the State as the central representative of the community whom they are organized to serve. Nothing short of this will produce the full development of the 'team spirit' in industry, which is the key to the whole problem of production. . . . Real social organization must be founded on the truths of human nature: our hope for the future lies in the liberation and right direction of man's true generous qualities of good-will, enthusiasm and adventure."

**THE PROBLEM STATED:** The Committee admits the present restriction of output, and ascribes this to the following four main reasons: (1) the fear of unemployment; (2) the unwillingness of workers to make unrestricted profit for private employers; (3) lack of interest in the industry owing to non-participation in control; (4) inefficiency, both managerial and operative.

**UNEMPLOYMENT:** To ensure continuous employment it is proposed to supersede the old haphazard alternation of congestion and stagnation by regularizing the demand for building. This is to be done by accelerating or postponing new building work. The "decasualization" of labour during wet or bad sea-

sons might be furthered by arrangements with public authorities and other industries for "dovetailing" or seasonal exchanges of labour, such work as afforestation, road making, preparation of building sites, or demolition of condemned areas, being suggested as alternative work at periods of slackness. Failing other employment, it is claimed that both humanity and efficiency demand that the industry itself adequately maintain the operative and his family, thus removing the fear of unemployment due to causes outside his control. A great and vitalizing change and increased efficiency is looked for from such measures. The revenue for maintaining unemployed members would be raised by means of a fixed percentage on the wages bill, and paid weekly to the Employment Committee by each employer, with joint certificate of himself and a shop steward or other accredited Trade Union representative. The same fund would provide one week's summer holiday pay each year, to each registered member, at the same scale and from the same fund as the unemployment pay. All members of the industry, including the clerical, technical and managerial staffs, are included in this scheme. The question of remuneration for work done in other industries under the reciprocal arrangement referred to above, is recommended for further consideration. It is hoped that this scheme would ultimately relieve employers of their liability under the Workmen's Compensation and other such Acts, that it would supersede all Trade Union sickness and unemployment benefits, and that the industry would also obtain powers to contract out of the State insurance scheme.

**EMPLOYERS' PROFITS:** The committee found that existing schemes of profit-

sharing or co-partnership found little favour with the workers as being opposed to the principles of trade unionism and the solidarity of labour, but they anticipated that the opposition of labour would disappear when the surplus earnings of the industry go, not to individuals, but to some common service controlled by the industry as a whole. In this connection attention is called to the distinction often overlooked in the business of small building concerns, between the wages of management and the rate of interest on their capital. The committee recommends that managements should have adequate salaries based in the first instance upon existing rates of salary, subject to periodical revision by the Employment Committee in order to develop a recognized standard of remuneration.

**THE HIRING OF CAPITAL:** Following up the distinction between the remuneration of management, and interest on invested capital, the committee next deals with the treatment of capital under the Industrial Council. Besides regular and adequate pay or salaries both for operatives and management, they require as a condition of increased industrial efficiency that there should be a regular rate of interest for the hire of capital. Supervision, limitation of interest, and guarantees of security, form the "triple keystone" of the plan proposed. This is, that "approved capital, invested in the building industry, and registered annually after audit, shall receive a limited but guaranteed rate of interest, bearing a definite relation to the average annual yield of the most remunerative government stock." The guarantee would apply to all firms in the industry, except where failure to earn the required rate is declared by the com-

mittee, on the advice of the auditors, to be due to incompetent management. The committee recommends the regular employment of qualified accountants as regular assessors as between the builder, the whole body of producers, and the community as a whole.

**SURPLUS EARNINGS OF THE INDUSTRY:** These should be publicly declared every year, with a statement of the services to which the money was voted, and be held in trust by a National Joint Committee of the Industrial Council, and applied to the following common services:

- (a) Guarantee of interest;
- (b) Loans to firms in the industry;
- (c) Education and research for improvement of the industry, both independently and in co-operation with other industries;
- (d) Superannuation schemes for the whole registered personnel of the industry;
- (e) Replacement of approved capital lost through no fault of the management;
- (f) Any other purposes thought desirable.

Great importance is assigned to complete publicity as a means towards public confidence, and also ultimately to pave the way to the scientific adjustment of prices. "Industries are so intimately interdependent," the report says, "that any increasing well-being in one must ultimately lead to the benefit of the other and to the consumer in particular."

**CONDITIONS OF ENTRY INTO THE INDUSTRY:** Indiscriminate enrolment must be prevented by careful regulation, especially under the new attractive conditions. The industry must be kept under constant review by the Employment Committees, who will periodically notify Trade Unions as to the number of new members eligible after a suitable trade

test has been made, or evidence furnished of previous service. Applicants while on the waiting list should be afforded technical training. In connection with the admission of new employers, the Committee recommends that no loans be made from the Development Funds to new firms conducted by private enterprise. These must provide their own initial capital.

**SCIENTIFIC MANAGEMENT:** Under this head the committee treats of technical matters, such as correct systems of costing and accountancy (which to be generally applicable should be simple, elastic and accurate), the improvement of workshops, organization of operations with a view to the steady employment of operatives, and other points.

It is stated that there should be much more inducement to the most talented operatives to increase their efficiency and to undertake positions of greater responsibility. Finally, the extension of Works Committees is recommended as a medium for the exchange of specialist knowledge between the workers and the management.

In concluding their report the Committee again lay stress on the development of a "team spirit" in industry, "the fundamental basis of loyalty, enthusiasm and efficiency for a common aim," and anticipate that "the spectacle of organized management and labour, uniting their constructive energies upon a bold scheme of reorganization and advance, will transform the whole atmosphere of our industrial life."

The report was referred back to the Committee by the Council, with the recommendation that the committee "examine further the possible effects of the application of the principles it sets forth in the light of the criticisms which the present discussion has evoked."

## ECONOMIC EFFECT OF SHORTER HOURS OF EMPLOYMENT

THE December, 1919, issue of *Industrial Management* contains an interesting article on Fatigue and Industrial Efficiency, by Walter N. Polakov, consulting industrial engineer, New York. At various times Mr. Polakov has been employed in a consultative capacity by the Board of Estimate and Apportionment of the City of New York, by the United States Emergency Fleet Corporation, and by various railway companies, power companies, and industrial plants. The article in question deals particularly with the relations between the length of the working day, fatigue and the efficiency of operation in power houses. With respect to the economic effect of shortening hours, Mr. Polakov writes in part as follows:

"The six-hour workday advocated by Lord Leverhulme, in his opinion, 'can be applied forthwith with enormous gains in cost of production, provided the supply of raw material and of labour is available and the demand for products exists.' There could be no question of desirability and advantages of shorter hours in any industry where the overhead charges are equal or larger than the cost of wages. While in the case of a central power station the applicability

of this criterion alone may appear obscure, suffice it to remember, that a public utility or factory plant serves industry to a large extent. With shorter hours, shift work will become indispensable and consequently the idle time of expensive equipment provided for part time only will be greatly reduced.

"Again, in the power industry, may be shown clearer than in some others that shorter hours have other strong arguments for their adoption. A typical comment is to be found in a letter which the author received from an American engineer of note, manager of an industrial plant, written after the writer's suggestion to reduce two 12-hour shifts to three 8-hour shifts of firemen, with the same weekly pay to each man was on trial for some time:

We did carry out your recommendation on the reduction of hours of work for firemen and certainly have found this highly satisfactory.

We believe that the 8-hour shift pays us, for the following:

1. We have been able to get and hold good firemen.
2. While we have not the accurate data to support this, we feel satisfied that there is a saving in coal.
3. Our variations in steam pressure have been practically eliminated."

## NATIONAL CONFERENCE OF EMPLOYERS AND EMPLOYEES OF SOUTH AFRICA\*

A NATIONAL Conference of Employers and Employees, which was called by the Government of the Union of South Africa, was held at Pretoria on November 3-7, and a second session was held on December 8-11. Delegates were present from all parts of the country representing every class of employers, manufacturing, mining, state, municipal, commercial, etc., and various labour or-

ganizations and other associations of employees.

The following resolutions among others were unanimously carried by the Conference:

This Conference is of opinion that free recog-

\*Reports of similar national conferences appeared in the following issues of the LABOUR GAZETTE: United Kingdom, May, 1919, p. 568; Canada, October, 1919, p. 1172; United States, November, 1919, p. 1306.

dition of Employees' Organizations by employers of labour would tend to allay industrial unrest, and is further of opinion that legislation should be introduced giving effect to this principle.

That in the opinion of this Conference the Government should immediately introduce legislation providing for the registration of voluntary Industrial Agreements entered into between representative bodies of employers and employees in any industry, and the application of the terms of such agreements to the whole of the persons engaged in that industry, either locally or throughout the Union as required.

This Conference is of opinion that the establishment of Joint Boards provides the best means for the regulation and constant exchange of views between employers and employees, and considers that in each industry, commercial undertaking, and public institution, there should be formed Local Joint Boards, subject to the control of District or Provincial Boards, which in turn must be responsible to a National Joint Board.

This Conference is further of opinion that the method of selection of representatives on the various joint boards, conferences, etc., representing both employers and employees, should (except in the case of employers' representatives in Government Departments) be entirely in the hands of the unions or organizations concerned, where such exist, and should be free from Government direction or ratification direct or indirect.

This Conference desires that legislation be introduced to establish the principle of a minimum wage based on a minimum standard of living.

This Conference endorses the principle of equal payment for equal work, irrespective of the sex of the person performing such work.

In the opinion of this Conference the adequate and comfortable housing of the workers has an important bearing on production and national efficiency, and where housing is inferior or inadequate, steps should be taken by the Government to provide the necessary houses by means of a National Housing Scheme.

This Conference approves the principle of a half-holiday on one afternoon per week in all trades, industries and occupations where such is feasible, and recommends that where practicable the holiday should be on Saturday afternoon.

This Conference is of the opinion that the present high cost of living is detrimental to the State in that it places a very heavy burden on all wage-earners and others with limited incomes, thereby causing anxiety to many members of the community and aggravating unrest. This Conference therefore urges upon the Government the need for legislation to limit profits on the necessities of life.

That this Conference affirms the necessity for an Act for the regulation of apprenticeship;† it accepts generally the principles laid down in the draft Apprenticeship Bill prepared by the Sub-Committee, and recommends that the Government be requested to call a meeting composed of the members of the Conference Apprenticeship Committee together with such other members as may be necessary to carry this resolution into effect. Any addition to the existing Committee to be made with due regard to the preservation of the proportions of representatives at present existing.

A number of other resolutions were carried on division. These included ones in favour of nationalization of industries; a forty-eight hour week as a maximum for any industry, with a forty-four hour week wherever practicable, and a forty-hour week for workers in underground or hazardous occupations, for the application of minimum wage legislation on national lines, with stringent penalties for any infringement of the law; for the abolition of systematic overtime in any industry, and the payment for any necessary overtime at enhanced rates; in favour of legislation to provide a complete scheme of registration for all unemployed persons.

†An article on the regulation of apprenticeship in South Africa appeared in the LABOUR GAZETTE, March, 1919, pp 315-6.

## REPORT OF THE EMPLOYMENT SERVICE OF CANADA FOR THE FOUR WEEKS' PERIOD, JANUARY 4-JANUARY 31, 1920

**R**EPORTS for Employment Offices to the Dominion Headquarters of the Employment Service of Canada, Department of Labour, show a substantial increase in the number of placements during the four weeks from January 4 to January 31, the number of placements recorded being 21,753 as compared with 15,923 during the preceding four weeks.

The following table presents in summary form by Provinces, a revised record of placements from the beginning of March, 1919, to January 3, 1920, covering the operations of the Service for the ten months of the year 1919, during which it was in existence. As has been indicated in previous issues of the *LABOUR GAZETTE*, regular placements refer only to those applicants for whom the employment found was likely to be of more than one week's duration, while casual placements refer to those applicants where the employment found was likely to be of less than one week's duration. It will be observed that the number of regular placements from the beginning of the record until January 3, was 267,968, or at the rate of 6,090 per week, while the number of casual placements for the same period was 37,905, or a weekly average of 861. From March 1, 1919, to January 3, 1920, the number of vacancies notified to the Service was 373,866, the number of applications for employment during the same period totalled 370,782.

During the period under review, January 4 to January 31, the regular placements were distributed as follows:

Week ending January 10—5,808

Week ending January 17—5,262

Week ending January 24—5,450

Week ending January 31—5,204

The following table shows in detail the work of the various offices during the four weeks from January 4 to January 31. At the beginning of the period there were 18,895 unplaced applicants as compared with 8,362 unplaced applicants at the beginning of the preceding four weeks, while at the same time there were 12,036 unfilled vacancies as compared with 13,107 unfilled vacancies at the beginning of the preceding period. This would indicate that there was a substantial increase in the number of unplaced applicants, and that these applicants were in a less favourable position regarding opportunities for employment than at the beginning of the preceding period, the number of vacancies having decreased. During the four weeks, 46,866 new applications and re-applications, were registered, while during the same time 26,858 vacancies were notified, an excess of applications over vacancies of 19,978. Corresponding figures for the preceding four weeks' period were 36,899 and 22,194, an excess of applications over vacancies of 14,705. The large excess of applications over vacancies as reflected in the present returns, while partly seasonal in character, is also the result of increased registration under the Federal Emergency Appropriation.

The accompanying chart shows graphically the number of applications and vacancies registered, as well as the number of placements made over the period of the record. The chart indi-

cates that for the period under review, (previous periods having been reviewed in corresponding issues of the LABOUR GAZETTE) there was a marked rise in the number of applications registered during the first week of the period, the number reported during the week ending January 10, being 14,020, which represents the largest number of applications so far registered with the Service, during any one week. Though succeeding weeks of the period showed a falling off from this peak, the number of applications for the period under review remained substantially higher than that registered during any preceding period.

The number of vacancies likewise showed a marked rise during the first week of the period, the peak for the period being reached during the second week after which time there was a decrease in the number of vacancies reported. The total number of vacancies was considerably higher, however, than during the preceding period. The number of placements is previously indicated, also showing a marked increase, the highest number reported being for the week ending January 10. The fluctuation of succeeding weeks represents largely the effect of the adverse weather conditions, particularly in the Maritime and Prairie Provinces.

EMPLOYMENT CONDITIONS IN CANADA DURING THE PERIOD  
JANUARY 11-FEBRUARY 7, AS REPORTED BY EMPLOYERS

**W**EEDLY reports from employers to the Dominion Headquarters of the Employment Service of Canada, Department of Labour, during the four weeks from January 11 to February 7 show that increases in the volume of employment were registered during the period, especially noteworthy increases being registered during the first two weeks.

The following chart shows weekly the percentage increases or decreases in the volume of employment for the full period of the record of March 22

until February 7. As formerly, the chart presents a series of percentages each percentage recording the increase, or decrease in the volume of employment during the week as compared with the preceding week. As the number of firms reporting varies from week to week, no attempt should be made to read the chart as a cumulative record. The chart indicates that substantial recovery took place during the period under review from the losses registered during the preceding inventory and holiday period. The large increase

which characterized the closing week of the preceding period was also found during the first two weeks of the period under review. Increases, but of a smaller character, were likewise registered during the latter two weeks of the period. The changes recorded were:

Week ending January 17—an increase of 1.1 per cent.

Week ending January 24—an increase of 1.0 per cent.

Week ending January 31—an increase of .1 per cent.

Week ending February 7—an increase of .3 per cent.

Reports from the various districts indicate that, with the exception of the Maritime Provinces, conditions were substantially the same throughout Canada. The Maritime Provinces reported an increase in only one week, that of January 24, decreases being registered in the other three weeks, reflecting generally adverse weather conditions. Quebec registered increases during all four weeks, likewise Ontario. Increases, but of a less sub-

stantial character, were registered by the Prairie Provinces. British Columbia, with the exception of the week ending January 31, registered substantial increases.

Summarizing the returns by industrial groups, Clay, Glass and Stone Products, Chemicals, Metals and Wood-working registered increases during all four weeks, the most substantial increase being registered by the Metal group. Lumbering, Leather and Leather Goods, Textiles, Pulp, Paper and Printing, Vehicles, Quarrying and Mining, Railway Construction, Railway Operation and Miscellaneous Industries registered increases taking the period as a whole, while losses were registered during individual weeks.

Commercial and Mercantile, and Food and Drink and Tobacco, while registering increases during individual weeks, registered decreases, taking the period as a whole into consideration. Building and Construction, on the other hand, registered decreases during all four weeks.

### UNEMPLOYMENT IN TRADE UNIONS AT THE CLOSE OF JANUARY, 1920.

THE present article on unemployment among the members of local trade unions deals with unemployment as at the end of January, 1920, and is based on returns received from 1,428 labour organizations with a total membership of 173,161. For all occupations reporting, 4.28 per cent of the members were unemployed as compared with 4.98 per cent in December, 1919, and

with 3.94 per cent in January, 1919. Unemployment as used here has reference to involuntary idleness due to economic causes. Persons occupied in work other than their own trades or who are idle because of sickness or as the direct result of strikes and lock-outs, are not considered as unemployed.

That the percentage out of work at

the end of January was slightly smaller than at the end of the preceding month, was due to there having been more employment for transportation workers, particularly in the navigation subgroup, and also for workers in the building and construction group.

Tables I and II on page 325 summarize the returns by districts and provinces. Quebec and British Columbia showed less unemployment than in December, while the Maritime Provinces, Ontario, and the Prairie Provinces registered more idleness. The increases, however, in the Maritime and Prairie Provinces were nominal. Individual decreases in the percentage of unemployment were registered in New Brunswick, Manitoba and Saskatchewan, in addition to Quebec and British Columbia mentioned above. As compared with the returns for January, 1919, Ontario alone showed improvement in employment, less activity having been recorded in the other districts and also by the individual provinces.

Unemployment in the manufacturing and mechanical industries as reported by 378 unions having a combined membership of 50,778, was slightly more prevalent than at the end of December, 2.96 per cent of the members having been unemployed as compared with 2.79 per cent in the preceding month. In comparison with the figures for January, 1919, however, there was a slight improvement shown, 3.32 per cent of the members having been reported idle in that month. The percentage unemployed in the metals, machinery and conveyance group was somewhat larger than in either December, 1919, or January, 1919, largely due to continued and increased shortage

of steel. There was more activity for workers in the food, tobacco and liquors, textiles, carpets and cordage, pulp, paper and fibre, leather, boots and shoes and oil refinery groups than in either of the months used in this article for comparative purposes. The percentages unemployed among tradesmen in the clothing and laundering and woodworking and furniture groups were slightly larger than in the preceding month. They were, however, smaller than in January, 1919. Workers in printing, publishing and paper goods, glass bottle blowing and jewelry industries were less well employed than in either month here used for comparison. Considerable short time was reported by unions of boilermakers, machinists, iron, steel and tin workers, meat cutters, bakers and confectioners, pulp and paper makers, typographers, pressmen, tailors, boot and shoe workers, and glass bottle blowers.

Reports from 571 organizations of transportation workers, having a total membership of 65,170 indicated that 2.73 per cent of the members were unemployed, as compared with 5.03 per cent in December and 2.02 per cent in January, 1919. There was slightly more unemployment among steam railway employees (whose returns constituted nearly 75 per cent of the entire membership reporting) than in either the preceding month or in the corresponding month of 1919. This slackness was largely attributable to continued seasonal unemployment for maintenance of way employees. Some engineers, firemen, carmen, trainmen, and maintenance of way employees also reported considerable short time. Street and electric railway employees, and teamsters and chauffeurs, were more fully engaged than in both December and

January, 1919. There was considerably more employment for navigation workers than in the preceding month, but the percentage unemployed was larger than in January, 1919.

In the mining quarrying and refining of ores group, reports were received from 37 unions with an aggregate membership of 11,115 and show that .84 per cent of the members were unemployed as compared with 2.10 in December, 1919, and with 1.42 per cent in January, 1919. Employment for miners showed more activity than in the preceding month, and also than in January of last year. Quarry workers continued to be well employed. The percentage unemployed among mill and smelter men was slightly less than in December, while in January, 1919, no members of these unions were reported as unemployed.

The percentage out of work in the building and construction groups as reported by 238 organizations having a combined membership of 27,624 was 11.77 as compared with percentages of 12.06 in December and 16.29 in January, 1919. Tradesmen in this group continued to be affected by the severe weather prevailing throughout the country, particularly at the end of January, which made outside work practically impossible. Unemployment in the shipyards in British Columbia also added to the number out of work, especially among carpenters and joiners. Members of these unions, however, were better employed than in December or in January, 1919. The same is true of electrical workers, granite and stone cutters, tile layers, lathers and roofers. The percentage unemployed among bricklayers, masons and plas-

terers was slightly larger than in the preceding month. In comparison, however, with the returns for January, 1919, substantial improvement was shown, the percentage unemployed in that month having been considerably larger. Painters, decorators, and paperhangers, plumbers and steamfitters, hod carriers and building labourers showed more members idle than in December or January, 1919. Bridge and structural iron workers and steam shovel and dredgemen reported slightly less unemployment than at the end of the preceding month, but the percentages out of work in these unions were larger than in January, 1919. There was considerable short time reported by unions of bricklayers, masons, and plasterers, carpenters and joiners, painters and decorators and paperhangers, and plumbers and steamfitters.

In the public employment group, as reported by 72 unions having a total membership of 6,614 the percentage out of work was .68, as compared with unemployment percentages of .91 and .33 respectively, in December and January, 1919. Civic employees were slightly better employed than in the preceding month, but the percentage out of work was larger than in January of last year.

Unemployment in the group of miscellaneous trades, as indicated by returns received from 129 unions with 11,385 members, was more prevalent than in December or in January, 1919. Increases in the percentages of unemployed were reported by barbers, stationary engineers and firemen, and unclassified workers. Retail clerks and hotel and restaurant employees were

more fully engaged than in the preceding month and also than in January, 1919. Musicians and theatre employees reported a slight decrease in unemployment as compared with December, but the percentage was larger than in January of last year. Some unions of barbers, musicians, and theatre employees and stationary engineers, in addition to the members entirely unemployed, reported some short time.

The percentages reported idle in the different groups of occupations are indicated in Table III on page 326.

The percentages reported idle in some larger industrial centres are indicated in Table IV.

The tabular statement on pages 328-9 presents the returns in some detail.

## EMPLOYMENT FOR CIVIC EMPLOYEES IN FIFTEEN CITIES, JANUARY, 1920

THE table given below shows the number of workers temporarily engaged by fifteen city corporations, and the wages paid these persons during the month of January. These statements were formerly published on a fortnightly basis, but commencing with the returns for January, it is planned to show the returns for the entire month. The reports indicate that increases of nearly 13 per cent in the number of workers, and of over 15 per cent in the wages paid, were registered during January as compared with December. In January, 8,776 persons were temporarily employed, and the wages amounted to \$675,698.56 as compared with 7,789 employees, and an ag-

gregate payroll of \$586,890.60 during December. In comparison with the figures for January, 1919, increases of nearly 20 per cent in the number of workers, and over 31 per cent in the wages paid are shown, there having been 7,341 employees with a total payroll of \$513,986.91 in January of last year.

Montreal, London, Brandon, Moose Jaw and Victoria reported increases in the number of employees both as compared with the preceding month and with the same month in 1919. St. John and Saskatoon registered increases as compared with December, and declines in comparison with January, 1919. Ottawa, Toronto, Hamilton, Winnipeg, Regina,

EMPLOYMENT (BOTH CONTRACT AND MUNICIPAL WORK) AFFORDED WORKPEOPLE TEMPORARILY EMPLOYED BY FIFTEEN CITY CORPORATIONS, JANUARY, 1920, COMPARED WITH DECEMBER, 1919, AND WITH JANUARY, 1919.

Total.....	7,789	8,776	7,341	\$ 586,890.60	\$ 675,698.56	\$ 513,986.91

Edmonton, Calgary, and Vancouver, on the other hand, showed declines in comparison with December, and increases as compared with January, 1919. Calgary recorded decreases in both comparisons.

As to wages, St. John, Montreal, Ottawa, Toronto, Hamilton, London, Moose Jaw, Calgary and Victoria, reported increases, both as compared with December

and with January, 1919. Saskatoon showed an increase as compared with the figures for the preceding month, and a decline in comparison with the returns for January of last year, while Winnipeg, Brandon, Regina, Edmonton, and Vancouver, recorded decreases in comparison with the returns for December, and increases as compared with the January reports.

---

#### EMPLOYMENT IN THE BUILDING TRADES DURING JANUARY, 1920, AS INDICATED BY BUILDING PERMITS

THE table given below shows the volume of employment in the building trades during January as indicated by the value of building permits issued in 50 cities and towns. For some years the Department of Labour has received regular reports from 35 cities whose populations when the table was first prepared were 15,000 or over. Recently, however, it has been decided to enlarge the scope of this report, and commencing with the January figures, the Employment Service, with the co-operation of the city officials, is able to publish statements from 50 municipalities having a population of 10,000 and over. For the convenience of those who are following the record of the value of permits issued since 1910 the total and the comparisons for the original 35 cities are given at the foot of the table, the cities included in this total being marked with an asterisk. As compared with the figures for December, 1919, the total value of building permits issued during January in the 50 cities showed a decrease, the value falling from \$5,056,198 in December, 1919, to \$3,956,247 in January, 1920, a

decline of \$1,099,951, or 21.8 per cent. Alberta and British Columbia were the only provinces to show increases in this comparison.

As compared with the corresponding month in 1919 there was an increase of 239.2 per cent, the value for January, 1919, having been \$1,163,316. Increases in this comparison were shown in all the provinces except in Manitoba, where there was a slight decline, and in Prince Edward Island where no permits were issued in this month of either year.

Of the larger cities, Vancouver recorded substantial increases both as compared with the preceding month and also with January, 1919. Montreal and Toronto reported declines as compared with December, 1919, but large increases were registered as compared with January, 1919. Winnipeg and Edmonton recorded decreases in both comparisons. Of the smaller centres, Quebec, Three Rivers, Brantford, Sarnia, Windsor and Calgary recorded large increases both as compared with December and with January, 1919.

## ESTIMATED COST OF BUILDING WORK AS INDICATED BY BUILDING PERMITS ISSUED IN FIFTY CITIES.

## BUILDING CONSTRUCTION IN CANADA DURING 1918 AND 1919

THE statistics in the following tables supplied by the MacLean Daily Reports, Limited, show the value of buildings, bridges, and other engineering works in Canada, the construction of which was begun in each of the years 1918 and 1919. For purposes of com-

parison the Dominion is divided into four parts, Maritime Provinces, Quebec, Ontario and Western Provinces. In each of these localities there are shown the values of residential, commercial and industrial structures, bridges, and other engineering works.

From the above tables it may be seen that in the Maritime Provinces there was a decline in building construction of \$4,392,700 in 1919, compared with the preceding year, while in all other parts of Canada there was a great increase in construction, Ontario leading with an advance of \$53,971,600 (from \$33,385,200 to \$87,356,800, followed by Quebec with an increase of \$31,635,100 (from \$23,631,700 to \$55,266,800), and the Western Provinces which showed an increase of \$8,686,200 (from \$19,634,900 to \$28,321,100). There was a marked increase in the building of residences and commercial structures in all four districts, but there was a decline in the value of industrial plants and engineering works built in the Maritime and Western Provinces. The following table gives a general summary of building construction for the whole of Canada in each of the past two years:

SUMMARY OF BUILDING CONSTRUCTION IN CANADA DURING 1918 AND 1919.

## RECENT INDUSTRIAL AGREEMENTS

THE following is a summary of the more important industrial agreements recently received by the Department. While the conclusion of every industrial agreement implies the acceptance, to a greater or less degree, of the principle of collective bargaining, it should not be overlooked that in a number of cases the agreement was reached only after the employees had been on strike. The agreements are arranged by industrial groups.

### Fishing and Hunting

PORT STANLEY, ONT. — CANADIAN GREAT LAKES FISHERIES PROTECTIVE ASSOCIATION AND VARIOUS FISHERMEN IN THEIR EMPLOYMENT. Agreement made for the fishing season of 1919.

Wage Scale: Per day—Beginning the first day of March, 1919, men to receive \$3.50 and 5 cents per hundredweight commission on all fish caught until the 15th day of July, when men shall receive \$4 and 5 cents per hundredweight commission until the first day of November, when men shall receive \$5 and 5 cents per hundredweight commission until the end of the season. There is no overtime in this agreement, the five-cent commission having taken its place.

### Building and Construction

WINDSOR, ONT.—INTERNATIONAL BROTHERHOOD OF ELECTRICAL WORKERS, NOS. 58 AND 773, AND ELECTRICAL CONTRACTORS OF WAYNE COUNTY, MICH., AND ESSEX

COUNTY, ONT. Agreement in effect from May 1, 1919, to April 30, 1920.

Forty-four hours shall constitute a week's work, to be put in as follows: 8 hours each work day between the hours of 7.30 a.m. and 4.30 p.m. All over 8 hours per working day, Sunday, Decoration Day, 4th of July, Labour Day, Thanksgiving Day, Christmas Day and New Year's Day, and Saturday afternoon shall be considered as overtime, and shall be paid for at the rate of double time, with the exception of Saturday afternoon, and that to be paid for at the rate of time and one-half.

Wages for journeymen shall be: Per hour—93¾ cents to September 30, 1919, and from October 1, 1919, \$1; helpers, 50 cents.

Those working in jurisdiction of Local Union No. 773, shall observe holidays mentioned above, except Decoration Day and July 4th, which are substituted by May 24th and July 1st.

#### Metals and Machinery

TORONTO, ONT. — IRON MOULDERS' UNION, No. 362, AND THE ASSOCIATED STOVE MANUFACTURERS. Agreement signed January 6, 1920, provides that there must be no more changing of board prices in any manner, except by mutual agreement, but in the case of the Empire Stove Company of Owen Sound this resolution applies only to such patterns on which the prices were revised in March, 1919, and to such of their patterns as have been priced since that date.

When members of the Associated Stove Manufacturers shall desire a general reduction in the rate of wages, or the moulders' union an advance, they shall each give the other at least thirty days' notice before the end of each year which shall commence on January 1. If such notice be not given, the rate of wages current during the year shall be the rate in force for the succeeding year. Notice to be given in writing to the business agent of the I.M.U. and to the chairman of the Associated Stove Manufacturers.

The established minimum day wage for all day work moulders shall be \$6.10.

KINGSTON, ONT.—CANADIAN LOCOMOTIVE COMPANY, LIMITED, AND FEDERAL LABOUR UNION, No. 15959, A. F. OF L. Agreement in effect from October 26, 1919, to June 15, 1920.

The company agrees to establish a 45-hour week to be worked in five shifts of nine hours on first five days of the week. Any work performed on Saturdays shall be at overtime rates. All employees represented by the American Federation of Labour, Union No. 15959, shall receive the same amount per 45 hours as they have in the past for 50 hours. Subject to the above conditions all terms and arrangements covered by former agreements with the Federal Labour Union No. 15959 shall continue during the life of this agreement.

#### Pulp and Paper

THOROLD, ONT.—THE ONTARIO PAPER COMPANY, LIMITED, AND THE INTERNATIONAL BROTHERHOOD OF STATIONARY FIREMEN AND OILERS. Agreement in effect from May 11, 1919 to May 11, 1920. This agreement to cover men employed in steam plant.

Operation of paper mill shall be six days per week from 7 a.m. on Monday to 7 a.m. Sunday, except when required to keep up steam for heat on Sundays and holidays.

The schedule for hours for tour workers shall be Monday from 7 a.m. to 4 p.m., 4 p.m. to midnight, midnight to 8 a.m.; Tuesday, Wednesday, Thursday and Friday from 8 a.m. to 4 p.m., 4 p.m. to midnight, midnight to 4 a.m.; Saturday from 8 a.m. to 4 p.m., 4 p.m. to midnight, midnight to 7 a.m. Any hour workers required to work between 7 a.m. on Sunday and 7 a.m. on Monday shall receive time aid one-half for all such work.

Dominion Day (32) hours, Labour Day (24) hours, and Christmas (40) hours, shall be holidays, on which no unnecessary work shall be performed. For all necessary work done upon these holidays, time and one-half shall be paid. When the business of the Company will allow of it, there shall be a fourth holi-

day, same to be determined by the local and the management\*

Wage Scale: Per hour—head firemen, 50 cents, second firemen, 52 cents; labourers, 46 cents. Each fireman shall tend three furnaces.

Any grievance or complaint shall be reported by the organization to the superintendent.

### Printing and Publishing

VANCOUVER, B.C.—THE VANCOUVER BOOKBINDERS' UNION, No. 105, AND THE EMPLOYING PRINTERS. Agreement to take effect January 1, 1920, and to remain in force to December 31, 1920.

The minimum rate of wages for journeymen: Per week—\$19.50 from January 1, 1920, to August 31, 1920, and \$20.25 from September 1, 1920, to December 31, 1920. Forty-eight hours shall constitute a week's work and shall be performed between the hours of 7.45 a.m. and 5.45 p.m. Monday to Friday inclusive, and from 7.45 and 12.15 p.m. on Saturday.

Overtime up till 10 p.m. and Saturday afternoons shall be charged at the rate of time and one-half. After 10 p.m., and on Sundays, New Year's Day, Good Friday, Empire Day, Dominion Day, Labour Day, Thanksgiving Day, Christmas Day, shall be charged double time.

Girls entering the trade must serve six months in the shop before becoming registered apprentices. Apprentices shall serve three years at the trade and shall not commence their apprenticeship under the age of sixteen years.

Scale of Wages of apprentices: Per week—\$10.00 to commence, with an increase every six months as follows: end of first six months, \$11.00; end of first year, \$12.00; end of 1½ years, \$13.00; end of two years, \$15.00; end of 2½ years, \$17.50 end of three years—scale per week.

Apprentices shall not be allowed to work overtime except when journeymen are working.

CALGARY, ALTA.—INTERNATIONAL TYPOGRAPHICAL UNION, No. 449, AND THE

PRINTERS OF CALGARY. Agreement in effect from May 1, 1919 to April 30, 1920.

Hours and wages: (day work)—(1) Day work shall consist of work done between the hours of 6 a.m. and 6 p.m. (2) A day's work shall consist as per agreement now in operation. Forty-five hours to constitute a week's work. Lunch time to be not more than 1 hour, nor less than 45 minutes. (3) The foreman of an office or his representative shall fix the hour for work to begin. Notice of change of time shall be posted in the office at least 24 hours before becoming effective, except in case of emergency.

Wage scale: Per week—Machinemen and machinists, except as herein and otherwise provided, shall receive not less than \$35. Foremen, make-ups, bankmen, head men, proofreaders, ad men and employees engaged in hand composition and distribution, except as herein otherwise provided, shall receive not less than \$35.

Overtime shall be paid for at the rate of price and one-half for the first three hours, double time thereafter. Sunday double time. All statutory holidays shall be paid for at the rate of double price.

Hours and wages: (night work)—Night work shall consist of work done between the hours of 6 p.m. and 6 a.m. A shift, part day and part night, shall be paid for as night work. A night's work shall consist of 7½ continuous hours, exclusive of lunch time, such time to be not more than one (1) hour, nor less than 45 minutes. Forty-four hours to constitute a week's work.

Wage Scale: Per week—Machinemen and machinists, except as herein otherwise provided, shall receive not less than \$37. Foremen, make-ups, bankmen, head men, proofreaders, ad men and employees engaged in hand composition and distribution, except as herein otherwise provided, shall receive not less than \$37. Overtime shall be paid for at the rate of price and one-half for the first three hours, thereafter double time, Saturday night, double time. All statutory holidays shall be paid for at the rate of double price. Beginners on machines (night or day work) shall receive the following rate of wages: Per week—For

the first five weeks, \$15; for the next five weeks, \$20; and for the next five weeks, \$28; and thereafter the scale as provided for above. An apprentice shall receive for the second year of his apprenticeship, one-third of the journeyman's scale; for the third year, one-half of the journeyman's scale; and for the balance of his term, two-thirds of the journeyman's scale. He shall work no more than the daily time specified in this scale in any one shift, nor more than six (6) days a week.

VICTORIA, B.C.—PRINTING PRESSMEN AND ASSISTANTS' UNION, No. 79, AND LOCAL EMPLOYERS. Agreement in effect from January 1, 1920, to December 31, 1920, and so far as working conditions are concerned for three years, and thereafter until terminated by either party by a previous two months' notice in writing. If sixty days' notice is not given contract to run another year.

Forty-eight (48) hours shall constitute a week's work on morning and evening newspapers. One day shall be the shortest period for which a member of this union shall accept pay. Foreman of morning and evening papers shall receive not less than 75 cents per day over the scale of journeymen. The hours of labour shall be not more than forty-eight (48) in any one week. All members of this union employed on newspapers (except apprentices and those provided for above) shall be paid at the following rates: Per week—day work shall be paid for at the rate of \$40.50; night work shall be paid for at the rate of \$44.10.

Overtime shall be paid for at the rate of time and one-half. Work done on Labour Day, Christmas Day and Sundays after the regular edition, shall be charged double price. Work on New Year's Day, May 24, Dominion Day, Thanksgiving Day, shall be charged price and one-half; provided, newspapers may work a 5-hour day for a full day's pay on the holidays stated as price and one-half. When a holiday falls on a Sunday, Monday shall be considered the holiday, but the chapel may arrange with the management to take another day. The

scale of wages for apprentices shall be as follows: First year, \$12; 2nd year, \$14; 3rd year, \$18.80; 4th year, \$24; 5th year, \$30. Nothing in this section shall prevent an apprentice from receiving an increase every six months based on the above rate.

SAULT STE. MARIE, ONT. — TYPOGRAPHICAL UNION, No. 702, AND LOCAL EMPLOYING PRINTERS. Agreement in effect from December 1, 1919, to April 30, 1921.

Eight hours shall constitute a day's work, and 7½ hours a night's work. Six days or six nights shall constitute a week's work.

Scale of wages: Per week—Hand compositors, make-ups, and journeymen not otherwise specified in this scale shall receive not less than \$26 for day work and not less than \$28 for night work. Machine operators shall receive not less than \$26 for day work and not less than \$28 for night work. The scale for apprentices: Per week—First year, \$6; second year, \$8; third year, \$10; fourth year, first 6 months, \$12; second 6 months, \$14; fifth year, first 6 months, \$16; second 6 months, \$18. All work performed by day or night shifts beginning on Sundays or holidays shall be paid for at double price. Employees given less than half a day's work shall be paid for a half day, over a half day and not a full day, a full day's pay.

Scale for learners, members of the union: Per week -- First month, \$24; second month, \$24; third month, \$25.

STRATFORD, ONT. — TYPOGRAPHICAL UNION, No. 139, AND THE EMPLOYING PRINTERS OF STRATFORD. Agreement in effect from August 1, 1917 to August 1, 1920.

Scale of wages: Per week—Foremen, \$19; hand compositors, stone hand, etc., \$17; operators, machinists, and machinist-operators, \$18. Apprentices—First year, \$4; second year, \$5; third year, \$6; fourth year, \$7.50; fifth year, \$9. The working week to consist of forty-eight hours, or eight hours per day, to be between 7 a.m. and 6 p.m. Provided that

should it be mutually agreed between any employer and his employees that the working hours on Saturday or any other day shall be less than eight hours, the number of hours less may be distributed among other days of the week. All work over eight hours in any one day (except as provided above) and all work on Sundays and public holidays shall be paid at the rate of time and one-half.

Apprentices are not to be eligible as learners on linotype or other composing machines until they have served three years of their apprenticeship and then without displacing regular operators.

It is agreed between the parties to this agreement that any difference arising which they cannot settle shall be submitted to a board of arbitration consisting of one representative each of the union and of the employer or employers, and a third person who is satisfactory to both parties, or who in event of difference may be chosen by the two representatives already chosen, and both parties shall abide by the decision of the said Board of Arbitration.

ST. JOHN, N.B.—THE BOOK AND JOB PRINTERS AND THE ST. JOHN PRESSMEN'S UNION. Agreement in effect from January 1, 1920, for one year.

Scale of wages: Cylinder pressmen, \$30; cylinder feeders, \$20; platen pressmen on four presses, \$30; on three presses, \$28; on two presses, \$26. Apprentices shall serve four years. The first six months an apprentice shall receive \$8, the second six months, \$9, the first six months of the second year, \$11, the second six months of the second year, \$13, the third year, \$15, and the fourth year \$18. He shall then be entitled to a journeyman's place in the office in which he is employed, provided there is a journeyman's place vacant.

Time and one-half shall be paid for work on Christmas Day, July 1, and Labour Day. Double time for work on Sundays. All other overtime to be charged at time and one-half. Eight hours to constitute a day.

Should any misunderstanding arise as to the meaning of this agreement the

question at issue must be settled by a Board of Arbitration, such Board to consist of one man nominated by the Union, and one by the employer, these two to choose a third. An award by this Board of Arbitrators shall be binding on all parties concerned.

SHERBROOKE, QUE.—LA TRIBUNE PUBLISHING COMPANY, LIMITED, AND THE SHERBROOKE DAILY RECORD COMPANY, AND THE TYPOGRAPHICAL UNION, No. 672. Effective from September 1, 1919, to August 31, 1920.

The minimum rates of wages for floor men and make-up men, linotype operators, monotype operators, linotype machinists, monotype machinists and monotype combination operators and caster men shall be as follows: Per week of 48 hours, the hours of work to be between 7 a.m. and 6 p.m. except Saturday when work shall cease not later than 1 p.m.:—September 1, 1919, to August 31, 1920, \$23; September 1, 1920, to August 1, 1921, \$24. September 1, 1921, to August 31, 1922, \$25. All overtime will be paid for on the basis of time and one-half until midnight and double time after midnight. Double time for Sundays and all statutory holidays

Apprentices may be employed in the ratio of one to every four journeymen, members regularly employed, provided that no office shall be entitled to an apprentice unless at least one journeyman aside from the proprietor, shall be regularly employed in the composing room.

The scale for apprentices is as follows: First year, \$5; second year, \$7; third year, \$10; fourth year, \$14; fifth year, \$18. Learners on machines shall receive three-fourths of the prevailing journeyman's scale.

#### **Food, Liquors and Tobacco**

PETERBOROUGH, ONT.—THE MASTER BAKERS AND BAKERY AND CONFECTIONERY WORKERS' INTERNATIONAL UNION, No. 281. Agreement in effect from June 20, 1919, to June 30, 1920. Terms to consist of eight hours per night with exception of Friday night which shall consist of ten hours for all employees working night

work, and nine hours per day for all employees working day work, each day and night to consist of eight and nine hours respectively with exception of Friday night.

Wage scale : Per week — Bread and confectionery foremen, \$30 ; ovenmen and doughmakers in bread shops, \$28 ; bread and confectionery table or bench hands, \$25 ; bread and confectionery helpers, \$22 ; candy workers, \$25. First two hours overtime for night workers straight time, time and one-half for overtime with exception of above stated two hours ; 75 cents per hour for all bread and confectionery jobbers.

All apprentices on bread and confectionery to work union hours with time and one-half for overtime. No contracting shop shall employ non-union labour at any of the above mentioned branches of the trade.

#### **Vehicles for Land and Water Transportation**

THREE RIVERS, QUE. — THE TIDE-WATER SHIPYARD COMPANY AND THE MARINE TRADES AND LABOUR FEDERATION. This agreement to become effective on April 1, 1919, for one year and from year to year subject to thirty days' notice prior to April 1 by either party to this agreement.

Forty-eight hours shall constitute a week's work to be worked as follows : eight hours per day for the first six days of the week, to be worked between the hours of 8 a.m. to noon and 1 p.m. to 5 p.m. Time and one-half shall be paid to midnight, and double time after this and for all Sundays and the following holidays : New Year's Day, Circumcision Day, Good Friday, Ascension Day, Empire Day, St. John Baptist Day, Dominion Day, Labour Day, All Saint's Day, Conception Day and Christmas Day. Nightmen's hours.—Night shifts shall be as mutually agreed between the management and the local Marine Federation Committee, 48 hours to constitute a week's work and regular time shall apply. For all time worked over the time as agreed, overtime rates shall apply.

If any grievance arises between the parties of this agreement the company agrees to receive a committee of their employees, and, if possible, adjust such grievance.

The number of apprentices shall be one for the shop and one for every five mechanics employed, apprentices to serve an apprenticeship of four years and to receive the mechanic's rate of pay at the end of their apprenticeship.

The minimum rates of pay shall be as follows : Per Hour — Blacksmiths, 60 cents and 50 cents ; blacksmith's helpers, 45 cents ; bolters, 40 cents ; bolter's apprentices, first six months, 45 cents and 55 cents ; burners, 60 cents ; chippers and caulkers, 65 cents ; carpenters and joiners, 55 cents ; drillers, 55 cents and 50 cents ; driller's helpers, 40 cents ; cranemen, 50 cents ; electricians, 60 cents ; electrician's helpers, 45 cents ; fitters first class, 80 cents ; fitters second class, 65 cents ; fitters third class, 50 cents ; furnacemen, 65 cents ; firemen on furnace, 45 cents ; hammer runners, 45 cents ; holder-on, 55 cents ; heaters, 50 cents ; labourers, 35 cents ; machinists, 75, 65 and 50 cents ; machinist's helpers, 40 cents ; millwrights, 60 cents ; painters, 50 and 40 cents ; patternmakers, 65 cents ; pipefitters, 65 and 55 cents ; pipefitter's helpers, 45 cents ; punch and shears man, 60 cents ; punch and shears man's helper, 40 cents ; packers, 55 cents ; packer's helper, 40 cents ; rivetter, 75 cents ; (hand) shell or inside helpers, 40 cents ; reamers, 45 cents ; riggers head, 50 cents ; helpers, 45 cents ; riggers' helpers in the yard, 40 cents ; common checkers, 45 cents ; caulkers in wood, 55 cents ; rivet passers, 25 cents.

#### **Shipping and 'Longshore Work**

TORONTO, ONT.—THE NATIONAL ASSOCIATION OF MARINE ENGINEERS OF CANADA AND THE SHIPOWNERS OF THE GREAT LAKES. Agreement to be effective during the season of 1920, or until revised or amended by the Great Lakes Executive Committee.

Overtime at the rate of 75 cents per hour for all time over twelve hours shall

be paid engineers in boats carrying only one engineer.

Scale of wages—References to tonnage to be construed as gross tons:

#### PASSENGER STEAMERS.

*Class No. 1*—All Passenger Steamers of 3,000 tons or over:

Chief Engineer ..... \$2,400 per season.  
Second Engineer ..... 180 per month.

*Class No. 2A*—All Passenger Steamers of 1,250 tons and under 3,000 tons running six months or over:

Chief Engineer ..... \$2,100 per season.  
Second Engineer ..... 150 per month.

*Class No. 2B*—All Passenger Steamers of 1,250 tons and under 3,000 running less than six months:

Chief Engineer ..... \$1,900 per season.  
Second Engineer ..... 150 per month.

*Class No. 3*—All Lake Passenger Steamers under 1,250 tons and all Passenger Steamers confined to River Service requiring Second Class Engineer:

Chief Engineer ..... \$1,650 per season.  
Second Engineer ..... 125 per month.

*Class No. 4*—All Passenger Steamers from 45 N.H.P. to 25 N.H.P.:

Chief Engineer ..... \$ 150 per month.  
Second Engineer ..... 110 per month.

*Class No. 5*—All Passenger Steamers under 25 N.H.P.:

Chief Engineer ..... \$ 125 per month.

#### FREIGHT STEAMERS.

*Class No. 1*—All Freight Steamers of 5,000 tons or over:

Chief Engineer ..... \$2,400 per season.  
Second Engineer ..... 180 per month.

*Class No. 2*—All Freight Steamers of 3,000 tons and under 5,000 tons:

Chief Engineer ..... \$2,200 per season.  
Second Engineer ..... 160 per month.

*Class No. 3*—All Water Bottom Freight Steamers under 3,000 tons requiring Second-Class Engineer:

Chief Engineer ..... \$2,000 per season.  
Second Engineer ..... 140 per month.

*Class No. 4*—All Freight Steamers not included in Classes Nos. 1, 2 and 3 requiring Second-Class Engineer:

Chief Engineer ..... \$1,800 per season.  
Second Engineer ..... 130 per month.

*Class No. 5*—All Freight Steamers not otherwise classified and requiring Third Class Engineer:

Chief Engineer ..... \$ 165 per month.  
Second Engineer ..... 120 per month.

#### TUG STEAMERS.

*Class No. 1*—All Tug Steamers requiring Second-Class Engineer:

Chief Engineer ..... \$ 185 per month.  
Second Engineer ..... 145 per month.

*Class No. 2*—All Tug Steamers from 75 N.H.P. to 50 N.H.P.:

Chief Engineer ..... \$ 170 per month.  
Second Engineer ..... 140 per month.

*Class No. 3*—All Tug Steamers from 50 N.H.P. to 25 N.H.P. and all H.P. Tugs over 15 N.H.P.:

Chief Engineer ..... \$ 165 per month.  
Second Engineer ..... 130 per month.

*Class No. 4*—All Tug Steamers under 25 N.H.P. and not embraced in Class No. 3:

Chief Engineer ..... \$ 150 per month.  
Second Engineer ..... 120 per month.

*Special Class*—Harbour Tugs (other than Dredge Tugs) operating exclusively in the Welland Canal and carrying only one Engineer:

Engineer ..... \$ 160 per month.  
Overtime clause not to apply to this class.

#### FERRY STEAMERS.

All Passenger Ferry Steamers operating from Sault Ste. Marie, Ont., and requiring Second-Class Engineer:

Chief Engineer ..... \$ 185 per month.  
Second Engineer ..... 175 per month.

For season of not less than 10 months.

All other Passenger Ferry Steamers requiring Second-Class Engineer:

Chief Engineer ..... \$ 175 per month.  
For season of not less than 6 months.

All Passenger Ferry Steamers requiring Third-Class Engineer:

Chief Engineer ..... \$ 150 per month.  
For season of not less than 6 months.

THE MARINE ENGINEERS' BENEFICIAL ASSOCIATION AND THE STEAMSHIP OWNERS. Agreement effective from July 28, 1919, to August 1, 1920.

Wage scale for licensed engineers:

Classes.	Single Screws.	Twin Screws.
A .....	Over 20,001	Over 15,001
B .....	12,001 to 20,000	9,001 to 15,000

A working day at any port where watches are broken shall be from 8 a.m. to 5 p.m., during which time one hour shall be allowed for dinner. All work done at sea by assistant engineers in excess of eight hours except that necessary for the safety of the vessel or her equipment, shall be paid for at the rate of eighty cents per hour.

ST. JOHN, N.B.—THE INTERNATIONAL 'LONGSHOREMEN'S ASSOCIATION, No. 272, AND VARIOUS EMPLOYERS. Agreement to become effective on December 1, 1919, and to continue in force until December 1, 1920, and thereafter from year to year unless or until either party serve notice on the other party to the contrary at least thirty (30) days prior to the date above mentioned, or prior to the first of December of any subsequent year.

The rate of wages shall be \$5.50 per day of nine hours. Double time to be paid to the men required to work on Sundays and all statutory and proclaimed holidays. Double time to be paid for all overtime when required to work after 5 p.m., except in cases when men are culling, stamping or handling for surveyors alongside of ships, in which cases the ordinary rate shall prevail. If men or gangs are ordered out to work at 7 a.m. or 1 p.m. and not set to work they shall be paid for the time while they are waiting or until the time that they are sent home.

#### Municipal Employment

VANCOUVER, B.C.—THE CIVIC FEDERATION OF VANCOUVER, No. 59, AND THE CITY OF VANCOUVER. Agreement made December 22, 1919.

The Council agrees that it will form a special committee, which shall consist of four members of the Council, and such committee shall meet jointly with a committee of equal number to be selected by the Civic Federation for the purpose of dealing with questions concerning hours, salaries, working conditions or any other matters which from time to time arise, affecting relations between the City and the Federation, which the officials in charge of the various departments have been unable to settle satisfactorily with the employees. It being understood, however, that all matters under dispute and all concessions being asked for shall first be referred to the official or officials in charge of the department affected. The chairman of said committee shall be selected by the joint committee.

CALGARY, ALTA. — INTERNATIONAL BROTHERHOOD OF ELECTRICAL WORKERS, No. 348, AND CITY OF CALGARY. Agreement in effect from January 1, 1920, to December 31, 1920.

Eight hours' work from 8 a.m. to noon and from 1 p.m. to 5 p.m. shall constitute a day's work, except on Saturdays when the hours shall be from 8 a.m. to noon, but where the requirements of the service demands shift work, 8 consecutive hours shall constitute a day and such shift hours will be those that the service requires to be filled constantly. This applies to automobile mechanics and operators. Gangs working away from garage or customary meeting place shall report at said meeting place ready for work at 8 a.m. and shall be back not later than 5 p.m. or the schedule rate of overtime shall be paid. After the noon hour they shall report on the job at 1 p.m.

Troublemens working in excess of eight hours out of twenty-four shall be paid at the schedule rate of overtime. The first five hours after the ordinary working hours viz.:—between 5 p.m. and 10 p.m. shall be considered as being equivalent to one and one-half time the corresponding period of the ordinary working hours and payment therefore shall be computed on that proportion on the basis of the wage schedule mentioned hereinafter. All overtime shall be computed on the basis of eight hours per day for daily men and twenty-five and one-half days per month for monthly men. Overtime other than that mentioned in the preceding clause, viz., work commencing on or at any time after 10 p.m. up to 8 a.m. or until relieved shall be considered as double time of the ordinary working hours and payment therefor shall be computed in that proportion on the basis of the wage schedule mentioned below, with the omission of the time necessary for meals. In no case shall men receive payment for less than two hours' overtime whatever be the actual period of work. All the time worked on Sundays and Dominion holidays shall be considered as equivalent to double time of ordinary working hours and payment therefor shall be made accordingly. All time worked on Saturday afternoons shall be considered as equivalent to one and one-half time the ordinary working hours, after 5 p.m. shall be considered as double time and payment therefor shall be made accordingly. The following shall be considered holidays: New Year's Day, Good Friday, Victoria Day, Dominion Day, Labour Day, Thanksgiving Day, and Christmas Day, and such other days as are proclaimed Dominion holidays. When a Civic Holiday is proclaimed all employees shall receive such time off with pay, and if working shall be paid double time.

#### Wage schedule:

LINEMEN:	Per day.
Foreman .....	\$ 7.75

**Domestic and Personal (including amusements)**

ST. CATHARINES, ONT.—THE INTERNATIONAL ALLIANCE OF THEATRICAL STAGE EMPLOYEES, No. 461, AND LOCAL EMPLOYERS. Agreement dated August 9, 1919, and to remain in force until September 8, 1920.

Wage Scale based on six working days per week: Machine operators (afternoon and evening) \$20, machine operators (evenings only) \$20, stage electricians, \$27, stage propertyman, \$23, stage carpenter, \$20, stage second hand, \$25, stage flyman, \$23. Per performance: extra help to carry in performance, 75 cents, extra help to work performance, grips, \$1.50, clearers \$1.00, lamp operators, \$2.00.

HAMILTON, ONT. — MOTION PICTURE MACHINE OPERATORS' PROTECTIVE UNION, No. 303, AND LOCAL THEATRE MANAGERS. Agreement in effect from September 1, 1919, to September 1, 1920.

Members of the union cannot be compelled to work in any theatre or place of amusement when any organized labour trouble exists.

It is understood that no member of the union shall be held responsible for an unsteady picture, poor definition or light (as the case may be) after he has notified the manager of the necessary repairs.

Any difference between manager and operator must be reported to the business agent of the local for adjustment, and the operator must continue to work until such matter has been adjusted by the business agent or executive board of Local 303, I.A.T.S.E.

Any theatre playing afternoons and evenings and running a continuous show daily (Sunday excepted) shall employ two men on separate runs, both of whom must be members of Local 303, International Alliance of Theatrical Stage Employees and Motion Picture Machine Operators of the United States and Canada. Day's work to count from time

operator reports for afternoon performance on all theatres playing afternoon and evening. Six days to constitute one working week (Sunday excluded). If any member of the union is required to do the work of operating moving picture machine, stereopticon or spot light, in excess of eight hours, the same shall be paid for as overtime at the rate of one dollar (\$1.00). Members of the union employed in theatres giving afternoon and evening performances shall be allowed an hour and one-half (1½) for supper, and when required to work during supper time shall be paid for such time at the rate of one dollar (\$1.00) per hour.

Any member required to do the work of operating moving picture machine, stereopticon or spot light in the mornings for rehearsals or special performances, shall be paid two dollars and fifty cents (\$2.50), time not to exceed three hours.

Wage Scale: Per week—Evening performances only (not to exceed four hours) not less than \$18. Matinees extra at \$2.50 a performance. Theatres seating under seven hundred, afternoons and evenings (not to exceed 8 hours) not less than \$25. Theatres seating over one thousand, afternoons and evenings (not to exceed 8 hours) not less than \$28. Theatres playing motion pictures at irregular intervals or not guaranteeing a continuous run of six weeks or more, afternoons and evenings (not to exceed 8 hours) not less than \$30. Per hour: Sunday work of operating motion picture machine, stereopticon or spot light, \$1.25 or any fraction thereof, the minimum time accepted not less than four hours. Time to count from time operator is called to report. (a) Operating stereopticon or motion picture machine for special performances not in theatres (Sunday excluded) afternoon or evening (three hours or fraction thereof) from \$3.00 to \$5.00. (b) "Setting up" and "clearing" of apparatus, \$1.00 per hour. (c) Cartage and transportation charges.

## FURTHER REGULATIONS AFFECTING WESTERN COAL MINES

**S**EVEN new orders have been received from the Director of Coal Operations for Alberta and Eastern British Columbia.\* Order No. 135 relates to a reduction in the number of firemen employed in the boiler house of the Canmore Coal Company, at Canmore, Alta. Order No. 136 has reference to the rate of wages paid to a rope rider employed by the Canmore Coal Company. Order No. 138 contains regulations governing the export of coal to the United States. By Orders Nos. 142B, 142C, 142D and 142E respectively certain other mines are added to the list of those where the agreement of December 18, between the Western Coal Operators' Association and District 18 of the United Mine Workers of America, is effective.

**ORDER No. 135.**—A dispute arose at the mine of the Canmore Coal Company at Canmore, Alta., with regard to a reduction in the number of firemen employed by the Company in their boiler house. The Company stated that an extra man was employed while the boiler capacity was taxed to its utmost, necessitating a considerable amount of work. When this condition of affairs was relieved the man was laid off, but the other men requested that the previous staff be maintained. The Director of Coal Operations declared his opinion that this dispute was covered by the clause in the agreement entitled "Management of the Mine and Direction of the Working Forces." This clause reads in part: "The right to hire and discharge, the management of the mine, and the direction of the working forces, are vested exclusively in the Company, and the United Mine Workers of America shall not abridge this right."

**ORDER No. 136.**—A dispute arose at the mines of the Canmore Coal Company regarding the rate of wages to a rope rider. The Company claimed that this employee was under age and therefore

was only entitled to a boy's wages. The men claimed that he was over eighteen years of age and had been performing this work for a considerable period, and they claimed further that there was no boy's rate in the agreement for this classification. It was ruled by the Director that as this employee was evidently performing the duties of a man, he should be paid at the rate specified in the agreement for a rope rider.

**ORDER No. 138.**—This Order has reference to the export of coal to the United States and reads as follows:

"Notice is hereby given that all coal operators in the provinces of Alberta and South Eastern British Columbia who desire to export coal to the United States should make application to the Canadian Trade Commission at Ottawa. The application should state the class of coal and be sent to this office for approval. If approved of, it will then be forwarded to the Canadian Trade Commission at Ottawa, who will issue a licence provided the conditions under which the export is made are satisfactory."

**ORDERS NOS. 142B, 142C, 142D, and 142E.**—In accordance with the agreement between the United Mine Workers of America and the Western Coal Operators' Association, (a copy of which was given in the January issue of the *LABOUR GAZETTE*, on page 72) which was confirmed by Order No. 141, it is directed by these orders that the terms and conditions as set out in the agreement shall be in force at all the mines of the Blue Diamond Coal Company, Limited, Brule, Alberta, at the Star Mine of the Canada West Coal Company, Limited, at Aerial, Alberta, at the mines of the Federal Coals, Limited, Lethbridge, Alberta, and at the mines of the Midland Collieries, Limited, at Midlandvale, Alberta. Other mines to which the agreement also applies were specified in Order 142, mentioned in the February issue of the *LABOUR GAZETTE*.

\*For details of previous orders see *LABOUR GAZETTE*, February, 1920, p. 177, and various preceding issues.

## FAIR WAGE CONTRACTS, FEBRUARY, 1920

**D**URING February the Department of Labour received for insertion in the LABOUR GAZETTE the following information relative to five fair wage contracts awarded by the Department of Public Works, all of which contained the usual fair wage clause providing for the payment of such wages as are current in the district in which the work is to be performed, the observance on the works under contract of the prevailing hours of labour, and otherwise to prevent abuses and to secure the legitimate rights of the labour employed.

A statement was also received as to supplies ordered by the Post Office Department, subject to the Regulations for the Suppression of the Sweating System, the securing of fair wages, etc.

## DEPARTMENT OF PUBLIC WORKS.

Construction of lavatory (toilet room) at Lorne Dry Dock, Lauzon, Que. Name of contractor, Jos. Gosselin Ltée, Lévis, Que. Date of contract, January 30, 1920. Amount of contract, \$3,150.

Supply of eleven pontoon discharge pipes for Dredge P.W.D. No. 3, Northumberland. Name of contractors, The Maritime Bridge Co., Ltd., New Glasgow, N.S. Date of contract, January 24, 1920. Amount of contract, \$4,485.

Grading and roadwork at Westminster Hospital, London, Ont. Name of contractor, Wm. H. Harvey, Deseronto, Ont.

Date of contract, February 7, 1920. Amount of contract: schedule of prices.

Construction of addition to wharf, Powell River, B.C. Name of contractors, Fraser River Pile Driving Co., Ltd., New Westminster, B.C. Date of contract, February 7, 1920. Amount of contract: schedule of prices.

Overhauling and repairing of Dredge "Fruhling" D.P.W. No. 303. Name of contractors, Wallace Shipyards, Ltd., North Vancouver, B.C. Date of contract, February 17, 1920. Amount of contract: schedule of prices.

## POST OFFICE DEPARTMENT.

The following is a statement of payments made in February for supplies ordered by the Post Office Department, subject to the Regulations for the Suppression of the Sweating System, the securing of fair wages, and the performance of work under sanitary conditions:

Nature of orders	Amount of Orders
Making metal dating stamps and type and making other hard stamps and brass crown seals.....	\$ 464.74
Making rubber stamps.....	158.01
Supplying stamping materials, pads and ink..	539.88
Supplying mail lag fittings.....	544.00
Repairing scales.....	7.20
Making up and supplying letter carriers' uniforms.....	21,124.95
Mail clerks' boxes and letter boxes repaired..	18.40
Repairing miscellaneous articles.....	14.50

## PRICES RETAIL AND WHOLESALE IN CANADA, FEBRUARY, 1920

PRICES continued to rise during the month, there being considerable increases in the retail prices of foods and in the index numbers of wholesale prices. There were seasonal changes in food with increases in potatoes, sugar, flour, bread, rice, and meats, but decreases in eggs and dairy products. In materials there were substantial increases in some lines of textiles, hides, metals, fuel and building materials.

In retail prices the average cost of a weekly budget of staple foods in some 60 cities was \$15.70 at the middle of February as compared with \$15.30 in January, \$13.41 in February, 1919, and \$7.75 in February, 1914. The chief increases were in potatoes, but meats, sugar and several other lines averaged higher, while eggs and dairy products showed some decreases. Coal averaged higher and wood lower while rents were upward.

In wholesale prices the index number rose to 343.5 for February as compared with 336.4 for January, 279.8 for February, 1919, and 136.6 for February, 1914. Grains and fodder were higher, but livestock and meats fluctuated and dairy products were down. Vegetables rose considerably while flour and sugar were higher. There were also increases in textiles, hides and leather, metals, fuel and building materials.

The accompanying tables and notes give details as to the prices movement during the month and as compared with the same month in previous years.

The table of retail prices gives statistics for some 60 localities in Canada, having a population of approximately 10,000 or over. Quotations are obtained by the correspondents of the LABOUR GAZETTE, resident in each locality, from representative dealers doing a considerable trade with workingmen. All prices are for delivered goods. The exact quality for which the quotation is given is set forth in the case of each commodity, and every effort has been made to ensure

that the quotations in each case refer to the same class of commodity in order that the statistics may be available for purposes of comparison from month to month, from city to city, etc.

Owing to varying local conditions and customs in cutting meats, in buying groceries in larger or smaller quantities, in buying wood four feet long or in stove lengths, etc., such comparisons will reflect general conditions better if averages over some time or for several cities are taken, and if the several articles are grouped together as in a family budget in order that the tendencies to be comparatively high or low in some cases may be offset by the opposite tendency in other cases. Owing to the difficulties in securing quotations for exactly the same quality of foods for each city, from month to month and year to year, or in obtaining and compiling figures from so large a number of dealers that the differences in quality would be largely eliminated in the averages for each city and province each month, it is preferable to make such comparisons by using index numbers calculated for each commodity from the prices reported by each dealer for each city, as is done in the Departmental index number of wholesale prices, and in the index numbers of retail food prices of various countries. The calculations of such index numbers involve the use of series of quotations over a considerable period of time, with somewhat elaborate statistics for proper weighting, and required considerable time for the calculation each month. The calculation of a family budget in terms of the average prices, for the Dominion, for each province or each city, is comparatively a simple and short process and affords approximately the same results in showing the comparative changes in prices levels from time to time.

The calculation and publication of such a budget each month in the LABOUR GAZETTE was therefore decided upon,

and commenced in August, 1915, as the index number of wholesale prices which had previously reflected approximately the changes in the cost of living no longer did so, owing to the violent changes in prices of metals, chemicals and other war materials included in the list. The budget adopted for this purpose and published in the LABOUR GAZETTE each month since August, 1915, appeared annually in an appendix to the reports on wholesale prices in Canada back to 1911, and also in the report of the Board of Inquiry into the Cost of Living, 1914-1915, including prices for December, 1900 and 1905. Only the commodities for which quotations were available back to 1910 were included, but arrangements were made to secure quotations for many more lines in the future with a view to the calculation eventually of a complete index number of the retail prices of all commodities of importance in family consumption.

This weekly budget for a family of five, including staple foods, laundry starch, coal, wood and coal oil, and rent, was based upon the estimated importance of the various commodities included, the quantities being slight modifications of those employed in similar calculations by the various official bodies. For some articles comparatively large quantities were included, owing to the omission of other important foods of the same class. For instance, the only fruits were evaporated apples and prunes and the only fresh vegetable was potatoes. As market conditions affecting these usually affect the prices of other fruits and vegetables somewhat similarly, the relative proportion of expenditure on the various foods therefore tends to be maintained. In fuel and lighting the quantities were estimated on a similar principle, anthracite coal being used chiefly east of Manitoba, and soft coal and wood in the western provinces, while no allowance was made for the quantities required in the various localities owing to climatic conditions, nor for the difference in quality. It was estimated, when the budget was first published in 1912, that these calculations represented from sixty to eighty per cent of

the expenditure of an ordinary family, according to the total income. For the average family of five the expenditure on these items of food, fuel, light and rent would be perhaps two-thirds or about sixty-five per cent of the total income. While the budget serves to show the increase or decrease from time to time in the cost of the items included it does not purport to show the minimum cost of food and fuel supplies for an average family in the Dominion or any one province. The quantities of meats, dairy products, cereals, etc., included were designed to afford a liberal supply for the healthy family of a man at hard physical work. On the other hand an average family with an income sufficient to do so would buy less meat, etc., but more fruit, fresh and canned vegetables, etc.; so that the comparative expenditure would be little changed.

In the table of retail prices the list of commodities includes over one hundred staple foods and groceries, coal, wood and coal oil, the number of articles having been increased twice since January, 1910, when the regular publication of these statistics was begun. The original list contained the thirty foods and groceries in the weekly family budget together with coal, wood, coal oil and rentals, and in 1916 it was extended to include forty-one foods and groceries, as well as seven other items covering fuel, light and rentals, so that quotations for this list of forty-eight items were published monthly from the beginning of 1916 until February, 1920. At this date quotations for wood in stove lengths and for mill wood, etc., were also included.

The quotations for rent are the prevailing rates for six-roomed houses of two classes in districts extensively occupied by workmen. The first class is of houses in good condition, favourably located in such districts, with good modern conveniences. The second class is of houses in fair condition less desirably located, but still fairly central without modern conveniences or with incomplete conveniences. From January, 1910, until September, 1911, rentals were quoted for simply "a typical workingman's

December only.

dwelling of the better class." Since that date quotations have been given for two classes of workingmen's houses, with and without sanitary conveniences. Owing to variations in houses and local conditions such as building by-laws, water supply, sewer connection, etc., it was found that the present definition of the two classes describes more clearly and accurately the kinds of houses commonly rented and actually quoted since 1911.

The index number of wholesale prices is based on the quotations for 271 commodities, and is the simple average of the percentages of current prices of the several commodities in relation to the average prices for the base period, 1890-1899, these being therefore made equal to 100. The table of index numbers shows the changes by groups and sub-groups for the previous month and for corresponding months back to 1913.

#### Retail Prices

In meats prices averaged slightly higher, but there were decreases in some lines in some of the provinces and increases in others. Bacon averaged a fraction lower. Eggs, milk, butter, and cheese averaged lower. In bread there was a substantial increase following an advance in flour in January. Flour also averaged higher again. Rolled oats, rice, beans, evaporated apples, and prunes showed increases. Sugar advanced substantially, and further increases were reported later in the month. In potatoes there were considerable advances, especially in Nova Scotia, New Brunswick, Ontario, Saskatchewan, and British Columbia. Coal was higher, but wood slightly lower. In rents there were a number of advances reported in Nova Scotia, Quebec, Ontario, and British Columbia.

#### Wholesale Prices

**GRAINS AND FODDER.**—Wheat prices were steady at the higher prices determined in December and January by the Wheat Board. Barley eased off at Winnipeg and Toronto, but fluctuated from week to week. Oats advanced to 97½c. per bushel at Winnipeg and

98c.-\$1.00 at Toronto. American corn rose to \$1.90. Flax seed advanced to \$5.25. Rye advanced to \$1.80, recovering partly from the decline in January. Hay was firmer at Montreal and Toronto, at \$26.00 and \$28.00. Straw advanced \$1.00 to \$17.00 per ton.

**ANIMALS AND MEATS.**—Prime western cattle eased off from \$13.00 per hundred pounds to \$12.50 and later to \$12.00. Butcher cattle in Toronto declined from \$13.00 to \$12.00 and heavy beef steers from \$15.00 to \$14.25. Dressed beef, hindquarters, declined 1c., to 21-27c. per pound, and forequarters 1c., to 14-17c. per pound. Veal was firmer at 28c. for the top grade. Live hogs advanced to \$17.25. Dressed hogs advanced from 23-25c. per pound to 24-29c. Bacon was higher at 43-45c., and hams at 34-36c. Fowl advanced at Toronto from 28-33c. to 30-35c. Turkeys rose from 47-50c. to 53-54c.

**DAIRY PRODUCTS.**—Finest creamery butter declined at Montreal from 64-65c. per pound to 60-62c. Fresh eggs at Montreal fell from 80-85c. to 76-77c. per dozen. Storage eggs went off the market at Toronto.

**FISH.**—Whitefish at Toronto were up to 13c. The export market for dry fish to Cuba was reported good. The demand for herring was dull, and No. 1 Shore was quoted at \$7.00 per bbl. Mackerel was also dull at \$13.00 per barrel.

**FRUITS AND VEGETABLES.**—Apples were up to \$6.00-11.00 per barrel at Toronto. Bananas were higher at 8½c. per pound. Lemons were easier at \$4.50 per box. Evaporated apples advanced to 24c. per pound. Potatoes advanced to \$4.00 per bag at Toronto and Montreal. Dried beans were higher at \$5.50 per bushel. Onions rose to \$8.50 per bag. Turnips advanced from \$1.00 to \$1.25 per bag. Canned peas were firmer at \$2.25-2.50 per dozen.

**MISCELLANEOUS FOODS.**—Oatmeal, rolled oats, and rice were firmer. Winter

wheat flour advanced to \$11.00 per barrel from \$9.95 following the increase in the price of winter wheat effected by the Wheat Board in January. Chocolate, glucose, molasses, honey, maple sugar, salt, and baking soda also advanced.

**TEXTILES.**—Cotton was down from 40.25c. to 38.95c. per lb., in New York. Cotton goods averaged higher. Silk thread, jute, hessians, and flax sewing twine advanced.

**HIDES, LEATHER, BOOTS AND SHOES.**—Beef hides advanced from 25c. per pound to 30c. Calfskins advanced from 50c. per pound to 60c., and horse hides from \$11.00 each to \$12.00. Some lines of leather advanced.

**METALS AND IMPLEMENTS.**—Pig iron rose \$6.00 per ton to \$55.50. Black sheets, galvanized sheets, scrap iron, and steel bar advanced. Antimony, lead, nickle, tin, and zinc advanced. Quicksilver and silver bar were easier. Axes were quoted lower.

**FUEL AND LIGHTING.**—Anthracite coal advanced at Montreal from \$10.85 per ton to \$11.20. Gasoline rose 1c. to 35c. per gallon.

**BUILDING MATERIALS.**—Pine advanced at Ottawa and Toronto. British Columbia fir advanced at Winnipeg. Shingles were higher at Winnipeg and Victoria, B.C. Bricks, lime, building paper, iron pipe, lead pipe, sash weights, sash cord, linseed oil, turpentine, benzine, shellac, and varnish advanced.

**HOUSE FURNISHINGS.**—Furniture was steady at the advance at the beginning of the year.

**DRUGS AND CHEMICALS.**—Alcohol, bleaching powder, brimstone, caustic soda, and glycerine were higher, but opium fell.

**MISCELLANEOUS.**—Malt, mink skins, wrapping paper, pulp, ground and sulphite, advanced. Raw rubber declined.

## PRICES IN THE UNITED KINGDOM AND IN OTHER COUNTRIES

THE accompanying tables and the following notes give the latest available statistics as to the movement of prices in other countries.

### United Kingdom

At the beginning of February the level of retail food prices was reported to be 135 per cent higher than in July, 1914, as reported in the *Labour Gazette* published by the British Ministry of Labour. The slight decline from the first of Jan-

uary was due to lower prices for beef, milk and eggs. The price of milk was freed from control at the beginning of February and fell on February 2 1d. per quart in London and in nearly half of the other large towns. Beef was down 2d. per pound, and eggs declined about 2d. per dozen. At the beginning of March a further decline brought the average level to a point 133 per cent higher than in July, 1914. Clothing was reported at the beginning of February

to be 300 per cent higher than in July, 1914, and coal was 70 per cent higher.

#### France

The index number of the retail prices of food in Paris was reported by the General Statistical Department of France to be 1.8 per cent higher in January, 1920, than in the preceding month and 190 per cent higher than in July, 1914.

#### Belgium

The index number representing the general level of retail prices in Brussels in December, 1919, showed an increase of 5 per cent over the preceding month and of 259 per cent over April, 1914.

#### Switzerland

The Statistical Bureau of the Union of Swiss Co-operative Societies reported the general level of retail food prices on December 1, 1919, to be 1.7 per cent lower than September 1 and 137.5 per cent higher than in July, 1914. The greatest increases since 1914 were in eggs, edible fats and oils, peas, beans, etc., meats, sugar, bread, flour and cereals. Fuel, lighting and soap had risen 213 per cent.

#### Italy

The general level of food prices in Rome in December, 1919, was reported by the Municipal Labour Office to be slightly higher than in the previous month and 152 per cent higher than in 1914. Other necessities, including clothing, fuel, light, rent, etc., caused

the average increase to be 146 per cent. For Milan the Municipal Labour Office reported the cost of maintaining a pre-war standard of living for a family of five in January, 1920, to be 7 per cent higher than in December, 1919, and 278 per cent higher than in 1914. The cost of food had risen 312 per cent, the cost of clothing 291 per cent, heat and light 322 per cent, and rent 8.3 per cent.

#### Holland

The Municipal Statistical Bureau of Amsterdam reported the index number representing the total food bill of a working class family in Amsterdam in terms of prices in December, 1919, to be slightly lower than in November, but 99 per cent higher than in 1913.

#### Norway

The Central Bureau of Statistics reported the index number representing the total expenditure of a Norwegian family upon food, fuel, lighting, clothing and taxation at the prices prevailing in October, 1919, to be 201 per cent higher than in July, 1914, the increase in food being 200 per cent, fuel and light 267 per cent, clothing 344 per cent, and rent 29 per cent.

#### India

The Director of the Department of Statistics of Calcutta reported that the general level of retail food prices in Calcutta in December, 1919, was 1.3 per cent lower than in the preceding month, but 51 per cent higher than in July, 1914.

# FATAL INDUSTRIAL ACCIDENTS DURING THE LAST QUARTER OF 1919

**D**URING the last quarter of 1919, the Department received reports of 248 fatal industrial accidents (8 of which occurred earlier in the year, 94 in October, 80 in November, and 66 in December), as compared with 270 accidents in the previous quarter. During the corresponding quarter of 1918, there

were 299 fatal accidents reported, 99 of which occurred in October, 86 in November, and 114 in December. Fifty-nine accidents were reported in the railway group. The following statement, while not necessarily including all the fatal accidents that may have occurred, has been prepared from information received from all sources available.

## FATAL INDUSTRIAL ACCIDENTS DURING THE LAST QUARTER OF 1919.

Trade or Industry.	Locality.	Date	Age	Cause of fatality.
<b>METALS, MACHINERY AND CONVEYANCES.—</b>				
Employee of car factory.....	Ottawa, Ont.....	Oct. 4	48	Struck by sash which caught in saw.
Employee of sewing machine factory	St. John's, Que.....	" 5	29	Struck by shunting cars. Sept. 24.
Labourer at machine factory.....	Toronto, Ont.....	" 23	46	Crushed by machine.
Machinist at steel plant.....	St. Catharines, Ont.....	" 12	..	Fell from scaffold.
Carpenter at steel plant.....	Sydney, N.S.....	" 15	..	Fell from staging.
Employee at steel plant.....	Montreal, Que.....	" 16	34	Electrocuted—touched electric box with tip of oiling can.
Employee at steel plant.....	Halifax, N.S.....	" 18	31	Struck by beam.
Brakeman at steel plant.....	Sault Ste. Marie, Ont.....	" 30	23	Crushed under engine.
Riveter.....	Dartmouth, N.S.....	" 25	35	Struck by flying steel.
Labourer at steel plant.....	Wingham, Ont.....	Nov. 1	47	Back strained.
Brakeman at steel plant.....	Sault Ste. Marie, Ont.....	" 22	45	Crushed between cars.
Fitter at plough factory.....	Brantford, Ont.....	" 1	53	Emery wheel burst causing fall.
Apprentice at engine plant.....	Brandon, Man.....	" 20	15	Caught in belt.
Employee at car factory.....	Montreal, Que.....	" 22	19	Fell from ladder.
Foreman at aluminum mill.....	Massena, Ont.....	Dec. 4	35	Crushed by falling crane—failure to set safety device.
Stool cleaner.....	Sault Ste. Marie, Ont.....	" 24	51	Struck by engine.
Fireman at shaft factory.....	Merrittton, Ont.....	" 6	34	Infection.
Structural iron worker.....	Winnipeg, Man.....	" 26	..	Fell off scaffold.
<b>FOOD, TOBACCO AND LIQUOR.—</b>				
Employee at biscuit factory.....	Montreal, Que.....	Oct. 8	..	Crushed between elevator and shaft.
Carpenter at flour mill.....	Winnipeg, Man.....	" 22	45	Fell.
Labourer at cereal mill.....	Peterboro, Ont.....	Nov. 10	65	Fell down elevator shaft.
Employee at flour mill.....	Fort William, Ont.....	" 22	40	Caught in shafting.
Labourer at distillery.....	Corbyville, Ont.....	Dec. 10	..	Fell down elevator shaft.
Carpenter at milk product plant.....	Belmont, Ont.....	" 11	20	Struck by train.
Driver for dairy.....	Brantford, Ont.....	" 16	..	Struck by street car.
Driver for dairy.....	Ottawa, Ont.....	" 18	..	Runaway horse dashed into train.
<b>TEXTILES, CARPETS AND CORDAGE.—</b>				
Carter in mattress factory.....	Montreal, Que.....	Oct. 14	18	Caught in machinery.
Textile mill hand.....	Toronto, Ont.....	" 15	58	Caught in shafting.
Textile mill hand.....	Simcoe, Ont.....	Nov. 10	55	Caught in gears.
Watchman at cordage factory.....	Kitchener, Ont.....	Dec. 26	64	Spark from fire ignited clothing.
<b>CLOTHING AND LAUNDERING.—</b>				
Employee at knitting mill.....	Toronto, Ont.....	Oct. 15	55	Clothing caught in belt.
Superintendent of woollen mill.....	Simcoe, Ont.....	Nov. 10	..	Caught in belt.
Employee of woollen mill.....	Moncton, N.B.....	Dec. 3	over 21	Crushed by falling roof.

## FATAL INDUSTRIAL ACCIDENTS DURING THE LAST QUARTER OF 1919—Continued.

Trade or Industry.	Locality.	Date	Age	Cause of fatality.
<b>PULP, PAPER AND FIBRE.—</b>				
Labourers (2).....	St. John, N.B.....	Oct. 19	42	Boiler tube burst.
Papermaker.....	St. Raymond, Que.....	Nov. 14	43	Crushed between reels.
Chipperman at pulp mill.....	Bathurst, N.B.....	" 30	33	Crushed by falling disc.
Employee at paper factory.....	Frankford, Ont.....	Dec. 17	29	Caught in gears.
Labourer with pulp company.....	Timmins, Ont.....	" 22	23	Struck by tree.
<b>WOODWORKING AND FURNITURE.—</b>				
Foreman at shingle mill.....	Chatham, Ont.....	Nov. 21	57	Caught in shaft.
<b>LEATHER, BOOTS AND SHOES AND RUBBER.—</b>				
Workman at rubber factory.....	Toronto, Ont.....	Oct. 27	23	Fell from window.
<b>CLAY, GLASS AND STONE.—</b>				
Labourer at glass works.....	Thorold, Ont.....	Oct. 21	..	Electrocuted.
Labourers with paving company (2).....	Simcoe, Ont.....	" 23	..	Earth caved in.
Brakeman at brick plant.....	Montreal, Que.....	Nov. 28	38	Fell between clay cars.
Foreman at quarry.....	Point Anne, Ont.....	" 29	..	Fell into screening bin—suffocated.
<b>PAINTS, OILS, CHEMICALS AND EXPLOSIVES.—</b>				
Night watchman at oil shop.....	Montreal, Que.....	Nov. 4	36	Electrocuted.
Teamster with oil company.....	Stratford, Ont.....	" 6	42	Thrown off wagon.
<b>STEAM RAILWAYS.—</b>				
Conductor.....	Toronto, Ont.....	Oct. 2	..	Crushed—cars jumped switch.
Foreman.....	Port William, Ont.....	" 3	..	Struck by engine.
Foreman.....	Winnipeg, Man.....	" 27	41	Crushed in car when wrecked.
Section foreman.....	St. Jerome, Que.....	" 1	40	Struck by motor car.
Section foreman.....	Rignold, Man.....	" 26	30	Struck by engine.
Sectionman.....	Near St. Eustache, Que.....	" 9	66	Struck by train.
Sectionman.....	St. Theresa, Que.....	" 9	..	Struck by train.
Sectionman.....	Havelock, Ont.....	" 10	60	Struck by train.
Sectionmen (2).....	Sable River, N.S.....	" 13	65, 52	Thrown from car when track jack fell off motor.
Sectionman.....	Sydney Mines, N.S.....	" 16	21	Struck by flying steel.
Sectionman.....	Napanee, Ont.....	" 25	24	Struck by train.
Shedman.....	Toronto, Ont.....	" 24	..	Struck on head.
Shed foreman.....	Wilkie, Sask.....	" 27	36	Crushed by falling safe.
Yardman.....	Toronto, Ont.....	" 2	..	Derailement.
Yardman.....	Port William, Ont.....	" 23	31	Fell between cars.
Engineer.....	Shenacadie, N.S.....	" 15	..	Crane jumped track.
Carman.....	Halifax, N.S.....	" 22	47	Struck by switching engine.
Employee.....	Hartney, Man.....	" 7	54	Fell off jigger (died Oct. 11).
Employee.....	Transcona, Man.....	" 13	33	Run over in attempt to board moving train.
Employee.....	Winnipeg, Man.....	" 26	..	Fell from car.
Labourer.....	Toronto, Ont.....	" 23	46	Crushed by machine.
Engineer.....	Toronto, Ont.....	Nov. 1	34	Crushed under engine (died Nov. 4)
Engineer.....	La Riviere, Que.....	" 6	42	Fell from tender.
Engineer.....	Sudbury, Ont.....	" 29	..	Derailement.
Brakeman.....	Glen Tay, Ont.....	" 4	27	Fell under train.
Brakeman.....	Puslinch, Ont.....	" 23	..	Fell off train.
Messenger and Fireman (2).....	St. Vincent de Paul, Que.....	" 22	40-23	Collision.
Foreman.....	Scotia Jct., Ont.....	" 6	55	Fell off pump house roof.
Sectionman.....	Brantford, Ont.....	" 1	38	Struck by train.
Sectionman.....	Alba, N.S.....	" 21	49	Struck by engine.
Section labourer.....	Jellicoe, Ont.....	" 24	45	Struck by engine.
Policeman.....	Winnipeg, Man.....	" 6	51	Struck by train.
Trainman.....	St. John, N.B.....	" 3	28	Fell.
Trainman.....	Glen Tay, Ont.....	" 4	27	Fell under train.
Bridgeman.....	North of Emerson, Man.....	" 21	63	Knocked off car over bridge.
Employees (2).....	Nr. China Bar, B.C.....	" 6	..	Rockslide.
Employee.....	Colebrook, B.C.....	" 23	..	Collision of hand cars.
Employee.....	Saskatoon, Sask.....	" 23	27	Collision.
Employee.....	Port Daniel, Que.....	" 24	29	Fell between cars
Labourer.....	Nr. Glacier, B.C.....	" 25	..	Struck by engine.

FATAL INDUSTRIAL ACCIDENTS DURING THE LAST QUARTER IN 1919—*Continued.*

Trade or Industry.	Locality.	Date	Age	Cause of fatality.
<b>STEAM RAILWAYS.—Continued.</b>				
Car foreman.....	Winnipeg, Man.....	Dec. 2	65	Run over by cars.
Yard foreman.....	Montreal, Que.....	" 18	..	Fell from step of tender.
Gang boss at car shop.....	Stratford, Ont.....	" 17	..	Burned by hot metal, and shock.
Car cleaner.....	St. John, N.B.....	" 9	53	Rib broken—pneumonia.
Helper.....	Chapleau, Ont.....	" 9	..	Struck by engine.
Trainman.....	Ernfold, Sask.....	" 10	..	Collision.
Bridgeman.....	Minaki, Ont.....	" 13	36	Fell under engine.
Brakeman.....	Moncton, N.B.....	" 26	over 21	Run over by shunting engine.
Conductor.....	Newtonville, Ont.....	" 22	..	Struck by train.
Fireman.....	Stralak Station, Ont.....	" 16	..	Collision.
Tire-setter.....	Stratford, Ont.....	" 17	..	Crushed by wheel.
Car repairer.....	Trenton, Ont.....	" 11	..	Struck by wheel.
Car repairer.....	Toronto, Ont.....	" 24	36	Crushed between cars.
Tunnel employee.....	Montreal, Que.....	" 16	30	Struck by electric motor.
Employee.....	Milan, Que.....	" 11	..	Collision.
Employee.....	Moose Jaw, Sask.....	" 10	43	Collision.
<b>MISCELLANEOUS TRANSPORT.—</b>				
Driver of motor truck.....	Niagara Falls, Ont.....	Oct. 4	35	Struck by train.
Driver.....	Montreal, Que.....	" 6	34	Fell from wagon when horse bolted.
Steamship fireman.....	Montreal, Que.....	" 4	24	Missed footing—drowned.
Sailor.....	Montreal, Que.....	" 13	..	Fell through open hatch.
Seaman.....	Sorel, Que.....	" 23	..	Fell overboard.
Captain.....	Montreal, Que.....	" 20	..	Slipped from ladder while boarding ship.
Employees of steamship company (6)	Lake Ontario.....	" 28	..	Drowned.
Mate on steamship.....	Port Colborne, Ont.....	Nov. 9	24	Fell down hatch way.
Driver of brick wagon.....	Montreal, Que.....	" 26	56	Struck by street car.
Carter.....	Quebec, Que.....	Dec. 20	over 21	Fell down cellar trap.
<b>MINES, SMELTERS AND QUARRIES.—</b>				
Fireboss.....	Nanaimo, B.C.....	Oct. 2	over 21	Fall of rock.
Fireboss.....	Fernie, B.C.....	" 9	..	Trampled by runaway horses.
Shaftman.....	Galetta, Ont.....	" 1	25	Fell down shaft.
Shiftman.....	New Aberdeen, N.S.....	" 21	63	Caught between box and pillar when loading car.
Machine loader.....	Cumberland, B.C.....	" 3	..	Fall of coal.
Fireman.....	Sydney Mines, N.S.....	" 14	28	Tube burst—burned.
Haulage hand.....	Nanaimo, B.C.....	" 9	..	Caught between cars.
Pusher.....	Nanaimo, B.C.....	" 10	..	Caught between car and post.
Tipple foreman.....	Cassidy, B.C.....	" 18	..	Caught by empty car.
Rope rider.....	Fernie, B.C.....	" 20	..	Caught between car and post.
Miners (2).....	Canmore, Alta.....	" 5	25, 50	Bridge stick broke when putting in post—buried.
Miner.....	St Remi d'Amherst, Que.....	" 9	32	Fall of ground in a drift.
Miner.....	New Waterford, N.S.....	" 10	23	Fall of stone.
Coal Miner.....	Stellarton, N.S.....	" 28	36	Suffocated from outburst of gas and coal.
Coal miner.....	Thorburn, N.S.....	" 28	48	Slipped when pushing box.
Overman.....	Canmore, Alta.....	Nov. 8	41	Caught in gears of hoist.
Workman.....	Timmins, Ont.....	" 13	26	Rock slide—suffocated.
Switcher.....	Wellington, Extension Mines, B.C.....	" 14	over 21	Fall of rock.
Machine scraper.....	Lethbridge, Alta.....	" 14	27	Fall of coal.
Loader.....	Dominion, N.S.....	" 15	24	Fall of stone.
Loader.....	Taber, Alta.....	" 21	50	Fall of rock.
Brakeman.....	Laprairie, Que.....	" 27	25	Fell from clay car.
Miner.....	Drumheller, Alta.....	" 7	35	Fall of rock.
Miner.....	Trochu, Alta.....	" 7	..	Ignition of powder from shot.
Miner.....	Swamp Pit, Anyox, B.C.....	" 14	over 21	Fall of rock.
Miner.....	Thetford Mines, Que.....	" 18	45	Fall of rock.
Miner at lead mine.....	Galetta, Ont.....	" 19	30	Crushed by falling steel.
Engineer.....	Evansburg, Alta.....	Dec. 3	34	Struck by cars loose from locomotive
Mill hand.....	Nipissing Mine, Ont.....	" 6	..	Fell, striking pipe thus severing connection—scalded.

## FATAL INDUSTRIAL ACCIDENTS DURING THE LAST QUARTER IN 1919.—Continued.

Trade or Industry.	Locality.	Date	Age	Cause of fatality.
<b>MINES, SMELTERS AND QUARRIES.—</b>				
<i>Continued.</i>				
Miner.....	Britannia Beach, B.C....	Dec. 10	..	Struck by pipe—compressed air blow out.
Labourers (2).....	Dryden, Ont.....	" 10	..	Explosion.
Machine man.....	Clover Bar, Alta.....	" 16	49	Crushed by fall of coal.
Cage runner.....	Stellarton, N.S.....	" 26	..	Cage ran off track.
Mechanic.....	Anyox, B.C.....	" 31	..	Caught by loose cable.
<b>BUILDING AND CONSTRUCTION.—</b>				
Tinsmith.....	Edmonton, Alta.....	Oct. 6	30	Scaffold collapsed.
Superintendent of construction company.	Sudbury, Ont.....	" 7	35	Collision.
Labourer.....	Bond Head, Ont.....	" 6	..	Skull fractured.
Labourer.....	Halifax, N.S.....	" 8	40	Runway broke causing fall.
Painter.....	Quebec, Que.....	" 16	32	Fell off roof.
Carpenter.....	Toronto, Ont.....	" 27	50	Fell off roof, Oct. 17.
Watchman.....	Lake Ontario.....	" 27	35	Drowned.
Labourer.....	Portsmouth, Ont.....	Nov. 1	..	Struck by falling derrieck due to improperly fastened forging.
Labourer.....	Toronto, Ont.....	" 13	..	Struck by fellow workman on head.
Carpenter.....	Sudbury, Ont.....	" 15	40	Struck by auto.
Carpenter.....	Hamilton, Ont.....	Dec. 22	..	Fell off scaffold.
Employee of construction company.	Montreal, Que.....	" 12	32	Crushed by falling beam.
Labourer.....	Caledonia, Ont.....	" 8	..	Struck by stone.
Labourer.....	Niagara Falls, Ont.....	" 17	..	Fell down stairs.
Labourer.....	Winnipeg, Man.....	" 26	..	Fell off scaffold.
<b>RAILWAY, CANAL AND HARBOUR CONSTRUCTION.—</b>				
Repairman.....	Finch, Ont.....	Oct. 2	62	Struck by train.
Employee at canal work.....	Niagara Falls, Ont.....	Dec. 15	34	Struck by falling rock.
<b>LUMBERING.—</b>				
Foreman.....	Midland, Ont.....	Oct. 9	58	Struck on head.
Labourer.....	Pembroke, Ont.....	" 2	..	Struck by board.
Labourer.....	Bolkow, Ont.....	" 13	..	Drowned.
Employee.....	Kipawa, Que.....	" 15	..	Infection.
Roller.....	Cache Bay, Ont.....	Nov. 5	..	Crushed by log.
Woodsmen.....	Bolger Bridge, Ont.....	" 6	24	Drowned.
Woodsmen.....	Gloucester Co., N.B.....	" 9	..	
Woodsmen.....	Sootia, Ont.....	" 12	50	Struck on head by tree.
Woodsmen.....	Upper Gagetown, Queens Co., N.S.	" 21	62	Struck by falling tree.
Cutter.....	Lake Saint-Anne, Que...	" 18	..	Crushed by falling tree.
Employee.....	Whitefish, Ont.....	" 8	26	Struck by log.
Employee.....	Field, Ont.....	" 26	33	Struck by tree.
Employees on logging railway (2)...	Duncan Bay, B.C.....	" 30	..	Runaway train.
Employee.....	Gloucester Co., N.B.....	Dec. 5	59	Kicked by horse.
Employee.....	Dauphin, Man.....	" 5	28	Struck by falling tree.
Employee.....	Sudbury, Ont.....	" 10	27	Struck on head.
Workman.....	Stilwood, Ont.....	Dec. 8	62	Explosion.
Woodsmen.....	Edmundston, N.B.....	" 3	18	Electrocuted.
Woodsmen.....	90 M. West Le Pas, Man.	" 11	23	Struck by falling tree.
Elevator man.....	Chatham, N.B.....	" 8	35	Fell.
Teamster.....	Pakesley, Ont.....	" 14	..	Struck by log.
Sawyer.....	Osaquan, Ont.....	" 18	37	Struck by tree.
Labourer.....	Pakesley, Ont.....	" 26	..	Struck by log.
Labourer.....	Blind River, Ont.....	" 31	31	Struck by tree.
<b>PUBLIC AND MUNICIPAL EMPLOYMENT</b>				
Teamster.....	Kemptville, Ont.....	Oct. 27	..	Kicked by horse.
Street cleaner.....	Montreal, Que.....	" 28	63	Struck by automobile.
Lighthouse keepers (2).....	Kamouraska, Que.....	Nov. 9	..	Drowned.
Lighthouse keeper.....	Kamouraska, Que.....	" 17	..	Drowned.
Elevator operator.....	Winnipeg, Man.....	Dec. 20	..	Caught between door and platform in attempt to stop car outside of landing.
Fireman.....	Montreal, Que.....	" 20	..	Electrocuted—Wire on ladder came in contact with plug on wall.

FATAL INDUSTRIAL ACCIDENTS DURING THE LAST QUARTER OF 1919—*Concluded.*

Trade or Industry.	Locality.	Date	Age	Cause of fatality.
<b>PUBLIC UTILITIES.—</b>				
Employee of electric light system...	Transcona, Man.....	Oct. 6	41	(no particulars)
Power operator.....	Shelburne, N.S.....	" 21	43	Fell—drowned.
Troubleman with telephone company	Montreal, Que.....	" 29	45	Electrocuted.
Engineer with power commission...	Big Chute, Ont.....	Nov. 16	33	Electrocuted.
Lineman.....	London, Ont.....	" 9	..	Electrocuted.
Lineman.....	Bradford, Ont.....	Dec. 11	18	Injured foot.
Pitman with power commission...	Stamford, Ont.....	" 13	38	Struck by falling rock.
Electrician.....	Bridgewater, N.S.....	" 13	38	Fell from pole.
Employee of tramway company.....	Moncton, N.B.....	" 25	40	Injured in moving cars from shed.
<b>AGRICULTURE.—</b>				
Farmer.....	North Regina, Sask.....	Oct. 7	..	Crushed—Railway car overran tractor.
Farm hand.....	St. Mary's, Ont.....	Nov. 5	15	Hanged—While sliding down rope from mow, head caught in noose.
Farm hand.....	Arundel, Que.....	" 14	20	Trampled when horses bolted.
Farmer.....	Sarawak, Ont.....	" 13	..	Hand caught in leading rope when colts bolted.
Farmer.....	Cardigan, P.E.I.....	Dec. 8	21	Fell from load.
<b>FISHING AND HUNTING.—</b>				
Fisherman.....	Alert Bay, B.C.....	Oct. —	..	Drowned.
Fishermen (4).....	Nitinat Bay, Vancouver Island, B.C.	" ..	..	Drowned.
Fishermen (2).....	Halifax, N.S..... (off Liscomb)	Dec. 18	..	Lost in storm.
<b>MISCELLANEOUS</b>				
Messenger Boy.....	Lauzon, Que.....	Oct. 2	15	Fell.
Labourer with fuel company.....	Toronto, Ont.....	" 22	26	Slipped and drowned when loading coal.
Fireman at sponging plant.....	Montreal, Que.....	Nov. 3	58	Pipe burst.
Janitor.....	Montreal, Que.....	" 4	54	Slipped on snow and fell down stairs.
Employee of electrical plant.....	Montreal, Que.....	" 5	18	Fell down elevator shaft.
Surveyor.....	Victoria, B.C.....	" 19	..	Fell off bluff.
Labourer with merchant.....	York Co., Ont.....	" 21	60	Cut knee with axe.
Electrician.....	St. John, N.B.....	" 22	51	Fracture of leg.
Elevator employee.....	Carman, Man.....	" 25	..	Caught in belting.
Labourer.....	Bridgewater, N.S.....	Dec. 15	68	Fell when loading car.
Labourer.....	Montreal, Que.....	" 15	17	Fell through window.
Labourer at refinery.....	Port Colborne, Ont.....	" 31	44	Fell off ladder.
Chauffeur at garage.....	St. John, N.B.....	" 15	..	Smothered by petrol fumes.

## SUPPLEMENTARY STATEMENT OF ACCIDENTS THAT OCCURRED PREVIOUS TO THIRD QUARTER OF 1919.

Trade or Industry.	Locality.	Date	Age	Cause of fatality.
Operator at planing mill.....	London, Ont.....	Apr. 27	62	Struck on thigh by machine.
Carpenter.....	Hambleton, Ont.....	July 29	26	Scaffold collapsed.
Labourer.....	Bridgewater, N.S.....	Aug. 31	64	Fell over lumber.
Miners' helper.....	Canmore, Alta.....	Sept. 4	32	Struck by falling rock.
Painter.....	Espanola, Ont.....	" 4	30	Fell off scaffold.
Labourer.....	Toronto, Ont.....	" 25	70	Struck by truck.
Brickmaker.....	Winnipeg, Man.....	" 26	19	Fell off car.
Conductor.....	Niagara Falls, Ont.....	" 29	..	Fell under car.

## RECENT LEGAL DECISIONS AFFECTING LABOUR

**IN** the February issue of the LABOUR GAZETTE, on page 205, there is given a decision rendered by the Court of King's Bench of Manitoba, in which certain provisions of the Manitoba Workmen's Compensation Act were declared to be *ultra vires* of the legislature. This decision has since been reversed by the Manitoba Court of Appeal, which delivered the following judgment in full court:

"The board, as created, is an administrative body and not a court of justice. It is not, in the opinion of the court, a supreme court. Some provisions of the act are of a drastic, almost revolutionary nature. But the courts have nothing to do with the policy or the legislation of the act. If the board exceeds its jurisdiction or acts without jurisdiction it may be restrained. But as long as the board acts within its jurisdiction it is the duty of the courts to lend them assistance when necessary to carry out the purpose and intentions of the act.

It has been argued that the Workmen's Compensation Board was a superior court and that the appointment of the board came under the British North America Act, assigning power exclusively to the Dominion, and that, therefore, appointments made by the provincial government were *ultra vires*. The intention of the Workmen's Compensation Act is to provide means for securing speedy compensation to workers who receive injuries arising out of and in the course of their employment, also to recover reasonable compensa-

tions, without the expense of lengthy litigation. To the board the provincial legislature has entrusted exclusive jurisdiction. The action and decisions of the board are final, and, in fact, the legislature has appointed the board exclusive judges of law and fact in all questions arising under its jurisdiction. Similar statutes are in force in other provinces of Canada and the jurisdiction of the provincial legislatures to enact such statutes has not been successfully attacked.

Taking the Workmen's Compensation Act at large, the court holds the power to enact such legislation was conferred on the legislatures of the provinces by section 92 of the British North America Act. In previous cases it has been found that the B.N.A. Act conferred a provincial government with 'authority as plenary and as ample within the limits prescribed by section 92 as the Imperial parliament in the plenitude of the powers possessed could bestow.' Within these limits of subjects and areas the local legislature is supreme." (*Manitoba—Kowhanko vs. Tremblay et al.*)

A driver of a bread cart was injured while at work by a street car in Toronto. He brought action against the street railway company for damages under the common law. A jury awarded him damages of \$2,500, and found excessive speed of the car as the negligence. During the trial it came out in evidence that before beginning his common law action, the plaintiff had elected to claim compensation under the

**A claim under Ontario Compensation Act does not debar action under Common Law, but Board becomes beneficiary**

Workmen's Compensation Act,' whereupon the defendant appealed the case on the ground that such election barred the plaintiff's right to recover damages in this action. The judgment of the Court of Appeal was to the effect that "the only right given to the Board by the election is that of subrogation," and that "the situation created by the election spoken of in the statute and its consequences cast no additional burden upon the wrongdoer. . . . He has no concern with the dealings of the Board and the claimant; and, unless he is prejudiced, he has no right to complain. In this case, the respondent's cause for action is not divested; it exists still in him, but if enforced by him it must be for the benefit of the Board, if he has signed an election. . . . The dismissal of the appeal should be preceded by a direction that the amount of the judgment should be paid to the Board, to be dealt with by them in due course." The defendant then made a further appeal to the Supreme Court of Canada, on this point. The Supreme Court upheld the judgment of the Appeal Court and declared that an election by the workman to claim compensation under the Act did not bar an action consequently brought by him against the defendant. The Board should be the beneficiary of such action, but the defendant was sufficiently protected by a direction of the Court that the amount of his judgment be paid to the Board. The appeal was therefore dismissed. (*Ontario—Hutton vs. Toronto Railway Company.*)

A driver of a coal cart was thrown from his cart and injured. He brought action against his employers under the Workmen's Compensation Act of Quebec, in the Superior Court, and was awarded damages. An appeal was taken against this judgment, and the case was brought before the Court of Review. The question was raised as to

the meaning of *chantier de charbon* as used in the French text of the Quebec Workmen's Compensation Act, and as to whether it came within the scope of the Act. It was held by the Court of Review that the term "*chantier de charbon*" was meaningless, but that the meaning was clearly expressed in the English text, which was therefore adopted by the Court as the law. The English text states that the Act is applicable to "a stone, wood, or coal yard." While the plaintiff was not actually at work in the coal yard when he met with the accident it was held by the Court that "when there is need in the exercise of an industry to cart the product of that industry in vehicles belonging to the proprietor, it is right to say that the carters are also employed in the industry."

Judgment was therefore delivered in favour of the plaintiff and the decision of the Superior Court was upheld. (*Quebec—Charbonneau vs. Peter Kennedy & Co.*)

A boy of thirteen years was killed in a shop of an asbestos mining company at Thetford Mines, Que. His father brought an action against the Company claiming that the accident was due to the imprudence and negligence of the assistant foreman. The Company denied all responsibility alleging that the accident was due to the victim's own fault. The Superior Court of the District of Arthabaska decided in favour of the plaintiff and condemned the Company to pay him \$1,182. The Company appealed against this judgment. The evidence showed that the deceased had been employed at another asbestos mine at \$2 a week and that he had been giving all his wages to his father. It appears that the boy was killed by compressed air with which the sub-foreman was dusting off the boy's clothes. The Company maintained that orders had been given to the workmen not to touch the compressed air hose, only the foreman and the sub-foreman being allowed to use it, and

**Quebec  
Workmen's  
Compensation  
Act includes  
Carters for  
Industries in  
its scope**

**Company liable  
for act of  
sub-foreman**

then only for certain specified purposes. These orders were disobeyed frequently with the knowledge of the foreman and sub-foreman, as the workmen almost every day used the hose to dust the asbestos off their clothes. There was another order that strangers should not be allowed to enter except on business, but up to the time of the accident this order also was not observed. It was held by the Appeal Court that (1) there was fault on the part of the Company in not preventing the use of the hose for compressed air to dust off the employees; (2) the sub-foreman, in addition to employing the compressed air hose for its ordinary purpose of dusting off the motor,

employed it in a way for which he lacked the necessary experience to avoid danger, and the company should be answerable for the lack of skill and inexperience of its employee; (3) there should be applied to the defendant the presumption of fault which follows from the first part of Article 1054 of the Civil Code with regard to the care of objects, and it was for him to destroy this presumption by a proof of *force majeure*, misadventure, or complete absence of fault on his part. It was held that this was not done, and the judgment of the trial court was therefore confirmed. (*Quebec—Delisle vs. The Asbestos Corporation.*)

# THE LABOUR GAZETTE

MINISTER—THE HONOURABLE GIDEON D. ROBERTSON.  
DEPUTY MINISTER—F. A. ACLAND.

Volume 20

APRIL, 1920

Number 4

## NOTES ON CURRENT MATTERS OF INDUSTRIAL INTEREST

### The month in brief

At the beginning of March the percentage of unemployment was 4.33, as compared with 4.28 at the beginning of January. According to returns received from nearly 4,900 firms, employment continued to increase during March, the general monthly average showing a slight increase over the average for February; towards the end of the month, however, employment became practically stationary. According to preliminary figures, the various offices of the Employment Service of Canada received about 41,700 applications for employment, were notified of 38,200 vacancies, and made about 28,300 regular placements and 6,100 casual placements during March, as compared with 36,750 applications, 28,350 vacancies, 29,900 regular placements and 5,000 casual placements in February.

The time loss on account of industrial disputes during March was less than during both February, 1920, and March, 1919. There were in existence during the month 22 strikes, involving about 3,789 workpeople and resulting in a time loss of about 43,169 working days. Of these strikes, 8 were on record at the beginning of the month, and 14 were reported as having commenced during the month. At the end of March there were on record 16 strikes involving about 2,503 workpeople.

The average cost of the weekly family budget of staple foods equalled \$15.98

at the middle of March as compared with \$15.77 in February, \$13.05 in March, 1919, and \$7.68 in March, 1914. The index number of wholesale prices averaged 349.0 for March as compared with 343.5 for February, 277.6 for March, 1919, and 137.0 in March, 1914.

### Proceedings under the Industrial Disputes Investigation Act

During March the Department received five reports from Boards of Conciliation and Investigation established to deal with disputes between (1) the Nova Scotia Steel and Coal Company, Limited, and certain of its employees, being members of District No. 26, United Mine Workers of America; (2) the Inverness Coal and Railway Company, Inverness, N.S., and certain of its employees, being members of District No. 26, United Mine Workers of America; (3) the Canadian General Electric Company, Peterborough, Ont., and certain of its employees, being armature winders, members of Local Union No. 261, International Brotherhood of Electrical Workers; (4) the Corporation of Ottawa and certain of its employees, being members of Civic Employees' Federal Labour Union No. 15, and (5) the Bedford Construction Company, St. John, N.B., and certain of its employees engaged on the Courtenay Bay Harbour contract, which Board had been reconvened to confer and make interpretation of the clause with respect to the ten-hour day appearing in the re-

port rendered by this Board in October, 1919.

Five applications for the establishment of Boards were received, and Boards were established in connection with two disputes for which applications had been received during previous months.

#### **Special meeting of International Labour Conference**

The governing body of the International Labour Office has arranged for a special meeting of the International Labour Conference to be held at Genoa on June 15. The meeting is called for the purpose of considering questions relating to seamen, and the following matters have been placed on the agenda: (1) Application to seamen of Washington Convention limiting working hours to eight per day and forty-eight per week, with the consequential effects of such hours on manning and on regulations for governing accommodation and health on board; (2) Supervision of articles of agreement. Facilities for finding seamen employment. Application to seamen of the Washington Convention and recommendations concerning unemployment and unemployment insurance; (3) Application to seamen of the Washington Convention prohibiting children's employment under fourteen years; (4) Consideration of the possibility of drawing up an International Seamen's Code.

#### **Proposed industrial conference at Ottawa**

When introducing a Bill in the Senate on April 6, to amend the Industrial Disputes Investigation Act, 1907, the Minister of Labour stated that it had been proposed that a conference should shortly be held in Ottawa, at which there would be a representative of each provincial Government, a representative of the employers of each province, chosen by the employers, and a representative of labour from each province, chosen by labour, in accordance with and agreeable to decisions arrived at by the Industrial Conference which

met at Ottawa in September last. It was proposed that the conference should deal with the question of the provinces either permitting the Industrial Disputes Investigation Act to be extended in its scope or themselves passing legislation whereby workmen engaged in industrial life or employees of municipalities may have access to machinery operating along similar lines. The particular purpose of the meeting would be to endeavour to co-ordinate and make uniform the labour laws of the various provinces.

#### **Reply of Dominion Government to labour delegation**

The Dominion Government, in a letter from Sir George E. Foster, acting prime minister, to the executive of the Trades and Labour Congress, has replied to the representations made by a delegation of the Congress on January 8, an account of which appeared in the February issue of the LABOUR GAZETTE, expressing its views on the various subjects submitted for its consideration. With regard to immigration it was stated that the Government had already adopted the principle of careful selection of all immigrants. Careful consideration was promised with regard to the suggestion of the delegates respecting Oriental immigration and certain deportation provisions of the Immigration Act. Further inquiry was promised with a view to assisting Canadian theatrical mechanics. With regard to the right to organize, the Government stated that while this was already recognized as applying to industrial workers, the principle could not be applied to Government employees, who were obviously in a different category. In accordance with the terms of the Peace Treaty, and the action of the Labour Conference at Washington, the Government had already approved the adoption of the forty-eight hour week and the eight-hour day, and the question as to whether necessary legislation on this subject was within the jurisdiction of the Federal or of the Provincial Governments was now being considered. Care-

ful attention was promised to any legislation proposed to enable workmen to buy co-operatively. With regard to the registration of union labels, the Government stated its willingness to consider this matter, provided a general statement of such legislation as would meet the needs were submitted by the delegation. Concerning the revision of the Industrial Disputes Investigation Act, amendments to the Act were now under consideration by the Department of Labour, and further suggestions would be gladly received. Inquiry into health regulations for painters by the Department of Health was promised. The findings of the Mathers Industrial Relations Commission and the National Industrial Conference were now being considered. The Congress was requested to make specific proposals as to the desired amendment to the Fair Wage Clause in Government contracts. With regard to the age limit on the Canadian National Railways, the Government stated that there was no age limit prescribed by law, that the National Railways were being operated under a corporate management, and that the Government declined to interfere in any way with the details of operation. Such matters, it was stated, should be submitted first to the management for adjustment by negotiation. With regard to the protection of car builders and repairers, the Government explained that this was a matter for adjustment by the railway management, and that, failing proper adjustment through this source, application should be made to the Board of Railway Commissioners.

#### **Bonuses for teachers**

The Regina Collegiate Institute Board recently voted a bonus to the members of its teaching staff. In the case of teachers receiving more than \$2,000 per annum, this bonus amounts to \$250. Teachers receiving \$2,000 and less will be given a bonus of 10 per cent of their salary. The bonus is designed to meet the high cost of living during the current year, which was unforeseen when the teachers signed their contracts. The school board of Brandon, Manitoba,

has granted bonuses of \$250 and \$200 to all teachers. The arrangement is as follows: (1) To those teachers receiving the initial salary of \$750, a bonus of \$250; (2) To teachers joining the staff since September last, a bonus in due proportion; (3) To all other teachers, a bonus of \$200.

#### **Proposed civic pension scheme for Calgary**

A self-sustaining municipal retirement system, to be based upon figures compiled by an actuarial expert, is recommended in a report of the civic pensions committee to the city commissioners of Calgary. The object of the system would be primarily to insure employees and their dependents against want in old age, disability and death. It is proposed that the beneficiaries bear one-half the cost of the pension scheme, the municipality paying the other half, and that it be covered by an assessment on salaries, which would amount to about 10 or 12 per cent. The benefits suggested are as follows: A superannuation benefit to employees attaining the age of 60; a disability benefit upon disability incurred in the performance of duty; a disability benefit upon disability through causes not connected with the performance of duty, after ten or more years of service; death benefits; return of employees' contributions with 3 per cent compound interest, when leaving the city's service without drawing retirement benefits. Because of their duties and the fact that after 50 or 55 years of age policemen and firemen are not as efficient as they should be, it is recommended that they should be retired earlier than other employees. To provide for their retirement, without raising the assessment, it is suggested that a percentage of fines, licenses and other sources of revenue in their departments be set aside.

#### **Pension scheme of Whitman and Barnes Company**

The Whitman and Barnes Manufacturing Company, of St. Catharines, Ont., has adopted a pension scheme for all employees who have been in the con-

tinuous service of the Company for certain periods of years. The expenses of such pension are to be borne entirely by the Company, without any contribution from, or levy upon employees. The following persons under this scheme are eligible for pensions: male employees of 70 and female employees of 65, who have been in the Company's service for fifteen years or more; male employees of from 60 to 65, and female employees of from 55 to 60, who have been in the Company's service for twenty years; all employees who have been in the Company's service for thirty years or more. Pensions may be refused or cancelled, for just cause, where the management deems advisable. Upon approval of the management, a pensioner may engage in other lines of work not prejudicial to the interests of the Company. Pensions shall be paid monthly as follows: For each year of continuous service, one per cent of the average regular monthly pay (not including bonuses and awards) during the ten years preceeding retirement. Pensions shall not amount to less than \$20, nor more than \$100 a month. The Company guarantees such pensions as are granted for the life of the employee, and to his widow after him, provided she shall remain unmarried and possess no other means of support, both subject to the rules and regulations of the Company. The Company reserves the right to alter or abolish the pension scheme at any time it sees fit, without affecting in any way those already receiving pensions.

**Housing  
scheme of  
employers at  
Trail, B.C.**

Owing to the house shortage in Trail, B.C., the Consolidated Mining and Smelting Company of Canada, Limited, has formulated a scheme for the relief of a portion of its employees which it is now ready to put into effect. The proposition is as follows: A loan to the amount of 80 per cent of the value of the property will be made to a married employee to purchase a lot and build a house for his own use, \$2,000 to be the maximum amount of such loan. Loans

will be repaid in monthly instalments covering both principal and interest, the terms of repayment to extend over periods of four, six or eight years, according to the circumstances of the borrower. Additional payments may be made on account of principal at any time, in even amounts of \$100, or multiples thereof. The loans will be secured by a first mortgage. If desired, building material may be supplied by the company at cost, in place of cash for their purchase. Advances on account of the loan arranged will be made from time to time, as the building progresses, such advances to be estimated by the company's inspector. Value of work done by the borrower himself, or the value of a suitable lot owned by the borrower, will also be estimated by the company's inspector, and may apply on the portion of the expenditure to be carried by the borrower. The company will have a number of standard designs of houses, which are recommended but not insisted upon, though such designs are likely to be cheaper than the borrower's own design, especially as an attempt will be made to standardize some of the parts. Should the purchaser prefer his own design, it will require the inspector's approval and should be accompanied by full specifications and estimate of cost, preferably by a bid from a responsible builder. The company reserves the right to inspect the house from time to time during construction, and to require reasonable compliance with the specifications submitted.

**Newswriters'  
branch of In-  
ternational  
Typographical  
Union**

Following British precedent, the newspaper writers of Montreal organized themselves last year into a trade union, the new organization being affiliated with the International Typographical Union, with the title of Newswriters' Union of Montreal (International Typographical Union) Local No. 10. This local, the first trade union organization of working journalists in Canada, received its charter from the parent body on May 9, 1919. Although

subject to the general laws of the International Typographical Union, it is governed by its own constitution and by-laws suited to the conditions of editorial and reportorial newspaper work. A clear distinction is made between working journalists on the one side, who thus become allied with the printing and mechanical employees in the newspaper industry, and the proprietors, managers, and directors on the other side, who are not eligible for membership in the union. A newswriters' union has also been formed at London, Ont.

The National Union of Journalists of Great Britain, which had over 4,000 members in 1919, was established in March, 1907. It consists of working journalists who are and have been for three years members of a journalistic staff, or who are and have been for three years dependent upon their own journalistic work. Its objects are: (1) to defend and promote the professional interests of its members with regard to salary, conditions of employment, and tenure of office; (2) the establishment of out-of-work, benevolent and superannuation benefits, and sickness and other insurance; and (3) to deal with questions affecting the professional conduct of its members. Other services rendered by the union include an unemployment bureau to assist its members in finding suitable work, and free legal advice, the Union also taking legal action when necessary to protect the rights of its members. Newspaper proprietors in Great Britain are reported generally to regard the Union without prejudice.

A similar movement is reported also in the United States, where newswriters' unions were organized in many centres in 1919.

#### **Joint meetings of British Trade Union- ists and co- operators**

Following the joint meeting of representatives of British Trade Unions and Co-operative Societies which was held in London last spring, mention of which was made in the May, 1919, issue of the LABOUR GAZETTE, a series of local joint confer-

ences have taken place during the past few months in the chief centres in the southern section of England, according to the *Co-operative News*. At a joint conference held at Banbury a resolution was carried urging that the development of co-operative banking, insurance and trading is essential; that the unification and development of educational and propaganda efforts be encouraged as a means of aiding reconstruction; and that co-operative and trade union representation on local governing bodies should be sought and supported by co-operative societies and trade unions.

#### **Jottings**

An officer has been appointed to the Department of Labour, to take charge of the juvenile employment work of the Employment Service Branch. Mr. J. M. Wyatt, formerly Chief Probation Officer of the Toronto Juvenile Court, assumed the duties of this office in January last.

The Labour Department of the Province of Quebec opened an office at Montreal, on March 22, for the purpose of examining children under 16 years of age who wished to obtain educational certificates entitling them to work, in accordance with the Quebec Industrial Establishments (Amendment) Act respecting Child Labour, which Act was printed in the April, 1919, issue of the LABOUR GAZETTE. A rule has been passed that children working in factories need not report to the office to be registered until their employer has been notified. In future the registration cards will be accepted by the factory inspectors without question, and it will not be necessary to make inquiries from their employers. All registered children under 16 will be compelled to attend night school.

A bill has recently been introduced in the Quebec Legislature by the Provincial Secretary guaranteeing a salary to the young inmates of the reformatories and industrial schools of Quebec commensurate with their work. Part of such salary will be appropriated by the

Government to cover the expense of their maintenance, the surplus being handed over to the youthful offenders on their liberation.

The executive of the Canadian Construction Industries Association, which met in conference at Ottawa in February, have appointed a standing committee on labour whose duties will be, among other things, to take steps toward the formation of an industrial council for Canada, to deal with Canadian-wide labour questions in the building industry. The Trades and Labour Congress of Canada has been asked to co-operate with the committee in this matter.

A bill to provide a minimum wage for women has been introduced into the Nova Scotia Legislature, which would create a minimum wage board of five members, two of whom shall be women. The authority to be conferred on the board is similar to the powers vested in the minimum wage boards already in existence in Manitoba, British Columbia and Saskatchewan.

Under amendments to the Factory Act passed at the last session of the Alberta Legislature, advisory committees have been appointed by order-in-council in Edmonton, Calgary, Medicine Hat and Lethbridge. Each of these committees consists of three members, one representing the employers, another the employees, the third being appointed by the Attorney General. The committees will investigate prevailing labour conditions and make recommendations regarding hours of work, wages, etc., and upon such recommendations the chief factory inspector may then issue regulations covering the situation.

Arrangements have been made for the holding of an industrial congress in Alberta and British Columbia from June 2 to June 10, similar to the Alberta Industrial Congress of last August, an account of which ap-

peared in the September issue of the LABOUR GAZETTE. The programme will include visits to Medicine Hat, Lethbridge, Calgary, Edmonton and the coast cities of British Columbia. At the request of the National Manufacturers' Association of Great Britain, a representative is being sent there to organize a party to attend the congress.

The American Federation of Labour announces that the building trades unions have reached an agreement to submit all jurisdictional disputes to a joint representative board, the decisions of which will be final. The board met in March at Washington, D.C., and proceeded to assign classes of work to the different trades. The assignment will continue in effect indefinitely, and any further disputes between unions regarding their right to do certain work will be settled by arbitration.

A bill has recently been presented in the Italian Parliament by the Minister of Industry, Commerce and Labour, providing for a maximum eight-hour day and a forty-eight hour week. Under this bill two hours' overtime will be allowed daily, but only in cases of necessity, and provided the worker agrees to work overtime at a 25 per cent increase in pay.

An organization called The Confederation of Intellectual Workers (La Confederation des Travailleurs Intellectuels) has recently been formed in Paris, France. Delegates of two hundred associations met to draw up the constitution. Their manifesto declares their intention to "represent, co-ordinate and defend the interests of all those men and women who derive their principal livelihood from the work of their brain and not from manual labour or invested capital." Clerks, inventors, managers, directors, writers, artists, teachers, lawyers and scientists are eligible for membership.

## INDUSTRIAL CONDITIONS DURING MARCH, 1920

## I.—General Review

A continued slight increase was noted in the total volume of employment in Canada during the month of March. At the end of the month, however, employment became practically stationary. Gains were steady and well maintained throughout Ontario and Quebec, while sharp fluctuations occurred in the Maritime Provinces and British Columbia, and a marked decline continued in the Prairie Provinces.— Compared also with the base week in January the gain was substantial, and was due largely to expansion in the metal, textile, and pulp and paper industries.

In the metals and machinery group a steady improvement was recorded in all provinces except in the west, marked gains being made in Ontario, Quebec and the Maritime Provinces. Eastern ship-building was increasingly active, but on the Pacific coast this industry was much less steady. In the food group the general average of the previous month was maintained, though some decline in activity was noted in the abattoir and meat packing industries. Textile and clothing workers were increasingly busy during the month. The pulp and paper industry was still very active, the general average of employment being considerably increased, though local declines were noted about the middle of the month in Quebec and British Columbia. The clay, glass and stone industries started the month with a decline, followed, however, by substantial increases, with local variations. Paint, oil, and chemical workers found increased employment. The leather trades declined slightly. Shipping and 'longshore work made marked gains, especially in Quebec, Ontario and British Columbia, in the second week of the month.

Coal mining showed decreased activity throughout the month, especially in the Prairie provinces, the Maritime provinces, however, maintaining the previous level. Railway construction showed signs of the approach of the busy season, and building began to revive, although hampered at times by adverse weather conditions. Lumbering and logging continued to show a marked decline, operations in the woods practically coming to an end for the season.

The loss of time on account of industrial disputes during March was less than during February, 1920, and March, 1919.

**Strikes** There were in existence at some time or other during the month 22 strikes, involving about 3,789 workpeople, and resulting in a time loss of about 43,169 working days, as compared with 24 strikes, 3,145 workpeople and 49,939 working days in February, 1920; and 25 strikes, 4,206 workpeople and 71,704 working days in March, 1919. On March 1 there were on record 8 strikes, affecting 461 workpeople. Fourteen strikes were reported as having commenced during March, as compared with ten in February. One of the strikes commencing prior to March and five of those commencing during March were reported terminated, leaving 16 strikes, involving about 2,503 workpeople, on record at the end of the month.

The general movement in prices continued upward, substantial increases being noted in the index numbers of wholesale prices and in the retail prices food budget in spite of some seasonal decreases in eggs, fish and hides. The chief increases were in building materials and in metals. Grains and fodder, livestock and meats, fruits

**Prices**

and vegetables and miscellaneous foods showed slight increases.

In retail food prices, meats were slightly higher, eggs were down ten cents per dozen, milk and butter were slightly lower, but sugar averaged nearly two cents per pound higher, and potatoes were thirty cents per bag higher. Coal, wood, coal oil and rents were all slightly upward.

The retail prices budget of 29 staple foods averaged \$15.98 in some 60 cities at the middle of March, as compared with \$15.77 at the middle of February, \$13.05 in March, 1919, and \$7.68 in March, 1914. The index number of wholesale prices averaged 349.0 for March as compared with 343.5 for February, 277.6 for March, 1919, and 137.0 in March, 1914.

## II.—Industries and Trades.

Steel and other metal industries throughout the Maritime Provinces showed increased activity during March. The output of the Dominion Steel plant at SYDNEY, which showed a marked increase over the previous month, was as follows: pig iron, 18,300 tons; ingots, 23,800; blooms, 2,750; billets, 5,400; rails, 3,350; rods, 9,260; plates, 2,500; fit rails, 700; wire, 200; nails, 1,850; two blast furnaces were in operation, but it was expected that six would shortly be working, when the number of employees be increased from about 4,500 to over 5,000; output was partly hampered by the shortage of cars affecting receipt of equipment and material; the rail mill closed down about the middle of the month, the Government rail order being completed, but the men discharged would, it was expected, be fully absorbed when the bar mill opened, and additional men would be required. The stove, furnace and metal roofing industries continued active during the month. The output of the steel plant at SYDNEY MINES, which showed a slight increase over the previous month, was as follows:—iron, 7,300 tons, steel, 10,700; all departments were in operation. WESTVILLE reported an improvement in the structural steel industry; engine and boiler makers were busy; sheet metal workers active, and the electrical trade normal.

At NEW GLASGOW conditions in the metal group continued steady; all the mills of the Nova Scotia Steel Company were active, but without increased em-

ployment, about 990 men being on the various staffs; the Maritime bridge plant worked part time owing to difficulty in obtaining material. At HALIFAX activity in the skate, bar, iron-nuts and bolts trades continued steady with good prospects. AMHERST reported great activity in engineering work. At CHARLOTTETOWN, foundry and machine shop men were well employed. The rolling mill at St. JOHN, which closed last month would, it was reported, shortly re-open under new auspices, employing about seventy men at first; tin and sheet metal workers were well employed, but the machine shops were slack owing to the continued strike of machinists. At MONCTON the moulding and machine shops which were damaged by fire in February were not quite ready to resume work, but the other foundries were in active operation. FREDERICTON reported active preparations for the spring rush of work. At MONTREAL the structural steel industry showed activity; sheet metal plants were quiet and the electrical trades were normally active. QUEBEC reported a very busy month in the stationary engine and in the architectural and structural steel plants, but the metal roofing workers were rather slack. Machinists at SHERBROOKE were actively employed, with good prospects ahead; conditions in the architectural iron and steel shops were fairly good. At St. HYACINTHE the iron working plants and machine and repair shops had plenty of work. Iron workers at THREE RIVERS, St. JOHN's and IBERVILLE were very busy and foundries and

machine shops were well employed. The foundries at OTTAWA and HULL were busy. Continued activity, with occasional demand for more help, was reported from TORONTO in the metal and machinery industries, though production in some lines was limited by shortage of steel; stove and furnace plants were busy, but agricultural implement factories could not carry out all the work on hand, owing to lack of raw material. A general demand for more skilled labour was still reported from HAMILTON, where activity prevailed throughout the metal group. At NIAGARA FALLS the metal working industries continued busy, with machinists, foundrymen, brass polishers and tool makers in demand; cutlery and plating factories were also short of drill and press hands, male and female. At BROCKVILLE boiler work was reported rather slack, but activity prevailed in stove and furnace plants and in factories for axes, hammers, edge tools, and small hardware. At WELLAND a large steel-working industry that has been shut down for some time was about to reopen, having secured large European orders, while two other iron-working concerns were about to enlarge their establishments. Metal trades at ST. CATHARINES continued well employed, boiler makers being specially busy. BELLEVILLE reported a good month in the metals group, many foundry and steel plants working day and night; the rolling mills were busy supplying the demand for bar iron, nails, etc. PETERBOROUGH reported all iron industries working to capacity, overtime being frequent among moulders and core-makers, and many machine shops working day and night. In GALT and vicinity, many machine shops worked double shifts, and the metal roofing and other sheet metal trades were very busy; activity prevailed generally in the pig iron and steel furnaces, in the rolling mills, and the stationary engine shops; the stove and furnace plants continued very busy, also electrical apparatus and fixtures, and agricultural implements. At BRANTFORD the machine shops all ran full handed; the milling machinery plant worked overtime; the factories

for gas engines, windmills, etc., were active; stove and radiator workers were well employed; and electrical workers were very busy, more skilled help being needed; farm implement makers were also active. KITCHENER reported a demand for sheet-metal workers and electrical fixture makers; foundries and machine shops were very busy, but had sufficient help; stationary engine, thresher and farm implement factories were busy in every department. At GUELPH activity prevailed in all the metal trades, moulders and factory labourers being in demand. STRATFORD reported the iron machine and repair works were very busy and other machinery and appliance factories continued active. A chronic shortage of moulders was reported from WOODSTOCK in the stove and furnace factories, also a scarcity of skilled mechanics in the boiler and machine plants. LONDON reported the rolling mills busy, with all the furnaces going; the stove and furnace factories were very busy though hampered in one department by shortage of tin; in the moulding shop labourers were employed for "sanding down" work hitherto done by the moulders, who work on piece terms; thresher and threshing engine makers were extremely busy. A scarcity of unskilled helpers was noted at ST. THOMAS for the iron foundries, which had an active month. The structural steel industry at CHATHAM showed steady improvement. Additional help was taken on at the structural steel plants at WINDSOR; machine shops were rushed with work, all metal trades being very active; the injector factory took on additional help owing to rush of overseas orders. The electric die castings factory at TRILLIA gave steady employment to about 40 men. The steel plant at SAULT STE. MARIE continued running day and night shifts, and the foundries were calling for more help. At WINNIPEG employment in the metal group remained unchanged, but there was some demand for machinists, moulders and pattern makers; electrical workers and wiremen were well engaged.

The metal trades at MEDICINE HAT

had an active month, except the rolling mill, which was rather slack. The iron works at LETHBRIDGE were busy, all hands working full time, but at EDMONTON the iron workers were only fairly employed. VANCOUVER reported activity in the rolling mill and in the structural iron industry; roofing and other sheet metal plants were busy; a demand was noted for workers in some metal trades. The machine shops at NEW WESTMINSTER had a busier month than any since last June. Machinists and pattern makers were in demand for the new drydock at PRINCE RUPERT. At VICTORIA the demand for machinists and stationary engineers still continued; iron foundries were dull, but stove foundries operated steadily.

The railway repair shops at SYDNEY were active during the month of March.

**Vehicles (land and water)** The shipyards at TREN-  
TON were busy, but the car shops were rather slack and will so continue for about two months as the plant is being overhauled for a large government order; many car shop men are finding employment at the shipyard where a demand for help will follow their return to their own work. At WESTVILLE the carshops took on many more employees, shipbuilders were busy, and automobile and farm implement makers were well employed. Shipbuilding at HALIFAX continued active, with demand for iron workers and helpers; about 1,340 men were employed; work on portable engines and boilers showed an improvement over the previous month, most of this work being done at the shipyards. The car foundries at AMHERST worked under heavy pressure, but the big government order was not yet begun. At MONCTON great activity continued in the locomotive and car repair shops of the Canadian National Railways. MONTREAL reported normal employment in the engine and boiler shops and in the shipbuilding yards. At QUEBEC the portable engine shops were active; the iron shipbuilding and ship-repairing yards had a very busy month, one firm being reorganized and now employing

over 1,200 men; repairs on steamers, tugs, schooners, and the numerous vessels that wintered in port were in active progress. Shipbuilding was very active at THREE RIVERS, 600 men being regularly employed at one yard and 900 at another, but shortage of material hampered operations. Increased employment in the shipyard was reported from SOREL, in view of the opening of the season. The car shops at OTTAWA and HULL were normally active. At TORONTO the shipbuilding yards, and engine, boiler and automobile factories were all busy. HAMILTON reported a general demand for skilled labour, and activity in the locomotive and car shops, and in portable engine, boat, carriage, cycle and motor factories. The locomotive works at KINGSTON were active and increasing their staff, and the shipbuilding and repairing yards were actively preparing for the coming season. Motor boat and engine factories at BROCKVILLE were busy. The G.T.R. shops at BELLEVILLE were busy on the manufacture of locomotive parts, and other foundries were active on portable engines and boilers; makers of automobile parts were exceptionally busy. At GALT and in the district the portable engine and boiler makers were well employed and steam and motor tractor workers were very busy. At BRANTFORD the engine shops worked overtime; tractor factories were active on overseas orders and carriage and wagon plants were actively preparing for the coming season. KITCHENER reported activity in the portable engine and auto truck factories. More help was in demand for the wagon and sleigh factories at WOODSTOCK, where the activity of the past season still continues. Engine and boiler shops at CHATHAM were busy, and the automobile factory increased its staff during the month. Considerable additional help was taken on at the various automobile factories at WINDSOR, every department being rushed to capacity; die makers and machine hands were wanted by many concerns; all machine shops were rushed with work for auto supplies, some new concerns being started, and even stove foundries were directing their attention to auto tops;

tractor factories were very busy supplying the western demand. Work continued at the shipyard at PORT ARTHUR, where from 700 to 900 men have been steadily employed all winter. Employment at the car works at FORT WILLIAM was slack. At WINNIPEG a demand was noted for machinists, moulders and pattern makers for the railway shops. Automobile repair shops continued busy with demand for experienced help; the Ford plant employed about 200 hands. VANCOUVER reported activity in locomotive and car shops, also an increase of activity in the steel shipbuilding trade, due to the arrival of more material; automobile repair and parts shops were busy. At VICTORIA employment was increased by the enlarged shipbuilding programme, the iron shipyards being active; by order of the Dominion Government all work ceased in the naval yard, about 50 mechanics, and a similar number of clerical workers, being laid off.

Activity continued at SYDNEY throughout the food group, with some improvement visible in the aerated water section. Active conditions also prevailed at WEST-

**Food, liquors  
and tobacco**

VILLE. At HALIFAX sugar production was hampered by shortage of raw sugar, and baking and confectionery fell off slightly owing to shortage of western orders and the lenten season; increases were noted in the meat trades and in soft drink plants. Female help was in demand at NEW GLASGOW for the confectionery trades. The tobacco factory at TRURO worked full time. ST. JOHN reported activity in the flour and feed mills, sugar refinery, bakeries, creameries and soft drink factories, the latter showing seasonal improvement. The biscuit factory at MONCTON was increasingly busy, and at FREDERICTON steady conditions prevailed in all branches. At MONTREAL flour and feed plants, abattoirs and meat packing houses showed activity, soft drink factories and breweries were busy, and tobacco workers about normal. QUEBEC reported a very quiet month in the abattoirs and packing houses, the baking and confectionery

trades also being dull, but tobacco factories and breweries being active. At SHERBROOKE, STE. HYACINTHE, THREE RIVERS, ST. JOHN'S, IBERVILLE and SOREL conditions were generally good. At OTTAWA and HULL normal activity was reported throughout the food group. TORONTO reported slack conditions in the flour, feed and cereal factories; abattoirs and packing houses were fairly active; bakers and confectioners had plenty of work; aerated water had increased activity; and cigar makers were well employed. General activity continued at HAMILTON, ST. CATHARINES, KINGSTON, BROCKVILLE, BELLEVILLE and PETERBOROUGH. Favourable reports were also received from GALT, BRANTFORD and GUELPH. Bakers were in demand at KITCHENER, and more girls were required for confectionery factories, other food industries being normally active. Female help was also in demand at STRATFORD, WOODSTOCK and LONDON, for candy, biscuit and confectionery plants. The flour mills at ST. THOMAS employed full staff. Steady conditions were reported from CHATHAM. At WINDSOR the distillery and the breweries were very busy, while improvement was noted in other departments. At WINNIPEG the confectionery trades were fairly steady, with same staffs as before; vegetable canners had a good month, being now supplied with raw material and sufficient help. The flour mills reported that owing to the orders of the Wheat Board prohibiting exports it was necessary to work their men at intervals, 80 or 90 men being affected, these working about two days per week; abattoirs and packing plants and breweries and soft drink factories were fairly active. The flour mills at REGINA and MEDICINE HAT ran only part time; and at LETHBRIDGE both flour mills closed down, the reason alleged being "Government restrictions on flour trading." At CALGARY flour and feed plants were quiet, abattoirs busy and breweries and soft drink plants rather slack. General activity was noted at EDMONTON. Breweries at FERNIE were very busy. At VANCOUVER the flour, feed and cereal mills, abattoirs and packing houses and breweries were

busy, bakeries, confectioneries and creameries were fairly active, the sugar refinery and soft drink factories were rather slack, and the canning industry was at a standstill. VICTORIA reported general activity throughout the food group, but the tobacco industry was slack.

The textile factories in the Maritime provinces were exceptionally busy during March. The rope

**Textiles,  
cordage and  
carpets**

and twine industry at HALIFAX continued steadily without marked improvement. The woollen mills at TRURO worked full time but were very short of experienced help. The cotton factory at YARMOUTH continued employing about 510 hands. At ST. JOHN the cotton mills continued in steady operation, the Mill-town plant employing about 575 hands. The woollen mills and underwear factory at MONCTON also continued active with the usual staffs. FREDERICTON reported that the cotton mills at MARYSVILLE worked to capacity, the usual staff being about 575 hands. MONTREAL reported the cotton, woollen and knitting factories busy, and tent and sail makers about normal. At QUEBEC the cotton mills were busy, though handicapped for a time by shortage of water power; sail-makers also had a good month. SHERBROOKE reported activity in the cotton, woollen, bleaching, dyeing, finishing and textile printing plants. At ST. HYACINTHE the woollen and cotton factories, as well as knitting, underwear and hosiery factories were very active. The cotton factory at THREE RIVERS continued to keep 1,400 hands in steady employment, and were enlarging their plant which would soon require several hundred more workers. At TORONTO woollen, hosiery and knitted goods workers were very busy with good prospects ahead; carpet, tent and awning workers also were active. At HAMILTON the demand, especially for female labour, continued in all branches of the textile industry. Woollen, silk and knitting mill workers at ST. CATHARINES were well employed, and at KINGSTON female help was in demand for the cotton and

woollen mills. Tent and awning makers at BROCKVILLE were fairly active. The woollen mills at PETERBOROUGH worked day and night, and hosiery and knitted goods hands worked overtime. Help was wanted at GALT for the cotton and woollen mills of the district. Female help was also in great demand at BRANTFORD where the silk underwear and hosiery factory could not secure sufficient workers; help was also needed at the woollen goods and blanket factory, and unskilled labour was in demand at the cordage factory. At KITCHENER help was in demand for the twine factory, and the felt plant was also very busy. GUELPH reported a shortage of female help in the wool spinning and in the carpet weaving mills; the cotton and linen mills and hosiery and knitted goods factories were also busy. Female workers were in demand for the woollen hosiery and knitted goods mills at STRATFORD. A similar demand was noted at WOODSTOCK and LONDON. The knitting workers at ST. THOMAS were very busy, and at CHATHAM the woollen factory ran overtime, and the pad workers were well employed. The awning factory at WINDSOR reopened for the season. The worsted woollen mill at ORILLIA reported a shortage of female help. At WINNIPEG some bag factories reduced their staffs, while others took on additional experienced help; the knitting mill continued active, and the tent and awning factory increased its staff. The knitting, tent and awning factories at VANCOUVER had a good month.

Steam laundries at SYDNEY continued active. At HALIFAX ready-to-wear

**Clothing,  
boots, shoes  
and laundering**

clothing benefitted at the expense of custom tailoring; steam laundries showed improvement. The hat and cap factory at TRURO was rushed with spring orders, and worked overtime with full staffs. Tailors at CHARLOTTETOWN and ST. JOHN were reported very busy. The hat and cap factory at MONCTON continued in steady operation. Shoe and larrigan makers, were in demand at FREDERICTON, tailors and garment workers

were active, and dyers and cleaners were increasingly busy. At MONTREAL ready-made clothing factories were busy; hat, cap, shirt, collar and button makers had plenty of employment, and laundries were fairly active; boot and shoe makers were very busy with spring work but the usual slack season was anticipated later. Overtime work was frequent at QUEBEC in the clothing factories, but laundries had a slack month; boot and shoe factories were busy. SHERBROOKE reported activity in the ready-made clothing, boot and shoe, and laundry plants, and at St. HYACINTHE ready-made clothing, and steam laundry and dyeing plants were well employed. The glove, boot and shoe factories and laundries at THREE RIVERS had a good month. At St. JOHN'S and IBERVILLE the shirt and collar factories were more active than in February; female help was in great demand at the straw hat factory. The clothing and shoe trades at SOREL had an active month. At OTTAWA and HULL the clothing industries continued working at capacity. TORONTO reported the ready-made clothing, hat and cap and whitewear plants busy, with steady demand for additional labour, especially women; boot and shoe workers were less active than in February, spring deliveries having been completed. At HAMILTON a big demand for tailors was reported, also for workers in the shirt, collar, hat, cap and women's wear industries, and in the steam laundries; the boot and shoe trades were active. NIAGARA FALLS reported the corset, hat, suspender and neckwear factories and laundries all busy. Laundry workers were in demand at WELLAND. At BROCKVILLE the hat, glove, and fur makers and laundry workers were active. The shirt factory at BELLEVILLE gave good employment, and steam laundries and cleaning establishments were unusually busy. At PETERBOROUGH the carpet weavers were active and makers of women's whitewear and children's clothes were very busy. Help was in demand at GALT for the shirt, collar and clothing trades; boot and shoe factories and steam laundries were also busy. Shirt and overall makers at BRANTFORD were very busy on foreign orders; female help

was in demand for the women's whitewear factories; laundries and cleaning establishments were very busy. Clothing workers at KITCHENER continued busy, with help in demand in shirt and collar factories for buttonhole and collar band turning machines; experienced operators and learners were needed for sewing machines, also girls for ironing underwear and shirts; men, boys and girls were needed at the button factories, and glove makers were also in demand; steam laundries and dyeing plants were rushed with work. GUELPH reported a demand at the whitewear factory for pressers, tuckers, hand sewers and finishers; rubber workers were also very busy. At STRATFORD ready made clothing factories, laundries and cleaning establishments were active. LONDON reported great activity in the ready-to-wear clothing and costume factories; boot and shoe makers were working overtime. Shoemakers were also very busy at St. THOMAS. Clothing and laundry workers at CHATHAM were increasingly active. At WINDSOR overall and shirt makers were very busy, in spite of occasional shortage of material. WINNIPEG reported increased employment in the ready-to-wear clothing, whitewear and glove trades; experienced shirt makers were in demand; cap makers had a satisfactory month, but fur workers were slack; cleaners were exceptionally busy. Help was in demand for laundry work at REGINA. VANCOUVER reported activity in ready-made clothing for men and women, also in shirt, overall and women's and children's whitewear factories; dressmaking, custom tailoring and millinery trades improved with; opening of spring laundries and cleaning establishments were rather slack; boot and shoe workers were busy. At VICTORIA the shirt and overall factories operated steadily and steam laundries and cleaners were busy.

The pulp mill at St. JOHN continued running steadily. BATHURST reported a good month at the pulp mill, but without any increase in the amount of pulp manufactured or in shipments, the average

**Pulp, paper  
and fibre**

daily output amounting to 110 tons, which was shipped as soon as manufactured. The pulp and paper mills at SHERBROOKE had another busy month. At THREE RIVERS over 900 hands were steadily employed in one of the pulp and paper mills, the other employing nearly 700 hands. The pulp and paper mills at OTTAWA and HULL continued to be busy. Felt and tarred paper makers at HAMILTON had an active month. At St. CATHARINES pulp, paper, beaver board and products factories were steadily active. The paper roofing plant at BRANTFORD was rushed with work. The pulp and paper industry was very active at SAULT STE. MARIE. VANCOUVER reported that the pulp and paper mills at OCEAN FALLS and POWELL RIVER, and at several other points up the Pacific Coast continued busy. Similar reports came from VICTORIA, the paper export trade continually increasing; roofing and tarred paper plants were also active.

Printers continued active at SYDNEY and WESTVILLE. At HALIFAX compositors were still in demand, and printing and publishing showing an increase in all lines. A shortage of printers was noted at TRURO, but conditions at CHARLOTTETOWN were slack.

**Printing,  
publishing  
and paper  
goods**

St. JOHN reported employment good in the printing and binding trades, and engravers fairly busy. Favourable conditions were also reported from MONCTON and FREDERICTON. MONTREAL reported activity among printers, bookbinders and lithographers. At QUEBEC and St. HYACINTHE printers and bookbinders, also paper box and bag makers were busy. Printers at THREE RIVERS had a good month, but at SOREL work was rather slack. The printing trades at OTTAWA and HULL were normally active. At TORONTO printers, bookbinders, engravers and lithographers had steady employment and paper box and bag factories were also active, with a demand for help. At HAMILTON and St. CATHARINES active conditions continued to prevail throughout this group. KINGSTON, BROCKVILLE and BELLEVILLE also

reported continued activity. PETERBOROUGH reported a revival in the printing trades after a two-months' slack period; paper box workers were busy. In GALT district printers and box makers were well employed, and at BRANTFORD envelope and paper box makers were very busy. More printers' apprentices were required at KITCHENER this trade and the paper box trade being very busy there and at WATERLOO, GUELPH and STRATFORD. A shortage of linotype operators was reported at WOODSTOCK and at LONDON and expansion was noted in the printing and paper goods industries. Active conditions continued in the printing trades at St. THOMAS and WINDSOR. Help was required at CHATHAM for the printing, binding and lithographing trades. Some experienced help was required in the book-binding trade at WINNIPEG, and employment continued steady, though stock was difficult to secure; printers were well employed, and binderies and box factories continued to work with staffs unchanged. The printing and publishing trades were reported active at BRANDON, REGINA, LETHBRIDGE, CALGARY and EDMONTON, but rather quiet at MEDICINE HAT and FERNIE. At VANCOUVER printers were fairly active, but publishing plants, binderies and paper box plants were rather slack. VICTORIA reported average activity in the printing trades, and paper box factories very busy and running two shifts.

At SYDNEY the sash, door and planing mills continued active, but at HALIFAX

a considerable falling off in activity was noted, owing, it was stated, to continued high prices and shortage of material. Furniture workers at WESTVILLE had a fair month. The mattress factory at TRURO worked full time. Coopers and broom makers at CHARLOTTETOWN had a good month. At St. JOHN the sash, door and planing mills ran to capacity, and the broom and brush factories were very busy. MONCTON reported activity

**Woodworking  
and furniture**

in the planing mills and cooperage plant. The sash, door and planing mills at FREDERICTON had a good month, and canoe makers were well employed. At MONTREAL wooden box and furniture workers were fairly active and piano makers were busy. QUEBEC reported activity in the woodworking and box factories. At SHERBROOKE the sash, door and planing mills and chair factory continued busy. St. HYACINTHE reported activity in the planing mills, wooden box, chair and organ factories. At THREE RIVERS workers in the wooden toy, chair, sash and door factories and planing mills had a good month. The planing mills at St. JOHN'S and IBERVILLE were active, but at SOREL woodworkers were rather slack. OTTAWA and HULL reported steady employment in the sash, door and planing mills. At TORONTO the woodworking industries, including the piano and phonograph trades, were in full operation, except when handicapped by shortage of material, additional labour being required in some shops; women had steady employment in victrola, piano and toy factories. At HAMILTON activity continued in all departments of the woodworking and furniture group. The planing mills at NIAGARA FALLS were again busy, enlargements being planned. Woodworkers at St. CATHARINES continued busy, and at KINGSTON the planing mills and piano and broom factories had an active month. BROCKVILLE and BELLEVILLE reported increased activity in the furniture factories and the planing mills also very busy. At PETERBOROUGH the woodworking industries, including planing mills, box and canoe factories and cooperages, were exceptionally busy. Help was in demand in GALT and district for the planing mills, sash and door and furniture factories. At BRANTFORD all sash, door and planing mills were kept running to full capacity, and piano and victrola makers were also very busy. KITCHENER reported vacancies in the furniture industry for shellackers, cabinet makers, machine hands and rubbers; sash and door, wooden box, furniture,

wooden ware and toy factories were very busy; piano, organ and phonograph workers were fairly active. Cooperage workers at WATERLOO were well employed. Activity continued at GUELPH in the planing mills, and in the sash and door, piano and sewing machine factories. STRATFORD reported continued activity in the sash, door and planing mills, and in the furniture, chair, cooperage and broom factories. At WOODSTOCK the furniture trades continued very busy, with constant demand for machinists, bench hands, finishers and handy men; a few skilled mechanics were also required at the organ factory. LONDON reported exceptional activity in the planing mills; box makers were in demand. At WINDSOR piano workers were fairly active. The sash and door factories at SAULT STE. MARIE had a very quiet month. No change was reported from WINNIPEG at the planing mills. The sash and door factories and planing mills at BRANDON, REGINA and CALGARY had a busy month, but at MEDICINE HAT the planing mills were rather slack, and no improvement was noted in this industry at FERNIE. At VANCOUVER the sash, door and planing mills were busy, but wooden box, furniture and chair factories were rather slack. A new planing mill started operations at PRINCE RUPERT. At VICTORIA the sash, door and wooden box factories and planing mills were only moderately busy.

At HALIFAX steady conditions continued in the trunk, leather bag and harness industries, but production was hampered by shortage of supplies. Leather workers of all descriptions were in demand at FREDERICTON. At MONTREAL employment was good in the tanneries, trunk, bag and harness plants and rubber factories. QUEBEC reported tanners, curriers and thawers well employed. Tanners and leather workers at St. HYACINTHE and SOREL had a good month. At TORONTO trunk, bag and har-

**Leather and rubber (other than clothing)**

ness makers had plenty of employment. At HAMILTON activity continued in all departments of the leather group. The harness and belting workers at BROCKVILLE were well employed. Leather workers at PETERBOROUGH had increased employment. KITCHENER reported increased activity in the tanneries, but some trunk and bag workers were laid off at one of the factories; tire makers were very busy, plants being extended, and double and treble shifts being run. Rubber factories at GUELPH were also very busy. At STRATFORD tannery workers and harness makers were well employed. At WOODSTOCK and LONDON the tanneries ran to capacity. The tanneries at BRANDON were very busy, and the trunk factory workers were well employed.

Clay product workers at WESTVILLE continued in steady employment. Cut stone and granite work at St. JOHN was still dull, but lime kilns ran steadily, with good prospects of increased employment as the provincial government was taking over a plant at Torreyburn and installing machinery for crushing limestone for fertilizing purposes. The glass factories at MONTREAL continued in steady operation. At QUEBEC stone cutters had a dull month, and the brick making season had not yet opened. SHERBROOKE reported the cut stone and granite works and brickyards as fairly active. The brickyards at TORONTO were preparing to resume operations, with prospects of a busy season; glass factories were in steady operation. At HAMILTON activity continued throughout the group. At KINGSTON cut stone and granite workers were active. BROCKVILLE reported cut stone and granite work beginning to be active, but the brickyards remained closed. At BELLEVILLE the cement plant was working day and night, and the pottery, tile and pipe industries were also busy. The brick, tile and sewer pipe workers at BRANTFORD had an active month. Stone cutters

at KITCHENER were well employed, and brick, tile and sewer pipe makers were increasingly active. STRATFORD reported brick and tile workers fairly busy; at LONDON these trades were preparing for spring operations, and at CHATHAM they were already very active. Cut stone and granite workers at REGINA were fairly busy. At MEDICINE HAT brick and tile workers were very busy and stone cutters fairly active.

Activity continued at SYDNEY throughout this group, including the tar, naphtha, carbolic acid, creosote oil, dead oil, naphthaline, and pitch industries. At HALIFAX the paint and oil industries continued active. The oil refinery at DARTMOUTH increased its staff, employing over 1,000 hands at the end of the month. MONTREAL reported the paint and varnish, and chemical, drug and medicine industries about normal. The cartridge and ammunition factories at QUEBEC had a quiet month, but at SHERBROOKE the powder factory was reported fairly active, and the acid, drug, extract and medicine plants busy. The paint mills at THREE RIVERS were very busy. At TORONTO the paint and varnish, soap and chemical industries were active. HAMILTON reported activity in the soap and acid industry, and fair conditions in the powder and cartridge plant. At BRANTFORD the paint and varnish plants were busy, working full handed. Oil and grease workers at KITCHENER had a good month. The salt industry at WINDSOR continued very busy; paint and varnish workers were well employed; the fancy soap, perfume and toilet trades were normal; the drug industry was short of female help. Help was required for the chemical works at SAULT STE. MARIE. Soap makers at WINNIPEG were running with the usual staffs. At REGINA the oil workers were steadily employed, but the soap industry was quiet. The linseed oil mill at MEDICINE HAT was fairly active. VANCOUVER reported the oil refinery workers and

**Paints, oils,  
chemicals,  
explosives**

**Clay, glass,  
stone, cement,  
etc.**

paint and varnish trades as busy. At VICTORIA the paint and soap factories were active, and the powder, explosive and chemical plants were busy, especially in the dynamite department.

The earnings of the Canadian Pacific Railway during February were \$13,-

**Railways,** 557,103, as compared  
**shipping and** with \$11,064,166 in Feb-  
**'longshore work** ruary, 1919. The number of persons employed by the Canadian Pacific

Railway, Grand Trunk Railway and Canadian National Railways, on railway operation, including general offices, train and engine crews, station forces, sleeping, dining and parlour car employees, was 750 less at the end of March than at the end of February, the totals being 65,250 and 66,000 respectively. In the middle of March the total fell to a figure under 65,000, but there was a slight recovery at the end of the month. These variations were nearly all accounted for by changes in the personnel of the Canadian National Railways; the Canadian Pacific Railway showed small weekly decreases amounting to less than 150 for the month, and the Grand Trunk Railway showed an increase of less than 50 persons during the month.

At SYDNEY, during March, transport workers continued active excepting navigation and 'longshore men who were rather slack. HALIFAX reported increased activity on the steam and street railways. At CHARLOTTETOWN railway and other transport workers were well employed. A number of employees, mostly trainmen and switchmen, were laid off by the Government railways at TRURO towards the end of the month. ST. JOHN reported navigation active, as many as twenty steamers being in port together, and 'longshoremen were busy; railway freight was exceptionally heavy. MONTREAL reported the railways well manned, with a large volume of traffic. At QUEBEC also railway and transfer

workers were busy, but navigation and 'longshore work had not yet opened for the season. At SHERBROOKE employment was good in steam railway and transfer work, but street railways were rather quiet. Transport workers at THREE RIVERS had a busy month. At TORONTO the railways were busy with very heavy freight traffic and an unusual number of passengers to the United States; street railwaymen and garage helpers were well employed. Steam and electric lines were also busy at HAMILTON, and teamsters were in demand; the first steamer of the season made the Toronto trip on March 31. Transportation was heavy on all railways at NIAGARA FALLS, and teamsters were in demand. Railway workers were well employed at ST. CATHARINES and KINGSTON, and at BROCKVILLE work was fairly active, but 'longshoremen still awaited the opening of navigation. BELLEVILLE and PETERBOROUGH reported heavy railway activity. At GALT, BRANTFORD and KITCHENER steam and electric railways and transfers and garages were all busy. Railways at LONDON were very busy, extensions and improvements being under way. At ST. THOMAS railway traffic employees had a fair month, regular men working full time, but spare men were not required. A heavy increase in freight handling at CHATHAM over last year was reported. Navigation opened at SAULT STE. MARIE on March 27; large gangs were employed repairing damage to railway road beds caused by floods. At FORT WILLIAM and PORT ARTHUR navigation was still closed at the end of March. WINNIPEG reported railway and transportation workers active during the month with few changes in staffs. Activity was also reported from BRANDON, REGINA, MEDICINE HAT, LETHBRIDGE, CALGARY and EDMONTON. VANCOUVER reported electric railways and transfers fairly busy, but navigation and 'longshore work was rather slack. At VICTORIA 'longshoremen were reported fairly active, coasting traffic increasing considerably; employment at garages increased steadily.

The Dominion Steel Company started new ore-mining operations during the month at Upper Leithe Creek, near SYDNEY. Mining (other than coal) and quarrying Stone quarrying was active at QUEBEC. SHERBROOKE reported the asbestos mines busy, and the chrome iron mines and granite quarries fairly active. Asbestos workers at THETFORD MINES were well employed, about 300 additional miners being engaged in spite of difficulties caused by spring thaw; exports, however, were hampered by car shortage, more than 300 cars being in the sheds at one mine; the dryer plant at the Jacob mine was partially destroyed by fire; the Harris mine mill, destroyed by fire last fall, was under reconstruction; a new mine was about to open at Coleraine, giving employment to about 200 men. In COBALT district shipments from the mines during March totalled 921,872 pounds of ore, as compared with approximately 915,377 pounds in February; bullion shipments were comparatively light, 80 bars containing 166,624 fine ounces of silver being shipped, as compared with 516,871 fine ounces in the previous month; discoveries of new ore bodies in some of the leading mines assured heavy production for some time; the workmen co-operated with the companies through committees. In the gold camps at PORCUPINE and KIRKLAND LAKE an increase in pay was given the miners. WINNIPEG reported an increased demand from surrounding country for quarry and mine workers. FERNIE reported activity above the average in the Windermere and Kimberley districts, the strike at Sullivan Mines being at last called off by the men. Labourers were sent from Cranbrook to FORT STEELE for metalliferous mining development there. Operations were resumed at STEWART, B.C., the strike being settled, and great activity began at ALICE ARM.

Some shortage of coal miners was noted in the Maritime provinces at the close of March. SYDNEY reported the output of the Dominion Collieries during the month at 286,000 tons of coal, against 248,500 tons in the previous month; the output of coke was 26,500, compared with 25,000 tons in February; 120 coke ovens were working; about 7,770 hands were employed; one or two collieries were idle for a few days, owing to minor disagreements in connection with the recent wage award, but these were soon adjusted. The output of the Nova Scotia Steel and Coal Company at SYDNEY MINES was 55,500 tons of coal, compared with 49,500 tons in the previous month; 10,200 tons of coke were produced, 190 ovens being operated; the Glace Bay mine worked steadily; a new shaft was to be sunk at Quarry Point. WESTVILLE reported a total production at the local mines during the month of 38,483 tons, of which 12,846 tons were from the Albion mine; 8,638 from McGregor, 1,869 from Acadia No. 1, 7,977 from Acadia No. 3, and 7,153 from the Allan shaft; about 150 miners were thrown out of work at Westville for a time owing to a fire in the Drummond mine. The Acadia Coal Company at STELLARTON had over 1,500 employees on the staff. The THORBURN mines worked steadily. The coal mines at MINTO were only fairly productive owing to the continuance of the strike. In Alberta the lignite miners at LETHBRIDGE continued working about half time; and bituminous miners at BLAIRMORE and BELLEVUE worked at only about half strength, differences still continuing in the matter of the International "check off." At most of the lignite mines in CALGARY district a number of men were laid off, owing to decreased demand for domestic fuel. At RED DEER only two shifts a week were worked on account of car shortage. EDMONTON re-

ported a demand for more men at all the larger surrounding mines, the Cadomin mine alone being slack. FERNIE reported a very marked falling off in mining operations at Crow's Nest Pass, labour unrest and "cessations" in the Alberta section being blamed for stagnation, while in the FERNIE and MICHEL section the same cause operated indirectly, the operators, on account of conditions of organized labour, deciding to conclude contracts for domestic and commercial coal, some of these contracts requiring indemnity bonds in case of failure to supply; employment was accordingly reduced to three days a week; the coke industry was confined to small operations at Michel and Coleman. NANAIMO reported some days' slackness in the Vancouver Island coal mines due to shortage of shipping, but otherwise activity prevailed in the mines of the Canadian Western Fuel Company, Canadian Collieries, Nanoose-Wellington Collieries, Pacific Coast Coal Company, and the Granby Coal and Coke Company.

The value of building permits issued in 50 cities during February amounted

**Building and construction** to \$4,491,034, as compared with the revised figure of \$3,968,472 in January and \$2,002,004 in February, 1919. Building in the Maritime provinces during March showed some signs of coming activity, though hampered by bad weather conditions, and signs pointed to a record season's activity, especially in SYDNEY, HALIFAX, ST. JOHN, MONCTON and FREDERICTON, with a probable shortage of experienced building tradesmen; severe fires occurred at SYDNEY early in the month, increasing building demand. Carpenters were fairly busy at TRURO. Conditions at NEW GLASGOW and CHARLOTTETOWN were slack. BATHURST resumed work started in the fall, and at CAMPBELLTON some activity was noted. MONTREAL reported some improvement, with prospects of considerably increased activity. At QUEBEC, SHERBROOKE and THREE

RIVERS building operations were resumed, with prospects of a very busy season. SOREL reported quiet conditions. At OTTAWA and HULL building was active for the time of year. TORONTO reported that the building season had set in actively, work being begun on a number of large contracts for commercial and industrial buildings, some of which had been long held over; dwelling house construction, though badly needed, was not yet started on a large scale, the high cost of labour and material being said to act as a deterrent; work on Toronto Harbour improvement had not yet begun. HAMILTON reported the building trades very active, and at ST. CATHARINES, KINGSTON, BROCKVILLE and BELLEVILLE conditions were fairly good. At PETERBOROUGH only slight activity had developed. GALT was preparing for a specially active season. At BRANTFORD construction was active early in the month, but declined later. KITCHENER reported operations in dwellings, and industrial and commercial buildings, already under way. Fair conditions were reported from GUELPH, STRATFORD, WOODSTOCK and LONDON; at the latter city the housing commission acquired a tract of land and were letting contracts for about 80 houses. At ST. THOMAS and CHATHAM the building trades were still quiet. WINDSOR reported great activity, about 650 carpenters being already employed by contractors, several commercial and industrial buildings being also in course of erection. At WINNIPEG mechanics in the building trades were fairly well employed for the season of the year, painters and paperhangers being already in demand. A serious shortage of men was noted at BRANDON for work previously begun, and at REGINA preparatory work was started on dwellings, warehouses, etc. At CALGARY conditions in the building trades showed a marked improvement, especially for carpenters and painters, but masons, stone cutters and plasterers were not yet in much demand. At EDMONTON some revival of work was reported. VANCOUVER reported a decided increase in activ-

ity, especially towards the end of the month, trade being spread over dwelling houses, extensions to industrial and commercial premises, and erection of a new theatre and bank; the Canadian Pacific Railway also started on construction of another dock. At NEW WESTMINSTER building operations still continued slack, but with some demand for men for excavation work. NANAIMO reported rather slack conditions in the building and allied trades.

During the month of March there was a small increase only in the number of persons employed by the Canadian Pacific Railway, Grand Trunk Railway, and Canadian National Railways on railway construction, including maintenance of way, the total at the end of the month being 28,900 as compared with 28,200 at the end of February. This increase was accounted for by additions of about 400 persons to the Canadian Pacific Railway staff and 300 to the staff of the Canadian National Railways. The Grand Trunk Railway construction staff showed no change during the month of March.

Lumbering operations practically ceased in the woods of the Maritime provinces during March, except in the MONCTON, CAMPBELLTON and

**Lumbering** FREDERICTON centres, and the usual short inactive period prior to the spring drive was experienced; the cut in northern New Brunswick was said to have been the greatest on record; about 2,000 men were supplied to these camps by the Government Employment Service. QUEBEC reported the winter camps closed down for the season, the heavy snowfall and succeeding thaw rendering work in the bush impossible; river driving had not yet begun. In SHERBROOKE district also the timber, railway tie and telegraph pole camps broke up before the close of the month. OTTAWA and HULL reported activity in the lumber camps as still continuing. PETERBOR-

OUGH also reported lumbering as very active and saw mills making ready for a heavy season's work. FORT WILLIAM and PORT ARTHUR reported the closing of several of the local camps, owing to thaw, but work continued in those situated on high ground and fairly near the railway lines. Demands on the WINNIPEG labour market were cancelled about the middle of the month, and the lumbering season closed in Northern Manitoba; from 1,500 to 1,800 men were expected to leave the camps, but it was anticipated that the mills would use up most of this labour. PRINCE ALBERT reported some demand for skilled men for the mills. In EDMONTON district bush work was still to be had, but men were unwilling to take it as farming jobs were opening up. FERNIE reported great lumbering activity, in spite of adverse weather conditions; mills in the southern section of the country (Baynes, Waldo, etc.) already had sufficient stock of logs to insure uninterrupted mill operations. In the CRANBROOK district the mills were already working continuously day and night; there was less demand for teamsters and hookmen in the camps, and men were returning to the prairies. Lumbering still continued active in NELSON, every available man being employed, although the burning of Summit Lake mill and planer reduced the demand. At VERNON some logging camps closed down, but tie cutting camps continued active. VANCOUVER reported lumber camps and saw and shingle mills as very busy. PRINCE RUPERT reported continued activity along the line of the Grand Trunk Pacific Railway, and more men were required for work in Queen Charlotte Islands. At VICTORIA all branches of the lumbering industry continued in a thriving condition. NANAIMO reported the lumbering trade still fairly active, with reasonably good prospective shipping; new mills started at DEEP BAY, GRANTHAM and COURTENAY, and a new camp was opened at LASQUETI ISLAND.

## INDUSTRIAL DISPUTES INVESTIGATION ACT, 1907

### PROCEEDINGS FOR THE MONTH OF MARCH, 1920, WITH TEXT OF BOARDS' REPORTS

**D**URING the month of March the Department received five reports from Boards of Conciliation and Investigation established to deal with disputes between (1) the Nova Scotia Steel and Coal Company, Limited, and certain of its employees, being members of District No. 26, United Mine Workers of America; (2) the Inverness Coal and Railway Company, Inverness, N.S., and certain of its employees, being members of District No. 26, United Mine Workers of America; (3) the Canadian General Electric Company, Peterborough, Ont., and certain of its employees, being armature winders, members of Local Union No. 261, International Brotherhood of Electrical Workers; (4) the Corporation of Ottawa and certain of its employees, being members of Civic Employees' Federal Labour Union No. 15, and (5) the Bedford Construction Company, St. John, N.B., and certain of its employees engaged on the Courtenay Bay Harbour contract, which Board had been reconvened to confer and make interpretation of the clause with respect to the ten-hour day appearing in the report rendered by this Board in October, 1919.

Five applications for the establishment of Boards were received, and Boards were established in connection with two disputes for which applications had been received during previous months.

#### Applications Received.

During the month of March applications for Boards were received as follows:

(1) From the employees of the Harbour Commission of Montreal, being plumbers, handymen, labourers, etc., members of the Montreal Harbour Employees' Union. Through the mediation of a Departmental Officer direct negotia-

tions were renewed and a settlement of the dispute was reached without Board procedure.

(2) From the civic employees of the Corporation of Ottawa, members of Federal Labour Union No. 15. The employer in this case being a municipality, a Board could be established only upon the joint consent of the disputants. This consent was granted by the City and a Board was established. The personnel of the Board and the text of the Board's report appear in the present article.

(3) From the employees of the Hamilton Hydro-Electric Commission, being linemen, groundmen, patrolmen and operators, members of Local Union No. 105, International Brotherhood of Electrical Workers. Through the mediation of a departmental officer direct negotiations were renewed and a settlement of the dispute was reached without Board procedure.

(4) From the employees at London, Ont., of the Dominion Transport Company, Limited, the Canadian Cartage and Storage Company, Limited (formerly the Shedden Forwarding Company, Limited) and the O'Dell Cartage Company, Limited, being teamsters, members of Local Union No. 663, International Brotherhood of Teamsters, Chauffeurs, Stablemen and Helpers. The companies in this case did not consent to the establishment of a joint Board and separate Boards were, therefore, established in the cases of the two firms first named, Mr. Fred Bancroft, Toronto, being appointed a member of each Board on the nomination of the employees. No Board was established in the case of the O'Dell Company, advice having been received in the Department that it would be preferable that the matter be left in abeyance pending the action taken with respect to the other two firms.

(5) From the employees of the Canadian National Railways, being checkers, coopers, car sealers and porters on the piers at Halifax, N.S., members of the Canadian Brotherhood of Railroad Employees. No Board had been established at the close of the month pending further negotiations in the matter.

#### **Other Proceedings under the Act.**

During the month of March other proceedings under the Act took place as follows:

(1) A Board was established to deal with the dispute between the Grand Trunk Railway Company and certain of its employees, being clerks, etc., members of the Canadian Brotherhood of Railroad Employees. This Board was

composed as follows: the Honourable Mr. Justice F. S. MacLennan, Montreal, chairman, appointed by the Minister in the absence of a joint recommendation from the other two members, Messrs. U. E. Gillen and Fred Bancroft, Toronto, nominees of the Company and employees respectively.

(2) A Board was established to deal with the dispute between the Canadian Fish and Cold Storage Company, Prince Rupert, B.C., and certain of their employees, being fish packers, composed as follows: His Honour Judge F. McB. Young, Prince Rupert, chairman, appointed on the joint recommendation of the other two members, Messrs. S. P. McMordie and Geo. Rudderham, Prince Rupert, nominees of the company and employees respectively.

#### **Report of Board in Dispute between the Nova Scotia Steel and Coal Company, Limited, and certain of its employees.**

A REPORT was received from the Board established to deal with the dispute between the Nova Scotia Steel and Coal Company, Sydney Mines, N.S., and certain of its employees, being members of District No. 26, United Mine Workers of America. The Board was composed as follows: His Honour Judge G. Patterson, New Glasgow, chairman, appointed on the joint recommendation of the other two members; Prof. Howard Murray, Halifax, and Mr. J. C. Watters, Inverness, nominees of the company and employees respectively. The report of the Board was unanimous and was accompanied by a proposed schedule of wages.

#### **Report of Board.**

In the matter of the Industrial Disputes Investigation Act, 1907, and of a dispute between the Nova Scotia Steel & Coal Company, Limited, hereinafter called the "Company," and certain of its employees being members of District No. 26 United Mine Workers of America, hereinafter called the Employees.

To the Honourable  
the Minister of Labour,  
Ottawa.

The Board of Conciliation and Investigation appointed in relation to the dispute between the Company and its employees having been duly constituted and its members having taken the oath prescribed, met for the first time on Tuesday the 24th day of February in the Town Building, Sydney Mines, at 10.30 a.m. It so happened that the Assessment Appeal Court for that town also had its first meeting that day and the Board in consequence could not obtain the use of the Town Hall as had been proposed and there was no other suitable room in the Town building. With the consent and approval of all parties interested the Board adjourned to the offices of the Company and there all our subsequent meetings in Sydney Mines were held. We sat all that and all the next three days taking evidence. Then in order to give both parties an opportunity of getting together and endeavouring to settle among themselves certain contract rates that formed part

of the subject matter of dispute and which it seemed possible they could settle, we adjourned until the 9th of March. We sat all that and all the next three days and finished the taking of evidence and then adjourned to meet in Halifax on March 23rd to draw up this report. All of that day and of the next four following days were occupied at this work. Fuller details of our sittings are given in the Special Report of the Chairman which is submitted per concurrent mail.

At our first meeting we impressed upon both parties to the dispute the advantage of getting together and endeavouring to settle their difference among themselves offering our services in adjusting those matters upon which after a full interchange of opinion and argument they could not come to terms. The company, however, took, and quite properly took, the attitude that before it could enter into conference with its employees it should have the opportunity of showing to them and to the Board the hard conditions, as compared with other and competitive companies, under which its mining operations were carried on—conditions which made the cost of winning its coal greater than that of any other company in Nova Scotia. The opportunity asked for was given and at great detail and in most convincing manner the difficulties under which the company as a coal producer labored, were explained. It would not be proper to make public all or many of the figures as to the cost of mining. We shall have said enough when we state that it takes two men in the company's mines to produce as much coal as one man can do in one at least of its competitive companies. This does not mean that the cost per ton of the company's coal is twice that of the other company but it does mean that it is very greatly increased as compared with that of the other.

It must not be inferred that the company in taking the attitude it did denied the right of its employees to an increase of wages. Rather its position was this—"We admit that right; if we were able we would of our own motion give an

increase; we leave it to the Board having heard our statement to make such increases as it thinks proper under the circumstances, and when our position has improved, and it is improving, we will not object to further increases." Every facility was offered to the Board and to the employees to verify the figures that were submitted as to cost, etc., and there can be no doubt whatever that they were correct. As the leader of the employees' representatives stated to the Board: "they could not be challenged; they were unanswerable."

Reference to the application for a Board will show that an increase of wages was sought in all or nearly all of the different classifications of workmen employed in or about the mines of the company. Many of the classifications are paid by the day, others by contract. So far as those that are paid by contract are concerned, we were not asked to make large or far reaching changes but as for those paid by the day—datal labor as they are collectively called—we were asked practically to draw up a new schedule. The following is the schedule we have agreed upon for datal labour. It is to go into operation and be effective from the first day of March, 1920, and shall remain in force until terminated by either party giving thirty days' notice in writing of their desire to change.

## SURFACE.

Pushers .....	25	2.90	3.20

Referring generally to the above rates we wish it to be distinctly understood that they are not as high as we would have liked to fix, nor what, under other circumstances, we would have fixed. They are based on the ability of the company to pay. The mines of the company, as we have already stated, are difficult to work and the cost of producing its coal is greater than that of its competitors and to fix its rates as high as those of its competitors might well involve the shutting down of its coal operations. We are satisfied the employees do not desire to impair in the slightest the efficient carrying on of these operations nor prevent the improvement nor hinder the development that the company in spite of its difficulties has already under way. We confidently anticipate that the time is not far distant when conditions will be such that the company will be able to advance upon the rates we have fixed and bring them up to those of most of the other companies in Nova Scotia. Meantime we hope the men will recognize the position of the company and accept for the time being the rates we have fixed. The employees in two of the other com-

panies have recognized the difficult conditions under which those companies were operating and have accepted rates lower than the standard. We cannot believe the employees of the Scotia Company will adopt a different attitude.

The contract rates of the company were for the most part generous and there was little complaint about them. These rates will continue unchanged except in the following:

1st. Hand pick miners in rooms and pillars at Princess Colliery:

Height of coal.	Old rate per ton.	New rate per ton.
4' 9" and over .....	.81	1.05
4' 9" and under .....	.86 $\frac{3}{4}$	1.11
4' 6" and under .....	.91	1.15
4' 3" and under .....	.96 $\frac{3}{4}$	1.21
4' 0" and under .....	1.02	1.26
3' 9" and under .....	1.05 $\frac{3}{4}$	1.29
3' 6" and under .....	1.12 $\frac{1}{4}$	1.36
3' 3" and under .....	1.18	1.42
3' 0" and under .....	1.23 $\frac{3}{4}$	1.48

The new rate is to absorb the 5c. per ton now paid all hand pick miners in lieu of the 20c. per day directed to be paid by the Fuel Controller. The men are to pay 3 $\frac{1}{2}$ c. each for detonators and do their own timbering—all other conditions to remain unchanged.

2nd. Machine undercutters in rooms at Princess Colliery:

Height of coal.	Old rate.	New rate.
5' to 4' 7" .....	23 $\frac{1}{2}$	30c. per ton
4' 6" to 4' 1" .....	24 $\frac{3}{4}$	33c. per ton
4' to 3' 7" .....	29 $\frac{1}{4}$	37c. per ton
3' 6" to 3' .....	33 $\frac{3}{4}$	46c. per ton

The new rate is to absorb the 20c. per day now being paid the undercutters and helpers. The undercutters are to pay 20c. per day advance to their helpers. The rates for coal of greater height than specified are unchanged. For coal lower than 3' a special rate is to be arranged between the men and management.

3rd. Shooting and loading in rooms at Princess Colliery:

Height of coal.	Old rate.	New rate.
5' to 4' 7" .....	45 $\frac{1}{2}$	55c. per ton
4' 6" to 4' 1" .....	47 $\frac{1}{4}$	57c. per ton
4' to 3' 7" .....	54	62c. per ton
3' 6" to 3' .....	59 $\frac{1}{2}$	72c. per ton

The new rate is to absorb the 20c. per day now being paid to shooters and loaders. The rates for coal of greater height than 5' are unchanged. Where coal lower than 3' a special rate is to be arranged between men and management.

4th. Machine undercutters in rooms at Florence Colliery:

Height of coal.	Present rate per ton.	New rate per ton.
5' to 4' 7" .....	23	30
4' 6" to 4' 1" .....	25 $\frac{1}{4}$	33
4' to 3' 7" .....	28 $\frac{3}{4}$	37
3' 6" to 3' .....	33 $\frac{3}{4}$	46

The new rate is to absorb the 2c. per ton now being paid the undercutters and 10c. to the helpers in lieu of the 20c. per day directed to be paid by the Fuel Controller. The undercutters are to pay helpers 20c. a day advance. Where coal lower than 3' a special rate will be arranged between the men and management.

5th. Shooters and loaders in rooms at Florence Colliery:

Height of coal.	Present rate per ton.	New rate per ton.
5' to 4' 7" .....	45 $\frac{1}{2}$	55
4' 6" to 4' 1" .....	47 $\frac{1}{4}$	57
4' to 3' 7" .....	53 $\frac{1}{4}$	62
3' 6" to 3' .....	59	72

The new rate absorbs the 2c. per ton allowed in present rates to cover the 20c. per day directed to be paid by the Fuel Controller. Where coal lower than 3' a special rate is to be arranged between the men and management.

6th. Brushing in rooms to be paid for at the same rate and under the same conditions as exist at the Dominion Coal Company's Collieries—the company reserving the right to have the work of brushing in rooms performed by shooters and loaders or by other men appointed for that purpose.

7th. Miners' rates at all Collieries when called out from the face to other work shall be \$4.50. The old rate was \$3.73.

In closing our report we desire to make a recommendation which may be beyond the scope of our authority but which we believe it is in the interests of

all concerned to make. The Jubilee Colliery of the company is its latest and is the one in which development work can most readily and advantageously be carried on. Unfortunately, the Jubilee coal is very friable in character and while greatly appreciated as a steam coal is not so well fitted for domestic use. There is little market for steam coal at Sydney Mines, and the Canadian Government Railway Board has been its only purchaser on a large scale. During 1919 that Board took 56,000 tons but in 1918 less than 4,000. Not knowing within 50,000 tons per year of what amount the Railway Board will buy the company cannot venture to develop the Jubilee mine as it would like nor provide up to date equipment. But if the Railway Board would enter into a contract for three or four years to take a fair and reasonable amount of this coal or would give a contract for a large amount for one year, the company assures us it will immediately replace the makeshift bankhead at Jubilee with one up to date and well equipped, and proceed with development work underground as rapidly as the usages of good mining will permit. And to do this will have an indirect but most beneficial effect upon the wage question. The company's mines, largely because of its commendable efforts to find places for its returned men (of whom it has over 500 on its pay roll today), are overmanned. Development work at Jubilee will afford the opportunity of finding better places for many of these men. There should then be a greatly increased output at a cost not proportionately so great and the company would be placed in a much better position to meet the demands of its employees for an increased wage. We would therefore respectfully recommend that the Railway Board enter into a contract with the company along the lines we have ventured to suggest.

All of which is respectfully submitted.

(Sgd.) GEORGE PATTERSON,  
Chairman.

(Sgd.) J. C. WATTERS,

(Sgd.) HOWARD MURRAY.

## Report of Board in Dispute between the Inverness Coal and Railway Company and certain of its employees.

A REPORT was received in connection with the dispute between the Inverness Coal and Railway Company, Inverness, and certain of its employees, being members of District No. 26, United Mine Workers of America. On the employees' application, and with the consent of the employer, this dispute was referred to the Board of Conciliation and Investigation established to deal with a similar dispute in the mines of the Nova Scotia Steel and Coal Company, Sydney Mines, N.S. The Board in question was composed as follows: His Honour Judge G. Patterson, New Glasgow, chairman, appointed on the joint recommendation of the other two members; Prof. Howard Murray, Halifax, and Mr. J. C. Watters, Inverness, nominees of the company and employees respectively. The report was unanimous and was accompanied by a proposed schedule of wages.

### Report of Board.

In the Matter of the Industrial Disputes Investigation Act, 1907, and differences between the Inverness Railway and Coal Company, herein-after called the "Company" and certain of its Employees, being members of District No. 26, United Mine Workers of America, herein-after called the "Employees."

To the Honourable,  
the Minister of Labour,  
Ottawa.

The Board appointed in above matter having been duly constituted, and its members having taken the oath prescribed, met in the Town Hall, Inverness, on the morning of March 16th. Representatives of the employees, as well as the officials of the company and the manager of the Eastern Trust Company, Receiver for the company, were present. We adopted the course now becoming

usual in these matters of recommending that both parties to the dispute get together in conference, and as far as possible settle the matters in dispute between themselves, volunteering our assistance to adjust any matters upon which after full and frank discussion they could not agree. Our recommendation was cordially adopted, and a committee of the employees and the officials of the Company at once entered upon negotiations looking towards a settlement. We met with this joint committee, as we may term it, every morning and every afternoon during March 17th, March 18th and March 19th, and heard their statements upon a number of those matters upon which they were unable to agree. Besides, we heard much both from the men and the management about certain conditions in and about the colliery operated by the Company, and as a result have included in this report certain recommendations that we sincerely hope the employees will approve and assist in carrying out.

On and after April 1st, the following will be the Schedule for those classifications of labourers paid by the day:—

SURFACE			
Classification	No. of Men.	MINE	
		Old rate.	New rate.
		per day	per day
Mechanics.....	3	\$ 3.93	\$4.00
	2	4.04	4.30
Mechanics' helpers.	1	2.20	2.40
	1	2.50	3.00
Blacksmith.....	1	5.02	5.02
			4.00
Blacksmith's helper.	1	....	3.40
Carpenters—Mine...	2	4.04	4.05
	3	3.47	3.80
	5	3.37	3.50
Carpenters—Cottages	1	4.43	4.50
	1	3.93	4.05
	4	3.63	3.80

Ventilation.....	3	4.04	
		3.63	4.04
Ventilation helpers..	4		3.35
Couplers.....	6		2.60

Any assistants to the foregoing classifications over 18 years of age to be paid labourers' rates.

There will be no change of any kind in the contract rates.

We recommend that the wages of the days labourers as we have settled upon and fixed them and the contract rates shall continue in force for one year from the 1st day of April instant, and to continue in force thereafter subject to thirty days' notice from either party, with the proviso that should there be any appreciable change in the cost of living, or any disturbance in economic conditions or any disparity in the schedule of wages paid by any other coal company in the Province of Nova Scotia, this schedule may be open for revision at the instance of either party at the end of each four months' period from January 1st last.

We come now to the recommendations earlier spoken of:—

1. We recommend that each fireman should fire a battery of at least two boilers. If he fire only one, he should be paid at the rate of \$3.25 per day. We hope the employees will agree to this and assist the management in carrying it out.

2. There are more box car trimmers than necessary. We recommend that some of these men be placed at other work about the colliery, and that the employees consent to the change.

3. Boys remain at work on the Bankhead until grown up and then demand men's pay. Other positions are offered them but they will not change. It must be apparent to the employees that no mine can be efficiently or economically operated where the management is not allowed to direct in a matter of this kind. We feel confident then that they will lend their assistance to the management in effecting better conditions in this regard on the Bankhead.

4. Some twenty years ago when mining operations were commenced at Inverness, an arrangement was made between the Company and those then employed by it that these employees should have screened coal at \$1.20 per ton. Perhaps when the arrangement was entered into not much could be said against it, but now when conditions have very materially changed, and every ton of coal costs the Company several times that amount, the time would seem to have arrived for a more equitable arrangement. There is no reason why the employees should not take run of mine coal—to do that would save the Company not only the cost of screening, but the cost of removing the slack left from the screening to the boilers. We strongly recommend the men to accept run of mine coal instead of screened. The only other company operating in Inverness County charges its employees \$2.50 per ton for run of mine coal. The Nova Scotia Steel & Coal Co., Ltd., while giving its older employees coal very cheaply, charges those taken on in recent years a considerably higher rate. We would recommend to the Company that any one employed from this date should be asked to pay a higher rate than is now paid, and be supplied with run of mine coal.

5. In all our Nova Scotia mines a large percentage of the men do not work full time. Making due allowance for National holidays and for days necessarily lost because of sickness, there is still an alarming disparity between the number of working days and the number of days worked. The Company suffers more than any of its competing companies

in this matter. Absenteeism at its colliery during 1919 reached the appalling figure of thirty-one per cent. It is difficult to estimate to what extent the cost of the Company's operations is increased by this failure of its employees to work anything like full time—it goes without saying, however, the increase must be very great. Already we are informed the Local Union of the Employees has passed a resolution that ought to have some effect in decreasing absenteeism, but much yet remains to be done. We recommend that the employees enter into conference with the Company and endeavour to come to some agreement

by which this absenteeism can be greatly reduced.

All of which is respectfully submitted.

(Sgd.) GEORGE PATTERSON,  
Chairman.

(Sgd.) J. C. WATTERS.

April 5, 1920.

I concur in all of the foregoing report except as to the rates to be paid machinists (in the Machine Shop,) boiler-maker, blacksmiths, and car repairers. For these I would suggest 60c. per hour for first three classifications and 55c. for last.

(Sgd.) HOWARD MURRAY.

#### **Report of Board in Dispute between the Canadian General Electric Company, Peterborough, Ont., and certain of its employees.**

**A** REPORT was received from the

Board established to deal with the dispute between the Canadian General Electric Co., of Peterborough, Ont., and certain of its employees, being armature winders, members of Local Union No. 261, International Brotherhood of Electrical Workers. This industry not being one already within the scope of the Industrial Disputes Investigation Act, a Board could be established only by the joint consent of the disputants. The employees, who had gone on strike on January 2, returned to work on January 6, granting their consent to the reference of the dispute to a Board. A Board was established, composed as follows: His Honour Judge E. C. S. Huycke, Peterborough, chairman, appointed by the Minister in the absence of a joint recommendation from the other two members: Messrs. J. G. Merrick and Fred Bancroft, Toronto, nominees of the company and employees respectively. The report of the Board was unanimous, although Mr. Merrick and Mr. Bancroft noted an exception. Recommendations as to settlement were made and a proposed schedule of wages submitted.

#### **Report of Board**

In the matter of the Industrial Disputes Investigation Act, 1907, and of a dispute between the Canadian General Electric Company, of Peterborough, Ontario, employer, and certain of its employees, being armature winders, members of Local Union No. 261, International Brotherhood of Electrical Workers, employees.

To the Honourable  
the Minister of Labour,  
Ottawa, Ontario.

Sir,—

Your Board of Conciliation and Investigation established herein have the honour to report as follows:

Your Board met and organized at the Court House, Peterborough, on the eighteenth day of February, 1920. The members of the Board: James G. Merrick, Fred Bancroft and Edward C. S. Huycke, were all present, and having been duly sworn, proceeded with the investigation. Notice of the meeting had been given to those interested, and at the sessions the employers were represented by Mr. George W. Watts and Mr. E. G. Patterson, and the employees

by Mr. John Noble and Mr. William Houston. We visited the shops, inspected the kind of work done and conversed with a number of the workmen interested.

The Board was in session on the eighteenth (18th), nineteenth (19th), twentieth (20th), twenty-fourth (24th), twenty-fifth (25th), twenty-sixth (26th) days of February, and March 3rd, 1920, the first three days at the Court House, Peterborough, and the rest of the sittings in Toronto.

The demands of the employees were as follows:

1. Twenty per cent increase of wages.
2. A minimum rate of fifty cents (50c.) per hour to all men in winding department after three (3) months' service.
3. That seniority in department shall prevail. All senior men to be given preference over men starting from gate.
4. Time and one-half for overtime up until 10 p.m. Double time after 10 p.m. Double time for Sundays and all holidays.
5. No employee in winding department to be changed from day to night shift for a period of less than one week.

The representatives on both sides, though courteous throughout, were firm, and it was found impossible to get them to agree on a settlement of their differences, though such settlement was strongly and frequently suggested by members of the Board.

As shown by the record a 10 per cent all-round increase had been offered by the employer prior to the strike, but such offer was formally withdrawn at the sittings of the Board.

Your Board having heard all the evidence given and arguments advanced, beg to recommend as follows:

1. We recommend an increase of fifteen per cent (15%) over present rate

of wages, such increase to date from the sixth (6th) day of January, 1920.

This increased rate to remain in force for one year from said sixth (6th) day of January, 1920.

2. We do not see fit to recommend a minimum rate of wages in this department as demanded.

3. As to this demand we found after discussion and explanations that the parties were really in accord as to it and any trouble has been apparently the result of misunderstanding.

In case it should be necessary your Board recommends that the men senior in length of service in the department be given preference and promotion therein, provided their skill, ability and fidelity warrant it.

4. Some difficulty arose over this matter. The Company does now pay and is willing to pay the overtime rates demanded to these employees except to those working on what is known as their premium plan. This plan estimates a fixed time for a fixed piece of work and pays for it accordingly. If the employee does it in less time than that fixed he is so much the gainer. The employee claims he should be allowed overtime rates on this as well as any other work. The employer dissents, claiming that by such action the employee would get the double advantage of the premium preference and the excess overtime wages.

We found in conversation with the interested parties that both sides are now dissatisfied with this premium plan, or say they are. The employees claim the time limit for piece work is so arranged that they can get little or no benefit from it, work they ever so steadily and hard. The employers say the employees generally do not try to earn the premium and by concerted prearrangement or understanding take at least full time at their piece work.

In view of this most regrettable condition of affairs, we recommend that this premium plan be discontinued and that the overtime rates asked for in No. 4 be granted to all.

5. The difficulty causing this demand we find was caused wholly by misunderstanding and inadvertence. The parties practically agreed in our presence as to it. Some men called to do night work, worked say Monday and Tuesday nights and the days of Thursday, Friday and Saturday (half-day), a total of forty-three (43) hours instead of the ordinary fifty (50) hour week through no fault of the employees. This is unfair and we believe unintentional, and the employer promised and we recommend that such be not allowed to recur, and that any employee doing night work at the request of the Company part of the week be paid his full fifty-hour week's wages, even though he actually puts in less time as the result of doing such night work.

A further question arose during the discussions about two young women working as armature winders and their wages which are less than some of the men received, it is said, for similar work. These women did not go out on strike but an informal demand was made that they be paid wages equal to the men's. We recommend this as fair and it should be done in so far as they do similar work to the men and are equally efficient. Their names are: Miss Noyse and Miss Shaw.

The men whose names are hereunder written are those affected by this report:

Messrs. Lawless, O'Neil, Hughes, Morrison, Jeffrey, Martin, Welsh, Bickel, Robinson, LaPlante, Gutterson, Palmer, Halpin, Menzies, Killenbeck, Sullivan, Reader, Snowcroft, Hiltz, Harris, Stewart, Lang, Petty, Cullen, Hargrove, Pearson, White, Abbott and Houston.

Fred Bancroft joins in this report, with the exception of the two proposals referring to a minimum rate and term of the award, and recommends that the lowest rate for any of these employees shall be fifty cents (50c.) per hour after three months' service; and that the increased rates for all remain in effect from Jan. 6th, 1920, for three months thereafter, until thirty days' notice is given in writing, by either party desiring to change it, to the other.

J. G. Merrick joins in the report with the exception of the increase in wages and recommends an increase of ten per cent (10%) and also adds a reservation regarding the wages proposed for the two women.

All of which is respectfully submitted.

(Sgd.) EDWARD C. S. HUYCKE,  
Chairman.

(Sgd.) FRED BANCROFT,  
Member.

(Sgd.) JAMES G. MERRICK,  
Member.

Dated March 4th, 1920.

#### **Report of Board in Dispute between the Corporation of Ottawa and its civic employees.**

A REPORT was received from the Board established to deal with the dispute between the Corporation of Ottawa and certain of its employees, being members of Civic Employees' Federal Labour Union No. 15. The employer in this case being a municipality, a Board could be established only upon the joint consent of the disputants. The consent of the city was received and a Board was established composed as fol-

lows: His Honour Judge R. D. Gunn, Ottawa, chairman, appointed by the Minister in the absence of a joint recommendation from the other two members, Messrs. Ainslie W. Greene, Ottawa, and Fred Bancroft, Toronto, nominees of the city and employees respectively. The report was signed by the chairman and Mr. Bancroft, a minority report being presented by Mr. Greene. Both reports were accompanied by recommendations as to settlement and proposed schedules.

### Report of Board.

In the matter of the Industrial Disputes Investigation Act and of a dispute between the Corporation of the City of Ottawa, employers, and its Civic Employees, Members of Federal Union No. 15, employees.

To the Honourable,  
Senator G. D. Robertson,  
Minister of Labour, Ottawa.

The Board, to investigate the dispute set out in the application to your Department appointed upon the consent of the employers convened at the City of Ottawa in the City Hall on the 24th day of March, A.D., 1920, and following days, and were attended by His Worship, Harold Fisher, Mayor; Mr. McCallum, Engineer and Commissioner of Works; Assistant City Engineer Askwith, and Assistant Waterworks Engineer Macdonald, of the said city, representing the employers; and Mr. Edward Travers, President, and Mr. C. J. Clarke, Secretary, of Local Union No. 15, of the Civic Employees Federal Union, representing the Employees. It was represented on behalf of the employees that there were in or about 150 men affected directly in the dispute, and that many of them were and had been in the service and employment of the city for many years and were paid monthly rates, while others were long in the service of the city and were paid an hourly rate and all were members of the aforesaid local union of organized labour.

It further was represented that a schedule of rates of pay was submitted on behalf of the employees to the Commissioner of Works of the city during the month of January last past, and was under his consideration for some time, and was then submitted to the Board of Control with his recommendation for their approval, and endorsement.

It will be conceded also that as the employees paid an hourly rate and under consideration are the smaller percentage of that class of employee finding em-

ployment during the operating season with the city, and that the Board of Control had to consider the rates of pay, having in view such additional force and that the question of rates for these employees was under discussion often between the employees and the Board of Control prior to those proceedings, but no adjustment satisfactory to the parties was reached.

After ascertaining the nature and extent of the matters in dispute, it appeared that it was desirable that further conference between the parties should take place, and it did, without reporting any beneficial results, and the statements of a number of the employees in the several different classes were heard by the Board, and it was again the opinion of all concerned that other efforts to reach a working agreement between the parties might produce desirable results.

This serious conference took place at the express suggestion of this Board, with approval of all parties, and the whole schedule was fully considered therein, and it was then reported to this Board that as all offers of adjustment were not accepted, that neither party was bound by any offers made and accepted, and in view of the conditions under which such offers of settlement were made and accepted, the evidence of the results of the conference, although it was stated that it left but little in dispute, was denied to this Board or any of its members, thus destroying all efforts at conciliation and both parties retreated to their own camps.

The undersigned members of the Board are of the opinion that it would have been in the best interests of all parties, had a full and frank statement of the rates of pay that had been agreed upon at the conference been submitted to this Board, but objection being taken to such course, this Board proceeded without that valuable information.

It is significant and perhaps worthy of remark that no one representing the employers took the ground that none of the increases desired in the rates should be granted, but all seemed to concede that increases should be made, and only the

question as to the amount thereof was discussed.

It does appear that the increases in rate of pay sought by the employees are based almost entirely on the ever-repeated contention that the cost of living and rent and incidental expenses have very materially increased and continue to do so and that similar rates are paid for similar services by other employers of labour in this vicinity, and that increases have been granted recently to the other employees of the city in other capacities.

Under these circumstances above set out and no complaint being made upon the ability, efficiency and qualification of any of the employees, after the most careful and sincere consideration of the evidence, information, representations and contentions of the respective parties, and their witnesses, the undersigned members of this Board have decided to recommend that the monthly and yearly rates of pay set out in schedule "A" hereto be the rates payable monthly to the members of the different classes of employees named therein, and further recommend that the same be made effective from and after the 31st of December, A.D., 1919, for the present year.

The undersigned members of this Board do further state that they have decided to recommend that the rates of pay set out in schedule "B" hereto, be the rates to be paid for the class of employees therein mentioned, who are classed as hourly paid employees and would recommend that the same become effective from and after the first day of March, A.D., 1920, and for the present year.

Dated at Ottawa this 3rd day of April, A.D., 1920, and respectfully submitted.

(Sgd.) R. D. GUNN,  
Chairman.

(Sgd.) FRED BANCROFT,  
Member for employees.

## Minority Report

In the matter of the Industrial Disputes Investigation Act and of a dispute between the Corporation of the City of Ottawa, employers; and its Civic Employees, Members of Federal Union No. 15, employees.

To the Honourable  
Senator G. D. Robertson,  
Minister of Labour,  
Ottawa, Ontario.

His Honour, Judge Gunn, has submitted to me the report prepared by him and forwarded since to you after I had declined to sign the same.

He has covered the general history of the proceedings of the Board of Conciliation so that it is not necessary for me to deal with that other than in regard to some aspects of the report with which I cannot quite agree.

Prior to the appointment of the Board of Conciliation the Board of Control submitted to the Union a schedule of rates of pay considerably in advance of those now paid. Representatives of the City protested against this schedule being used before the Board of Conciliation and contended that the present rates of pay should be considered on the one hand and the demands of the Union on the other hand, the fair function of the Board being to find some common meeting ground if possible between these two points. The objection was that the offer of the Board of Control was in all cases being taken as a minimum and the fact of considerable increases having been offered by the Board of Control more or less lost sight of.

I would refer to the following paragraph of the majority report, (I have been informed since that Mr. Bancroft has concurred with Judge Gunn in his report), "It is significant and perhaps worthy of remark that no one representing the employers took the ground that none of the increases desired in the rates should be granted, but all seemed to concede that increases should be made, and only the question as to the amount thereof was discussed."

If this statement is with reference to the present rates of pay it is absolutely correct but if it refers to the rates of pay offered by the Board of Control it is, in my opinion, not correct except in the case of one or two individual employees.

In my opinion it should be borne in mind that the Board of Control is not in the same position as the ordinary employer of labour. In the first place none of the increases granted affect the individual pockets of the members of the Board of Control, as is the case with the private employer granting increases to his employees. In the next place the position of the Board of Control is such that there is every inducement for them to be fair and even generous in fixing the rates of pay.

The case of the employees was based almost entirely on the increased cost of living, but no satisfactory evidence as to what the percentage of increase in the past year had been was given. Such evidence as was submitted by the employees with regard to rates of pay in similar employments referred almost altogether to pending discussions between employers and employees as to rates which should come into force on the 1st May next. If my notes on the evidence are correct there was no specific evidence as to any agreement in these cases having yet been reached. Evidenced submitted by the City as to rates of pay in similar employments in Ottawa would in my opinion point to the fact that the offers made by the Board of Control are in advance of rates at present paid by private employers.

The largest body of men affected is the labourers, who are at the present time being paid 45 cents an hour. The offer of the Board of Control was 52 cents an hour. It has apparently been customary for some years past that City labourers should be paid 5 cents an hour less than the Builders' Trades labourers, as the latter are looked upon as partially skilled and their employment is, of course, not as steady as that of a City labourer. The Builders' Trades labourers are at the present time receiving 50 cents an hour, but negotiations are in progress for a change in this rate. The rate paid to City labourers should be within 5 cents of the rate settled as of May 1st, 1920, for Builders' Trades labourers.

I have placed in the schedule attached

to my report the sum of 52 cents an hour for labourers, but the above clause should be considered as attaching to the same.

The same rule would apply with regard to main pipe layers and service pipe layers. For some time past there has been a spread of 5 cents between the ordinary labourer and these men, that is the pipe layers of both classes have been paid the same as the Builders' Trades labourers. Consequently if the rate settled for Builders' Trades labourers on May 1st is more than 57 cents the rates of pipe layers should be increased accordingly.

The rates of pay for outside employees of the City have apparently been nearly always settled in March or April of each year, rather than as of the first of the year. The evidence of the employees was directed almost entirely towards rates of pay which would come into force on May 1st next, and living conditions as they would be on May 1st next, a large amount of the evidence being given to prove the increases in rent which will take place on May 1st.

In view of all the circumstances it would seem to me eminently fair to the employees that all the rates of increase should date from March 1st, 1920.

Appended hereto is a schedule of rates which in my opinion are fair and I would recommend that the same become effective from and after the first day of March, A.D., 1920. the rates for labourers and pipe layers being subject to increase as dealt with above.

Dated at Ottawa this fifth day of April, A.D., 1920, and respectfully submitted.

(Sgd.) AINSLIE W. GREENE,  
Member for Employers

### Supplementary Report of Board in Dispute between the Bedford Construction Company, St. John, N.B., and certain of its employees engaged on the Courtenay Bay Harbour contract

IT was recently found necessary by the Department of Labour to reconvene the Board of Conciliation and Investigation which was established in September last to deal with the dispute between the Bedford Construction Company, St. John, N.B., and certain of its employees engaged on the Courtenay Bay Harbour contract. The Board was composed as follows: Sir Ezekiel Mc-

Leod, St. John, chairman, appointed by the Minister in the absence of a joint recommendation from the other two members, Brigadier General C. L. Hervey, Montreal, and Mr. James E. Tighe, St. John, nominees of the company and employees respectively. The findings of the Board dated October 1, 1919, (see pp. 1149-1151, LABOUR GAZETTE, October, 1919), left some doubt as to the in-

terpretation of the clause relating to the ten-hour day. The supplementary findings were unanimous and favoured the company's interpretation of the clause in question.

### Report of Board

In the matter of the Industrial Disputes Investigation Act, 1907, and a dispute between the Bedford Construction Company, St. John, N.B., employer, and certain of its employees.

St. John, N.B., March 20, 1920.

To the

Honourable Gideon D. Robertson,  
Minister of Labour.

Sir,—

The Conciliation Board which was established in the above matter in the month of August last was by your request re-convened and had a hearing yesterday and to-day, for the purpose of dealing with a dispute that had arisen between the Company and its employees, concerning the meaning of the findings of this Board made on the 25th September, 1919, regarding the ten-hour clause in the said award. The Company was represented by its General Manager, and the employees by Mr. Christie, who is a member of what they term their Grievance Committee.

The complaint of the employees was that during about three months of the past winter they only worked nine hours,

and received pay for nine hours. Since the first of the present month they have been working ten hours and receiving pay for ten hours. The Company on its part claimed that it could only work with safety during daylight, and that during these three months they could only work nine hours by daylight, and this was admitted to be the fact by the representative of the employees. The work itself is somewhat dangerous, and the representative of the Company said it would be very expensive to install lighting to enable them to work at night and also be more dangerous.

The Board agreed with the contention of the Company that during these months they can only with safety work the nine hours, and that they should be only paid for the hours they work, and its interpretation of the clause with reference to the ten hours is that ten hours was as long as the employees could be asked to work at the regular rate of wages. Any time they worked over that was to be paid for as provided in the award, that is, they should be allowed time and a half for all overtime.

The Board recommends that the ten hours a day be continued so long as weather and conditions permit.

All of which is respectfully submitted.

(Sgd.) E. McLEOD,  
Chairman.

(Sgd.) C. L. HERVEY.  
(Sgd.) J. E. TIGHE.

### INDUSTRIAL COMMISSION

**A** PART from the proceedings under the Industrial Disputes Investigation Act, there were also during the month of March proceedings under the Inquiries Act.

An application had been received from certain of the employees of various firms in Vancouver, B.C., members of the General Cartage and Warehousemen's Association of British Columbia, being members of Local No. 655, Inter-

national Brotherhood of Teamsters, Chauffeurs, Stablemen and Helpers. As this industry did not fall within the scope of the Industrial Disputes Investigation Act, a Board could be established only upon receipt of the consent of the employers. This consent was not given. Consideration of the situation, however, by the Minister of Labour, resulted in the reference of the dispute to a Royal Commission, appointed under the Inquiries Act. The Rev. W. H.

Vance, of Vancouver, was appointed as Commissioner to hold and conduct this inquiry, and to report and make recommendations to the Minister of Labour with respect to the means of an amicable

adjustment. The report of the Commissioner was accompanied by a new schedule of wages and working conditions which has been adopted by both parties to the dispute.

**Report of Royal Commission appointed under the Inquiries Act to investigate the dispute between the members of the General Cartage and Warehousemen's Association of British Columbia, Vancouver, B.C., and certain of their employees.**

To the Honourable

Gideon D. Robertson,

Minister of Labour, Ottawa.

On March 5th the undersigned was appointed a commission to investigate and report upon the above-mentioned dispute. Three public sessions were held and several days were spent in negotiating a basis of working conditions agreeable to both parties.

F. D. Cross represented the General Cartage Association while Birt Showler represented the Union.

On October 1st, 1918, an agreement was signed between the Association and the Union and continued in force until June 3rd, 1919, when the members of the Union joined the local sympathetic strike, thereby breaking the agreement. At the conclusion of the strike the men returned to work as individuals, the Union was reorganized and on several occasions requested a conference with the Association, but their requests were either refused or ignored. The Association claimed that the Union had broken the agreement and was unworthy of further confidence. The Union claimed that its action was due to the influence of men no longer in control.

On February 13th the Union applied for a Board of Conciliation and Investigation. As the Association would not agree to this the undersigned was appointed a commission to enquire into the matter.

The Association and the Union were found to be in agreement on the following points, in the former contract:—

The right of employers to dismiss incompetent employees; non-discrimination against members of the Union; holidays; hours of work; overtime and

conference, and proportionate increases of wages whenever it could be shown that the cost of living had increased seven and a half per cent.

The Association had already granted the increased wage scale asked for when application was made for the Board of Conciliation and Investigation. The Association further agreed to recognize the Union.

The Union agreed to the "open shop", to a declaration against sympathetic strikes and to conferences and proportionate decreases in wages whenever the cost of living could be shown to have decreased seven and a half per cent.

A basis of working conditions embodying these points was drawn up and consented to by both parties. Letters indicating its acceptance were received from E. A. Quigley, Secretary of the Association, and Birt Showler, Business Agent of the Union.

I enclose herewith a copy of the basis of working conditions together with the above-mentioned letters of acceptance, the transcript of the evidence taken at the public sessions and certain exhibits.

(Signed) W. H. VANCE,

Commissioner.

The following is accepted as a basis of working conditions between the members of the "General Cartage Association", hereinafter designated as the "Employers" and the International Brotherhood of Teamsters, Chauffeurs, Stablemen and Helpers, Local No. 655, of Vancouver, B.C., hereinafter designated as the "Employees."

*Section 1:*

All employees shall receive regular wages as set forth in this agreement.

*Section 2:*

The Employers hereby reserve the right to discharge any man in their employ if his work is not satisfactory.

*Section 3:*

No workman shall be discharged or discriminated against for upholding recognized principles of organized labour. Any man who works under the instructions of the Employees or who serves on a Committee of the Employees shall not lose his position nor be discriminated against for this reason.

*Section 4:*

The following days shall be considered as holidays:—

New Year's Day,  
Good Friday,  
May 24th,  
July 1st,  
Labour Day,  
Thanksgiving Day,  
Christmas Day.

It is understood that the Employers shall not be required to pay Employees for holidays designated in this section when such Employees do not work.

*Section 5:*

Nine (9) hours shall constitute a day's work to be performed between the hours of seven (7) A.M. and six (6) P.M. Time to start when driver arrives at barn (optional with employer) 7 to 8 A.M. Overtime to be all work performed in excess of the maximum number of hours provided for. Time and one-half for all time in excess of the above, including Sunday and the holidays mentioned in section 4, unless otherwise arranged. When a driver takes out a team for one-half day or less, he shall receive one-half-day's pay; over one-half day and less than one full day, he shall receive a full day's pay. Any regular man ordered to report for duty in morning or held waiting subject to orders, shall receive one-half day's pay.

*Section 6:*

No employee who prior to the date of his agreement was receiving more than the rate of wages in the schedule set forth in this agreement, or working less hours than stipulated herein, shall suffer a reduction of wages or increase of hours because of the adoption of this basis of working conditions.

*Section 7:*

In case a dispute arises between an Employer and an Employee affecting their mutual relations, the matter shall be referred to a committee of three (3) and consultation must be had with a like committee of the other party before action is taken thereon, and in no case shall final action be had in any such matter until two weeks have elapsed. Two

at least of the members of the respective committees shall be actual Employers or Employees.

A permanent Committee of both Employers and Employees shall be elected and shall meet once a month for the discussion of all matters pertaining to the joint welfare of the industry.

It is agreed that there shall be no cessation of work or lockouts during the life of this agreement.

It is further agreed that in the event of a strike among the employees of any firm with which Employer is doing business, the Employers will not ask the Employees to perform any labour they do not ordinarily perform and the Employees agree to perform their usual work as if such strike did not exist.

*Section 8:*

The Employees are not in favour of sympathetic strikes and will do everything they can to avoid them.

*Section 9:*

The following is the minimum scale of wages which shall be paid:

Draymen—	
6,000 pounds and over .....	\$5.00
under 6,000 pounds .....	4.75
Furniture drivers—	
(Three horses) .....	5.25
(Two horses) .....	5.00
(Autos 1½ to 3 tons) .....	5.00
(Autos over 3 tons) .....	5.50
Piano crew .....	5.50
Baggage wagons drivers—	
(Single horses) .....	4.00
(Teams) .....	4.50
(Autos) ..	5.00
Coal wagon drivers .....	5.25
AUTOS:	
Ford parcel delivery .....	4.25
One ton and under 2½ tons .....	4.75
Two and one-half tons and under 4 tons ..	5.00
4 tons and over .....	5.50

*HELPERS:*

Coal ..	5.00
Furniture ..	5.00
General ..	4.75
Casual, less than one-half day, per hour ..	.75
Dump wagon drivers .....	5.00
Wood wagon drivers .....	5.00
Mail drivers (day shift) .....	4.50
Mail drivers (night shift) .....	4.75

Men without previous experience, 25 cents per day less than above rates for a period of not more than one month.

Overtime to be computed as follows: 15 minutes or over, one-half hour shall be allowed; 45 minutes or over, one hour shall be allowed.

*Section 10:*

Where it can be shown by the Employees that the cost of living has, according to the statistics furnished by the Department of Labour in the *Labour Gazette*, increased  $7\frac{1}{2}$  per cent or over, the Employees shall be entitled to a conference, and an increase in the wage rates corresponding to the increased cost of living. Where, on the other hand, it can be shown by the Employers that the cost of living has, according to the statistics furnished by the Department of Labour, in the *Labour Gazette*, decreased  $7\frac{1}{2}$  per cent or over, the Employers shall be entitled to a conference and a decrease in the wage rates corresponding to the decreased cost of living.

*Section 11:*

This basis of working conditions shall continue in force and effect from the date of the signing thereof to the twenty-seventh day of March, A.D. 1921, and written notice of the intention of either party desiring any change to be made in the same before the renewal thereof, together with the proposed change, not less than thirty (30) days prior to the expiration of same, and in case no such notice is given of the proposed change as provided for, it is expressly agreed that this arrangement shall remain in full force and effect until such notice is received.

Dated this twenty-seventh day of March, A.D. 1920.

I hereby certify that the above is a true copy of the arrangement mutually arrived at.

(Signed) W. H. VANCE,  
Commissioner.

GENERAL CARTAGE AND WAREHOUSEMEN'S ASSOCIATION OF B. C.

Vancouver, B.C., March 27th, 1920.

W. H. Vance, Commissioner,  
Vancouver, B.C.

Dear Sir,—

I have been authorized by the General Cartage Association to notify you of their acceptance of the 'basis of working conditions between the members of the "General Cartage Association," hereinafter designated as the "Employers," and the "International Brotherhood of Teamsters, Chauffeurs, Stablemen and Helpers, Local No. 655, of Vancouver, B.C." hereinafter designated as the "Employees" as signed by you this day.

Yours truly,  
(Signed) E. A. QUIGLEY.

INTERNATIONAL BROTHERHOOD OF TEAMSTERS,  
CHAUFFEURS, STABLEMEN AND HELPERS  
A. F. OF L. LOCAL UNION No. 655  
GENERAL TEAMSTERS AND  
CHAUFFEURS.

587 Homer Street,  
Vancouver, B.C.,  
March 27th, 1920.

W. H. Vance, Commissioner,  
Vancouver, B.C.

Dear Sir,—

I have been authorized by the International Brotherhood of Teamsters, Chauffeurs, Stablemen and Helpers to notify you of their acceptance of the basis of working conditions between the members of the "General Cartage Association," hereinafter designated as the "Employers," and "International Brotherhood of Teamsters, Chauffeurs, Stablemen and Helpers" Local No. 655, of Vancouver, B.C., hereinafter designated as the "Employees" as signed by you this day.

Yours truly,  
(Signed) BIRT SHOWLER,  
Secretary.

## PROCEEDINGS OF THE CANADIAN RAILWAY BOARD OF ADJUSTMENT No. 1

THE Department has received eight new decisions of the Canadian Railway Board of Adjustment No. 1. Case No. 67 relates to the appointment of a telegraph operator to a position on the Canadian National Railways (Eastern Lines). Case No. 68 has reference to the dismissal of a section foreman by the

Grand Trunk Pacific Railway Company. Case No. 69 deals with the difference of opinion as to the application of Article 3, Clause "F," of the C.P.R. Western Lines Trainmen's Schedule. Cases Nos. 70 and 71 relate to the dismissal of conductors of the Canadian Pacific Railway (Western Lines). Case No. 72 deals with

a request of locomotive firemen and enginemen of the C.N.R. for a reduction in their period of duty. Case No. 73 has reference to a request of locomotive firemen of the Canadian National Railways for a reduction of the exemption period after which they are entitled to minimum passenger rates when held at terminal points away from home. Case No. 74 has reference to the dismissal of a conductor of the Canadian National Railways (Eastern Lines).

**Case No. 67.—The Canadian National Railways (Eastern Lines) and The Order of Railroad Telegraphers**

A telegraph operator of the Canadian National Railways was senior applicant for a position that was vacant on his release from overseas service. There was nothing against him in the matter of his own qualifications for the position, but he was advised by the Superintendent that his application could not be considered, as his father was agent at the place where the vacancy existed. It was contended by the railways that there was a standing rule that father and son could not be employed where one was under the jurisdiction of the other. The employees contended that failure to appoint this applicant was a violation of the schedule and could in no way interfere with the best interests of the railway.

The decision of the Board was as follows:

The Board decides that under the terms of the schedule, and in view of the conditions as they exist in this particular case, the claim of the Employees is sustained.

The Board, however, recognizes that there are conditions, probably applying in the majority of cases, under which relatives should not be permitted to work together either in the interest of the Railway or of the Employees.

Pending any change in the schedule definitely establishing the basis on which such conditions shall be regulated, each case should be dealt with between the Railway and the Employees on its merits.

**Case No. 68.—The Grand Trunk Pacific Railway Company and the United Brotherhood of Maintenance of Way Employees**

A section foreman of the Grand Trunk

Pacific Railway Company was dismissed for alleged slighting of duty. The employees contended that he was unjustly discharged and that he should be reinstated and paid for time lost. In its general statement the Board declared that the principal cause of the section foreman's dismissal was stated to be improper booking of time not worked by his gang. Other irregularities were also charged, but in the opinion of the Board the evidence and in fact the entire presentation of the case on both sides was unsatisfactory. Before the Board could undertake to arrive at a decision, definite information would be necessary as to the regulations in effect on the branch line where the section foreman was employed relative to the sending in of the time sheet of the section forces; direct evidence as to the weather on March 10, when the section gang was found not to be working; information as to the way the record is taken and kept, and how many times a month it was in order for the section foreman to go for supplies. The statements filed did not indicate that an investigation of the case was held or that any request for an investigation was made.

The decision of the Board was as follows:

The Board, under the circumstances, considers that if an investigation of this case has not been held, that it would be desirable that an investigation be held so that charges of "irregularities" of a general nature be more definitely set out, and that evidence on them be taken and be available for the use of the Board, provided the result of the investigation should make it necessary to refer the matter again to the Board.

In the event of the parties wishing to again submit the matter, information along the lines mentioned should be presented jointly, if possible, but if this is not practicable, both parties should submit statements definitely setting forth their position on the points of the case.

**Case No. 69.—The Canadian Pacific Railway Company (Western Lines) and the Order of Railway Conductors and the Brotherhood of Railroad Trainmen**

A difference of opinion arose as to the application of Article 3, Clause "F," of the Canadian Pacific Railway, Western

Lines, Trainmen's schedule which reads as follows:

When an unassigned crew is used in work train service for two calendar days or less, the crew will be paid through freight rates and under through freight conditions, excepting that when the nature of the work is such that it is necessary for the crew to be run in and out of terminals it may do so without involving payment of run rounds or the crew being automatically released. If such a crew is tied up at a terminal it will take its turn out in the unassigned service.

If an individual crew is used longer than two days in such service it will be paid under work train conditions after the second calendar day, but all work train service of ten days' duration or longer will be advertised and made a regular assignment.

This rule will not apply should crew handle revenue freight.

According to the general statement of the Board it appears that prior to the adoption of the above clause in February, 1918, it was the practice when pool crews were called for short-term work service, to lay crews up on the line for rest periods, without pay. The employees contended that this practice imposed an unfair condition, at least in some cases, and claimed that through freight rates and conditions with respect to compensation should apply. The Company conceded the claim to the extent that rules and conditions as asked for should apply, with certain stated exceptions, to work service calls for two calendar days or less. It was stated on behalf of the Company that the intent was that continuous time or mileage should be paid, under the application of the schedule clause mentioned, to work crews called under the conditions stated, from the time of leaving terminal until return thereto, but not that any duplicate time should be paid for the same hours of service.

The Employees contended, on the other hand, that the clause as adopted was a compromise on their claims as originally presented and should be applied according to its stated terms, although it was admitted that the possibility of duplicate pay for work service en route was not considered at the time the clause was adopted.

The decision of the Board was as follows:

In view of the contentions of the parties, the Board would not be justified in dealing with the matter otherwise than on the basis of the clause as it reads, and decides that the claim of the Employees is sustained.

**Case No. 70.—The Canadian Pacific Railway Company (Western Lines) and the Brotherhood of Railroad Trainmen**

A conductor of the Canadian Pacific Railway Company was dismissed on the ground that he was not a man of sufficient ability to be in charge of a train as conductor. The Company offered him a position as permanent brakeman, which was declined. His dismissal followed a derailment, on which occasion he acted as flagman. After an investigation he was advised that he was dismissed for gross irregularity in handling a train when cars were derailed. The employees contended that there were no gross irregularities on the dismissed man's part, and that under similar and other circumstances a conductor often performs the duties of flagman, especially when the rear brakeman is required to perform other duties. The employees also testified that he had run a train apparently successfully for a number of years, and that the statement that he was not qualified to perform all his duties as a conductor was not well founded and was not substantiated by any proof from the records of his service. The Company stated that notwithstanding that the employee had been in the service for a considerable time as conductor, his mental capacity had been in doubt for years, but the Company, on account of certain circumstances, connected with his case, were anxious that he be given employment, and places were picked out for him where it was thought, with the assistance of a good brakeman, he could be kept out of trouble. The Company considered that he had not sufficient ability to assume the responsibility of a conductor.

The decision of the Board was as follows:

The Board decides that the Company's action is sustained, with the understanding that J— be returned to the service as a brakeman, with his seniority as such (subject to the Rules and Regulations), until such time as he demonstrates to the satisfaction of the Company his qualifications for promotion.

**Case No. 71.—The Canadian Pacific Railway (Western Lines) and The Order of Railway Conductors**

A conductor of the Western Lines of the Canadian Pacific Railway was dismissed for handling a car as an empty which contained a shipment of liquor, and setting it out at a station without reporting same, also for putting in a trip ticket for a brakeman when he was not employed on the train. The Board found that it was evident that liquor was stolen from a car and transferred into another car, which was switched into conductor N—'s train; that the car was handled without billing from Dunmore to Coaldale, where it was switched out; that the conductor did not see either of his brakemen from that time until he went off duty at Lethbridge; that his front brakeman did not travel beyond Coaldale; and that no report of the circumstances was made by Conductor N— up to the time he was called into the superintendent's office five days later, although he had opportunity to do so. It was declared by the Board that even if the evidence did not show that conductor N— participated directly in the stealing and handling of the liquor, it did undoubtedly show that he was guilty of gross negligence in permitting what did occur in connection with the handling of his train, and that he failed to report the circumstances at the first opportunity after he undoubtedly had knowledge of them.

The decision of the Board was as follows:

Inasmuch as the evidence does not show that Conductor N— participated directly in the stealing of the liquor, or that he had personal knowledge of it until after the occurrence, the Board decides to recommend to the company the favourable consideration of Conductor N—'s reinstatement, without pay for time lost, believing he should be given the benefit of the doubt to this extent, and

that his suspension from the service for somewhat over a year may be considered sufficient discipline for his failure to fulfill his duty as a conductor on the occasion and in connection with the circumstances in question.

**Case No. 72.—The Canadian National Railways and the Brotherhood of Locomotive Firemen and Enginemen**

The locomotive firemen of the Canadian National Railways requested that the period of duty after which trains may be laid up between terminals for them to obtain rest be reduced from fifteen to twelve hours. The second paragraph of Article 9 of the schedule, which they desired to be amended, reads:

•Trains may be laid up between terminals for firemen to obtain rest after they have been fifteen hours on duty, upon advice to train dispatcher, but if dispatcher will cut out all way work and switching, trains may be taken through to terminals. Firemen to be judge of their own condition.

The employees contended that the fifteen-hour optional rest rule was agreed to several years ago when small power was in service and good grades of fuel were being used, and when the road was practically in course of construction. Since then the power has increased and they are now hauling at least twice the tonnage and using much inferior grades of fuel, so that they find it at times almost impossible under present conditions to fire a locomotive fifteen hours without injuring their health. The men also pointed out that the other roads in the territory had an arrangement similar to that requested. On behalf of the railways it was contended that no hardship existed under the present rule, that the work of the firemen was being reduced by new equipment, that all United States railways require firemen to give up to sixteen hours' service, and that the change requested would enable firemen to tie up an entire crew before their period of service had elapsed, the engineers having just signed a schedule continuing the present fifteen-hour rule.

The Board declared it appeared to them that the article in the Canadian National Railways schedule left it op-

tional with the Company to require the crew to go through to terminal if way work and switching were cut out, and with that understanding they considered there would be no hardship imposed on the Company by altering the rule in question to read twelve instead of fifteen hours. The Board also gave consideration to the fact that employees on the United States railways, where the sixteen-hour law was in effect, in many cases were permitted to book rest before the expiration of that period. By decision of the Board the claim of the employees was therefore sustained.

**Case No. 73.—The Canadian National Railways and The Brotherhood of Locomotive Firemen and Enginemen**

On behalf of the firemen and hostlers of the Canadian National Railways, requests were made for a modification of certain clauses of the schedule, among them being Article 10 of the former Eastern and Western Lines of the Canadian National Railways System schedules. This article reads:

A. After the expiration of twenty hours, firemen on unassigned runs held at turn-around points will be paid minimum passenger rates for each hour up to eight hours, and after that at the same rate for the last eight hours of each succeeding twenty-four hours so held. This clause not to be operative if due to blockade.

The employees requested that this should read "After the expiration of sixteen hours...." They contended that the Company should be in a position to regulate traffic so that it would not be necessary to hold firemen on unassigned runs at terminals away from home longer than sixteen hours. They claimed that wages had not been increased commensurate with the increased cost of living and that a fireman was compelled practically to maintain two homes, one at each end of the division; that no additional allowances were made to cover expenses when they were held away from the home terminals.

The Railways contended that no hardship existed under the present rule as the contended conditions of the schedule were favourable to the men and the

present rule imposed a penalty on the Company sufficient to prevent any undue detention of men away from home. It was also pointed out that engineers were subject to the same condition and had not requested the change.

The Board did not render a decision on this point but, instead, sent the following communication to both parties:

The Board has given full consideration to the claim submitted on behalf of the Brotherhood of Locomotive Firemen and Enginemen that the away-from-home terminal pay exemption period for firemen be reduced from twenty to sixteen hours.

It was decided that, rather than that the Board should render a decision on the question at the present time, it should be referred back to the parties for further conference with regard thereto.

This action is taken by the Board for the reason that, since the agreement was reached to refer the matter to the Board, there has been issued Supplement No. 24\* to General Order No. 27 of the Director General, United States Railroad Administration, in which the away-from-home terminal and other conditions are dealt with. The Board, naturally, does not desire to take any action which might in any way be regarded as prejudicial to the rights of either of the parties directly concerned, or others, to negotiate mutual understandings with respect to such questions as that at issue or other questions which might be similarly affected.

**Case No. 74.—Canadian National Railways (Eastern Lines) and The Brotherhood of Railroad Trainmen**

A conductor was dismissed from the Canadian National Railways on the ground of making false statements at an investigation into the cause of the derailment of the train. The employees

held in accordance with the schedule rule in effect at the time of the conductor's dismissal, which reads:

Trainmen will not be suspended or dismissed until after investigation, except that they may, however, be held off for such investigation not exceeding five days, and may have the assistance of a fellow employee in stating their case.

They contended that inasmuch as the

\*Supplement No. 24 is reproduced elsewhere in this issue.

Railway failed to abide by the contract made with the men, the dismissed conductor should be reinstated to his former position with full seniority rights and pay during the time he was out of service. The Company contended that the conductor's dismissal was justified after proof had been obtained that the statements he had made at the investigations were false and that the case was properly investigated under the rules.

It was stated by the Board that this case had origin in circumstances arising prior to the date of the agreement constituting the Board, but that the parties to the dispute, having agreed that it should be heard and decided by the Board, the Board had therefore decided to hear the case. It developed that the case had been taken up by the Order of Railway Conductors and disposed of to the satisfaction of its local representa-

tives, and that it was then revived by the Brotherhood of Railroad Trainmen, the dismissed employee being a member of both organizations. The Board declared that the men's claim was entirely based on the position that there was no proper compliance with the provisions of the schedule in effect at the time, with respect to investigation of cases affecting suspension or dismissal of employees. The Board pointed out that the schedule rule with respect to such cases was not definite in its provisions. It found, however, that the superintendent investigated the case in accordance with the existing practice, and evidence was submitted by the Company to show that it was carried out in a manner considered satisfactory by the local representatives of the two organizations. By a decision of the Board the contention of the Company was therefore sustained.

### STRIKES AND LOCKOUTS IN CANADA DURING MARCH, 1920

**F**OURTEEN strikes, involving about 3,328 employees, were reported as having commenced during March. There were in existence at some time or other during the month 22 strikes, involving about 3,789 workpeople. The total time loss on account of industrial disputes was estimated at 43,169 working days, as compared with 49,939 in February, and 71,704 in March, 1919. The time loss occasioned by the 14 strikes which began in March was 30,682 working days, while a loss of 12,487 is charged to the 8 strikes that commenced prior to March. Termination was reported in the case of one dispute which commenced prior to

March. Five of the disputes commencing during March terminated during the month, leaving the following 16 strikes, affecting approximately 2,503 workpeople on record on March 31; coal miners, Bellevue, Blairmore, Canmore, Coleman and Hillcrest; miners, South Minto, miners and millmen, Cobalt; pottery workers, St. John's; painters, paperhangers and decorators, London; machinists, St. Hyacinthe and St. John; moulders, Brantford; moulders and core-makers, Sherbrooke; moulders and patternmakers, Toronto; structural iron workers, Hamilton, and film revisors and shippers at Toronto.

#### Disputes by Industries

The following is a review of the disputes by industries in the order in which they appear in the statistical table. A brief summary is given of the more important strikes.

**LUMBERING.**—The strike of loggers at Port Alberni was the only one in this group during March. This strike com-

menced on January 20 for recognition of the One Big Union, and resulted in but partial curtailment of operations. From the last report received by the Department the strike terminated about the end of March. During the latter part of the strike, the company employed Japanese labour and other labour not connected with the One Big Union.

**MINES, SMELTERS, QUARRIES, CLAY-PRODUCTS, ETC.**—This group was foremost in strike activity during March with a total of 10 strikes, involving 2,681 employees and an approximate time loss of 29,250 working days. Five of the strikes commencing in March were as a result of One Big Union hostility to the enforcement of Clause 3, Order No. 141 of the Director of Coal Operations, Mr. W. A. Armstrong. (See *LABOUR GAZETTE*, January, 1920, p. 75 and pp. 72-3.) As a result of the reorganizing of District 18 by the United Mine Workers of America and the subsequent agreement between that organization and the coal operators, a wage increase of 14 per cent was established by Order 141. This Order also provided that such increase was limited to members of the United Mine Workers of America who signed the checkoff to that body. Further, to offset the active hostility of the One Big Union, it was decided to guarantee the closed shop privilege to United Mine Workers of America by enforcing the compulsory check-off clause so that the mines were closed to One Big Union Labour. On March 9, the Director of Coal Operations issued the first "closed shop" order against the Bellevue mine. It resulted in a strike of the One Big Union faction at that place. The next day, the Greenhill mine at Blairmore, under the same firm, went on a sympathetic strike in protest against the order. On March 22, the "closed shop" was put in effect in the mines at Canmore, Coleman and Hillcrest, and all but United Mine Workers of America members resorted to strike action. In all, about 1,800 miners are out on strike at these mines, but the last reports indicated a gradual increase in the working complement. Strong picketting by the One Big Union featured the disturbance at Bellevue, but a patrol of Royal Canadian Mounted Police has been stationed in that district. A strike of two day's duration commenced on March 1 at Rossland following the action of the Consolidated Mining and Smelting Company in curtailing operations and laying off 114 men. This action was interpreted by

the One Big Union local as discrimination. However, as a result of direct negotiations, work was resumed. Fifty miners at the McKinley-Darragh mine, Cobalt, went on strike March 22, because of alleged discrimination in the discharge of five employees. A strike of asbestos miners at Thetford Mines involved 425 employees for three days. Settlement was effected by a wage increase of 10 cents per hour and work was resumed on March 6. The strike of the metalliferous miners at Kimberley which commenced on September 12, for a flat increase of \$1 per day and which originally involved 250 employees, terminated on March 1. This strike was officially called off by the One Big Union when their leaders acknowledged that it was no longer effective as a result of the replacing of the strikers by other workers. Those of the miners who returned to the company's employ accepted the company's terms. The strike of the South Minto miners remained unterminated at the end of the month.

**BUILDING AND CONSTRUCTION.**—Painters, paperhangers and decorators in London went on strike on March 1, for a 75 cents per hour wage schedule. The former rate was from 50 to 65 cents per hour. About 65 employees are involved and the strike was unterminated at the end of the month.

**METALS, MACHINERY AND CONVEYANCES.**—A strike of 160 structural iron workers in Hamilton was the largest strike in this industry during the month. The men quit work on March 22, following a demand for increased wages and a shorter working day. The existing rate of wages was 37½ to 50 cents per hour and the increase demanded was 50 cents to 80 cents per hour, together with an eight-hour day. There was a conference between the employers and employees about a week previous to the strike and the employers claim to have made an offer of increased wages attendant upon certain industrial conditions. The strike was unterminated at the end of the month. Forty-two machinists in St. Hyacinthe went on

strike on March 25 for a wage increase of 25 per cent. This strike was also un-terminated. The machinists' strike at St. John which commenced on January 26 remained un-terminated. The strikes of moulders at Sherbrooke and Toronto and the lockout of moulders at Brantford were also un-terminated at the end of the month.

**FOODS, LIQUORS AND TOBACCO.**—Cigarmakers and packers in London to the number of 400 and in Montreal to the number of 65 went on strike during the month. Both strikes were of brief duration. In London, the employees demanded a wage increase on piece work of \$5 per thousand. The firm offered \$3 per thousand on fancy shapes, \$2 on ordinary hand work and a 10 per cent increase to packers. This offer was accepted by the employees. In Montreal, employees went on strike

because of the employment of a non-union worker. The firm contended it was operating an open shop and after a week's duration work was resumed.

**TRANSPORTATION.**—Teamsters in London declared a strike on March 1 for a wage increase of \$15 per month over the existing rate of \$75 per month. About 65 employees were involved in the strike. Work was resumed on March 15, the employees returning to work pending the award of a Board of Conciliation.

**MISCELLANEOUS.**—The strike of film revisors and shippers in the motion picture agencies in Toronto which commenced on February 26 for increased wages, still continues. About 40 employees are involved, and it is alleged that the employers refuse to negotiate with the union.

### STRIKES AND LOCKOUTS DURING MARCH, 1920

Industry or occupation	Particulars	No. of employees affected	Time lost in working days
<b>Strikes commencing prior to March, 1920</b>			
<b>LUMBERING.</b> —			
Loggers, Port Alberni, B.C. ....	Commenced January 20. For union recognition. Information received in the Department indicates this strike terminated towards the end of the month	70	1,890
<b>MINES, SMELTERS, QUARRIES, CLAY PRODUCTS, ETC.</b> —			
Miners, Kimberley, B.C. ....	Commenced September 12. For increased wages. Strikers' places were filled and strike called off March 1.	250	.....
Miners, South Minto, N.B. ....	Commenced December 6. For increased wages and improved working conditions. Un-terminated.	150	4,050
Pottery workers, St. John's, Que. ....	Commenced November, 1913. Against a reduction in wages. Un-terminated.	38	.....
<b>METALS, MACHINERY AND CONVEYANCES.</b> —			
Machinists, St. John, N.B. ....	Commenced January 26. For increased wages and shorter hours. Un-terminated.	70	1,890
Moulders, Brantford, Ont. ....	Locked out May 1, 1919. Demand for increased wages. Un-terminated.	5	135
Moulders and coremakers, Sherbrooke, Que	Commenced September 23. For increased wages. Un-terminated.	36	1,012
Moulders and patternmakers, Toronto, Ont.	Commenced May 1, 1919. For increased wages and shorter hours. Un-terminated.	90	2,430

STRIKES AND LOCKOUTS DURING MARCH, 1920—*Continued*

Industry or occupation	Particulars	No. of employees affected	Time loss in working days
<b>METALS, MACHINERY AND CONVEYANCES:—</b>			
<i>—Cont.</i>			
Shipbuilders, Sorel, Que.....	Commenced August 12. For increased wages and shorter hours. Information received in the Department states the firm concerned has gone into liquidation.		
<b>MISCELLANEOUS.—</b>			
Film revisors and shippers, Toronto, Ont...	Commenced February 26. For increased wages. Terminated..	40	1,080
<b>Strikes commencing during March, 1920</b>			
<b>MINES, SMELTERS, QUARRIES, CLAY PRODUCTS, ETC.—</b>			
Asbestos miners, Thetford Mines, Que....	Commenced March 3. For increased wages. Settled by negotiation; work resumed March 6.	425	1,063
Coal miners, Bellevue, Alta. ....	Commenced March 9. Enforcing of "closed shop" clause in Order No. 141, requiring affiliation with U.M.W. of A., resulted in O.B.U. miners striking. Terminated.	320	6,400
Coal miners, Blairmore, Alta. ....	Commenced March 10. In sympathy with Bellevue miners' strike. Terminated.	550	9,900
Coal miners, Canmore, Alta. ....	Commenced March 22. O.B.U. members strike against "closed shop" order. Terminated.	200	1,800
Coal miners, Coleman, Alta.....	Commenced March 22. O.B.U. members strike against "closed shop" order. Terminated.	375	3,375
Coal miners, Hillcrest, Alta. ....	Commenced March 29. O.B.U. members strike against "closed shop" order. Terminated.	350	1,050
Miners, Rossland, B.C. ....	Commenced March 1. Owing to a curtailment in operations when 114 men were laid off. Settled by negotiations; work resumed March 3.	261	522
Miners and millmen, Cobalt, Ont.....	Commenced March 22. Owing to dismissal of employees. Terminated.	50	450
<b>BUILDING AND CONSTRUCTION.—</b>			
Painters, paperhangers and decorators, London, Ont.	Commenced March 1. For increased wages. Terminated.....	65	1,755
<b>METALS, MACHINERY AND CONVEYANCES.—</b>			
Machinists, St. Hyacinthe, Que.....	Commenced March 25. For increased wages. Terminated.....	42	252
Structural iron workers, Hamilton, Ont..	Commenced March 22. For increased wages and shorter hours. Terminated.	160	1,440
<b>FOODS, LIQUORS AND TOBACCO—</b>			
Cigarmakers, London, Ont.....	Commence March 12. Against employment of particular persons. Settled by negotiations; work resumed March 30.	400	800
Cigarmakers, Montreal, Que.....	Commenced March 22. For increased wages. Settled by negotiations; work resumed March 16.	65	455
<b>TRANSPORTATION—</b>			
Teamsters, London, Ont.....	Commenced March 1. For increased wages. Men returned to work pending the award of a Conciliation Board. Work resumed March 15.	65	780

## STRIKES AND LOCKOUTS IN THE UNITED KINGDOM DURING FEBRUARY, 1920

**T**HE following details with regard to strikes and lockouts in the United Kingdom during February, 1920, based on returns from employers and workpeople, are taken from the March issue of the *British Labour Gazette*.

**NUMBER, MAGNITUDE AND DURATION.**—The number of trade disputes beginning in February was 122, as compared with 86 in the previous month, and 62 in February, 1919. In these new disputes over 82,000 workpeople were directly and over 5,000 workpeople indirectly involved (i. e., thrown out of work at the establishments where the disputes occurred, though not themselves parties to the disputes.) In addition nearly 23,000 workpeople were involved, either directly or indirectly, in 47 disputes which began before February, and were still in progress at the beginning of that month. The total number of disputes in progress in February was thus 169, involving about 110,000 workpeople, as compared with about 119,000 workpeople involved in disputes in progress in January, 1920; and about 280,000 in February, 1919.

Of the 450,000 working days lost in February by all disputes in progress, about 157,000 were lost by disputes which began before February, and were still in progress at the beginning of that month, and about 293,000 by disputes which began in the month.

**CAUSES.**—Of the 122 new disputes, 56, directly involving over 31,000 workpeople, arose on demands for advances in wages; 21, directly involving about 7,000 workpeople, on other wages questions; 19, directly involving over 36,000 workpeople, on questions respecting the employment of particular classes of persons; 13, directly involving about 3,000 workpeople, on details of working arrangements; 7, directly involving about 2,000 workpeople on questions of trade union principle; and 6, directly involving about 2,000 workpeople, on other questions.

**RESULTS.**—During the month settlements were effected in the case of 60 new disputes, directly involving about 53,000 workpeople, and 16 old disputes, directly involving nearly 2,000 workpeople. Of these new and old disputes, 24, directly involving 35,000 workpeople, were settled in favour of the workpeople; 21, directly involving 5,000 workpeople, in favour of the employers; and 31, directly involving over 15,000 workpeople, were compromised. In the case of 28 other disputes, directly involving over 25,000 workpeople, work was resumed pending negotiations.

The following table classifies these disputes by groups of trades and indicates the number of workpeople involved (whether directly or indirectly) at the establishments concerned, and the approximate time lost during February in all the disputes in progress:

Groups of Trades	Number of Disputes			Number of workpeople involved in all disputes in February.	Aggregate loss of working days during February.
	Started before 1st February.	Started in February.	Total.		
Building.....	9	17	26	7,800	63,000
Mining and Quarrying....	6	26	32	56,700	121,000
Metal, Engineering and Shipbuilding.....	12	23	35	32,100	101,000
Textile and Clothing.....	5	16	21	5,700	57,000
Other Trades....	15	40	55	8,000	108,000
<b>Total, February, 1920.....</b>	<b>47</b>	<b>122</b>	<b>169</b>	<b>110,300</b>	<b>450,000</b>
<b>Total, January, 1920.....</b>	<b>56</b>	<b>86</b>	<b>142</b>	<b>118,900</b>	<b>1,793,000</b>
<b>Total, February, 1919.....</b>	<b>66</b>	<b>62</b>	<b>128</b>	<b>280,000</b>	<b>2,316,000</b>

## MINING INDUSTRY IN ONTARIO IN 1918

FULL details of the mining industry in Ontario during the year 1918 are given in Part I of the annual report of the Provincial Bureau of Mines, recently issued.\* In that year the production of the Province reached its culminating point in value, this fact being attributed to the great demand for nickel, copper, iron pyrites and other minerals required for war purposes, in which Ontario is specially rich. The increased value of production was due partly to higher prices prevailing in the year under review, but in the metal and metal bearing products at least the gain was largely in actual production. The total value of the output, metallic and non-metallic, during 1918, was valued at \$80,308,972, or 11.3 per cent in excess of that of 1917, which in turn showed a gain of 10.3 per cent over the value of production in 1916.

In the metallic section the copper and nickel group came first both in the value of the product and in the number of employees, the average number of men employed during the year in the production of copper, copper in matte and nickel in matte being 3,735, out of a total for the whole metallic section of 10,496. The large increase in the production of nickel is attributed to the fact that a large new nickel refinery started operations about the middle of the year at Port Colborne. The silver mines came next in point of employment, with 2,539 men as the year's average, followed by the gold mines with 2,128 men. Silver showed a slight decrease in production but a gain in value, while gold showed a small decline both in volume and value.

In the non-metallic section the yearly average number of men employed was 5,730, of which number 1,027 were en-

gaged in the production of fancy pressed and common brick, 631 in the quarrying of building stone, and 621 in production of iron pyrites. Natural gas employed an average of 872 men, notwithstanding a fall of one-third in production due mainly to the breakdown of the supply from the Kent field.

The statistics for the metallic and non-metallic sections of the mining industry are summarized in the following table:

	Value	Number of employees	Wages
Metallic .....	\$66,178,059	10,496	\$15,881,866
Non-Metallic.....	14,130,913	5,730	4,816,253
	\$80,308,972	16,226	\$20,698,119

Thirty-two fatalities caused by 27 accidents were recorded in the mines, metallurgical works and quarries of Ontario during 1918, being in the proportion of 2.10 per 1,000 workers employed. Of these, ten accidents resulting in eleven deaths occurred underground; four men were killed above ground at the mines, twelve at the metallurgical works and five at the quarries. Of the fifteen deaths in or around mines, seven occurred in the nickel-copper mines, the highest proportion at the mines being due to explosives. Twenty of the twenty-seven men killed in mining and metallurgical work were aliens. The five quarry workers killed were all English-speaking.

When the Armistice was signed, mining operations began to decline, and it is forecasted in this report that the figures for 1919 would afford a decided contrast to those of 1918.

\*Twenty-eighth annual report of the Ontario Bureau of Mines, 1919, being Vol. XXVIII; Part I. Toronto, 1919.

## THE CO-OPERATIVE INVESTMENT TRUST OF IMPERIAL OIL, LIMITED

**I**MPERIAL Oil, Limited, has provided means whereby its employees may become shareholders in the Company on liberal terms by the establishment of the Co-operative Investment Trust of Imperial Oil, Limited. The provisions of the Trust were considered and approved by the joint works councils of the Company's refineries at Sarnia, Halifax, Montreal East, Regina and Ioco, and by the councils of the marketing divisions at Calgary, Edmonton, Vancouver, Toronto and Hamilton, as well as by other committees of employees.

The Trust will be administered by a board of five trustees selected by the Board of Directors, three of whom may be officers or directors, and two employees who are depositors in the Trust, but not officers or directors. Any permanent employee of the Company, or a subsidiary, whose continuous service exceeds one year, may participate in the Trust by regularly depositing therein during any period of twelve consecutive months an amount not to exceed twenty-five per cent of his annual compensation from the Company. The deposits shall be in equal instalments payable monthly or semi-monthly on the dates of payment of such compensation, or on such other dates as may be fixed by the trustees. The Company will deposit concurrently to the credit of such employee a sum equal to fifty per cent of the employee's deposits. The proceeds of these joint deposits will be invested in the stock of the Company. All dividends upon stock so purchased shall be invested in like manner. Any employee who has been a depositor for five years shall withdraw from the Trust the full amount of stock which has been purchased and placed to his credit from his own deposits, from those of the Company, and from dividends and withdrawal accruals as explained below; and should there be any uninvested balance

in his account it will be paid in cash. Upon withdrawal from the Trust at the end of a five-year period the employee may immediately again become a participant.

An employee who leaves the service of the Company shall cease to be a depositor, and he shall immediately withdraw from the Trust as follows: If he has been a depositor for two years or less, he will receive, at the option of the trustees, either in cash or in stock at the average cost thereof as shown by his account, the full amount he has deposited, with interest thereon at the rate of six per cent compounded annually. If he has been a depositor for more than two years and less than five years he will receive in stock at the average cost thereof as shown by his account, the full amount he has deposited, with interest thereon at the rate of six per cent, compounded annually. Any balance amounting to less than one share of stock shall be paid in cash.

An employee who remains in the service of the Company may, if he so elects, withdraw from the Trust, but he will not be eligible to again participate for a period of one year. Prior to withdrawal from the Trust the trustees will hold title to all stock purchased on account of employees and shall have full power to vote on the stock. Failure of any employee to make payments when due may, at the option of the trustees, work a forfeiture of any right to the stock, but the employee shall receive in cash or in stock, if the trustees shall decide to terminate his participation in the Trust, the amount he has actually paid in with interest thereon at the rate of six per cent, compounded annually. Any further sums held to the credit of a withdrawing employee will be credited proportionately to the accounts of the remaining employee depositors. The Company, however, desires to have all employees share in its earnings to the

greatest extent possible, and the trustees will assist an employee to prevent forfeiture of his privileges. Upon the application of an employee the trustees will, if in their discretion the adverse conditions warrant it, either make a loan to the depositor or suspend for a definite period his deposits. A depositor who retires under the provisions of the Annuity Plan of the Company will receive the full amount of stock which has been purchased and placed to his credit from his deposits, those of the Company, dividends, and withdrawal accruals; and any uninvested balance in his account will be paid in cash. In the case of the death of an employee-depositor his estate or such beneficiaries as he may designate, will receive the full amount of stock which has been purchased and placed to his credit from his deposits, those of the Company, dividends, and withdrawal accruals; and any uninvested balance in his account will be paid in cash. The first payments in the Trust were made on April 15, and it was stated that a large number of employees wished to subscribe the maximum amount of 25 per cent of their salaries. The price at which the stock is from time to time sold by the Company to the trustees will be fixed by the directors on January first of each year and shall govern all transactions during that year. For the year 1920 the price has been fixed at \$75 per share.

nate, will receive the full amount of stock which has been purchased and placed to his credit from his deposits, those of the Company, dividends, and withdrawal accruals; and any uninvested balance in his account will be paid in cash. The first payments in the Trust were made on April 15, and it was stated that a large number of employees wished to subscribe the maximum amount of 25 per cent of their salaries. The price at which the stock is from time to time sold by the Company to the trustees will be fixed by the directors on January first of each year and shall govern all transactions during that year. For the year 1920 the price has been fixed at \$75 per share.

### SPECIAL TRADE UNION CONGRESS IN ENGLAND

A SPECIAL Trade Union Congress, attended by delegates representing nearly five million British workers, was held in London, England, on March 11, for the purpose of considering what action to take in view of the refusal of the Government to carry out the recommendations of the Sankey Commission for the nationalization of the coal mines.\* This meeting which had been adjourned from December 10, was decided upon at the Annual Trades Union Congress which met at Glasgow last September, as mentioned in the October issue of the LABOUR GAZETTE. A discussion took place on the question whether to enforce the demand for nationalization by direct action in the form of a general strike, or to seek to attain this object through political methods. J. R. Clynes, M.P., president of the National Union of General Workers, spoke against a general strike for a political object on the ground that the Government could immediately put labour in the wrong by submitting the

whole question to the country. He said that if a general strike was declared the Government would declare a general election "under conditions with our own class rent in twain and every other class determined to resist this aggressive step on the part of labour." J. H. Thomas, M.P., said that a general strike does not and cannot mean a mere stoppage of work—it means the outbreak of civil war. The men who found themselves without wages and without food would attempt to seize food wherever it could be found. The Government would use its armed forces against this looting. There would be a contest of violence of which no man could tell the end. Tom Shaw, M.P., and others also opposed direct action. S. Mills, labour candidate for Dartford, suggested that the issue should not be decided there, but by a ballot of the Unions. Frank Hodges, of the South Wales Miners, who, with the exception of Tom Mann, was the only advocate of direct action, while admitting all the objections raised to the course he proposed, based his argument on the allegation that the miners had been made the victims of a gigantic political fraud by the Govern-

\*See LABOUR GAZETTE; April, 1919, p. 453, and July, 1919, p. 802.

ment, which deluded them into the belief that the findings of the Sankey Commission would be accepted. He warned the labour movement that they were simply swimming in a vortex when they cried "Wages, wages, wages," all the time, instead of dealing radically with

the whole problem of the relations between capital and labour.

A vote taken on the question of direct action resulted in a majority of about 2,750,000 against direct action, about 1,000,000 being in favour of it, and 3,750,000 against.

### THE BUILDING TRADES GUILD IN MANCHESTER

A UNIQUE experiment in industrial undertakings was inaugurated recently at Manchester, England, when the Housing Committee of the City Corporation accepted the offer of a newly-created Building Guild, composed of various unions of building tradesmen in Manchester, to erect one thousand houses in the suburb of Irlam. The scheme under which the work is to be carried out provides that the municipality as the medium of credit will advance the money for the work, and will receive back the houses when they have been built; while the unions in virtue of their labour monopoly in the building trades will undertake to supply and control the labour required for the undertaking, including not only manual workers but technical and administrative workers as well.

It is agreed that the City of Manchester will pay the cost of the labour employed in the work, plus ten per cent. Labour is made the first charge upon this fund, regular payment being secured to the workers for the full week, irrespective of stoppages of work on account of weather or other causes. The additional ten per cent is applied, first to make good any losses incurred by the full week system; second, to the purchase of plant, such as mortar mills, scaffolding, etc; and third, to the cost of transport. Building materials are to be purchased by the City Council and supplied to the Guild as it was considered safer, at the present experimental stage that the unavoidable difficulties and risks of delay in getting materials could be better dealt with by a public body. In this way is avoided a risk which is not an

essential part of the scheme. The Guild will be represented in all transactions by an executive committee as small as it can be consistently with its representative character, but comprising administrative and technical advisers, and the entire working force is to be subject to the direction and discipline of men in good union standing.

The full week or "all-weather" employment of building tradesmen, an important innovation in the building industry, is fully provided for in the scheme. According to the usual method, in the case of smaller dwellings, workers are employed on both the outside and the inside of the houses at the same time. When wet weather comes the outside workers have to stop, thus losing both work and pay until the return of fine weather. According to the full-week or all-weather method, there is one staff for both inside and outside work. In fine weather the workers are all occupied in building the shells of houses, and in wet weather they are all turned on to inside work on shells that have already been erected. As a result of this there will be a large number of houses in various stages of completion at one time, and it is recognized that this will necessitate a correspondingly large working capital, which the City of Manchester is prepared to advance.

Under the Guild system it is claimed that the worker's position is improved, both directly by payment of regular salary as a working member of the Guild rather than by irregular wages; and indirectly, by a change in status, creating a sense of responsibility on the part of the worker which is relied upon to offset his newly acquired freedom

from service to an employer, and to guarantee a service to the public superior to that rendered under the old system.

The Building Guild in Manchester is attracting widespread notice in Great Britain, and plans are already being made for similar Guilds in adjoining towns, for a group to compose a North-western Building Guild, and even for a National Guild, which would enter into agreements with the Government similar to that between the Corporation and the trade unions of Manchester. The building trade, owing to the relatively small amount of capital required in its operations, is considered specially adapted

to serve as a field for experiment in industrial organization.

Criticisms of the plan centre on the possibility that the Building Guild might fail to complete the work as required, and that unlike private contractors it is not required to furnish financial guarantees as to the quality of the work to be done, or the date of its completion. To this it is replied that private contractors, in spite of any safeguards, cannot in fact guarantee completion, since they do not absolutely control labour, while on the other hand the Building Guild pledges as a security the standing of its members in the community.

## REPORT OF SECOND INDUSTRIAL CONFERENCE OF THE UNITED STATES

THE second industrial conference of the United States has recently issued its report, embodying its final plan for the adjustment of industrial disputes. Three fundamental principles of industrial relations are laid down in the report: That labour is not a commodity, that workers have a right to strike, and that the adjustment of the grievances of any group must be made in co-operation with the other party to the dispute. The following recommendations are made by the conference: Establishment of employee representation in shops or plants; acceptance of the principle of collective bargaining; creation of machinery for settlement of all industrial disputes; establishment of a new system of food marketing and development of co-operative buying and selling of food products to stop speculation and profiteering; the fixing of a minimum wage to give reasonable living conditions; extension of Government machinery to investigate living costs; establishment of "gain-sharing" as opposed to profit-sharing; promotion of the insurance principle and means for converting Liberty Loan savings into some form of annuities; fixing hours of labour on a weekly basis, with preferably 48 hours a

week and a Saturday half-holiday; final determination of hours of labour on the basis of studies of fatigue and the effect of work in a particular calling on the one hand and studies of hours that will give maximum production on the other; prevention of child labour; compulsory education and physical up-building; special safeguards for women in industry as to hours and conditions of work, and equal pay for equal skill and production; better housing; prevention of labour turnover; relief from present economic conditions for Government workers and school teachers.

The conference declares its opposition to profit-sharing as a panacea for labour ills; to restriction of production by labour; to strikes of United States employees or public servants, such as police and firemen; affiliation of policemen and firemen with organizations that use the strike weapon; and to overtime work.

The plan for the adjustment of industrial disputes follows the tentative plan which was outlined in the February issue of the LABOUR GAZETTE, but it has been modified so as to lessen the emphasis on arbitration and to enlarge the scope of voluntary settlement by agreement. The prevention of disputes by arrangement within the industry con-

cerned is recognized as the best method, and the policy of collective bargaining is approved. By this term the conference means negotiations between an employer or an association of employers on the one hand and the employees acting as a group either through a labour union or through some other plan of representation. When such means fail in effecting an agreement, the parties to the dispute may voluntarily submit their differences to a board known as a Regional Adjustment Conference. This board would be composed of four representatives selected by the parties to the dispute and four others chosen by these representatives from within the industry concerned. The latter four would be selected from the employers' panel and from the workers' panel by the representatives of the employers and workers respectively, the panels being constituted by the Secretary of Commerce and the Secretary of Labour after the method outlined in the tentative plan. The chairman would be a government official and would act as a conciliator. If the regional adjustment conference reaches a unanimous agreement, this agreement would have the same effect as if reached by a joint organization in the shop or industry. If the regional

conference fails to agree unanimously, the matter goes under the agreement of submission to the National Industrial Board of Washington, which would be composed of nine members appointed by the President and confirmed by the Senate. Three of the members of the National Industrial Board would be representative of industrial employers, three would be representative of employees, and three, one of whom would be designated chairman, would represent the general public. The voluntary submission to a regional adjustment conference carries with it an agreement by both parties that there shall be no interference with production pending the processes of adjustment. In the case of public utilities the Government agency in control would have two representatives in the adjustment conference. If either or both parties refuse to submit a dispute to a Regional Adjustment Conference the Chairman shall form a regional board of inquiry composed of two employers and two employees engaged in the industry affected, but not parties to the dispute. This Board would have the right, under proper safeguards, to subpoena witnesses and records, and would have the duty to publish its findings as a guide to public opinion.

---

## RAILROAD LABOUR BOARD OF THE UNITED STATES

---

### **Tripartite Board Representing the Railroads, their Employees and the Public**

**A**FTER a period of national control lasting over two years, the railways of the United States were returned to the owners on March 1, the instrument of the transfer being the Railroad Reorganization Act, signed by President Wilson on February 28. The labour section of the Act provides machinery for the settlement of industrial disputes. It follows the plan originally suggested in the bill introduced in the House of Representatives by Representative John J. Esch, chairman of the Interstate

Commerce Committee, and rejects the compulsory anti-strike provisions contained in Senator Cummins' original bill in the Senate. The final bill, which was carried by a vote of 250 to 150, contains, it is claimed, nothing of an anti-strike or compulsory character. It creates a Railroad Labour Board, to hear appeals of the railroads or their employees from the decision of lower adjustment boards when the latter fail to reach a unanimous agreement on matters under dispute; and the decisions of this

Board, so far as the new machinery is concerned, are to be final. There is nothing in the Act, however, regarding compulsory enforcement of the awards of this Railway Labour Board; as Mr. Esch stated in a speech in the House, "it relies for its effect upon the force of public opinion."

The Act makes it the duty of the railroads and their employees to exert every reasonable effort and adopt every available means to avoid any interruption of interstate commerce; boards of adjustment may be established by the parties concerned, but no specific stipulation for the creation of these minor boards is made, and their establishment by the railroads and their employees remains voluntary. The Railway Labour Board, created by the Act, is a tribunal consisting of nine members, three representing labour, three the carriers and three the public. It has power to take jurisdiction over disputes which threaten interference with interstate commerce, with authority to subpoena witnesses and documentary evidence, failure to obey a subpoena of the court being treated as an act of contempt of court.

The members of the Board are to be chosen by the President of the United States from the names submitted to him by the public, the workers, and the railroads, each group nominating not fewer than six men, the President's selections to be subsequently sent to the Senate for confirmation. Each member will receive \$10,000 a year.

In issuing instructions as to the naming of delegates, the Interstate Commerce Commission stated that the unions had been chosen to represent labour because more than 90 per cent of the railway workers were included in their membership. Similarly, the Association of Railway Executives was asked to nominate representatives of the railroad managements and owners, because approximately 95 per cent of the railroad mileage was included in the association. For the purpose of making nominations the labour unions were classified into three groups, arranged according to the

nature of the work performed, and each group is to nominate at least two members, not fewer than six names being thus secured for submission to the President from which to select the three labour representatives on the Railroad Labour Board.

The labour leaders, however, while agreeing on public grounds to co-operate in carrying out the provisions of the Act, definitely placed on record their disagreement with many of its features. A detailed criticism of the measure was published on February 19, while the Bill was still before Congress, indicating the preference of labour for the "Plumb Plan" for railway administration. After the law had been passed a second statement was issued which read in part as follows: "We have not changed our views in regard to this legislation, and therefore do not endorse the law; however, as American citizens, we feel that in the interests of railroad labour there is nothing left for us to do at present except to co-operate with each other in the prompt creation of the machinery provided for in this law."

On March 2, immediately after the railroads had been returned to their owners, President Wilson, setting in motion the new machinery created by the Railroad Reorganization Act, invited the railroad executives and the employees' organizations to name representatives to a bi-partisan conference to consider pending wage disputes, with the hope that a settlement might thus be reached without the necessity of bringing the matters in dispute before the Railroad Labour Board about to be appointed.

At the conference, which was duly held, it was decided to form a joint railroad wage board. The organization of this board was completed on March 22, and it began consideration of the wage demands of some two million workers made in August last and which had since been twice before the President without a settlement being reached. The deliberation of the board, however, early resulted in a deadlock and the railroad representatives insisted that the ques-

tions at issue be passed on to the Railroad Labour Board for settlement. A strike of certain of the unions of railroad workers then took place. As a result of these happenings the formation of the Board was at once proceeded with, and early in April members were appointed as follows: Representing the Public—George W. Hangar, Washington; Henry Hunt, Cincinnati; R. M. Barton, Tennessee. Representing the

Railroads—Horace Baker, J. H. Elliot and W. L. Park. Representing the Employees—Albert Phillips, A. O. Whaiton and James J. Forrester. The headquarters of the Board will be at Chicago.

The first duty of the Board will be to take up the grievances of the railroad employees at present on strike, after which a basis of a general percentage of increases will be considered.

### GERMAN WORKERS' COUNCILS ESTABLISHED

**A**N outline of the draft of the German Workers' Council law, the so-called Exploitation Law, appeared in the LABOUR GAZETTE for December, 1919, at pages 1464-5. The bill constitutes the fulfilment of Article 165 of the German National Constitution of July 31, 1919, which is as follows:

The workers and office employees are qualified to take part with equal rights and in co-operation with the employers in the regulation of wage and labour conditions, as well as in the entire economic development of the productive forces. The organizations on both sides and their agreements are recognized.

The workers and office employees receive legal representation in the Works Councils, as well as in the District Workers' Councils grouped according to economic districts, and in a National Workers' Council, for the purpose of looking after their social and economic interests.

The District Workers' Councils and the National Workers' Council meet together with the representatives of the employers and of other interested groups of people in District Economic Councils and a National Economic Council to carry out their joint economic tasks and to co-operate in putting into effect the socialization laws. The District Economic Councils and the National Economic Council are to be formed in such fashion as to provide for the proper representation therein of all the important trade groups according to their economic and social importance.

Drafts of social and economic laws of fundamental importance are to be submitted by the National Government to the National Economic Council for its opinion before presentation. The National Economic Council itself has the

right to propose such drafts of laws. If the National Government does not agree with it, it nevertheless has the right to present its proposal to the Reichstag with an explanation of its point of view. The National Economic Council may have its proposal represented before the Reichstag by one of its members.

Supervisory and administrative functions may be delegated to the Workers' and Economic Councils within their respective areas.

The development of the Workers' and Economic Councils and the definition of their duties and of their relation to other administrative bodies of a social nature are exclusively national matters.

In January last, the bill in amended form was passed by the Reichstag, despite strenuous opposition both from the Communists and Independent Socialists, who had put forward an alternative scheme based on the Russian or Soviet plan, and also from the Conservative and Capitalistic representatives on the ground of interference with working systems of industry. The new law affects all establishments where more than twenty\* men or women are employed, newspapers alone being excepted from dictation by workers' councils. In the smaller plants the employees elect a steward to confer with the employer on relations with the workers and on the general conduct of the business.

The form of the larger councils is described in the preamble of the new law, as follows:

\*Some reports give the number as five men or women.

In order to protect the interests of the employees, workmen and clerks, against the employer, and to help the employer in carrying out the purpose of his business, councils of management are to be established in all factories which employ at least 20 workpeople. Where there are less than 50 workpeople employed in a factory or other industrial establishment, the workpeople's management council or committee is to consist of three members (or stewards); when between 50 and 100 employees, of five; when between 100 and 200, of six; and one additional representative for every additional 200 workpeople employed up to 1,000. In factories where over 1,000 workpeople are employed, one additional representative on the Council is allowed for every 500 workmen employed up to 6,000, and over that number one workman for every 1,000 employees. No factory council is to contain more than 30 members.

In large factories each shop has its own Council, manual workers and clerical employees electing separate representatives unless they themselves decide otherwise. Each of these councils elects members to represent it on the general council of management, which is elected for a term of one year.

The functions of the Councils are defined as follows:

The Councils are meant to assist by their advice the management of the business so that smooth working and improved economic results may be achieved. In order to prevent friction in the factory or business, to prevent general or partial strikes and to settle disputes between employer and workpeople; to help to introduce any new methods which might lead to increased production, better and more efficient working; to elect a member to represent it on the board of directors or management, which representative, while receiving no remuneration, to have the same authority and position as the other directors possess. . . .

The employer has to summon the Council at least within the week after its election. All subsequent meetings are to be summoned by the chairman who draws up the agenda and presides over the discussion. On the demand of at least one-fourth of the members of the Council the Chairman has to summon a meeting. The meetings of the Councils are to take place as a rule and whenever possible outside working hours. They are not public. The employer takes part not only in those sittings to which he is invited, but also in those which are summoned at his request. The chairmanship of the last mentioned meetings can be offered to

him. The employer is to be informed in due time of any meetings which it is proposed to hold in working hours. A resolution of the Council is only valid when all members have been summoned to attend and half of them do attend. Minutes of all meetings are to be made and signed by the chairman and one other member and copies of the minutes of meetings which the employer attends are to be given to the employer.

The Councillors of any shop or factory may be recalled at any time by a special vote of the General Assembly of its workers. Where the employers are stock companies the Workers' Councils may name two representatives (in some cases only one) to sit on the Board of Directors "to represent the interests and demands of the employees as well as their point of view and desires regarding the organization of the industry. These representatives have a seat and voice in all meetings of the Board of Directors, but cannot represent the firm or receive further compensation than their expenses. They are bound to maintain silence on confidential statements made to them." On the latter point the law, which was strongly criticized by the Socialist groups because it would not allow the delegates to report back to the worker, is as follows:

In order to enable its members to carry out properly its functions, the General Council has the right to demand of the employer that in so far as no injury would be done to the business by so granting the request, he supply it with full information about the contracts he has carried out or has on hand, and the profits and the general activity of the business. In this connection wages and other books are to be produced. Further, the employer has to present each half year to the Joint Council a complete report of the working of the firm. The members of the Joint Council and the workmen's and clerks' councils are bound to preserve the greatest secrecy about the confidential information which the employer gives them.

Whoever publishes unauthorized business or management secrets which become known to him or her as a member of a workmen's or clerks' Council can be fined up to a sum of 1,500 marks or be imprisoned. If the intention

of the person making known any such information was to procure money for himself or for someone else, or to do damage to the employer, imprisonment and a fine as high as 3,000 marks may be inflicted. If there are extenuating circumstances the punishment can be limited to a fine. Prosecution only follows the request of the employer.

Among other features the Act obliges employers to furnish to the Workers' Councils a quarterly report on the general condition of the firm, and in so far as relates to wages, salaries and continuity of labour, to open his books for investigation at any time. Certain industries employing over 500 persons must also present annual reports of profit and loss; except in cases such as banks holding foreign investments, when the Government may suspend the Councils' right of investigation. A discharged employee may appeal to the Councils who may negotiate with the em-

ployer, and if no agreement is reached the case goes to arbitration, the employee retaining his position in the meantime. No employee may be discharged for political, religious or trade union activity.

A clause giving the Councils control over hiring as well as discharging employees was defeated in committee. On the other hand a foreman or department chief may be forced out of his position by the action of the Councils. It is estimated that when the scheme is developed the councillors or stewards throughout Germany will number more than half a million. The only workers who are not definitely affected by its provisions are the members of the learned professions and the merchant marine. The inclusion of agricultural workers is now under consideration.

### THE EIGHT-HOUR DAY ABROAD\*

THE movement for a shorter working day, so prominent in British industry since the signing of the Armistice, has a long history, but its recent rate of progress has rapidly increased, and all industrial nations are now realizing that the old working day has gone forever.

Since the Armistice, general eight-hour laws have been enacted in Czecho-Slovakia, Finland, France, Germany, German-Austria, the Netherlands, Norway, Poland, Portugal, Spain, Sweden and Switzerland, and Bills for the establishment of a general eight-hour day are in draft in Belgium, Italy and Roumania.

Very significant, too, is the draft convention of the International Labour Conference, which lays down the limitation of normal working hours in all industrial undertakings to eight in the day and forty-eight in the week. This limitation is not an actual maximum but a basis subject to wide exceptions for countries in which climatic conditions, the imperfect development of industrial organization or other special circumstances render the industrial efficiency of the workers substantially different. China, Persia and Siam are excluded from the scope of the Convention, Greece and Roumania are allowed a limited period of delay in its application, and special modifications of its provisions are allowed for British India and Japan.

\*Reprinted from "The Month's Work of the Ministry of Labour" [United Kingdom], issue of February, 1920.

This Convention, however, can only be enforced after ratification by each State concerned.

Until recently collective agreements, arbitration awards and the customs of the trade were the common means of limiting working hours in all industrial countries. But the establishment of an eight-hour day by agreement of this kind does not necessarily mean in practice the guarantee of an actual minimum of eight hours of work, but merely the recognition of this basis for the purpose of calculating wages. In accordance with agreements of this type a working week of 48 hours or less was established in a large number of industries in the United States, Belgium, France, Switzerland, and the Commonwealth of Australia. And in Italy, the Netherlands and Spain, the 48-hour week was observed in a few industries.

The legal limitation of hours by explicit enactment is effected by legislation of varying types. The laws may be roughly classified as belonging to four types.

(1) Laws limiting working hours to eight a day, or forty-eight a week, or to an equivalent limitation averaged over a longer period and specifying *in detail* the industries, occupations and categories of workers to which the limitations apply. This method is easier of adoption by those States whose 48-hour week legislation follows upon previous factory or industrial legislation. Thus the New South Wales Act of 1916 finds a scheme ready to hand in the classification of industries under the Industrial Arbitration Act of 1912. The Norwegian Act of 1915, the Czecho-Slovakian eight-hour Act of 1918 and the Dutch Act of 1919 are also of this type.

Laws of this kind are also in force in Switzerland, Uruguay and New Zealand.

(2) Laws laying down the limit of eight hours a day, or forty-eight a week, or an equivalent limitation averaged over a longer period as a *general rule*, but permitting exceptions and relaxations under conditions to be defined by decree or administrative order. As an example of this type of enactment it may be noted that in France a general eight-hour day law was passed in April, 1919, but the application is left to representative bodies for each trade. The principle is, however, laid down that any deviation from the eight-hour day should maintain the equivalent of this normal maximum. Laws of the general type are also in force in Ecuador, Finland, Germany, German-Austria, Panama, Poland, Portugal, Russia and Sweden.

(3) Laws providing for the settlement of disputes over the conditions of employment, including hours, by arbitration and the enforcement of collective agreements or arbitration awards. Arbitration laws have had in view other objects than the mere fixation of hours; in fact it may be said that their chief interest has generally been to secure an adequate minimum wage. But in the case of many of them it is also laid down that the Court of Arbitration or the Wages Boards for the particular trades, in fixing minimum wages, shall also fix the maximum number of hours per week in respect of which such wages or rates should be paid, and these laws have been largely instrumental in securing a 48-hour week. The chief examples of this type of law are to be found in the Arbitration Laws of the Australian Commonwealth and its constituent

States, certain States of the American Union and certain provinces of Canada.

(4) In addition to such general legal limitation of hours as is involved in the types of law mentioned in the three classes above, there are laws which deal only with particular industries, branches of industry, or occupations. Industries which have been singled out for preferential treatment of this kind are mining, industries involving processes in the reduction of ores, continuous process industries, transport and communications services, and certain dangerous trades. Amongst the most recent laws of this kind are those of Denmark (continuous processes) and Italy (railways).

In all laws and decrees, whether general or special, certain exceptions are permitted. In laws of the type of the French eight-hour Act all details as to relaxations and exemptions are left to be supplied by administrative order. In other laws provision has been made for two classes of exception: first, temporary relaxations of the law, and, second, permanent exclusion of some industry,

branch of industry, or class of worker from the law. Provision is generally made for suspension or relaxation of the Act in case of war or other exceptional national emergency. Secondly, provision is nearly always made for work in excess of the normal hours to cope with accidents or to make necessary and urgent repairs. Thirdly, certain provision is usually made for exempting workpeople who are employed upon processes which must be performed before or after the main work. Fourthly, occasional exemption is allowed to workpeople engaged in light or intermittent work, and to those who are required in continuous process industries to work slightly overtime in order to ensure a smooth change-over from one shift to the other. Fifthly, in certain seasonal trades permission may be granted to exceed the normal 48-hour week in their busy season. In all these cases, a limit is usually placed on the number of hours in excess of the normal that may be worked, and some form of authorization is required.

### ANNUAL CONVENTION OF THE NEW BRUNSWICK FEDERATION OF LABOUR

**T**HE annual convention of the New Brunswick Federation of Labour was held at Fredericton on March 10-12, four district councils with six delegates and twenty-four local unions with forty-seven delegates being in attendance.

The constitution was amended to entitle unions to two delegates for the first hundred members or less, with one additional delegate for each additional hundred or majority portion; central bodies, building trades councils, allied trades councils and similar bodies being entitled to two delegates each.

The Federation adopted a resolution calling upon their executive to summon a convention to organize an independent labour party in New Brunswick for political action. Another resolution to express "pleasure at the formation of the Farmers' Organization and cordially inviting the United Farmers to co-operate with the labour movement," was negatived on a division.

Amendments to the Factory Act were recommended, forbidding the employment of children under sixteen; favouring an eight-hour day, without decrease of wages, overtime not to increase work-

ing hours to more than 58½ hours per week; providing eating and dressing rooms in factories, separate toilets for males and females, female inspectors, first aid instructors and inspectors, one competent engineer and one competent fireman on all stationary engines on construction work. A proposal that the administration of the Factory Act be under the jurisdiction of the Workmen's Compensation Board was approved.

The following suggested amendments to the Workmen's Compensation Act were approved: Permanent disability compensation to be increased from \$1,500 to \$2,500; full medical attendance from date of accident; increase of funeral expenses to \$100; allowances from Compensation Board to widows and their minor children to be increased from \$20 and \$5 a month respectively to \$30 and \$7.50 per month respectively; where a child employed under age is injured or killed, the full cost to be paid by the offending employers, payment being enforced by the Compensation Board; the extension of the act to include widows and orphans.

Proposals were approved that a Provincial department of labour be created in New Brunswick, its duties to include taking over and maintaining the employment service established by the Federal Government, the Federal offer to pay one-half the cost of maintaining the said service being accepted; that the administration of all labour laws be more centralized;\* that the local and the Dominion Governments be shown the urgent necessity of taking over and controlling all necessities of life to prevent further exploitation of the people; that the Provincial Government appoint representatives of the workers on all public boards. Private fee-charging employment agencies were condemned.

The Federation went on record as favouring the Proportional Repre-

sentation method for Provincial elections, and recommended that Moncton have two members instead of one; and that absent electors be afforded an opportunity to vote at elections.

A resolution was passed favouring the establishment of Rochdale Co-operative societies where possible, and that all available capital held by organized labour be invested in such a movement; that the co-operative principles of the owning and controlling of labour's production by labour be accepted as the basis of future propaganda; affirming that "the Rochdale co-operative method is the surest, safest, quickest and most equitable way to secure full control of production by labour," and urging all organized labour to promote and extend the movement by fully supporting co-operative industry. In the discussion it was stated that the co-operative store at Moncton pays from 5 to 6 per cent on the investment; the first half year's profits are left in the business; customers are allowed credit up to the limit of their transferable stock; and no person may hold more than \$400 stock.

A law was demanded to protect tenants from landlords, rent "profiteering" being strongly denounced, the delegates endorsing the "Fair Rent Bill" submitted by the Amalgamated Labour Unions of Moncton, which provides for boards to investigate tenants' complaints. A resolution previously passed by the Moncton Town Council, suggesting that municipal councils be invested with the right to appoint boards with power to fix rentals, was approved by the Federation.

The New Brunswick Teachers' Association was congratulated on their re-organization and urged to affiliate with the Federation of Labour. It was resolved that the Legislature be approached to secure legislation ensuring minimum living wages to school teachers; that school be kept up continuously in every school district, small districts being consolidated where practicable; free school books and supplies up to Grade 8 inclusive were recommended.

\*The Dominion conference to co-ordinate and unify labour laws was expected to meet in April, and a letter from the Premier of New Brunswick was received by President Melanson asking that the Federation name one of the three representatives for the province of New Brunswick.

The Provincial Government was recommended to place further restrictions on the shipment of pulpwood to foreign countries in an unmanufactured state.

Among the other recommendations approved by the Federation were the following:

Mine-owners to instal scales for weighing all coal mined.

The holding of food products in cold storage for more than thirty days to be prohibited.

Establishment of a uniform system of sanitary plumbing based on modern standards, with examination and licensing of master and journeymen plumbers.

The use of the union label on all government printing.

That workers' wages be guaranteed without their having to resort to legal action.

The abolition of all property qualifications for the offices of mayor, alderman or county-councillor.

One-man vehicles should not carry more than twelve passengers.

Members of the families of automobile owners acting as drivers to be registered and licensed.

The American Federation of Labour should be requested to place more organizers in the New Brunswick field.

A resolution criticizing the Government Housing scheme on the ground that the cost of the houses provided was beyond the means of the returned soldiers intended to benefit, and requesting the Provincial Government to offer these homes to the soldiers on such terms as they could afford to accept, was laid over by the delegates. In the discussion of this proposal it was stated that Moncton spent \$150,000 and was asking for \$50,000 more, houses being offered at cost, plus about five per cent.

Officers were elected for the ensuing year, as follows:

President, C. A. Melanson, Moncton (re-elected); First Vice-President, J. E. Tighe, St. John (re-elected); Second Vice-President, J. S. Martin, Chatham; Secretary-Treasurer, G. R. Melvin, St. John (re-elected).

## REPORT OF THE EMPLOYMENT SERVICE OF CANADA FOR FOUR WEEKS' PERIOD, FEBRUARY 1—28, 1920

**R**EPORTS from employment offices to the Dominion Headquarters of the Employment Service of Canada show an increase in the number of placements during the four weeks from February 1 to 28, the number of placements recorded being 22,908 as compared with 21,753 during the preceding four weeks.

During the period under review, February 1 to 28, regular placements were distributed as follows: week ending February 7,—5,481; February 14,—5,691; February 21,—6,132; February 28,—5,604; Casual placements for the same period were: week ending February 7,—1,280; February 14,—1,198; February 21,—1,251; February 28,—1,250. As has been indicated in previous issues of the LABOUR GAZETTE, regular placements refer only to those applicants for whom employ-

ment found is likely to be of more than one week's duration, while casual placements refer to those applicants for whom employment found is likely to be of less than one week's duration.

The following table shows in detail the work of the various offices during the four weeks from February 1 to February 28. During the four weeks' period 37,643 applications and re-applications were registered, while during the same time 28,348 vacancies were notified, an excess of applications over vacancies of 9,295. Corresponding figures for the preceding four weeks' period were 46,866 applications and 26,858 vacancies, an excess of applications over vacancies of 20,008. This would indicate a closer approximation of demand (vacancies) and supply (applications) than during

the preceding four weeks' period. The large excess of applications over vacancies during the preceding period, which was partly seasonable in character and partly a reflection of registration under the Federal Emergency Appropriation; would chiefly account for the large number of unplaced applications at the beginning of the period under review. The number of such unplaced applicants at the beginning of the period was 27,641 as compared with 18,895 unplaced applicants at the beginning of the preceding four weeks' period. At the same time there were 10,039 unfilled vacancies as compared with 12,086 vacancies at the beginning of the preceding period. This would indicate that there was a substantial increase in the number of unplaced applicants and that these appli-

cants were in a less favourable position regarding opportunities for employment than at the beginning of the preceding period, the number of vacancies having decreased.

The accompanying chart shows graphically the number of applications and vacancies registered, as well as the number of placements made for the period of the record. The chart indicates that for the period under review previous periods having been reviewed (in other issues of the LABOUR GAZETTE) there was a decrease in the number of applications registered, taking the period as a whole. On the other hand, the number of vacancies as previously noted shows an increase during the period. There was a corresponding increase in the number of placements made.

# EMPLOYMENT CONDITIONS IN CANADA DURING THE PERIOD FEBRUARY 8-MARCH 6, AS REPORTED BY EMPLOYERS

WEEKLY reports from employers to the Dominion Headquarters of the Employment Service of Canada, Department of Labour, during the four weeks from February 8 to March 6, show little change in the volume of employment afforded by these employers. Practically no change in the volume of employment was reported during three weeks of the period and in the remaining week, namely that of February 21, a slight decrease was recorded. The following chart shows weekly the percentage increase or decrease in the volume of employment

for the full period of the record of March 22, 1919, until March 6, 1920. As formerly the chart presents a series of percentages, each percentage recording the increase or decrease in the volume of employment during the week as compared with the previous week. As the number of firms reporting varies from week to week, no attempt should be made to read the chart as a cumulative record. The chart indicates that the increase which characterized the preceding period, representing as it did recovery from the losses recorded during

the inventory and holiday period, was not found in the period under review. The changes recorded were:

Week ending February 14—an increase of .02 per cent.

Week ending February 21—a decrease of .1 per cent.

Week ending February 28—an increase of .02 per cent.

Week ending March 6—an increase of .04 per cent.

Reports from the various districts indicate that conditions are not the same throughout Canada. The Maritime Provinces reported decreases in the first three weeks of the period with a substantial recovery during the week ending March 6. Quebec registered increases during the first and last weeks of the period and decreases during the remaining weeks. Ontario on the other hand reported increases in every week

with the exception of the first. The Prairie provinces registered substantial decreases each week with the exception of the week ending February 28th. British Columbia reported declines during each week of the period.

Summarizing the returns by industrial groups, Metals, Vehicles, Textiles, Chemicals and Railway Construction recorded the most substantial increases. Building and Construction, Commercial and Mercantile, Glass and Stone Products, Leather and Leather Goods, Food, Drink and Tobacco, Pulp, Paper and Printing, Woodworking, Railway Operation and Miscellaneous registered slight increases, taking the period as a whole, with reductions during individual weeks. Quarrying and Mining registered a decrease, taking the period as a whole with increases during individual weeks. Lumbering registered large decreases during all four weeks representing the closing of bush operations.

---

## REPORTS ON CIVIC EMPLOYMENT IN FIFTEEN CITIES—FEBRUARY, 1920

**R**EPORTS from 15 cities showing the number of workers temporarily engaged and the wages paid these employees during the month of February showed increases of over 19 per cent both in the number of workers, and also in the wages paid as compared with the preceding month. In February 10,470 persons were temporarily employed and the payrolls amounted to \$806,046, as compared with 8,776 and an aggregate payroll of \$675,698 in January. In comparison with the same period in

1919, increases of over 28 per cent in the number of workers and of over 59 per cent in the wages paid are indicated, there having been 8,166 employees with an aggregate payroll of \$506,130 in February, 1919.

St. John, Montreal, Ottawa, Winnipeg, Regina, Saskatoon, Calgary and Victoria reported increases in the number of employees both as compared with the preceding month and also with February, 1919. Toronto, London, Moose Jaw, Edmonton and Vancouver registered declines as compared with the re-

turns for January, and increases in comparison with the figures for February of last year. Hamilton and Brandon reported declines in both comparisons.

As to wages, St. John, Montreal, Toronto, Winnipeg, Regina, Saskatoon, Calgary, Edmonton and Victoria showed

increases both as compared with January, 1920, and with February, 1919. Ottawa, Hamilton, London, Brandon, Moose Jaw and Vancouver registered declines as compared with the preceding month, but in comparison with the figures for the same month of last year increases were indicated.

EMPLOYMENT (BOTH CONTRACT AND MUNICIPAL WORK) AFFORDED WORKPEOPLE TEMPORARILY EMPLOYED BY FIFTEEN CITY CORPORATIONS, FEBRUARY 1920, COMPARED WITH JANUARY, 1920, AND WITH FEBRUARY, 1919.

### UNEMPLOYMENT IN TRADE UNIONS AT THE CLOSE OF FEBRUARY, 1920.

THE present article on unemployment among the members of local trade unions deals with unemployment as at the end of February, 1920, and is based on returns received from 1,445 labour organizations with a total membership of 181,405. For all occupations report-

ing, 4.33 per cent of the members were unemployed as compared with 4.28 per cent in January, 1920, and with 5.61 per cent in February, 1919. Unemployment as used here has reference to involuntary idleness due to economic causes. Persons occupied in work other

than their own trades or who are idle because of sickness, or as a direct result of strikes or lockouts, are not considered as unemployed.

The nominal increase in the percentage out of work at the end of February as compared with January was due to there having been a slight increase in unemployment for workers in the transportation, mining, and building and construction groups. The manufacturing industries, however, reported improvement. As compared with returns for February, 1919, a substantial decline in unemployment is recorded, the improvement being chiefly in manufacturing and transportation.

Tables I and II on page 443 summarize the returns by districts and provinces. Quebec alone showed considerably less unemployment than in January, all other districts reporting larger percentages. The improvement in Quebec was chiefly due to better conditions for transportation employees, particularly in the navigation sub-group. Workers in the manufacturing and mechanical industries and in building and construction were also more fully engaged. As compared with February, 1919, Quebec and Ontario recorded improvement, that in the former district being especially marked. In the Maritime Provinces a decline in the number out of work was reported by New Brunswick as compared with January, 1920, and in comparison with the figures for February, 1919, Nova Scotia, Prince Edward Island and New Brunswick showed less unemployment. In the three Prairie Provinces and British Columbia, however, conditions as reported by trade unions were not as good at the end of February as in the preceding month or as in February of last year.

Unemployment in the manufacturing and mechanical industries as reported by 370 unions, having a combined membership of 47,442, was slightly less prevalent than at the end of January and also at the end of February, 1919, 2.49 per cent of the members having been unemployed as compared with 2.96 per cent in the preceding month and with 4.29 per cent in February, 1919. Workers in metals, machinery, and conveyances, textiles, carpets and cordage, clothing, pulp, paper and fibre, wood-working and furniture, glass bottle blowing, jewelry working, and oil refining, reported smaller percentages of unemployment than in January, 1920, and also than in February, 1919. Tradesmen in the food, tobacco and liquors group registered more unemployment than in January or in February, 1919. There was no change in the percentage of unemployment as reported by the printing, publishing and paper goods group in comparison with the figures for the preceding month, but in comparison with February of last year the percentage unemployed was slightly larger. Workers in the leather, boots, shoes, and rubber group, showed a small increase in the percentage out of work as compared with January, but there was a substantial decline as compared with February, 1919. Some short time was reported by unions of boilermakers, boot and shoe workers, meat cutters and butcher workmen, pressmen, typographers, brewery workers and tailors.

Reports from 600 organizations of transportation workers having a total membership of 75,710 indicated that 2.77 per cent of the members were unemployed as compared with 2.73 per cent in January, 1920, and with 4.56 per cent in February, 1919. There was

less unemployment recorded by steam railway employees (whose returns constituted over 72 per cent of the entire group membership reporting) than in either the preceding month or in the corresponding month of last year. Some short time, however, continued to be reported by unions of engineers, firemen, trainmen, railway employees, and maintenance of way employees. Navigation workers and teamsters and chauffeurs also were more fully employed than in January or February, 1919. Longshoremen, however, reported considerable short time. Street and electric railway employees registered a nominal increase in the percentage unemployed as compared with January. In comparison with the figures for 1919, however, there was a pronounced decline in the percentage idle.

In the mining, quarrying and refining of ores group, reports were received from 37 unions with an aggregate membership of 10,832, and show that 4.78 per cent of the members were unemployed as compared with .84 per cent in January, and with 3.79 per cent at the end of February, 1919. Seasonal inactivity for miners and mill and smelter men was accountable for this increase in unemployment. Quarry workers continued to report no members out of work.

The percentage out of work in the building and construction group as reported by 231 organizations having a combined membership of 27,134 was 12.14, as compared with percentages of 11.77 in January, 1920, and 16.44 in February of last year. Seasonal dullness in these trades accounts for the large percentage unemployed, while continued inactivity in shipbuilding in British Columbia also added to the number

unemployed, especially among carpenters and joiners. Bricklayers, masons and plasterers, electrical workers, tile layers, lathers and roofers, and hod carriers and building labourers showed larger percentages unemployed than in January, but the percentages were smaller than in February, 1919. Carpenters and joiners, painters, decorators and paperhangers, plumbers and steamfitters, bridge and structural iron workers, and steam shovel and dredge-men registered less unemployment than in January, 1920, and February, 1919. Granite and stone cutters, however, showed more unemployment than in either month. There was some short time reported by unions of bricklayers, masons and plasterers, carpenters and joiners, electrical workers, painters, decorators and paperhangers, plumbers and steamfitters, and wood, wire and metal lathers.

In the public employment group, as reported by 77 unions having a total membership of 6,557, the percentage out of work was 1.63 as compared with unemployed percentages of .68 in January, and .48 in February, 1919. Civic employees were not as fully engaged as in either of the comparative months.

Unemployment in the group of miscellaneous trades as indicated by returns received from 127 unions with 13,310 members was less prevalent than in January, though the percentage unemployed was slightly larger than in February of last year. Retail clerks as reported by five unions showed no members out of work in January or February, 1920. In February of last year, however, 1.80 per cent of the members were idle. Hotel and restaurant employees showed more unemployment than in the preceding month, but the percentage was somewhat

smaller than in the corresponding month in 1919. Barbers, stationary engineers and firemen and unclassified workers registered smaller percentages out of work than in January. In comparison with the returns for February, 1919, however, there was more unemployment. Musicians and theatre employees showed less activity than in either month.

The percentages reported idle in the different groups of occupations, are indicated in Table III on page 444.

The percentages reported idle in some of the larger industrial centres are indicated in Table IV above.

The tabular statement on pages 446-447 presents the returns in some detail.

UNEMPLOYMENT ON FEBRUARY 28, 1920.

## EMPLOYMENT IN THE BUILDING TRADES DURING FEBRUARY, 1920, AS INDICATED BY BUILDING PERMITS

**E**MPLOYMENT in the building trades as indicated by the value of building permits issued in 54 cities showed an increase during February as compared with the preceding month, the total value of building permits rising from \$3,968,472 in January to \$4,491,034 in February, an increase of \$522,562 or 13.2 per cent. All the provinces except Nova Scotia, New Brunswick and Ontario showed increases in this comparison, those in Alberta, Saskatchewan and British Columbia being substantial.

As compared with the corresponding month in 1919, there was an increase of 124.3 per cent, the value for February 1919, having been \$2,002,044. Nova Scotia and New Brunswick were the only provinces showing declines in this comparison. The increase of \$1,333,439 or 120.5 per cent in Ontario was especially noteworthy. British Columbia, Alberta, Quebec and Saskatchewan, also showed large increases in this comparison.

The returns from the 35 cities originally used in this report are tabulated separately, and show that there was an increase of \$457,002 or 11.8 per cent in the value of building permits issued during February as compared with January. As compared with the figures for February of last year, the substantial increase of \$2,441,807 or 129.6 per cent is indicated.

Of the larger cities Montreal, Winnipeg, Edmonton, and Vancouver showed increases both as compared with the returns for January, 1920, and February, 1919. In Toronto there was a nominal decline as compared with the returns for January, but as compared with the returns for February of last year there was a large increase.

Of the smaller centres, Quebec, Hamilton, Kitchener, Niagara Falls, Woodstock, St. Boniface, Regina, Calgary, New Westminster, and Victoria, showed large increases as compared with both January and February, 1919.

## ESTIMATED COST OF BUILDING WORK AS INDICATED BY BUILDING PERMITS.

## RECENT INDUSTRIAL AGREEMENTS

**T**HE following is a summary of the more important industrial agreements recently received by the Department. While the conclusion of every industrial agreement implies the acceptance, to a greater or less degree, of the principle of collective bargaining, it should not be overlooked that in a number of cases the agreement was reached only after the employees had been on strike. The agreements are arranged by industrial groups.

### Printing and Publishing

**SYDNEY, N.S. — TYPOGRAPHICAL UNION NO. 460 AND LOCAL EMPLOYERS.** Agreement in effect from January 1, 1920 to June 30, 1920.

The minimum scale of wages shall be as follows: Per week—Linotype operators, monotype keyboard operators, monotype casters, intertype operators, and any other slug casting or typesetting machine hereafter used within the jurisdiction of this union, \$27 for day shift and \$30 for night shift. Admen, job printers, and proofreaders, when proofreaders are journeymen printers, and journeymen not otherwise stated in this scale, \$25 for day shift and \$28 for night shift. Machinist operators to receive at least \$3.00 above the scale for operators.

Eight consecutive hours (with the exception of time for lunch) constitute a day's work; a week to consist of six days; the hours for day work to be between 7 a.m. and 6 p.m., and the hours for night work between 7 p.m., and 6 a.m. Overtime, meaning all time over regular day's or night's work, shall be paid for at the rate of time and a half. All work performed on Sundays, Christmas Day, Labour Day, Good Friday, New Year's Day and legal holidays shall be paid for at the rate of double time.

The minimum compensation for apprentices shall be one-quarter of a journeyman's wages for the third year of his apprenticeship, two-fifths for the

fourth year and two-thirds for the fifth year.

**VANCOUVER, B. C. — (NOTE: The agreement between the Vancouver Bookbinders' Union No. 105 and the employing printers, given on page 336 of the March issue of the LABOUR GAZETTE, relates only to the Women's Section of the Union.)**

**VICTORIA, B.C.—INTERNATIONAL BROTHERHOOD OF BOOKBINDERS UNION NO. 147 AND LOCAL EMPLOYERS.** Agreement in effect from March 1, 1920 to December 31, 1920.

The minimum rate of wages shall be \$39 per week from March 1, 1920 to August 31 1920; \$40.50 from September 1, 1920 to December 31, 1920. The minimum rate for journeywomen shall be \$19.50 per week from March 1, 1920 to August 31, 1920, and \$20.25 from September 1, 1920 to December 31, 1920.

Forty-eight hours shall constitute a week's work, and shall be performed between the hours of 7 a.m. and 6 p.m., and 8 a.m. and 12 noon on Saturdays. Overtime shall be all time in excess of the time provided for a day's work, and shall be paid for at the rate of time and one-half the regular compensation for the first four hours, after which and for all time on Sundays, New Year's Day, Good Friday, Victoria Day, Dominion Day, Labour Day, Thanksgiving Day, Christmas Day, and any special day set aside as a public holiday, double time shall be paid.

Boys apprenticed to the bindery trade or any branch thereof shall be paid not less than the following scale: For the first six months 25 per cent, the second six months, 30 per cent, the third six months, 40 per cent, the fourth six months, 50 per cent, the fifth six months, 60 per cent, the sixth six months, 70 per cent, the seventh six months, 80 per cent, the eighth six months, 90 per cent of the minimum scale for journeymen, after which they shall be paid not less than the minimum scale for journeymen.

Women workers shall be paid not less than the following scale: Per week—\$10

to commence, with an increase every six months as follows: End of first six months, \$11; end of first year, \$12; end of one and one-half years, \$13; end of two years, \$15; end of two and one-half years, \$17.50; end of three years, regular scale per week. Apprentices shall not be allowed to work overtime except where journeywomen are working.

VICTORIA, B.C.—INTERNATIONAL TYPOGRAPHICAL UNION NO. 201 AND EMPLOYING BOOK AND JOB PRINTERS.

Seven and one-half hours shall constitute a day's work on morning and evening newspapers. One day shall be the shortest period for which a member shall accept pay. For book and job workers eight hours shall constitute a day's work, except where the chapel and management concerned shall agree on different hours, provided that in no case shall a week's work consist of more than forty-eight hours and that the hours are between 7 a.m. and 6 p.m.

Foremen of morning and evening papers shall receive not less than 75 cents per day over the scale of journeymen. Machinist operators (linotype or monotype) shall receive not less than 50 cents per day over the scale for journeymen. Foremen in job offices employing two or more compositors shall receive not less than 75 cents and assistant foremen 50 cents per day over the scale for journeymen. All members of this union employed in job offices (except apprentices and foremen) shall be paid at the rate of \$40.50 per week. Linotype operators in job shops shall receive \$40.50 per week of forty-five hours day work and \$44.10 night work. Machinists and machinist operators shall receive not less than 50 cents per day over the above scale of wages.

Hours of labour shall be fixed as follows: Morning newspapers, between 6 p.m. and 6 a.m.; day work on evening newspapers or day work on morning newspapers, between 7 a.m. and 5 p.m. The rate for overtime shall be price and one-half. Every member called upon to work more than seven and one-half hours in any one day shall be paid for such excess at the price and a half over his or her ordinary pay. Apprentices

must not be called upon to work overtime if a journeyman is available. Overtime in job offices shall commence from the regular quitting time as fixed by the chapel and shall be charged price and a half. Work after 12 (midnight) by the same staff of men who have worked through the day shall be double price, but a job office may have a double staff of men.

Work on Labour Day and Sunday shall be charged double price. Work on New Year's Day, Twenty-fourth of May, Dominion Day and Thanksgiving Day shall be charged price and one-half, but newspapers and job offices may work a 5-hour day for a full day's pay on the holidays stated at price and one-half.

All members of this union employed on newspapers (except apprentices and those provided for above) shall be paid at the following rates: Day work shall be paid for at the rate of 90 cents per hour or \$6.75 per day of seven and one-half hours. Night work shall be paid for at the rate of 98 cents per hour or \$7.35 per night of seven and one-half hours.

The compensation for apprentices in a newspaper office in the last three years of their time shall be as follows: Night scale: Per week—First six months of the third year, \$17.60; next six months, \$19.60; next six months, \$21.60; next six months, \$23.60; next six months, \$25.60; next six months, 27.60. Day scale: First six months of the third year, \$16.20; next six months, \$18.20; next six months, \$20.20; next six months, \$22.20; next six months, \$24.20; next six months, \$26.20.

Apprentices in a job office in the last three years shall receive the following compensation per week: First six months of the third year, \$16.20; next six months, \$18.20; next six months, \$20.20; next six months, \$22.20; next six months, \$24.20; next six months, \$26.20.

WINNIPEG, MAN. — INTERNATIONAL STEREOTYPERS AND ELECTROTYPERS' UNION NO. 59 AND EMPLOYING ELECTROTYPERS OF WINNIPEG. Agreement in effect October, 1919.

Scale of wages: Per week—Foremen not less than \$40; moulders not less than \$35; finishers not less than \$35; branchmen, \$30.

Apprentice scale: Per week — First year, \$10; second year, \$12; third year, \$15; fourth year, \$20; fifth year, \$25.

All overtime to be paid at the rate of time and one-half for the first three hours, and double time thereafter. Overtime shall be construed to mean any time after regular schedule of hours regardless of number of hours worked in any one week. Proclaimed holidays shall be paid at time and one-half rate; legal holidays double time. Recognized holidays being as follows:—New Year's Day, Good Friday, Victoria Day, Dominion and Thanksgiving Day. No work permitted on Labour Day.

#### Metal Products—Steel Shipbuilding and Repairing

VANCOUVER, B.C. — INTERNATIONAL BROTHERHOOD OF BOILERMAKERS AND IRON SHIP BUILDERS No. 194. Agreement in effect from March 1, 1920 to October 1, 1921.

Forty-four hours shall constitute a week's work, regular working hours for the first five days shall be 8 a.m. to noon, and 1 p.m. to 5 p.m., with Saturdays from 8 a.m. to noon. Overtime computed at double the standard rate will be paid for all time worked during other than the employee's regular assigned hours.

Overtime rate (double time) shall prevail on all Dominion holidays, including the following: New Year's Day, Good Friday, Victoria Day, Dominion Day, Labour Day, Thanksgiving Day and Christmas Day, also Saturday afternoons and Sundays. No work is to be performed on Labour Day, except to preserve life or property. Men working under permit shall receive the minimum rate of pay for the class of work for which permit has been granted.

AMHERST, N.S.—INTERNATIONAL MOULDERS UNION OF N.A. LOCAL No. 253 AND THE AMHERST FOUNDRY COMPANY. Agreement to take effect from March 1, 1920 to March 1, 1921.

Moulding prices on all work coming under the Stone Plate Agreement and now paying 65 per cent on board prices shall receive an advance of 20 points on board prices, making the new price 85 per cent on board prices instead of 65 per cent as previously paid. Board prices on all enamelware shall be adjusted to compare with similar work made by Port Hope Sanitary Manufacturing Company at Port Hope, Ontario, and 35 per cent shall apply to bath tubs, and any additional percentage advance that may be granted on this class of work at Port Hope shall apply to the Amherst Foundry.

The minimum rate for all day work shall be \$6.00 per day. Weekly pay day to become effective after April 1.

**Building and Construction (other than railway)**

VANCOUVER, B.C.—BRIDGE STRUCTURAL ORNAMENTAL AND REINFORCED IRON WORKERS, No. 97 AND LOCAL EMPLOYERS. Agreement to become effective March 1, 1917.

Eight hours shall constitute a day's work for the first five days in the week and four hours on Saturday, in all incorporated towns and cities. On jobs known as jungle jobs, or where shop is in camps outside such towns or cities, eight hours shall constitute a day's work for the first six days of the week from 8 a.m. to 12, and 1 p.m. to 5 p.m.

Wages: Per hour—All structural and ornamental iron work, also the handling, erecting or framing of derricks, travellers and false work, 62½ cents. Reinforced concrete work, 56¼ cents. In either class of work foremen to receive at least \$1 per day more than journeymen. Apprentice scale shall be two-thirds that of journeymen.

Two or more shifts may be employed at the regular scale; but seven and one-half hours will constitute a day's work, and must be paid for at the rate of eight hours, and no shifts shall receive less than eight hours pay. Double time shall be paid to anyone working in more than one shift. When more than one shift is employed, they will be allowed to work 4 hours each on Saturday. Saturday afternoons, Sundays, Good Friday, May 24, July 1, Labour Day, Thanksgiving Day, Christmas Day and New Year's Day are observed as holidays.

SAULT STE. MARIE, ONT. — BUILDERS' EXCHANGE AND THE BRICKLAYERS' AND MASONS' INTERNATIONAL UNION No. 16. Agreement in effect from February 1, 1920 to January 31, 1921.

The minimum wage rate for bricklayers and masons shall be \$1.15 per hour, subject to the following clause; wherever and whenever a foreman is employed the rate for such shall not be

less than 10 cents above the regular minimum rate to bricklayers and masons.

Eight hours shall constitute a day's work between the hours of 8 a.m. and noon, and 1 p.m. and 5 p.m., unless it is mutually agreed to work from 12.30 p.m. until 4.30 p.m. Time worked after the regular hours (except Sundays and holidays) shall be regular overtime, and workmen shall be paid at the rate of time and one-half. For time worked on Sundays or holidays the workmen shall be paid at double rate.

Regular holidays shall be Dominion Day, Labour Day and Christmas Day.

All questions or differences arising between the parties to this agreement shall be first referred to a joint committee of the said parties, said committee to be composed only of practical men of the bricklaying or mason trade.

TORONTO, ONT.—MASONS' SECTION BUILDERS' EXCHANGE AND BRICKLAYERS' UNION No. 2 AND STONE MASONS' UNION No. 26. Agreement to take effect from January 1, 1920 to December 31, 1920.

The wages of a bricklayer and stonemason shall be 90 cents per hour from January 1 to March 31, and \$1 per hour from April 1 for the balance of the term of this agreement.

Eight hours shall constitute the time for a day or night shift; one hour extra for meals midway in each shift. Overtime to be paid at the rate of time and one-half. All work done after noon on Saturday, also Sunday, New Year's Day, Victoria Day, Dominion Day, Labour Day, Christmas Day, also on the day of election of members to the Provincial or Federal Parliament, shall be paid at the rate of double time.

A joint Arbitration Committee, consisting of three members from Unions Nos. 2 and 26, and three members from the Masons' Section and General Contractors of the Exchange shall be appointed forthwith and shall meet at least once in every three months.

**Local Transportation—Electric Tramways**

SHERBROOKE, QUE.—RAILWAY AND POWER COMPANY AND ITS CAR OPER-

ATORS. Agreement to take effect February 1, 1920.

Scale of wages: Per hour—First class beginners, 35 cents; second class (after 12 months' service,) 37 cents; third class (after 5 years' service), 39 cents. All rates to be increased one cent per hour as soon as the revenue for a month averages \$200 per day. Operators will be paid for platform time only—9 hours per day starting from 6 a.m. to 6.10 a.m. and finishing from 11.50 p.m. to 12.10 a.m. according to shift. No overtime within these hours. All extra time outside these hours will be paid for at same rate.

Shifts: (1) 6 a.m. to 11 a.m. and 2 p.m. to 6 p.m.; (2) 11 a.m. to 2 p.m. and 6 p.m. to 12 p.m.

These shifts will vary a few minutes, depending on the different routes, and will change every Sunday.

#### Public Service—Municipal Employment

EDMONTON, ALTA.—Schedule of wages and hours for the several classes of labour employed on city work, same to apply to such trades as are not governed by the agreements entered into direct by the local unions and the city.

Overtime shall be paid for at the rate of time and one-half up to midnight except in the case of structural bridge and ornamental iron workers, who are to be paid double time for all overtime work. On Sundays and all holidays and on Saturdays from noon, all organized trades are to be paid double time.

Machinists.—When one shift is employed, the starting time shall not be earlier than 8 o'clock a.m. and not later than 9 o'clock a.m. Each shift shall be allowed 20 minutes for lunch and be

paid for same, lunch to be eaten in the fifth hour of each shift. Overtime shall be paid for at rate of time and one-half for the first four hours, then double time thereafter.

The rate of pay for steam shovel and dredge men including men operating drag lines, ditchers, steam shovels, locomotive cranes, orange peels, clam shells, dredges and other excavating machines is based on a month consisting of calendar days or nights, Sundays and holidays excepted, and includes board or its equivalent, 8 hours to constitute a day's work.

Holidays observed are New Year's Day, First of July, Labour Day, Thanksgiving Day, Christmas Day, Victoria Day, Good Friday, and any other public holidays appointed.

The following is the wage, for the steam shovel men, composed of men in charge of machines in all excavating jobs other than the excavating men, such as the operating of small locomotives, pumps and ledgerwood,—\$150 for 26 eight-hour days and board or its equivalent, and overtime conditions same as above. Workmen acting as foremen to be paid an additional five cents per hour over the price prevailing for that class of work.

CALGARY, ALTA.—Agreement between the City Commissioners and the Calgary Federation of Civic Employees, for the calendar year 1920.

(This agreement is given in detail on page 457 of this issue.)

#### Miscellaneous Service

MONTREAL, QUE.—MONTREAL LIGHT, HEAT & POWER CONSOLIDATED AND THEIR EMPLOYEES, MEMBERS OF THE VARIOUS UNIONS.

*Hochelaga Gas Works.—Local Union 16571.*

Eight hours shall constitute a day's work. All hours worked beyond the regular working day will be paid for at overtime rates. Continuous operation of the Gas Works being necessary, overtime for Sundays and holidays will not be paid the seven day or shift workers. Overtime for six day or non-shift work-

ers will be paid for at the rate of time and one-half except on the following specified holidays when overtime will be paid for at the rate of double time viz: Sundays, New Year's Day, Good Friday, Empire Day, Dominion Day, Labour Day, Thanksgiving Day, Christmas Day.

Rates of pay will be as follows:

#### COAL GANG:

Coal foreman.....	\$150.00 per month; no overtime.
Cable-way operators....	.55 per hour.
Sub-foreman (Belt Man).....	.45 "
Coal tripper operator....	.48 "
Transporter operator....	.55 "
Locomotive driver.....	.55 "
Labourers.....	.35 "

#### YARD GANG:

Sub-foreman.....	.40 per hour.
Coke loader operator....	.40 (or increased piece price)
Labourers.....	.35 per hour.
Watchmen.....	3.00 per full night.

#### WATER GAS MEN:

Gas makers.....	.53½ per hour.
Labourers, coaling.....	.37½ "

#### RETORT HOUSE GANG:

Machine men.....	.56 "
Pipe jumpers.....	.56 "
Stokers.....	.53½ "
Coke hoist and poker men	.53½ "
Tripper and screen men..	.50 "
Mains and scurf.....	.53½ "
Mains and scurf helper..	.35 per hour
Sulphate men.....	.41¼ "
Sulphate men helper....	.37½ "

#### MAINTENANCE:

Pipe fitters.....	.55, .50 per hr.
Pipe fitters' helpers ....	.37½ per hour.
Machinists .....	.70 per hour.
Machinists' apprentices and helpers.....	.40, .35, .30, .25 per hour
Handy men.....	.45, .40, .37½ per hour.
Boiler men.....	.50 "
Engineers (exhausters & boosters).....	.45 "
Blacksmiths.....	.68, .60, .55, per hour.
Blacksmiths' helpers....	.45 per hour.
Pump man at wharf....	.37½ "
Electricians 1st class....	.68 per hour.
Electricians (construction and maintenance).....	.50 to .60 per hour.

Men having any grievance, either specific or of a general nature, may pre-

sent their case to the proper officer of the company. If they desire representation by a committee and so notify the foreman, an officer of the company will, during working hours, meet a committee representing the aggrieved parties and if possible adjust the grievance.

*La Salle Gas Works—Local Union 16571.*

Hours and overtime and holidays same as in previous agreement.

Rates of pay will be as follows:

Engineers and booster men.....	\$ .45 per hour.
Bricklayers.....	.55 "
Retort men.....	.53½ "
Coke bridge operator....	.50 "
Cable splicer.....	.50 "
Clam operator.....	.50 and .55 per hour.
Bridgemen.....	.50 per hour.
Dumper.....	.50 "
Cable man.....	.50 "
Seal man.....	.50 "
Screen man.....	.50 "
Sulphate men.....	.41¼ "
Sulphate men's helper....	.37½ "
Coke loader operator....	.40 (or increased piece price)
Machinist.....	.70 per hour.
Machinists' apprentices & helpers.....	.40, .35, .30
Handy men.....	.25 per hour
	.45, .40, .35 per hour.
Blacksmiths.....	.68, .60, .55 per hour.
Blacksmiths' helpers....	.45 per hour.
Pipe fitters.....	.55, .50 per hour
Pipe fitters' helpers....	.37½ per hour.
Labourers.....	.35 "
Electricians, 1st class...	.68 "
Electricians (construction & maintenance).....	.50 to .60 per hour.

Overtime and holidays same as in previous agreement.

Rates of pay: Per hour—Single rig, 30 cents; double rig, 33½ cents; stablemen, 30 cents.

## NEW WAGE AGREEMENT BETWEEN THE CITY OF CALGARY AND ITS EMPLOYEES

**A** NEW agreement affecting wages and working conditions has recently been entered into between the Commissioners of the City of Calgary and the Calgary Federation of Civic Employees. The agreement supersedes the agreement in effect during 1919, which appeared in the July, 1919, issue of the *LABOUR GAZETTE*, on pages 784-9, and is effective

as to wage rates from January 1, 1920, and as to working conditions from the date of its adoption, to January, 1921, in each case.

The chief features of the agreement are as follows:

General Preamble.—The City Commissioners shall at all times receive a Grievance Committee.

The regular working time shall be 8 hours per day, 44 hours per week, except in cases of double running or revolving shifts, or when otherwise mentioned in the different agreements attached hereto. Overtime shall be paid for as follows: Time and one-half for the first four hours; double time thereafter until relieved. Double time for Sundays and holidays and for emergency work or calls after 10 p.m. and not less than two hours for any call.

The minimum wage for 1920 shall be as follows: Able-bodied men in the service of the City who are paid by the month, \$110 per month; able-bodied general labourers, except street cleaners, 60 cents per hour; street cleaners and men not able-bodied, 50 cents per hour.

#### CITY HALL STAFF ASSOCIATION.

This deals with individual salaries and rates of wages. In the matter of overtime and holidays, the corresponding clauses of the Preamble will be followed.

#### STEAM AND OPERATING ENGINEERS, No. 536.

Scale of wages: Per hour for a day of eight hours—Engineers in charge of or operating derricks, irrespective of motive power used, settling steel, stone or other structural material, \$1.00. This does not apply to concrete work or reinforcing steel. Engineers in charge of, or operating boom and guy derricks, dinkey locomotives, cranes, orange peels, travellers, clam shells, cable ways, dragline, pile drivers, road rollers, tractors, irrespective of the motive power, 85 cents. Engineers in charge of or operating any portable boiler engine, hoist, concrete mixer, pumps, syphons, pslometers, stone crushers or compressors, irrespective of motive power used, 75 cents. Firemen on construction work, 70 cents. In cases where plants are operated by gas, electricity or compressed air, where motive power is less than six horse-power the above schedule shall not apply.

#### INTERNATIONAL BROTHERHOOD OF ELECTRICAL WORKERS, LOCAL 348.

Eight hours work from 8 a.m. to noon and from 1 p.m. to 5 p.m. shall

constitute a day's work, except Saturday when the time shall be from 8 a.m. to noon; but where the requirements of the service demand shift work 8 consecutive hours shall constitute a day and such shift hours will be those that the service require to be filled constantly. This applies to automobile mechanics and operators. An agreement as to shift hours shall be made for not less than 14 calendar days or shift hours shall be paid at the overtime rate. Shift hours shall be arranged so that there shall be 16 consecutive hours rest between shifts, and should an operator be requested to do work during this intermission other than when changing shifts or working relief, he shall be paid at the overtime rate. Work during any period of hours other than those mentioned in the preceding clauses shall be considered as overtime, provided that maintenance men may work any nine consecutive hours out of the 24 with one hour off for lunch.

The first five hours after the ordinary working hours, viz; between 5 p.m. and 10 p.m. shall be considered as being equivalent to one and one-half times the corresponding period of the ordinary working hours and payment therefor shall be computed in that proportion on the basis of the wage schedule mentioned hereinafter. All overtime shall be computed on the basis of eight hours per day for daily men and twenty-five and one-half days per month for monthly men. Overtime other than that mentioned in the preceding clause, viz; work commencing on or at any time after 10 p.m. up to 8 a.m. or until relieved shall be considered as double time, and payment therefor shall be computed in that proportion on the basis of the wage schedule mentioned below, with the omission of the time necessary for meals.

All time worked on Sundays and Dominion Holidays shall be considered as equivalent to double time of ordinary working hours and payment therefor shall be made accordingly. All time worked on Saturday afternoons shall be considered as equivalent to one and one-half times the ordinary working

hours, and after 5 p.m. shall be paid double time. The following shall be considered Dominion holidays: New Year's Day, Good Friday, Victoria Day, Dominion Day, Labour Day, Thanksgiving Day, Christmas Day.

The wage schedule shall be as follows:

*Linemen:* Per day—Foreman, \$7.75; line inspector, \$7.50; man in charge of meter rig, \$7.50; journeymen linemen, \$7.00; apprentices, first year, \$4.85; second year, \$5.35; third year, \$5.85; fourth year, \$6.35; groundmen (in gangs) \$5.40.

*Cablemen:* Per day—Foremen, \$8.30; journeymen, \$7.80; underground conduit foreman, \$7.75.

*Station and Inside Wiremen:* Per day — Foreman, \$7.75; journeymen, \$7.00; apprentices, first year, \$4.60; second year, \$5.00; third year, \$5.40; fourth year, \$5.80.

*Repair and Testing Department:* Per day — Foreman, \$7.75; journeymen, \$7.00; apprentices, first year, \$4.60; second year, \$5.00; third year, \$5.40; fourth year, \$6.20.

*Maintenance Men:* Per day — Foreman, \$7.75; journeymen, \$7.00; arc trimmers, first year, \$5.00; second year, \$5.40; third year, \$5.80.

*Operators:* Per month — Chief Operator and plant electrician, \$184; Central Station, \$164; Class A Station, \$154; Class B Station, \$144; Senior operator, No. 2 pumping station, \$159; Class C Station, \$139; Class D Station, \$134; Apprentice, first year, \$104; second year, \$114; third year, \$124.

*Meter Readers:* Per month— Foreman, \$144; automobile electricians and mechanics: Per month — Garage Foreman, \$169; night battery man, \$149; truck driver and trimmer, \$134.

*Miscellaneous:* Per month — Chief wiring inspector, \$174; wiring inspector, \$164. Man in charge of police signalling system, \$174.

Armature Winders, \$7.00 per day.

CALGARY FIRE FIGHTERS FEDERAL UNION, No. 9.

Salaries: Per month — Fire alarm superintendent, \$180; master of mechanics, \$175; senior fire captain, head-

quarters, \$175; motor mechanic, \$150; captains, \$165; lieutenants, \$150; carpenters, \$150; painters, \$150; plumbers, \$150; firemen, first class, \$140; second class, \$130; third class, \$120; fire alarm operators, first class, \$117.50; second class, \$115; third class, \$110; fire chief's secretary, \$110.

INTERNATIONAL ASSOCIATION OF MACHINISTS.

The minimum rate of wage shall be paid as follows: Foreman, \$1.95 per month; machinists, 88 cents per hour; specialists, 75 cents per hour.

INTERNATIONAL BROTHERHOOD OF BLACKSMITHS AND HELPERS.

The minimum rate of wages:—Per hour, Blacksmiths, 88 cents; blacksmiths helpers, 68 cents.

Working hours, overtime, holidays and grievances quoted in corresponding clauses in preamble.

CALGARY CIVIC EMPLOYEES' ASSOCIATION No. 37.

Rates of pay are as follows:

*Parks Department:* Per hour — Labourers, 60 cents; gardeners, 65 cents; Per month — caretakers (3), \$130, (1) \$117; green house men, \$135; green house men, \$144; cemetery caretaker, \$150.60.

*Waterworks Department:* Per hour — Machine shop plumber, 88 cents; pipe layers, 65 cents; labourers, 60 cents; hydrant foreman, 68 cents.

*Sewer Maintenance Department:* Per hour — Pipe layers, etc., 65 cents; labourers, 60 cents.

*Public Works Department:* Per hour — labourers, 60 cents; street cleaners, 50 cents; garbage men, 60 cents.

*Power House Department:* Per hour — labourers, 60 cents; fitters, 75 cents; fitters helpers, 65 cents. Per month — firemen (3 head), \$135; firemen, \$132; ashmen, janitor, coal handler, cleaner, etc., \$117.50.

POUND: Dogcatcher —\$90 per month plus commission of 25 cents on each dog impounded.

The regular working time shall be eight hours per day; 44 hours per week,

except in cases of double running or revolving shifts; 48 hours per week when two or more shifts are in operation. One month's work shall consist of twenty-five and one-half days for running or revolving shifts.

#### THE POLICE PROTECTION ASSOCIATION.

The wage schedule shall be as follows: Per month — Inspector of detectives, \$190; inspector of police, \$185; detective sergeants, \$175; station sergeants, \$165; detectives, \$155; patrol sergeants, \$150; first class constables, \$140; second class constables, \$130; third class constables, \$120.

Men shall be granted one day off in seven and in the event of any man on night duty attending court he shall be allowed a corresponding period of time off. Eight consecutive hours shall constitute a day's work for uniform department and patrol drivers and six days shall constitute a week's duty.

#### THE INTERNATIONAL BROTHERHOOD OF TEAMSTERS, CHAUFFEURS, STABLEMEN AND HELPERS.

The rate of pay shall be as follows: Per month — teamsters, \$131.50; single horse drivers, \$131.50; truck drivers, \$131.50; stablemen, \$131.50; helpers, \$117.20.

Eight and one-half hours' road work shall constitute a day's work from March 16 to November 15. The teams shall leave the stable at 7.45 a.m. with one hour for lunch, returning to stable at 5.15 p.m. except Saturdays when the return shall be at 12.15 p.m. Eight hours shall constitute a day's work from November 16 to March 15. The teams shall leave the stable at 8 a.m. with one hour off for lunch returning to the stable at 5 p.m. except Saturdays when the return shall be at noon.

#### CALGARY STREET RAILWAY DEPARTMENT.

The wage schedules are as follows:

*Conductors and Motormen:* Per hour — First six months, 52½ cents; second six months, 57½ cents; third six months, 62½ cents; fourth six months and thereafter, 62½ cents; motor-conductors first

six months, 57½ cents; second six months, 62½ cents; third six months, 67½ cents; fourth six months, 72½ cents. This scale shall apply to new men coming into the service after the first day of January 1920, and the employees on the system up to January 1 shall receive the maximum wage. Motormen and conductors required to work on the following days, viz; Good Friday, May 24, Dominion Day, Civic Holidays, Labour Day, Thanksgiving Day, Christmas Day and New Year's Day, shall be paid double time. All men operating cars shall be paid on the same basis with one hour extra allowed for the time worked on Sundays, except in cases where called out on the seventh day, when regular overtime rate shall be given. Five cents per hour extra shall be paid motormen while training students. All employees shall be paid on the basis of 8 hours per day, six days or 48 hours per week. Time and one-half for overtime first four hours and double time thereafter. Spare men to be guaranteed seven hours per day or forty-two hours per week of six days. Any motor-conductor in the city's employ for one year or more to be given one week's vacation with pay.

*Trackmen, Repairmen, Greasers, Switch Cleaners and Labourers:*—The wages for trackmen repairmen (not exceeding five in number, to be named by the superintendent of the street railway) shall be 62½ cents, per hour, and for greasers and switch cleaners and labourers 60 cents per hour. Eight hours per day, six days per week; time and one-half for overtime first four hours and double time thereafter, and all holidays herein specified double time; one hour extra allowed for Sunday work. Senior men to be given preference of overtime and Sunday work.

Per month—Shop foreman, \$190; day foreman, \$185; night foreman, \$180. These three to work 6 days a week of 8 hours per day including legal holidays. Per hour—Blacksmiths, 85 cents; foreman carpenter, 85 cents; carpenters, January 1 to June 30, 77½ cents; carpenters, July 1 to December 31, 80 cents; armature winder, 87½ cents;

motor and controller men, 82½ cents; airbrake and wheel lathe operators, 82½ cents; foreman painter, 85 cents; painters, 75 cents; cleaners, washers and yardmen, 60 cents; motor mechanics and sash box repairer, 72½ cents; brake and truck men, first six months, 65 cents; second six months, 70 cents; third six months, 72½ cents.

*Office Staff*:—Per month—chief inspector, \$185; assistant inspector, \$175; chief of claim and complaints department, \$160; cash box collector, \$170; accountant, \$165; night cashier and advertising, \$150; timekeeper and cashier, \$120; work order and timekeeper, \$120; stenographer, \$100.

#### HOSPITAL EMPLOYEES' ASSOCIATION LOCAL No. 8.

Schedule for salaries and wages shall be as follows:

Per month—Business secretary, \$190; accountant, \$150; assistant accountant, \$125; collector, \$125; admission and discharge clerk, \$110; admission and discharge clerk, \$100; switchboard operators, \$90; stenographers technical, \$105; stenographers correspondence, \$100; general duty clerk, \$90; case record clerk, \$115; storekeeper, \$175; engineers (chief), \$190; engineers, (shift), \$150; plumber, \$170; carpenter, \$150; painter, \$150; laundry foreman, \$150; floor polishers, \$115; orderlies, porters and elevator men, \$110; laundry washer, \$115; maids, \$50 with room;

kitchen help, \$70 and board; head cook, \$150 with meals; second cook, \$110 with two meals; hand ironers, \$16 per week; mangle hands, \$16 per week; laundry hands, \$15 per week.

Forty-eight hours shall constitute a week's work for engineers, orderlies, etc., second cook, kitchen help and maids. Forty-four hours per week for plumber, painter, carpenter, floor polishers, laundry foreman washer, hand ironers, mangle ironers, laundry help.

Holidays to be observed as in preamble.

#### CALGARY CARPENTERS' DISTRICT COUNCIL.

*Wages*—The minimum wage for journeymen carpenters shall be 75 cents per hour, subject however to redécisions on wages by the Contractors' Association and the Carpenters' District Council, effective July 1, 1920.

The regular working time shall be 8 hours per day; 44 hours per week, except in cases of double running or revolving shifts, night shift shall be eight hours' work with nine hours' pay. Overtime shall be paid for as in preamble.

Holidays without pay as follows:—Christmas Day, New Year's Day, Dominion Day and Labour Day. If necessary to work on these days, double time to be allowed. On civic employees' half-holiday regular pay shall be allowed. No work to be performed on Labour Day except to save life or property.

#### FAIR WAGE CONTRACTS, MARCH, 1920

**D**URING March the Department of

Labour received for insertion in the LABOUR GAZETTE the following information relative to 13 fair wage contracts, 10 of which were awarded by the Department of Public Works, and three by the Department of Railways and Canals. All the contracts contained the usual fair wage clause which provides for the prompt payment of such wages as are current in the district in which

the work is to be performed, and for observance on the various works under contract of the prevailing hours of labour, and which otherwise prevents abuses and secures the legitimate rights of the labour employed.

A statement was also received as to supplies ordered by the Post Office Department, subject to the Regulations for the Suppression of the Sweating System, the securing of fair wages, etc.

## DEPARTMENT OF PUBLIC WORKS

Alterations and additions to main building of "Mowat Sanatorium," Kingston, Ont. Name of contractor, H. W. Watts, Kingston, Ont. Date of contract, February 28, 1920. Amount of contract, \$17,975.

Reconstruction of breakwater (being renewal of superstructure of part of eastern breakwater), Collingwood, Ont. Name of contractors, The York Construction Co., Ltd., Toronto, Ont. Date of contract, February 27, 1920. Amount of contract: schedule of prices.

Construction of grain conveyor, St. John Harbour, N.B. Name of contractors, Grant & Horne, St. John, N.B. Date of contract, March 2, 1920. Amount of contract: schedule of prices.

Installation of new elevator and alterations in postal station "A" (Immigration Building) Winnipeg, Man. Name of contractors, Wallace & Akins Ltd., Winnipeg, Man. Date of contract, March 1, 1920. Amount of contract, \$12,863.

Construction of roadways, side-walks, etc., in connection with Tuxedo Military Hospital, Winnipeg, Man. Name of contractors, Carter-Halls-Aldinger Co. Ltd., Winnipeg, Man. Date of contract, March 8, 1920. Amount of contract, \$40,000.

Overhauling and repairing of Dredge "Ajax" P. W. D. No. 301, Vancouver, B.C. Name of contractors, B. C. Marine Ltd., Vancouver, B.C. Date of contract, March 6, 1920. Amount of contract, \$4,938, and unit prices for works mentioned in contract.

Alterations and supply and installation of equipment at Detention Building, St. John, N.B. (Partridge Island.) Name

of contractors, James H. McPartland & Sons, St. John, N.B. Date of contract, March 17, 1920. Amount of contract, \$2,840.

Repairs of coal wharf at quarantine station, William Head, B.C. Name of contractor, Robert Moncrieff, Victoria, B.C. Date of contract, March 20, 1920. Amount of contract: schedule of prices.

Rebuilding of the Ell of main breakwater, Meteghan, N.S. Name of contractors, A. W. Girroir & W. F. MacKinnon, Antigonish, N.S. Date of contract, March 26, 1920. Amount of contract: schedule of prices.

Alterations and additions to the Post Office, Portage La Prairie, Man. Name of contractors, Snyder Bros., Portage La Prairie and Winnipeg, Man. Date of contract, March 22, 1920. Amount of contract, \$27,660.

## DEPARTMENT OF RAILWAYS AND CANALS

Construction, erection and completion of a train shed at the Halifax Ocean Terminals, Halifax, N.S. Name of contractors, The James Shearer Co., Ltd., Montreal, Que. Date of contract, March 3, 1920. Amount of contract, \$219,307.

Furnishing, fabricating and delivering F. O. B. cars certain new steel work, making alterations to and strengthening certain old bridge spans, framing and placing timber bridge decks, erecting certain bridges complete, including old and new steel, and removing superstructure of existing bridges at each of the following locations; Mile 10.3, 21.9, 42.3, Albert Subdivision; Mile 10.2, 16.9, 17.2, 19.8, St. Martin's Subdivision. Name of contractors, Dominion Bridge Co., Ltd., Lachine, Que. Date of con-

tract, March 3, 1920. Amount of contract; schedule prices.

Construction of a concrete dam at Lakefield, Ont. Name of contractor, F. R. Wilford, Lindsay, Ont. Date of contract, March 3, 1920. Amount of contract: schedule rates.

#### POST OFFICE DEPARTMENT

The following is a statement of payments made in March for supplies ordered by the Post Office Department, subject to the Regulations for the Suppression of the Sweating System, the securing of fair wages, and the performance of work under sanitary conditions:

Nature of Orders.	Amount of Orders.
Making metal dating stamps and type and making other hand stamps and brass crown seals.....	\$ 659.52
Making rubber stamps.....	129.85
Supplying stamping materials, pads and ink.....	602.71
Supplying mail bag fittings.....	1,690.10
Repairing scales.....	22.70
Making up and supplying letter carriers' uniforms.....	24,739.55
Mail clerks' boxes and letter boxes new and repaired ..	363.00
Making up new mail bags.....	620.61
Letter carriers' satchels.....	4,656.14
Mail bagging.....	18,998.10
Blue and grey serge for letter carriers' uniforms.....	21,003.15
Glasses for letter boxes.....	60.00

#### ANNUAL REPORTS OF MANITOBA BUREAU OF LABOUR AND MINIMUM WAGE BOARD

THE fourth annual report of the Manitoba Bureau of Labour shows a continued expansion of the activities of this branch of the Department of Public Works during the financial year 1918-19. Inspections increased from 1,154 in 1915, the year in which they were first instituted, to 14,332 in the period under review, while orders issued by the Bureau to industrial concerns grew from 1,220 to 7,503. As the report points out the very fact of inspection led to good results which cannot be recorded as orders were not always required to be issued.

A marked improvement is shown over the previous year in the frequency of accidents and especially fatalities, the figures for the past year being 921 accidents (including 11 fatalities) against 1,123 (including 21 fatalities) reported in 1918. A large proportion of eye-accidents was noted. Acting in co-operation with printing firms and the Typographical Union, the Bureau undertook a study of printing shop conditions with a view especially to securing means of carrying off by ventilation the fumes of the metal in the pots of lino-

type machines. Builders and architects were asked to familiarize themselves with provincial standards and their co-operation was invited. During the latter part of the year the proportion of accidents in building operations was substantially reduced. Following a serious accident caused by a boiler explosion in one of the railway shops, steps were being taken to secure for Provincial inspectors authority to inspect steam boilers used by the railways. The Railway companies claim to be governed only by the Dominion Railway Act, but the provincial Bureau desiring the right of inspection in the interest of public safety has asked the Federal Department of Railways and the Board of Railway Commissioners to give a ruling on this point.

During the year the Bureau was successful in bringing about the formation of safety committees in a number of the large plants, and it intends, in the near future, to give publicity by exhibition of slides, and other such means, of how accidents have occurred, and how the same might have been avoided had due care been exercised.

Illegal employment of child labour was found in 58 instances of which 20 occurred in stores and offices and 19 in the printing, lithographing and book-binding trades, and where sufficient proof of correct age was not forthcoming dismissal was ordered. The Manitoba Shops Regulation Act permits the employment of a child over 13 and under 14 years of age for a period under two hours and on holidays for 8 hours, on obtaining a permit from the Bureau of Labour, but applications for such permits showed a marked decline.

The administration of the Minimum Wage Act, passed in 1918, devolved much additional work upon the Bureau, and the enforcement of the new regulations resulted in a considerable improvement in the standard of wages, hours and conditions. Practically all female workers in Manitoba are affected by these regulations, in connection with which 2,569 inspections were carried out during the year, 11,090 employees coming under review. Of these 3,812 were city office employees, 2,206 employees in mail order houses, and 2,000 employees in departmental stores. The three prosecutions made by the Bureau during the year were all under the Minimum Wage Act.

Other acts administered by the Bureau included the Passenger and Freight Elevator Act of 1916, the good effects of which are seen in the smaller number of accidents. Under the Steam Boiler Act, numerous inspections were carried out, no accidents occurring in connection with boilers under the jurisdiction of the Bureau. Under the Building Trades Protection Act inspections showed improved conditions, no fatalities being reported during the year.

The section of the report dealing with strikes and labour disputes contains the following comment on the Winnipeg strike: "After the experience of last summer the Bureau would strongly recommend that our Manitoba Government, at the earliest possible moment, set up machinery whereby a painstaking and sympathetic enquiry can be made into the real economic mer-

its of all controversies. In this connection the Bureau is not advocating coercive measures, but consider that when this machinery for investigation and mediation has been tried out for a while, along proper co-operative lines, experience will no doubt lead us up to the point where a better understanding of the questions will prevail. While at the present moment, labour feels that it cannot give up its strike weapon, it realizes that this weapon has a dangerous double blade for the wielder as well as the victim." The Bureau itself although possessing no formal authority to arbitrate, was requested on many occasions during the year to use its good offices toward the settlement of disputes, and it is noted in the report that amicable settlements were reached in the majority of these appeals. Several general complaints were satisfactorily adjusted during the year and gratification is expressed at the receipt of several letters of appreciation from labour organizations and manufacturers.

#### Minimum Wage Board Report

Appended to the report of the Bureau is that of the Minimum Wage Board of Manitoba for the year November 30, 1918, to November 30, 1919. In the opinion of the Board experience proves that minimum wage regulations are having a stimulating effect upon wages. Practically all women engaged in industry now come within the scope of the Act, and the conditions of the woman wage-earner in Manitoba, it is claimed, "is now second to none in the Dominion." As the result of the regulation providing "that wages shall be paid weekly and after that they have been earned shall be paid within three days," weekly pay is now the rule not only for women but for men, even in establishments where payments were formerly made monthly or fortnightly. Among the decisions of the year was a ruling that gratuities such as are sometimes given to waitresses are not to be regarded as wages, and that living wages must be paid to such

workers. The problem of apprenticeship was encountered in the dressmaking and millinery trades, where it is admitted that the minors employed could not earn the proposed wage. The Board suggests a solution in the use of technical schools combined with some system of part-time employment. Disproof of the assertion that "minimums become maximums" was found in the fact that when the Board proposed an increased minimum for some trade to meet advanced cost of living, they discovered that proposed higher minimum was already adopted by the employers.

"The complete survey of the field having been made," says the report, "it is

now one of the aims of the Board to endeavour to standardize the hours of labour. Members of the Board are unanimous in the opinion that 48 hours is a sufficient portion of the week to devote to labour, and we hope to be able to amend all regulations to that point."

The original orders issued by the board with respect to minimum wages, maximum hours, and learners' and minors' rates for each class of employment, have been summarized from time to time in the LABOUR GAZETTE, but as amendments to certain of these orders have since been made, the following table, giving the present prevailing rates, is reproduced from the report:

WAGES AND HOURS FOR FEMALE EMPLOYEES IN BRANDON.

Industry.	Minimum Wage.	Adult Learners' Rates.	Minors' Rates.	Maximum Hours.
Dressmaking establishments.	\$12.00 per week.....	3 months, \$ 8.00..... 3 months, 9.00. 3 months, 10.00. 3 months, 11.00.	Probationary period of four weeks—6 mos. at \$6.00, increasing \$1.00 per week at the end of each successive six months for two years.	8½ hrs. per day. 49 hrs. per week. One half day off each week. Exceptions made when establishments are associated with store.
Millinery establishments...	\$12.00 per week.....	1st season \$5.00 p. w. 2nd season, 6.00 p. w. 3rd season, 8.00 p. w. 4th season, 10.00 p. w.	To be classed as learners.	8½ hrs. per day. 50 hrs. per week. Exceptions made where establishments are associated with store
Hotels (except workers employed at news counters and office staff.	\$12.50 per week.....	No learning period....  (Classed as experienced help)	No rate for minors...	52 hrs. per week. One full day off per week or two afternoons from 2 p.m.
Offices.....	\$12.50 per week.....	3 months, \$10.50..... 3 months, 11.50.	15 years, \$ 8.00..... 16 years, 9.00 17 years, 10.50 17½ years, 10.50	8 hrs. per day. 44 hrs. per week.
Seed packing and fireworks factories.	\$12.00 per week.....	3 months, \$ 9.00..... 3 months, 10.00. 3 months, 11.00.	3 months, \$ 7.50..... 3 months, 8.50. 3 months, 10.00.	9 hrs. per day. 48 hrs. per week. Exceptions for seed and fireworks factories.
Printing and other manufacturing operations of wholesale stationery.	\$12.00 per week.....	6 months, \$ 8.00..... 6 months, 9.00. 6 months, 10.00. 6 months, 11.00.	To be classed as learners.	9 hrs. per day. 48 hrs. per week.
Restaurants.....	\$12.50 per week.....	No learning or minor's period.		10 hrs. per day. 48 hrs. per week. One full day off each week.

## WAGES AND HOURS FOR FEMALE EMPLOYEES IN WINNIPEG, ST. BONIFACE AND ST. JAMES

Industry.	Minimum Wage.	Adult Learners' Rates.	Minors' Rates.	Maximum Hours.
Abattoirs.....	\$11.00 per week.....	First three mos. \$9.00 Sec. three mos. 10.00	Three mos. \$ 9.00.... Three mos. 10.00....	9 hrs. per day. 48 hrs. per week.

## SUPPLEMENTS Nos. 24 AND 25 TO THE McADOO AWARD— AFFECTING EMPLOYEES IN ENGINE AND TRAIN SERVICE

**Supplements (which supersede Supplements Nos. 15 and 16) to be  
effective on Canadian Railways**

IN December last, the Director General of United States Railroads issued Supplements Nos. 24 and 25 to General Order No. 27, standardizing wage rates of engineers, firemen, conductors and trainmen on all roads under federal control in the United States. These Supplements supersede Supplements Nos. 15 and 16 respectively, which were printed in the May, 1919, issue of the LABOUR GAZETTE, at pages 609-616. Many of the articles in the superseded supplements are repeated in the new supplements. Such articles are merely noted below, but new articles are in every case reproduced in full.

### Supplement No. 24

Effective December 1, 1919, and superseding Supplement, No. 15 to General Order No. 27 as of that date, as to employees herein named, the following rates of pay and rules for overtime and working conditions upon railroads in Federal operation are hereby ordered:

#### PASSENGER SERVICE.

ARTICLE I—*Rates of Pay*: (See Art. I—Supp. 15.)

ARTICLE II—*Basic Day*: (See Art. II—Supp. 15.)

ARTICLE III—*Overtime*: (See Art. III—Supp. 15.)

#### FREIGHT SERVICE.

ARTICLE IV—*Rates of Pay*: (See Art. IV—Supp. 15.)

ARTICLE V—(Same as Art. V—Supp. 15, except that Clause (c) is omitted.)

ARTICLE VI—(See Art. VI—Supp. 15.)

ARTICLE VII—*Basic Day and Overtime*:

(a) In all classes of service covered by Article IV, 100 miles or less, 8 hours or less (straightaway or turnaround), shall constitute a day's work; miles in excess of 100 will be paid for at the mileage rates provided, according to class of engine or other power used.

(b) On runs of 100 miles or less, overtime will begin at the expiration of 8 hours; on runs of over 100 miles, overtime will begin when the time on duty exceeds the miles run divided by  $12\frac{1}{2}$ . Overtime shall be paid for on the minute basis, at an hourly rate of three-sixteenths of the daily rate, according to class of engine or other power used.

(c) Road engineers, firemen, and helpers performing more than one class of road service in a day or trip will be paid for the entire service at the highest rate applicable to any class of service performed with a minimum of 100 miles for the combined service. The overtime basis for the rate paid will apply for the entire trip.

When two or more locomotives of different weights on drivers are used during a trip or day's work, the highest rate applicable to any engine used shall be paid for the entire day or trip.

#### ARTICLE VIII — *Held-Away-From-Home Terminal*:

Engineers, firemen, and helpers in pool freight and in unassigned service held at other than home terminal will be paid continuous time for all time so held after the expiration of 16 hours from the time relieved from previous duty, at the regular rate per hour paid them for the last service performed. If held 16 hours after the expiration of the first 24-hour period, they will be paid continuous time for the next succeeding 8 hours, or until the end of the 24-hour period, and similarly for each 24-hour period thereafter. Should an engineer, fireman, or helper be called for duty after pay begins, time will be computed continuously, provided that if overtime accrues on the trip that portion of the overtime due to starting pay at the expiration of the 16-hour period instead of at the time actually required to report for duty shall be paid at the pro rata rate, in order that time and one-half time for overtime will not be so applied as to increase the rates paid for time growing out of the held-away-from-home terminal rule.

For the purpose of applying this rule the railroad will designate a home terminal for each crew in pool freight and in unassigned service.

ARTICLE IX—*Monthly, Daily, or Trip Basis*:  
(See Art. IX—Supp. 15.)

ARTICLE X—*Arbitrariness and Special Allowances*:

(a) Excepting payments under rules applying to work performed at initial and final terminals, and to final terminal delays, all arbitrariness and special allowances applying to road service other than passenger, under rules, regulations, or practices, which conflict with the payment of single time, in miles or hours, from the time required to report for duty until released from duty at the end of the trip shall be eliminated.

On roads where no rules are in effect covering work performed at terminals, the practices in regard to the character of work permissible or duties required at terminals are not to be extended.

(b) Where the special payments under the rules, regulations, or practices which are retained under section (a) have been allowed independently or separately from the trip, they will continue to be so allowed, but at the former rates.

#### EXAMPLES.

(b 1) Under certain rules, allowed a minimum of 1 hour for switching independently of time or road trip; road time begins at expiration of time consumed performing switching.

Required to report at A, 7 a.m.; switches at A until 7.30 a.m.; runs A to B, 100 miles; arrives at B, 4.30 p.m.; switches 1 hour at B; relieved at B, 5.30 p.m.

Compensation—100 miles plus 1 hour initial switching at former rates, 1 hour road overtime and 1 hour final switching, both at  $\frac{3}{16}$  of the daily rate.

(b 2) Under certain rules, allowed a minimum of 1 hour for switching independently of time or road trip, but road time begins at expiration of the time allowed.

Required to report at A, 7 a.m.; switches at A until 7.30 a.m. (allowed 1 hour for 30 minutes' work); road time begins at A, 8 a.m.; runs A to B, 100 miles; arrives at B, 3.25 p.m.; relieved at B, 3.30 p.m.; time on road trip, 7 hours 30 minutes.

Compensation—100 miles plus 1 hour switching at former rates.

(b 3) Under same rules as stated in example (b 2).

Required to report at A, 7 a.m.; switches at A until 7.30 a.m. (allowed 1 hour for 30 minutes' work); road time begins at A, 8 a.m.; runs A to B, 100 miles; arrives at B, 4.25 p.m.; relieved at B, 4.50 p.m.; time on road trip, 8 hours 50 minutes.

Compensation—100 miles plus 1 hour switching at former rates and 50 minutes road overtime at  $\frac{3}{16}$  of the daily rate per hour.

Where, under any schedule rules, it has been the practice to allow the special payments and in addition calculate the road overtime for the trip from the time required to report for duty until final release at end of day, the duplication of time is eliminated and compensation for the trip will be calculated on the basis shown in the foregoing examples.

(c) Where the special payments under the rules, regulations, or practices which are retained under section (a) have been absorbable by the train movement not exceeding the speed basis of the overtime rule, they shall be allowed as follows:

1. When the train reaches the final terminal before overtime commences calculated from the time of reporting for duty, the special payments will be allowed at the former rates.

#### EXAMPLE.

Under certain rules, allowed 1 hour for switching when time amounts to 30 minutes or more; less than 30 minutes not counted.

Required to report at A, 7 a.m.; switches at A, 7 a.m. to 7.30 a.m.; leaves A at 7.30 a.m. and runs to B, 100 miles; arrives at B, 2.25 p.m.; switches 35 minutes; relieved at B, 3 p.m.

Compensation—100 miles plus 1 hour switching at each initial and final terminal at former rates.

2. If the train is not on overtime on arrival at the final terminal, but the overtime period commences before final release, special payments accruing at the final terminal up to the period when overtime commences will be allowed on the basis of the former rates, but time thereafter shall be paid on the actual minute basis of three-sixteenths of the daily rate.

#### EXAMPLES.

(a) Under same rule as used in examples of section (c) 1; final terminal delay being paid on same basis as shown for switching.

Required to report at A, 7 a.m.; leaves A at 7.15 a.m. and runs to B, 100 miles; arrives at B, 2 p.m.; delayed at final terminal 1 hour 20 minutes; relieved at B, 3.20 p.m.

Compensation will be 100 miles plus 1 hour final delay at former rates for period until overtime commences, and for the time thereafter 20 minutes final delay at  $\frac{3}{16}$  of the daily rate per hour.

(b) Under rule allowing minimum of 1 hour for switching, etc., consuming 30 minutes or more.

Run of 100 miles—required to report at A, 7 a.m.; leaves A at 7.25 a.m.; arrives at B, 2.45 p.m.; switches until 3.25 p.m.; relieved at B, 3.25 p.m.

Under the rule 1 hour's pay is allowed for switching at final terminal, and as 1 hour's pay equals 40 minutes at one and one-half time, the 1 hour terminal switching at pro rata will be paid in addition to the 100 miles.

(c) If in a similar case the switching at final terminal consumed one (1) hour and crew is released at 3.45 p.m., 1 hour after arrival, they would receive 1 hour at pro rata or overtime on the actual minute basis after 8 hours on duty at  $\frac{3}{16}$  of the daily rate per hour, whichever is the greater.

(d) Where the special payments under the rules, regulations, or practices which are retained under section (a) have been applied on varying bases in relation to the time of the road trip and not as covered by sections (b) or (c), they will be applied as follows:

1. Where the allowance has correspondingly extended the period before which overtime begins, time of the road service will continue to be so calculated.

#### EXAMPLES.

(a) Under certain rules, a minimum of 1 hour's pay is allowed for 30 minutes' work or more, but the time of road trip is extended to correspond with the time consumed in the switching, etc.

Required to report at A, 7 a.m.; switches at A until 7.30 a.m.; road time begins at A at 7 a.m.; runs A to B, 100 miles; arrives at B, 3.25 p.m.; relieved at B, 3.30 p.m.; total time on duty, 8 hours 30 minutes.

Compensation—100 miles plus 1 hour's switching at former rates.

(b) Required to report at A, 7 a.m.; switches at A until 7.30 a.m.; road time begins at A at 7 a.m.; runs A to B, 100 miles; arrives at B, 4.25 p.m.; relieved at B, 4.30 p.m.; total time on duty, 9 hours 30 minutes.

Compensation—100 miles plus 1 hour's switching at former rates and 1 hour overtime at 3/16 of the daily rate per hour.

(c) Under certain rules, a minimum of 1 hour's pay is allowed for 30 minutes' work or more and time of road trip is extended to correspond with the time paid for before overtime commences.

Required to report at A, 7 a.m.; switches at A until 7.30 a.m.; road time begins at A at 7 a.m.; runs A to B, 100 miles; arrives at B, 3.25 p.m.; relieved at B, 3.30 p.m.

As the period when overtime accrues is extended to correspond with the allowance for the switching and 1 hour's pay is equal to 40 minutes at one and one-half time, the period when overtime commences is extended to 8 hours 40 minutes. In the example 8 hours and 30 minutes elapsed from time of going on duty, therefore the hour at former rates would be paid for the switching, with 100 miles for the trip.

(d) Under same rule as shown in example (c) of section (d) 1.

Required to report at A, 7 a.m.; switches at A until 7.30 a.m.; road time begins at A at 7 a.m.; runs A to B, 100 miles; arrives at B, 4.25 p.m.; relieved at B, 4.30 p.m.; total time on duty, 9 hours 30 minutes.

The hour allowance for switching extends by 40 minutes the period when overtime commences. Compensation will be 100 miles plus 1 hour at pro rata for the switching plus 50 minutes overtime at 3/16 of the daily rate per hour.

2. Where either the allowance or the overtime based on the total time on duty, whichever is the greater, has been paid, payments will continue to be so applied.

#### EXAMPLES.

(a) Required to report at A, 7 a.m.; switches at A until 9 a.m.; leaves A at 9 a.m. and runs to B, 100 miles; relieved at B, 3 p.m.

Compensation—100 miles plus 2 hours' switching at former rates.

(b) Required to report at A, 7 a.m.; switches at A until 9 a.m.; leaves A at 9 a.m. and runs to B, 100 miles; relieved at B, 4 p.m.

Compensation—100 miles plus 2 hours' switching at former rates, such allowance being greater than 1 hour overtime at one and one-half time.

(c) Required to report at A, 7 a.m.; switches at A until 9 a.m.; leaves A at 9 a.m. and runs to B, 100 miles; relieved at B, 4.20 p.m.

Compensation—Either 100 miles plus 2 hours' switching at former rates or 100 miles and 1 hour 20 minutes' road overtime at 3/16 of the daily rate per hour, because the money value of the former allowance and the money value of the road overtime at 3/16 of the daily rate are equal.

(d) Required to report at A, 7 a.m.; switches at A until 9 a.m.; leaves A at 9 a.m. and runs to B, 100 miles; relieved at B, 5 p.m.

Compensation—100 miles plus 2 hours' overtime at 3/16 of the daily rate per hour. In this case the

money value of the road overtime at 3/16 of the daily rate exceeds the allowance of 2 hours' switching at former rates.

NOTE.—In calculating the time engaged in switching under the rules, regulations, or practices which are retained under section (a), it is understood that the time will be continuous from the time the work is begun until it is completed and train is coupled together.

(e) Special provisions of schedules for irregular conditions, such as crews called and not used, deadheading, attending court and investigations, and similar miscellaneous rules covering conditions which are not connected with the handling of a train and which provide for payments on the basis of "overtime rates," shall be changed to provide for payments at the former rates, it being the intent that the time and one-half basis shall not apply in such cases. Where, under such rules, time in excess of the limits of the day is paid for as overtime, the overtime rates of this order apply.

#### ARTICLE XI—Beginning and Ending of Day:

(a) In all classes of service, other than passenger, engineers', firemen's, and helpers' time will commence at the time they are required to report for duty and shall continue until the time the engine is placed on the designated track or they are relieved at terminal. All advance call time rules are superseded, and the management may designate the time for reporting for duty.

(b) Engineers, firemen, and helpers in pool or irregular freight service may be called to make short trips and turnarounds, with the understanding that one or more turnaround trips may be started out of the same terminal and paid actual miles, with a minimum of 100 miles for a day, provided (1) that the mileage of all the trips does not exceed 100 miles, (2) that the distance run from the terminal to the turning point does not exceed 25 miles, and (3) that engineers, firemen, or helpers shall not be required to begin work on a succeeding trip out of the initial terminal after having been on duty eight consecutive hours, except as a new day, subject to the first-in first-out rule or practice.

#### YARD SERVICE.

ARTICLE XII—*Rates of Pay:* (See Art. XII—Supp. 15.)

ARTICLE XIII—*Basic Day:* (See Art. XIII—Supp. 15.)

ARTICLE XIV—*Overtime:* (See Art. XIV—Supp. 15.)

ARTICLE XV—*Assignments:* (See Art. XV—Supp. 15.)

ARTICLE XVI—*Starting Time:* (See Art. XVI—Supp. 15.)

ARTICLE XVII—*Calculating Assignment and Meal Periods:* (See Art. XVII—Supp. 15.)

ARTICLE XVIII—*Point of Beginning and Ending Day:* (See Art. XVIII—Supp. 15.)

ARTICLE XIX—*Lunch Time:* (See Art. XIX Supp. 15.)

ARTICLE XX—*Arbitrariness and Special Allowances:*

(a) Where it has been the practice or rule to pay a yard engine crew or either member thereof arbitrariness or special allowances, or to allow another minimum day for extra or additional service performed during the course of or continuous after the end of the regularly assigned hours, such practice or rule is hereby eliminated, except where such allowances are for individual service not properly within the scope of yard service, or as provided in section (b).

(b) Where regularly assigned to perform service within switching limits, yard men shall not be used in road service when road crews are available, except in case of emergency. When yard crews are used in road service under conditions just referred to, they shall be paid miles or hours, whichever is the greater, with a minimum of one hour, for the class of service performed, in addition to the regular yard pay and without any reduction therefrom for the time consumed in said service.

ARTICLE XXI—*Hostlers and Hostler Helpers:* (See Art. XXI—Supp. 15.)

ARTICLE XXII—*Rules for Application of this Order:*

(a) In consideration of granting overtime on the basis provided in Article VII, all rules, regulations, or practices, and interpretations to Supplement No. 15 to General Order No. 27 applicable to freight service covered by Article VI which conflict with the application

of the rules contained in this order shall be changed to conform therewith.

(b) Rates of pay in road, yard, or hostling service which are not affected by Article IX and which are higher than those herein provided shall not be reduced. Existing differentials for divisions or portions thereof; or mountain or desert territory as compared with valley territory, whether expressed in the rates or constructive mileage allowances, are preserved.

(c) Questions and answers on interpretations of certain articles of this order are listed below:

#### ARTICLE III.

QUESTION 1. Will it be permissible for the management to definitely assign crews on the basis of a minimum day in each direction?

ANSWER. Yes (in accordance with decisions of Commission of Eight and arbitration boards).

QUESTION 2. May railroads which have a common overtime basis applicable to passenger service, as described in sections (a) and (b), adopt sections (a) and (b)?

ANSWER. Sections (a) and (b) of Article III apply to all passenger service.

#### Supplement No. 25

Effective December 1, 1919, and superseding Supplement No. 16 to General Order No. 27 as of that date, as to employees herein named, the following rates of pay and rules for overtime and working conditions upon railroads in Federal operation are hereby ordered:

#### PASSENGER SERVICE.

ARTICLE I—*Rates of Pay:*

(a) Rates for trainmen on trains propelled by steam or other motive power except as provided in Section (b).

CLASS.	Per mile.	Per day.	Per month.
	Cents.		
Conductors .....	4.00	\$6.00	\$180.00
Assistant Conductors or Ticket Collectors .....	3.20	4.80	144.00
Baggagemen operating dynamo .....	3.00	4.50	135.00
*Baggagemen handling express .....	3.00	4.50	135.00
Baggagemen .....	2.77	4.16	124.80
Flagmen and Brakemen .....	2.66	4.00	120.00
Baggagemen handling both express and dynamo .....	3.23	4.84	145.20

\*Rates specified for "Baggagemen handling express" apply to baggagemen in the employ of railroads who shall be paid exclusively by the railroads.

(b) The above rates apply on all roads except exclusively suburban roads doing passenger business only, upon which the following rates shall apply:

CLASS.	Per mile.	Per day.	Per month.
	Cents.-		
Conductors .....	3.00	\$4.50	\$135.00
Ticket Collectors .....	2.77	4.16	124.80
Guards performing duties of brakemen or flagmen...	2.45	3.68	110.40

ARTICLE II—*Basic Day*: (See Art. II—Supp. 16.)

ARTICLE III—*Overtime*: (See Art. III—Supp. 16.)

ARTICLE IV—*Guarantees*: (See Art. IV—Supp. 16.)

### FREIGHT SERVICE.

ARTICLE V—*Rates of Pay*: (See Art. V—Supp. 16.)

### MILK, MIXED AND MISCELLANEOUS TRAIN SERVICE.

ARTICLE VI—*Basic Day and Overtime*:

(a) In all road service, except passenger service, 100 miles or less, eight hours or less (straight-away or turn-around), shall constitute a day's work. Miles in excess of 100 will be paid for at the mileage rates provided.

(b) On runs of 100 miles or less, overtime will begin at the expiration of eight hours; on runs of over 100 miles, overtime will begin when the time on duty exceeds the miles run divided by  $12\frac{1}{2}$ . Overtime shall be paid for on the minute basis, at a rate per hour  $\frac{3}{16}$  of the daily rate.

(c) Road conductors and trainmen performing more than one class of road service in a day or trip will be paid for the entire service at the highest rate applicable to any class of service performed. The overtime basis for the rate paid will apply for the entire trip.

ARTICLE VII—*Guarantees*: (See Art. VII—Supp. 16.)

ARTICLE VIII—*Held Away from Home Terminal*:

Conductors and trainmen in pool freight and in unassigned service held at other than home terminal will be paid continuous time for all time so held after the expiration of 16 hours from the time relieved from previous duty, at the regular rate per hour paid them for the last service performed. If held 16 hours after the expiration of the first 24 hours' period, they will be paid continuous time for the next succeeding eight hours, or until the end of the 24-hour period, and similarly for each 24-hour period thereafter. Should a conductor or trainman be called for duty after pay begins, time will be computed continuously provided that, if overtime accrues on the trip, that portion of the overtime due to starting pay at the expiration

of the 16-hour period instead of at the time actually required to report for duty shall be paid at the pro rata rate in order that time and one-half time for overtime will not be so applied as to increase the rates paid for time growing out of the held away from home terminal rule.

For the purpose of applying this rule the railroad will designate a home terminal for each crew in pool freight and in unassigned service.

ARTICLE IX—*Monthly, Daily or Trip Basis*: (See Art. IX—Supp. 16.)

ARTICLE X—*Arbitrariness and Special Allowances*:

(a) Excepting payments under rules applying to work performed at initial and final terminals, and to final terminal delays, all arbitrariness and special allowances applying to road service other than passenger, under rules, regulations, or practices, which conflict with the payment of single time, in miles or hours, from the time required to report for duty until released from duty at the end of the trip shall be eliminated.

On roads where no rules are in effect covering work performed at terminals, the practices in regard to the character of work permissible or duties required at terminals are not to be extended.

(b) Where the special payments under the rules, regulations or practices which are retained under Section (a), have been allowed independently or separately from the trip, they will continue to be so allowed, but at the former rates.

### EXAMPLES.

(b-1) Under certain rules, allowed a minimum of 1 hour for switching independently of time of road trip; road time begins at expiration of time consumed performing switching.

Required to report at A, 7.00 a.m.; switches at A until 7.30 a.m.; runs A to B, 100 miles; arrives at B, 4.30 p.m.; switches 1 hour at B; relieved at B, 5.30 p.m.

Compensation—100 miles plus 1 hour initial switching at former rates, 1 hour road overtime and 1 hour final switching both at  $\frac{3}{16}$  of the daily rate.

(b-2) Under certain rules, allowed a minimum of one hour for switching independently of time of road trip, but road time begins at expiration of the time allowed.

Required to report at A, 7.00 a.m.; switches at A until 7.30 a.m. (allowed 1 hour for 30 minutes' work); road time begins at A, 8.00 a.m.; runs A to B, 100 miles; arrives at B, 3.25 p.m.; relieved at B, 3.30 p.m.; time on road trip, 7 hours 30 minutes.

Compensation—100 miles plus 1 hour switching at former rates.

(3) Under same rules as stated in Example b-2. Required to report at A, 7.00 a.m.; switches at A until 7.30 a.m. (allowed 1 hour for 30 minutes' work), road time begins at A, 8.00 a.m.; runs A to B, 100 miles; arrives at B, 4.25 p.m.; relieved at B, 4.50 p.m.; time on road trip, 8 hours 50 minutes.

Compensation—100 miles plus 1 hour switching at former rates and 50 minutes' road overtime at 3/16 of the daily rate per hour.

Where, under any schedule rules, it has been the practice to allow the special payments and in addition calculate the road overtime for the trip from the time required to report for duty until final release at end of day, the duplication of time is eliminated and compensation for the trip will be calculated on the basis shown in the foregoing examples.

(c) Where the special payments under the rules, regulations or practices which are retained under Section (a) have been absorbable by the train movement not exceeding the speed basis of the overtime rule, they shall be allowed as follows:

1. When the train reaches the final terminal before overtime commences calculated from the time of reporting for duty, the special payments will be allowed at the former rates.

#### EXAMPLES.

Under certain rules, allowed 1 hour for switching when time amounts to 30 minutes or more; less than 30 minutes not counted.

Required to report at A, 7.00 a.m.; switches at A, 7.00 a.m. to 7.30 a.m.; leaves A at 7.30 a.m. and runs to B, 100 miles; arrives at B, 2.25 p.m.; switches 35 minutes; relieved at B, 3.00 p.m.

Compensation—100 miles plus 1 hour switching at each initial and final terminal at former rates.

2. If the train is not on overtime on arrival at the final terminal, but the overtime period commences before final release, special payments accruing at the final terminal up to the period when overtime commences will be allowed on the basis of the former rates, but time thereafter shall be paid on the actual minute basis at 3/16 of the daily rate.

#### EXAMPLES

(a) Under same rule as used in examples of Section (c)—1 and 2; final terminal delay being paid on same basis as shown for switching.

Required to report at A, 7.00 a.m.; leaves A at 7.15 a.m. and runs to B, 100 miles; arrives at B, 2.00 p.m.; delayed at final terminal 1 hour 20 minutes; relieved at B, 3.20 p.m.

Compensation will be 100 miles plus 1 hour final delay at former rates for period until overtime commences, and for the time thereafter, 20 minutes' final delay at 3/16 of the daily rate per hour.

(b) Under rule allowing minimum of 1 hour for switching, etc., consuming 30 minutes or more.

#### RUN OF 100 MILES.

Required to report at A, 7.00 a.m.; leaves A at 7.25 a.m.; arrives at B, 2.45 p.m.; switches until 3.25 p.m.; relieved at B, 3.25 p.m.

Under the rule 1 hour pay is allowed for switching at final terminal and as 1 hour's pay equals 40 minutes at 1½ time, the 1 hour terminal switching at pro rata will be paid in addition to the 100 miles.

(c) If in a similar case the switching at final terminal consumed one (1) hour, and crew is released at 3.45 p.m.—1 hour after arrival—they would receive 1 hour at pro rata, or overtime on the actual minute basis after 8 hours on duty at 3/16 of the daily rate per hour, whichever is the greater.

(d) Where the special payments under the rules, regulations, or practices which are retained under Section (a), have been applied on varying bases in relation to the time of the road trip and not as covered by Sections (b) or (c) they will be applied as follows:

1. Where the allowance has correspondingly extended the period before which overtime begins, time of the road service will continue to be so calculated.

#### EXAMPLES.

(a) Under certain rules, a minimum of 1 hour's pay is allowed for 30 minutes' work or more, but the time of road trip is extended to correspond with the time consumed in the switching, etc.

Required to report at A, 7.00 a.m.; switches at A until 7.30 a.m.; road time begins at A at 7.00 a.m.; runs A to B, 100 miles; arrives at B, 3.25 p.m.; relieved at B, 3.30 p.m.; total time on duty, 8 hours 30 minutes.

Compensation—100 miles plus 1 hour's switching at former rates.

(b) Required to report at A, 7.00 a.m.; switches at A until 7.30 a.m.; road time begins at A at 7.00 a.m.; runs A to B, 100 miles; arrives at B, 4.25 p.m.; relieved at B, 4.30 p.m.; total time on duty, 9 hours 30 minutes.

Compensation—100 miles, plus 1 hour's switching at former rates and 1 hour overtime at 3/16 of the daily rate per hour.

(c) Under certain rules, a minimum of 1 hour's pay is allowed for 30 minutes' work or more, and time of road trip is extended to correspond with the time paid for before overtime commences.

Required to report at A, 7.00 a.m.; switches at A until 7.30 a.m.; road time begins at A at 7.00 a.m.; runs A to B, 100 miles; arrives at B, 3.25 p.m.; relieved at B, 3.30 p.m.

As the period when overtime accrues is extended to correspond with the allowance for the switching and 1 hour's pay is equal to 40 minutes at 1½ time, the period when overtime commences is extended to 8 hours 40 minutes. In the example, 8 hours and 30 minutes elapsed from time of going on duty; therefore the hour at former rates would be paid for the switching, with 100 miles for the trip.

(d) Under same rule as shown in Example (c) of Section (d)-1.

Required to report at A, 7.00 a.m.; switches at A until 7.30 a.m.; road time begins at A at 7.00 a.m.; runs A to B, 100 miles; arrives at B, 4.25 p.m.; relieved at B, 4.30 p.m.; total time on duty, 9 hours 30 minutes.

The hour allowance for switching extends by 40 minutes the period when overtime commences. Compensation will be 100 miles, plus 1 hour at pro rata for the switching, plus 50 minutes' overtime at 3/16 of the daily rate per hour.

2. Where either the allowance, or the overtime based on the total time on duty, whichever is the greater, has been paid, payments will continue to be so applied.

(a) Required to report at A, 7.00 a.m.; switches at A until 9.00 a.m.; leaves A at 9.00 a.m. and runs to B, 100 miles; relieved at B, 3.00 p.m.

Compensation—100 miles plus 2 hours' switching at former rates.

(b) Required to report at A, 7.00 a.m.; switches at A until 9.00 a.m.; leaves A at 9.00 a.m. and runs to B, 100 miles; relieved at B, 4.00 p.m.

Compensation—100 miles plus 2 hours' switching at former rates, such allowance being greater than 1 hour overtime at one and one-half time.

(c) Required to report at A, 7.00 a.m.; switches at A until 9.00 a.m.; leaves A at 9.00 a.m. and runs to B, 100 miles; relieved at B, 4.20 p.m.

Compensation—Either 100 miles plus 2 hours' switching at former rates, or 100 miles and 1 hour 20 minutes' road overtime at 3/16 of the daily rate per hour, because the money value of the former allowance and the money value of the road overtime at 3/16 of the daily rate are equal.

(d) Required to report at A, 7.00 a.m.; switches at A until 9.00 a.m.; leaves A at 9.00 a.m. and runs to B, 100 miles; relieved at B, 5.00 p.m.

Compensation—100 miles plus 2 hours' overtime at 3/16 of the daily rate per hour. In this case the money value of the road overtime at 3/16 of the daily rate exceeds the allowance of 2 hours' switching at former rates.

NOTE.—In calculating the time engaged in switching, under the rules, regulations, or practices which are retained under Section (a), it is understood that the time will be continuous from the time the work is begun until it is completed and train is coupled together.

(e) Special provisions of schedules for irregular conditions such as crews called and not used, deadheading, attending court and investigations and similar miscellaneous rules covering conditions which are not connected with the handling of a train, and which provide for payments on the basis of "overtime rates" shall be changed to provide for payments at the former rates, it being the intent that the time and one-half basis shall not apply in such cases. Where, under such rules, time in excess of the limits of the day is paid for as overtime, the overtime rates of this Order apply.

#### ARTICLE XI—*Beginning and Ending of Day:*

(a) In all classes of service other than passenger, trainmen's time will commence at the time they are required to report for duty, and shall continue until the time they are relieved from duty. All advance call time rules are superseded, and the management may designate the time for reporting for duty.

(b) Trainmen in pool or irregular freight service may be called to make short trips and turn-arounds with the understanding that one or more turn-around trips may be started out of the same terminal and paid actual miles with a minimum of 100 miles for a day, provided, (1) that the mileage of all the trips does not exceed 100 miles, (2) that the distance run from the terminal to the turning point does not exceed 25 miles, and (3) that trainmen shall not be required to begin work on a succeeding trip out of the initial terminal after having been on duty eight consecutive hours, except as a new day subject to the first-in first-out rule or practice.

#### YARD SERVICE.

ARTICLE XII—*Rates of Pay:* (See Art. XII—Supp. 16.)

ARTICLE XIII—*Basic Day:* (See Art. XIII—Supp. 16.)

ARTICLE XIV—*Overtime:* (See Art. XIV—Supp. 16.)

ARTICLE XV—*Assignments:* (See Art. XV—Supp. 16.)

ARTICLE XVI—*Starting Time:* (See Art. XVI—Supp. 16.)

ARTICLE XVII—*Calculating Assignments and Meal Periods:* (See Art. XVII—Supp. 16.)

ARTICLE XVIII—*Point for Beginning and Ending Day:* (See Art. XVIII—Supp. 16.)

ARTICLE XIX—*Lunch Time:* (See Art. XIX—Supp. 16.)

ARTICLE XX—*Arbitraries and Special Allowances:*

(a) Where it has been the practice or rule to pay a yard crew, or any member thereof, arbitraries or special allowances, or to allow another minimum day for extra or additional service performed during the course of or continuous after end of the regularly assigned hours, such practice or rule is hereby eliminated, except where such allowances are for individual service not properly within the scope of yard service, or as provided in Section (b).

(b) Where regularly assigned to perform service within switching limits yard men shall not be used in road service when road crews are available, except in case of emergency. When yard crews are used in road service under conditions just referred to, they shall be paid miles or hours, whichever is the greater, with a minimum of one hour, for the class of service performed, in addition to the regular yard pay, and without any deduction therefrom for the time consumed in said service.

ARTICLE XXI—*Rules for Application of this Order:*

(a) In consideration of granting overtime on the basis provided in Article VI all rules, regulations or practices, and Interpretations to Supplement No. 16 to General Order No. 27 applicable to freight service covered by Article V, which conflict with the application of the rules contained in this order shall be changed to conform therewith.

(b) Rates of pay in road or yard service, which are not affected by Article IX, and which are higher than those herein provided, shall not be reduced, and money monthly guarantees in passenger service shall be preserved as per Section (a) of Article IV. Existing differentials for divisions or portions thereof; or mountain or desert territory as compared with valley territory, whether expressed in the rates or constructive mileage allowances are preserved.

(c) Questions and answers on interpretations of certain articles of this order are listed below:

## ARTICLE I.

QUESTION 1. Do train auditors or ticket collectors who are not transportation employees and who have no status as such, come within the provisions for ticket collectors?

ANSWER. No.

QUESTION 2. Shall baggagemen, flagmen or brakemen who assist conductors in collecting tickets and fares receive the rate provided for assistant conductors or ticket collectors?

ANSWER. Only where designated and classified as assistant conductors or ticket collectors.

QUESTION 3. In view of different rates being provided for baggagemen handling express, and baggagemen not performing such work, how will baggagemen handling express on certain days and not handling it on other days be compensated?

ANSWER. On any day where express is handled the combination rate will apply for that day; in such cases minimum monthly guarantee shall apply.

QUESTION 4. Does the provision for higher rates for handling express cancel all existing understandings between the managements and the men in regard to bonuses or special compensation that they have heretofore received from either their road or the express company for handling express?

ANSWER. Yes; provided the new rates do not reduce previous combined earnings.

## ARTICLE III.

QUESTION 1. Will it be permissible for the managements to definitely assign crews on the basis of a minimum day in each direction?

ANSWER. Yes (in accordance with decisions of Commission of Eight and Arbitration Boards).

QUESTION 2. May railroads which have a common overtime basis applicable to passenger service, as described in Sections (a) and (b), adopt Sections (a) and (b)?

ANSWER. Sections (a) and (b) of Article III apply to all passenger service.

## PRICES RETAIL AND WHOLESALE IN CANADA, MARCH, 1920

THE movement in prices continued upward, the chief increases appearing in vegetables, sugar, metals and building materials, but there were appreciable increases in grains and fodder, livestock and meats, fruits, and miscellaneous foods, with smaller increases in a number of articles in nearly all of the groups. There were seasonal decreases in eggs, fish, and in hides.

In retail prices the cost of a weekly family budget of staple foods in some sixty cities averaged \$15.98 at the middle of March as compared with \$15.77 at the middle of February, \$13.05 in March, 1919, and \$7.68 in March, 1914. The chief changes were substantial increases in sugar and potatoes, with slight increases in meats and a number of the other items. Eggs declined 10 cents per dozen. Dairy butter averaged slightly higher, but creamery butter slightly lower. Coal, wood, coal oil and rent averaged slightly higher.

In wholesale prices the index number rose to 349.0 for March as compared with 343.5 for February, 277.6 for March, 1919, and 137.0 for March, 1914. The chief features of the movement were increases in metals and in building materials. Slight increases appeared in grain, fodder, livestock and meats, fruits and vegetables, miscellaneous foods, and

textiles, while there were decreases in dairy products, fish and hides. As compared with prices in March, 1919, increases appeared in all the groups, except Animals and Meats, Drugs and Chemicals.

The accompanying tables and notes give details as to the prices movement during the month and as compared with the same month in previous years.

The table of retail prices gives statistics for some 60 localities in Canada, having a population of approximately 10,000 or over. Quotations are obtained by the correspondents of the LABOUR GAZETTE, resident in each locality, from representative dealers doing a considerable trade with workingmen. All prices are for delivered goods. The exact quality for which the quotation is given is set forth in the case of each commodity, and every effort has been made to ensure that the quotations in each case refer to the same class of commodity in order that the statistics may be available for purposes of comparison from month to month, from city to city, etc.

Owing to varying local conditions and customs in cutting meats, in buying groceries in larger or smaller quantities, in buying wood four feet long or in stove lengths, etc., such comparisons will reflect general conditions better if averages

over some time or for several cities are taken, and if the several articles are grouped together as in a family budget in order that the tendencies to be comparatively high or low in some cases may be offset by the opposite tendency in other cases. Owing to the difficulties in securing quotations for exactly the same quality of foods for each city, from month to month and year to year, or in obtaining and compiling figures from so large a number of dealers that the differences in quality would be largely eliminated in the averages for each city and province each month, it is preferable to make such comparisons by using index numbers calculated for each commodity from the prices reported by each dealer for each city, as is done in the Departmental index number of wholesale prices, and in the index numbers of retail food prices of various countries. The calculations of such index numbers involve the use of series of quotations over a considerable period of time, with somewhat elaborate statistics for proper weighting, and require considerable time for the calculation each month. The calculation of a family budget in terms of the average prices, for the Dominion, for each province or each city, is comparatively a simple and short process and affords approximately the same results in showing the comparative changes in price levels from time to time.

The calculation and publication of such a budget each month in the LABOUR GAZETTE was therefore decided upon, and commenced in August, 1915, as the index number of wholesale prices which had previously reflected approximately the changes in the cost of living no longer did so, owing to the violent changes in prices of metals, chemicals and other war materials included in the list. The budget adopted for this purpose and published in the LABOUR GAZETTE each month since August, 1915, appeared annually in an appendix to the reports on wholesale prices in Canada back to 1911, and also in the report of the Board of Inquiry into the Cost of Living, 1914-1915, including prices for

December, 1900 and 1905. Only the commodities for which quotations were available back to 1910 were included, but arrangements were made to secure quotations for many more lines in the future with a view to the calculation eventually of a complete index number of the retail prices of all commodities of importance in family consumption.

This weekly budget for a family of five, including staple foods, laundry starch, coal, wood and coal oil, and rent, was based upon the estimated importance of the various commodities included, the quantities being slight modifications of those employed in similar calculations by the various official bodies. For some articles comparatively large quantities were included, owing to the omission of other important foods of the same class. For instance, the only fruits were evaporated apples and prunes and the only fresh vegetable was potatoes. As market conditions affecting these usually affect the prices of other fruits and vegetables somewhat similarly, the relative proportion of expenditure on the various foods therefore tends to be maintained. In fuel and lighting the quantities were estimated on a similar principle, anthracite coal being used chiefly east of Manitoba, and soft coal and wood in the western provinces, while no allowance was made for the quantities required in the various localities owing to climatic conditions, nor for the difference in quality. It was estimated, when the budget was first published in 1912, that these calculations represented from sixty to eighty per cent of the expenditure of an ordinary family, according to the total income. For the average family of five the expenditure on these items of food, fuel, light and rent would be perhaps two-thirds or about sixty-five per cent of the total income. While the budget serves to show the increase or decrease from time to time in the cost of the items included it does not purport to show the minimum cost of food and fuel supplies for an average family in the Dominion or any one province. The quantities of meats, dairy products, cereals, etc., included

were designed to afford a liberal supply for the healthy family of a man at hard physical work. On the other hand an average family with an income sufficient to do so would buy less meat, etc., but more fruit, fresh and canned vegetables, etc.; so that the comparative expenditure would be little changed.

In the table of retail prices the list of commodities includes over one hundred staple foods and groceries, coal, wood and coal oil, the number of articles having been increased twice since January, 1910, when the regular publication of these statistics was begun. The original list contained the thirty foods and groceries in the weekly family budget together with coal, wood, coal oil and rentals, and in 1916 it was extended to include forty-one foods and groceries, as well as seven other items covering fuel, light and rentals, so that quotations for this list of forty-eight items were published monthly from the beginning of 1916 until February, 1920. At this date quotations for wood in stove lengths and for mill wood, etc., were also included.

The quotations for rent are the prevailing rates for six-roomed houses of two classes in districts extensively occupied by workmen. The first class is of houses in good condition, favourably located in such districts, with good modern conveniences. The second class is of houses in fair condition less desirably located, but still fairly central without modern conveniences or with incomplete conveniences. From January, 1910, until September, 1911, rentals were quoted for simply "a typical workingman's dwelling of the better class." Since that date quotations have been given for two classes of workmen's houses, with and without sanitary conveniences. Owing to variations in houses and local conditions such as building by-laws, water supply, sewer connection, etc., it was found that the present definition of the two classes describes more clearly and accurately the kinds of houses commonly rented and actually quoted since 1911.

The index number of wholesale prices is based on the quotations for 271 commodities, and is the simple average of

the percentages of current prices of the several commodities in relation to the average prices for the base period, 1890-1899, these being therefore made equal to 100. The quotations for most farm products are obtained weekly and averaged for the month, the quotations for other commodities are taken for the middle of the month. The table of index numbers shows the changes by groups and sub-groups for the previous month and for corresponding months back to 1913.

### Retail Prices

Meats were slightly higher on the average throughout the country. In sirloin steak, increases appeared in many of the cities from Ottawa to the Pacific Coast. In round steak and other beef cuts there were comparatively few changes. In veal, as is usual, prices fluctuated, rising in some of the cities but falling in others. Mutton advanced in a number of the cities. Pork, bacon and lard showed a number of slight advances. Eggs were lower in nearly all of the cities, the decrease being greatest in Ontario and the Western Provinces. Milk advanced at Charlottetown and Stratford, but declined at Kingston, Brandon, Calgary and Nelson. Butter advanced in some of the cities, but declined in others, the averages in some provinces and for the Dominion being higher for dairy butter but lower for creamery, and *vice versa*. Bread and flour were almost unchanged, but rolled oats advanced in several cities. Canned vegetables showed very little change. Potatoes advanced in many of the cities. Fruit and jam showed little change. Sugar advanced appreciably in nearly all the cities, prices being two cents higher than in February and four cents higher than in January in many cases. Tea, coffee, vinegar, salt, etc., were steady, but laundry soap was up in many of the cities. Anthracite coal advanced between 25 and 50 cents per ton in a number of the cities. Bituminous coal was also higher in four cities in Ontario, two in New Brunswick, at Win-

nipege and Lethbridge. Wood advanced in a small number of cities. In coal oil there were some increases, but these were more numerous after the middle of the month owing to an increase in the wholesale price. Rent advanced in a number of the cities, and all round advances to take effect later were reported in nearly all localities.

### Wholesale Prices

**GRAINS AND FODDER.**—Wheat was unchanged at the prices fixed early in the year. Other grains rose but receded toward the end of the month. Barley fluctuated at Winnipeg between \$1.68 and \$1.73, but fell to \$1.64 $\frac{7}{8}$  in the last week. At Toronto good malting barley rose from \$1.77 to \$1.86, but fell to \$1.80. Oats advanced steeply, rising from 94c. to \$1.01 at Winnipeg and from \$1.00 to \$1.04 at Toronto. American corn advanced at Toronto from \$1.87 to \$1.96. Flaxseed rose from \$5.16 to \$5.56. Rye rose from \$1.80 to \$1.88 and fell to \$1.85. Hay rose from \$26 to \$29-30 for No. 2 timothy at Montreal.

**ANIMALS AND MEATS.**—Best butcher cattle were higher at Winnipeg, being up to \$11.50-\$12.50 per hundred pounds. At Toronto choice butchers were steady at \$11-\$13.25, the price reached in February. Dressed beef was steady at the higher levels reached in February. Hogs rose at shipping points in Ontario from \$17.50 per hundred pounds to \$18.75, but fell to \$17.75 in the last week. Bacon advanced from 40-42c. to 42-43c. at the end of the month, and medium weight hams rose from 37c. to 38-39c. Sheep rose to \$8-15, but eased off to \$8-13. Turkeys were up to 53-54c. per lb.

**DAIRY PRODUCTS.**—Finest creamery butter at Montreal fell to 60-61c. per lb. at the beginning of the month, but rose to 67-68c. later. Creamery solids advanced at Toronto from 58c. to 63c. Dairy butter was steady. Cheese was up from 26 $\frac{1}{2}$ -27c. at Montreal. Eggs

declined at Montreal from 76-77c. to 55c., and at Toronto from 74-75c. to 55-56c. In some cities prices of milk were reduced to take effect in April.

**FISH.**—Salt mackerel was down from 12c. per lb. to 10c. at the Atlantic coast. Stocks of salt herring were being reduced and prices were steady at \$6.50 per barrel f.o.b. vessel.

**FRUITS AND VEGETABLES.**—Bananas were up, but oranges were lower. Potatoes were up from \$4.00 per bag to \$4.25-4.50 in small lots at Toronto, and at Montreal from \$3.50 to \$3.75-3.85 in car lots. Onions were firmer. Canned corn declined 5c. and 10c. per dozen.

**MISCELLANEOUS FOODS.**—Flour and bread were steady. Soda biscuits rose from 16c. per lb. to 17c. Rolled oats advanced but tapioca declined. Sugar rose from \$14.71 per hundred at Toronto to \$16.51-16.76. Maple sugar came on the market for the new season at 30c. per lb. at Montreal as compared with 25c. a year ago. Glucose, cream of tartar and baking soda were higher.

**TEXTILES.**—Raw cotton was higher at 41c. per lb. and coloured cottons averaged higher at 110.72c. per lb. Raw silk dropped from \$16.00 per lb. to \$13.75 for Japan filatures, Kansai No. 1 at New York. Silk thread advanced. Jute and hessians declined slightly. Flax fibre rose to 70-80c. per lb. Oilcloth rose 10 per cent.

**HIDES, LEATHER, BOOTS AND SHOES.**—Beef hides declined to 23c. per lb., calfskins to 45c., and horse hides to \$8-10 each.

**METALS AND IMPLEMENTS.**—Iron bar, tinplates, wrought iron scrap, steel bar and cast steel advanced approximately 10 per cent. Brass was up, but copper was down. Quicksilver, lead, solder and zinc were up, but bar silver and tin declined. Axes, chain, soldering coppers and horseshoes advanced.

\*Preliminary figures. †Nine commodities off the market, fruits, vegetables, etc. One line of spelter was dropped in 1915.

**FUEL AND LIGHTING.** — Gasoline and coal oil advanced late in the month.

**BUILDING MATERIALS.** — Spruce deals rose at New Brunswick from \$36 to \$38 per M. Pine, birch and maple advanced at Toronto, and fir and shingles at Winnipeg. Lime, lead pipe, nails, sash cord, hinges, white lead, linseed oil, turpentine, window glass and putty advanced.

**HOUSE FURNISHINGS.** — Sad irons advanced again, reaching \$2.20 per set.

**DRUGS AND CHEMICALS.** — Alcohol, alum, bleaching powder and caustic soda advanced, and many lines of heavy chemicals were reported to be very scarce and difficult to obtain.

**MISCELLANEOUS.** — Malt, rope and laundry starch were higher, but binder twine and raw rubber declined.

## PRICES IN THE UNITED KINGDOM AND IN OTHER COUNTRIES

THE accompanying tables and the following notes give the latest available statistics as to prices movements in other countries and as compared with Canada.

### United Kingdom

In the United Kingdom, there was a fall in the level of retail food prices between the first of February and the first of March, owing mainly to a drop in the prices of eggs from 5½d. each to 4d. each. Milk and fish were also lower, but butter, margarine and potatoes were higher. The level of retail food prices at the beginning of March was therefore 133 per cent higher than in July, 1914, as shown by the index number of the Ministry of Labour. At the first of April, however, the index number had risen to a point 139 per cent higher than in July, 1914. Wholesale prices were also slightly upward, the index number of the London *Economist* reaching 379.6 at the end of March as compared with 370.9 at the end of February, and 260.1 at the end of March, 1919, which had marked the low point of the brief downward movement after October, 1918.

### Denmark

The Danish Statistical Department reports twice each year as to the increase in the cost of maintaining a family in Copenhagen. The report for January indicated that the increase over the cost in July, 1914, was 141.9 per cent, which

is 14.6 per cent higher than in July, 1919, and 27.4 per cent higher than in January, 1919. The greatest increases since the beginning of the war were in meats, flour, clothing and fuel, all of which were over 200 per cent. The chief increases since January, 1919, were in beef, pork, milk, cheese, eggs and fuel, all of which were up over 40 per cent.

### Iceland

The Icelandic Statistical Department reported the price of foods at Reykjavik in October, 1919, to be 10 per cent higher than in July, and 267 per cent higher than in July, 1914.

### Italy

The general level of food prices at Rome in January was reported by the Municipal Labour Office to be 9.3 per cent higher than a month before and 175 per cent above the prices in the first half of 1914. The average increase in prices of all household necessities was 7.2 per cent over the pre-war level. The Municipal Office of Labour of Milan reported that the cost of maintaining a family on the pre-war standard in February was one per cent higher than in January, and 282 per cent higher than in the first half of 1914, food being 1.4 per cent higher for the month and 318 per cent higher than before the war, while clothing was 293 per cent above the pre-war level, heat and light 325 per cent, and rent 8.3 per cent.

### South Africa

The cost of living index number calculated by the Director of the Census for the Union of South Africa averaged 1,401 for the year 1919 as compared with 1,300 for 1918, 1,250 for 1917, and 1,077 for 1913. The index number for December, 1919, however, was 1,548, as compared with 1,331 for January. All the groups advanced during the year, but the increases in fuel and in meat were slight. In wholesale prices the index number was up to 2,079 in October as compared with 1,799 in January, 1,663 in January, 1918, and 1,109 in January, 1915. During the

year there were decreases in metals, building materials, chemicals and in the miscellaneous group, but there were increases in all the other groups.

### United States

The United States Bureau of Labour Statistics reported the prices of staple foods in January to be 101 per cent higher than in 1913, the greatest increases being in potatoes, sugar, rice, cornmeal, flour, eggs, lard, ham, bacon, pork chops, all of which rose over 100 per cent. The index number for January was 201 as compared with 197 for December, 185 for January, 1919, and 100 for January, 1914.

## FIRST ANNUAL REPORT OF THE NEW BRUNSWICK WORKMEN'S COMPENSATION BOARD

THE first annual report of the Workmen's Compensation Board for New Brunswick covers the period from its organization on September 18, 1918, to December 31, 1919. For the purpose of obtaining the names of all employers of labour and the classification of industries, the Board undertook an industrial census of the province. At the close of 1919, 2,115 payrolls had been submitted to the Board for assessment. With an estimated total pay-roll of \$21,396,010, the Board adopted the capitalized reserve plan of assessment, and the rates fixed were calculated to provide an amount sufficient to cover:

(a) All compensable claims payable during the year 1919; (b) the reserve necessary to meet the pension claims accruing in future years, arising from accidents which happened in 1919; (c) an amount to be set aside for the purpose of establishing a disaster reserve, and (d) the cost of administration.

The total amount of assessment received was \$427,854.

On August 1, 1919, a regulation of the Board became effective providing for the payment of first-aid and hospital care to injured workmen in addition to

the compensation otherwise provided. This, however, was found not to work satisfactorily owing to variance of opinion as to the meaning of "first-aid," and hope was expressed that legislation would be introduced providing for full medical aid and hospital care during the disability of injured workmen.

Up to December 31, 1919, there were reported to the Board 2,746 accidents, which included 37 deaths, 1,583 cases of temporary disability, 113 cases of partial disability, 661 minor accidents and 342 claims in assembly and partially disposed of. The compensation awarded, and estimated to be awarded for accidents up to December 31, 1919, is as follows:

Compensation paid other than pensions .....	\$ 89,619.27
Transferred to pension reserve ...	67,610.85
Compensation estimated for claims reported but not completed ....	10,087.92
Compensation estimated for unreported claims .....	47,729.31
First aid .....	778.51
Hospital fees .....	1,011.43

Total compensation for the period. \$216,837.29

The expenses for administration amounted to \$41,473.

## RECENT LEGAL DECISIONS AFFECTING LABOUR

**SOME** time ago the International Brotherhood of Electrical Workers, through its Canadian vice-president, revoked the charter of Local Union No. 213 of the Brotherhood, which had its headquarters at Vancouver, B.C., and attempted to take over the

**International Union cannot revoke charter of an active local or seize its assets**

books, money and assets of the local union. Officers of the local union then brought action against the International Brotherhood for the retention of its affiliation, and, at the same time, the Brotherhood brought an action against the local for possession of its books, money and other assets. The two actions were consolidated, and the trial, which lasted for fifteen days, resulted in a decision in favour of the local union. In summing up his judgment, Mr. Justice Macdonald said:

I have found that the members of the local union had property rights which were destroyed, and were entitled to redress. I feel no doubt that I can thus declare the rights of the party and should apply a remedy as far as possible. There will be judgment accordingly, in apt terms, stating that the charter of the local union is restored and was improperly suspended and revoked. Also, that the members of the local union were, and are, entitled to all rights and privileges of membership in the brotherhood as well as the local union and are not affected by the suspension and revocation of the charter. It would be futile to restrain the Brotherhood or any of its officials outside the jurisdiction of the court from depriving the local union, or its members, of any such rights and privileges. As an injunction operates *in personam*, I will enjoin and direct Ingles [Canadian vice-president, I.B.E.W.] as a resident of the province. It follows without a lengthy discussion that the action of Ingles, as a representative officer of the Brotherhood, against certain members of the local union,

and particularly in connection with its funds, fails. I should add that I would have come to this conclusion aside from my determination in the Morrison action, as I cannot see upon what principle the Brotherhood can claim the funds of the local union after suspension and revocation of its charter. These moneys were not subscribed, as a fund to be appropriated, or used, in any way by the Brotherhood. They were for the benefit of the local union. It is true that the obligation of some of the officials of the local union required delivering over of all property to the general president of the I.B.E.W., but such obligation is not consistent in its terms with the previous portion of the pledge of the officials to make such delivery to their successors in office. Then section 4 of article 31 declares that the funds and property of the local union cannot be divided among the members individually and should be the property of the local union while five members exist. It is only when the local union finally dissolves that its charter, books, papers and funds shall be forwarded to the international secretary, but even then they are not declared to be the property of the Brotherhood.

Members of the local union who are interested in the funds might, on sufficient grounds, have applied to change the trustees but this was not even suggested nor did anyone appear in support of the position assumed by Ingles nor as advocating any change in the custody of funds. I do not think Ingles, upon behalf of the Brotherhood, can succeed in his action on any grounds.

The costs in connection with these actions, coupled with a lengthy trial, have been heavy. The plaintiff in the first action and the defendant in the second are entitled to the general costs of both actions.

The defendants in the first action, however, are entitled to the costs upon the issue or 'event' upon which they succeed—as to their actions with respect to the suspension and revocation of the charter being in good faith there will be judgments accordingly.

(British Columbia—*Morrison et al. vs. Ingles et al.* *Ingles et al. vs. Morrison et al.*)

A youth employed as a carter was sent by his employer to take an article

**Employer must  
compensate  
carter hurt  
when helping a  
third party**

to a mill. On arriving there he placed himself under the orders of the foreman of the mill, and, in working for him, he met with an accident, breaking his

leg. His mother brought action against his employers under the Workmen's Compensation Law of Quebec. It was contended by the defendants that: (1) The plaintiff had not legally been named tutor to her son, (2) the law of industrial accidents does not apply to the case in question, and (3) at the time of the accident the son of the plaintiff was not working for the defendant, but for a third party. The Superior Court of Quebec supported the claims of the defence and dismissed the action. An appeal was taken to the Court of Review, which found in favour of the plaintiff, reversing the judgment of the Superior Court. It was held by the Court of Review that the defendant had not denied that the plaintiff was tutor and had not proved that her nomination was illegal and irregular, and the nomination having been made it could not be attacked indirectly. It was further held that both parties admitted that the plaintiff's son had been requested by the foreman of the mill to help him load the vehicle, and that this aid rendered was in connection with his work, that the employer should expect his employees to help in the loading, and even if the defendant had not admitted that his employees should do all that was asked of them, even if it was not proved that the plaintiff's son had been in the habit of helping to load his vehicle, the accident would still have occurred in the course of his employment. The plaintiff's son having suffered a permanent partial incapacity of 25 per cent, she was awarded \$1,130.64, less \$300, which she had already received from his employer, this sum being the capitalized value of half his annual loss due to his

injury. (*Quebec—Dame Roy vs. Lemieux.*)

A boy was employed as labourer on the farm lands of the Royal Agricultural

**Father may  
sue for minor  
son's wages**

School, an incorporated company of the province of Quebec. The school became insolvent and his father then

brought an action in the Superior Court against the directors jointly and severally to recover \$137.85 for wages earned by his minor son. On behalf of the defendants the question was raised as to whether the plaintiff, not having done the work himself, could legally succeed in this privileged claim. With regard to this point the reply of the Court was as follows: "True, plaintiff personally did not perform this work for the Royal Agricultural School, but he sent his son and horses to do it. That amounts in law to the same thing, for privilege in support of such a claim is granted in regard to the work and not to the individual. Plaintiff's son forms part of plaintiff's household; he lives with his father, works for his profit, and is dependent upon his father for everything, as are the other minor members of the family. It is, then, the wages of a labourer that the plaintiff demands in this action, and he has a right to the recourse which Article 5971 of the revised statutes gives to him against the directors personally for wages of labourers due by the company, the conditions and formalities of the said statute having been previously complied with."

Judgment was therefore declared in favour of the plaintiff. (*Quebec—Bellefleur vs. Armstrong et al.*)

Five carpenters, all returned soldiers, brought an action for wages under the

**Wages recovered under  
Mechanics' Lien Act**

Mechanics' Lien Act of British Columbia against the firm by which they were employed, and against the owner of the house

which was being built by them. It ap-

peared from the evidence that the firm comprised a partnership of three men operating under the name of The Vancouver Construction Company, Limited. Workmen were engaged by the Company who announced that returned soldiers were preferred. It was alleged that when a returned soldier applied for work he was induced to contribute

\$100 to the company before being engaged. The owner of the house contested the action on the ground that the plaintiffs were partners in the business. The Court, however, decided against this contention and gave judgment for \$350, which was the amount of the liens. (*British Columbia—Doig et al. vs. Vancouver Construction Company and W. J. Burroughes.*)

## NOTES ON CURRENT MATTERS OF INDUSTRIAL INTEREST

### The month in brief

The Dominion-Provincial Commission, appointed in accordance with a resolution passed at the National Industrial Conference in September last, to consider the subject of Uniformity of Labour Laws of the Dominion, met at Ottawa during the last week in April. The report of the Commission appears in full in this issue.

The cost of the weekly family budget of staple foods averaged \$15.99 at the middle of April as compared with \$15.98 at the middle of March, \$13.35 in April, 1919, and \$7.51 in April, 1914. The index number of wholesale prices reached 353.1 in April as compared with 349.0 for March, 279.6 for April, 1919, and 136.7 for April, 1914.

At the beginning of April the percentage of unemployment among members of trade unions was 3.44 per cent, as compared with 4.33 at the beginning of March. According to returns received from nearly 4,900 firms, employment remained steady during the first half of April and increased considerably during the latter part, due largely to railway construction work.

The time loss during April due to industrial disputes was greater than during March, but less than during April, 1919. There were in existence during the month 44 strikes involving about 6,249 workpeople and resulting in a time loss of about 84,099 working days. At the end of April there were on record 18 strikes involving about 1,691 workpeople.

### Proceedings under the Industrial Disputes Investigation Act

During April the Department received a report from the Board established to deal with the dispute between the Canadian Fish and Cold Storage Company, Limited, Prince Rupert, B.C., and certain employees, being fish packers.

Twelve applications were received for the establishment of Boards, and a request was received that proceedings be discontinued for the present time in connection with two Boards established during the present month.

### Bonus plan of Saskatchewan Co-operative Creameries

Last year the Saskatchewan Co-operative Creameries Company, Limited, put into effect a bonus scheme of which the particulars were as follows: To all employees on the payroll at least one year, a bonus of 8 per cent of the year's salary was granted; returned men who had been with the Company prior to the war and were again in its service received a bonus of a full year's salary; returned men who were not in the employ of the Company before the war, but who had joined the staff since, were given a bonus for the actual period worked. Bonuses under \$100 were paid in cash. Bonuses of from \$100 to \$200 were paid half in cash and half in stock of the Company. Payment of bonuses over \$200 was made one-third in cash and two-thirds in stock.

**Pension plan  
of Ontario  
Hydro-Electric  
Power Commis-  
sion**

In accordance with an Act passed by the Ontario Legislature in 1919, mention of which was made in the **LABOUR GAZETTE** of May, 1919, the Ontario Hydro-Electric Power Commission has inaugurated for the benefit of their employees a pension plan, an insurance and sick benefit plan, and a savings account for women employees. About 2,500 employees will benefit from these plans. The pension scheme was made to date back from November 1, last. A pension will be paid to any male employee who has been in the service 15 years and has reached the age of 65, or has become permanently disabled before his sixty-fifth birthday. The pension will be an annual payment of one-eightieth of the pensioner's average salary for the last five years before retiring, multiplied by the number of years he has been in the service. The insurance plan provides that if a male employee dies, there will be paid to his estate five per cent of his salary for each year he has been in the service, provided it does not exceed twice the annual salary he was receiving at the time of his death. The sick benefit plan applies to all permanent employees, both male and female. During the first week of sickness employees are retained on the pay-roll, after which they are transferred to the sick benefit list. Sick benefit payments will be on an increasing scale, but the amounts to be paid and the periods that must elapse before the amounts are varied have not yet been decided upon. Certain medical supervision will also be provided by the Commission. If an employee is receiving assistance under the Workmen's Compensation Act, a sum will be added to make the total amount received equal to the scale fixed by the Hydro Commission. There will be no assessment on the employees for any of the above benefits, as the cost will be borne entirely by the Commission. A savings account will also be opened for each woman employee in which will be deposited every year 5 per cent of her salary, and the amount thus accrued

will be paid to her when she leaves the service.

**Employers'  
Association of  
Manitoba**

The Employers' Association of Manitoba was formed at Winnipeg on March 30, to continue as a permanent organization the work of the provisional committee of employers appointed last January to co-operate with the Dominion and Provincial Governments in dealing with the economic problems arising out of the peace treaty and with international labour legislation. The policy of the Association is set forth in the following statements of aims: (1) To promote [on] a fair and equitable basis, industrial peace, and commercial prosperity in the community, and the steady employment of labour. (2) To discourage lockouts, strikes and unfair demands by either employer or employee. (3) To secure for employer and employee freedom of contract in the manner of employment. (4) To disseminate a knowledge of the fundamental economic laws and conditions upon which a successful and desirable community life depends. At their organization meeting the employers declared for the "open shop" principle in all lines of business, and declared that, as citizens with large sums of capital invested, they would urge upon the Provincial and Dominion Governments to establish and maintain the principle, with a view to greater production in all lines of industry and commerce. They emphasized the fact that the Association was not intended to combat unionized labour, and declared their intention to co-operate with labour in legitimate efforts to improve conditions. At a subsequent meeting a legislative service bureau was established under the Association to supply its members with information concerning laws affecting their interests. During the past session of the Legislature sub-committees of the original provisional committee held joint conciliation sessions with labour delegates and representatives of the Provincial Government to discuss state insurance under the Workmen's Compensa-

tion Act, collective bargaining and other questions, and other committees were appointed at the request of the Dominion Minister of Labour to deal with the questions of uniform labour legislation throughout Canada. The officials of the Association are: President, H. T. Hazelton; Vice-Presidents, W. T. Riley, Winnipeg; A. E. McKenzie, Brandon; Joseph Marion, St. Boniface; H. Stevens, Portage la Prairie; General Secretary, Charles F. Roland, Winnipeg. Nominations were also made of five members as competent to represent the Association on the Manitoba Council of Industry, and from this number, two, Messrs. Stovel and Lyall, were subsequently selected as the employers' representatives on the Council. Every trade group is represented in the fifty-one directors of the Association. The foundation membership includes 243 firms, employing, besides executive officers, 13,817 hands, of which number 10,386 are males and 3,431 are females, earning a total annual wage of over eleven million dollars.

#### **New Industrial Councils in Great Britain**

During the present year new Joint Industrial Councils have been completed in Great Britain under the Whitley plan in industrial establishments under the Ministry of Munitions, and for administrative, technical and clerical staffs employed by local authorities. Constitutions have also been drafted this year for Joint Industrial Councils for the glass industry; entertainment workers; industrial establishments under the Air Ministry; and surgical instrument workers. Among the more important topics which the Councils have dealt with recently are the reorganization of industry, education, unemployment insurance and workmen's compensation. The Building Trades Industries Council is considering a code of regulations to be recommended for inclusion in the working rule agreements between employers' associations and trade unions, and a complete scheme of democratic control for voluntary adoption. A list of Joint Industrial Coun-

cils previously formed in the United Kingdom was given in the December, 1919, issue of the *LABOUR GAZETTE*, at page 1459.

#### **Bill for settlement of labour disputes in France**

The Minister of Labour of France has introduced in the Chamber of Deputies a bill for the settlement of labour disputes. It is not proposed to suppress the right to strike, but every means to settle disputes amicably must first be exhausted before work is stopped. The main points of the bill are summarized in *The Economic Review* as follows:

"If a dispute arises in any commercial, industrial or agricultural establishment employing more than 20 workers, a delegation, appointed from among the workers or employees affected, must approach the head of the establishment or his representative to discuss the point under dispute. . . . The delegates may not be more than 5 in number, except in the case of establishments employing over 500 workers divided into different categories. They must be received within 24 hours of making the request and must receive a reply within the next 24 hours, unless the period is extended by special arrangement.

"If the dispute cannot be settled in the above manner, the matter must be referred to a conciliator. The conciliator may be chosen by both sides in common, or two may be chosen, one by either side. If these methods are not agreed upon the dispute must be referred either to the Conciliation Committee for the trade concerned or to the local Justice of the Peace. The parties whom the dispute concerns must then be called upon to appear within 48 hours. If an agreement is reached, it must be recorded in a collective Convention. If no agreement is reached, both sides are advised that they may appeal to arbitration. The Conciliation Committee is composed of an equal number of employers and employees, and, in cases where arbitration is declared obligatory (see below), of an equal number of representatives of pub-

lie interests appointed by the Minister of Labour and the competent Minister.

"If the two sides decide to resort to arbitration, each side nominates one or more arbitrators, who may be chosen from among the members of the Conciliation Committee. If these arbitrators cannot agree, they themselves select an additional arbitrator. Any cessation of work during arbitration is prohibited. Arbitration is compulsory, and any collective cessation of work is prohibited until the arbitral decision has been made, in the following establishments which minister to public requirements, and the stoppage of which would imperil the life or health of the nation, or the economic or social life of the country: (a) Railways, tramways, and other transport means, on land or water; (b) gas and electricity works; (c) coal mines, water, lighting, and power undertakings; (d) hospitals; (e) in towns of over 25,000 inhabitants—funeral undertakers, refuse collectors and other services connected with the public health. In the event of a stoppage of work in any of the undertakings for which compulsory arbitration is imposed, the Government may requisition the premises, plant and staff, and may employ all other means for ensuring the public services."

#### Physical examination in industry

A statement recently issued by the National Industrial Conference Board in the United States contains the following in reference to physical examination in industry:

"The Conference Board of Physicians in Industry has just completed a study of physical examinations in twenty-eight corporations who together employ over 350,000 men and women. The returns indicate quite clearly that while the physical examination in industry is comparatively new, employers and employees have recognized its value. . . . In general, employees welcome the examination. The number of those objecting was found to constitute a fraction of 1 per cent. The reason given by

employees who objected to examination invariably took one or both of two forms: 'red tape' and 'opposition to exposure.' Employees who object to examination are frequently those who fear that such an examination will disclose some defect or a diseased condition. In the plants studied, it was found that of all employees examined, the average number of those rejected was four in every hundred. With but five exceptions, the results of the physical examination are used as a guide in placing employees within the factory. In these five cases the examinations are made for special reasons only and are not required of all applicants. The time required by the physician to make the examination was found to vary from three to forty minutes, the average ranging between six and ten minutes. The benefits claimed for the physical examination in the replies received are that they protect the employee, his fellow worker, and also the employer. Employees are not permitted to engage in an occupation in which they would be a menace to themselves, to others, or to property. Accident hazards are thereby reduced, labour turnover is reported as being lessened, and employees, on the whole, as being more satisfied."

#### State accident insurance in the United States

*The American Labour Legislation Review* for March, 1920, contains an article by Miles M. Dawson, consulting actuary of New York City, based upon his recent official investigations of state insurance funds for Workmen's Compensation in Ohio, Pennsylvania and New York. These investigations, according to Mr. Miles, continue to indicate the superiority of state over private stock company organization in regard to the interest both of employer and worker. The ratio of management expenses to premiums in the private profit-taking concerns ran as high as 35 to 40 per cent, while in Ohio where the state fund controls the entire field, the ratio is 1.62 per cent, and in Pennsylvania and New York, where commercial insurance com-

panies are permitted to compete, the ratio of management expense to premiums is 9 per cent and 6.2 per cent respectively. In net cost of insurance to policy-holders the Ohio fund, in which administrative expenses are paid out of the state treasury, instead of being taken from premium receipts, the saving to industry amounts at least to 35 per cent of premiums they would have to pay commercial insurance companies. (A similar saving effected in Ohio in 1917 was noted in the LABOUR GAZETTE, June, 1918, at page 380.) The Pennsylvania fund effects a saving of 19 per cent for coal mine operators and 23.5 per cent for other employers; and the New York fund a saving of 29 per cent. The writer declares his professional inquiry shows that all three state funds possess ample surplus over all liabilities, that all are administered in accordance with stringent actuarial principles, and that they permit of increasingly liberal benefits for injured workers and their families.

**Proposed compensation for occupational diseases in New York State**

A brief account of the present legal standing in various countries of the principle of workmen's compensation for "occupational diseases"

was given in the LABOUR GAZETTE for March, 1920 (page 304). In the United States a growing tendency was noted in many states to enlarge the conception of industrial injuries beyond those which were due to accidents. Existing compensation laws, however, were variously, and for the most part adversely, interpreted by State courts in adjudicating appeals on behalf of workers injured by gradual processes in the course of their occupation.

The first bill in the United States to name occupational diseases as definitely compensable was very recently introduced in the New York State legislature. This bill was promoted by the Workmen's Compensation Department of the National Civic Federation, composed of employers, representatives of

labour, and insurance experts. The British law was taken as the basis of the proposed New York State law, with a few improvements relating chiefly to administration. Twenty occupational diseases were specified, these being mainly limited to poisonous trades, with a further provision, however, that additional diseases may be included, as actual experience may suggest, on recommendation made to the Legislature by the State Industrial Commission and Industrial Council in joint session. A similar discretion was allowed to the Home Secretary by the British Workmen's Compensation Act of 1906, the original schedule naming six occupational diseases being later enlarged by eighteen additions. Among the occupational diseases provided for in the New York measure are anthrax; and lead, mercury, phosphorus, arsenic and other poisoning; miners' nystagmus; glanders; compressed air illness, and cataract in glass workers. The general provisions of the Act, like those of the British and Canadian legislation, provide that the disease must be contracted in the employment; that it must be caused by the nature of the employment; that liability shall be limited to diseases contracted within one year; that there shall be no liability for an occupational disease where the workman at the time of his hiring has falsely represented in writing that he had not previously suffered from that disease; that awards for occupational diseases should not be based upon the opinion of physicians selected by the claimants, and that disputed cases should be determined by impartial physicians; that there should be a presumption in favour of a claimant disabled by a disease peculiar to the industrial operation in which he was employed immediately before his disablement; that there should be a distribution of liabilities between employers in cases where the disease was contracted gradually in two or more employments; and that the occupational diseases, except those resulting from accidents (for which employers were already liable) should be enumerated in the statute.

# **Building schemes in Germany and Sweden**

Following a congress of the German Association of Workers in the Building Trades held in Hamburg in February, a Federation of Socialized Building Undertakings has been organized. The State Housing Commissioner has promised to the new Federation the co-operation of the State, which will assist in the matter of building sites and material, and will grant a subsidy of from 160 to 180 marks per square metre, according to the extent of surface built upon. It is proposed that the Federation operate either as a joint stock or limited liability company, and that the capital required be raised by the trade unions, especially those of the building trades, which, it is stated, could raise over twenty million marks a year if 400,000 workers agreed to contribute one mark each week.

The Swedish government is dealing with the house shortage, both directly by a state building programme providing for the erection of dwellings within the next five years to contain in all 40,000 rooms, and indirectly by building grants to local authorities, and through these to private persons, companies or societies. Builders will be required to raise capital to cover up to 50 per cent of construction cost, apart from ground values. The state would grant a loan, secured by a mortgage, and valid for at least twenty years, for the remainder of the cost of building. These loans will be exempt from interest charges up to ten years, or in lieu of such exemption a further capital grant may be made up to 2 per cent of the total cost. Similar building grants are also made to associations of civil servants.

# **Part-time schools in New York**

The report of the United States Commissioner of Education, for 1919, refers to a plan of co-operative schools at present in operation on a considerable scale in New York City, by which employed workers under 18 years of age are enabled to work half time for wages and

attend school half time, in alternate periods, the students receiving the same wages while at work as other employees engaged in similar work. Classes are in session at various hours from 8 a.m. to 10 p.m., accommodation being provided either in the school buildings or by employers at their places of business. The students are paired, one of the pair being in school while the other is at work, and they exchange places each week. Instruction is given to six different types of classes, as follows: (1) Compulsory continuation classes for workers under 16 years of age who have not completed the eighth grade, who devote four hours per week during working hours to general educational subjects and a choice between prevocational and vocational work; (2) extension classes for workers in the skilled trades; (3) extension classes for workers employed in commercial pursuits; (4) general improvement classes for employees in departmental stores and other stores; (5) classes in high-school subjects designed primarily for civil service employees, for general improvement, and to assist in qualifying for promotion, and (6) classes for non-English-speaking employees. That the two lines of activities of the student shall be unified, for each class instruction is included relating to its particular type. For this purpose a certain number of teachers from the high school faculties have been appointed as co-ordinators working under the direction of a chief co-ordinator. The duty of these co-ordinators is to seek out employers who might be induced to organize their working forces in this way; to confer with foremen and other officers as to the sequence of processes in office, store, or factory; to plan courses of study for the schools, making the necessary connection with the practical work; and to follow up the individual student in his progress both in school and at work. According to Mr. W. H. Dooley, in the *Manual Training Magazine* for June, 1919, some 670 boys and girls, pupils of these part-time schools, earned over \$105,000 in wages during 1918.

**International  
labour assists  
starving  
Austria**

The International Federation of Trade Unions has sent large consignments of food to Austria in order to relieve the people from threatened starvation. Most of the money for these provisions has been subscribed in Holland, where the workmen have worked extra time and given the whole proceeds to Trade Union funds. Last February, Mr. W. A. Appleton, president of the Federation, accompanied to Vienna one of three trains containing thirty-seven truck loads of provisions supplied by the Federation, and he has written a brief account of his impressions gathered there. The food was consigned to the central trade union organization of Vienna, which issued food tickets and distributed it through the co-operative societies. The industrial position of Austria, according to Mr. Appleton, is desperate. Large factories are unable to fill orders owing to lack of coal and lack of transport. The whole of Austria's former coal mines had been given to Czecho-Slovakia, and a large part of the rolling stock of the Austrian railways was lost when the army dissolved. Trading with neighbouring countries was said to be rendered very difficult owing to the attitude of the new nations in erecting barriers against trade and protecting themselves against doing business with their neighbours. In the writer's opinion, without gifts of food and clothes, Austria cannot exist until the next harvest. In conclusion he says: "The Austrian does not say he asks for justice, but for mercy. Our traditions and practices prevent us penalizing the helpless, and as the war is over, we cannot quietly sit still and see the wives, the widows, and children of our late enemies die of starvation. Nationally, we have had great provocations. We have lost much and suffered much, but, after all, humanity is greater than nationality and greater than class. It is impossible to escape the conclusion that it is our duty to stand for humanity and to help those in Austria who are

suffering the evil consequences of a war that was lost."

**Jottings**

According to the *Pulp and Paper Magazine*, the time lost during 1919 through accidents in the pulp and paper industry in Ontario was reduced 24.3 per cent from that lost in the previous year. During 1918 each full year worker lost 2.63 days, the figures being 1.99 days in 1919. This is attributed to the efforts of the Ontario Safety League.

A fine of \$25 and costs was recently imposed by the magistrate at Drumheller, Alta., on a mine examiner for neglecting to make a true report on the condition of the Western Gem mine. He was also fined \$20 and costs for neglecting to have a room in the same mine, which had been declared unsafe in March, fenced off in compliance with the Mines Act of Alberta. The charge was laid by the district inspector of mines.

At the Second Annual Convention of the British Columbia Federation of Labour held at Victoria, B.C., in March, formal announcement was made in the report of the Executive that the charter of the Federation had been returned to the Labour Congress of Canada some time before, and that the relations between the two bodies had been severed. After a lengthy discussion the action of the Executive in returning the charter was approved. Subsequently, by a vote of 40 to 5, the delegates declared themselves in favour of the dissolution of the British Columbia Federation of Labour, and of consolidation as one big union.

The Canadian Connecticut Cotton Mills Company are co-operating with the citizens of Sherbrooke, Que., for the establishment of a garden suburb for their employees. A housing company has been formed and a site of 52 acres adjoining the Company's mills has been bought at \$1,000 an acre, which is to be laid out on town planning lines. It is expected that 100 houses will be built

during the present year, 100 during 1921, and so on in accordance with the growth of the plant. The scheme will be financed by provincial funds through the City Council. The cotton company, under contract, has agreed to take all responsibility, and guarantees to pay the housing company 10 per cent per annum on the investment, and to collect the rents from the tenants.

Under the provisions of the Ontario Housing Act of 1919, 100 Housing Commissions have now been appointed in the Province. Of these, 19 are in cities, 50 in towns, 17 in villages, and 14 in townships. Sixty-eight of these municipalities constructed houses in 1919, and, in all, 1,184 houses were erected, while 269 more applications for houses have been approved. A report is now being prepared showing in detail all the housing work done by the various municipalities during the past year, containing plans of houses already erected, with the actual cost in each case, and other valuable information. Construction on a much larger scale is expected in 1920.

A growing interest in co-operative distribution is shown in the province of Ontario. New co-operative societies are reported to have been recently organized at Windsor, Walkerville, Woodstock, North Bay, Mount Hamilton and Niagara Falls.

A bill which passed its second reading in the British House of Commons in April, provides a secret ballot in all cases where a strike vote is taken by labour organizations. Under the bill a trades union ballot regulation committee would be established, the members of which would be drawn from representatives of the Board of Trade, the Ministry of Labour, the friendly societies, the Parliamentary Labour Party and the Trades Union Congress. The committee would issue rules of procedure and would supervise all strike ballots, it being their duty to secure a true and secret vote of the workmen concerned. Interference with ballot papers, or attempts to influence others by intimidat-

tion, would render the guilty parties liable to penalties prescribed by the Ballot Act.

The British Overseas Settlement Committee in their report for 1919 (Cmd. 573) state that practically the only openings in the self-governing Dominions for emigrants from Great Britain are for men to settle on the land, or for women to enter domestic service, and that any considerable influx of industrial workers would be likely to disorganize local labour conditions and would therefore be vehemently opposed. They note, however, an occasional demand for specialists in certain industrial work.

Four officials of the United Mine Workers of America were sent to jail on a charge of contempt on a bench warrant from a Kansas District Court, upon their refusal to recognize subpoenas issued by the recently created Kansas Industrial Court.

The minimum wage of \$16.50 fixed last year for women mercantile employees in Washington, D.C., has recently been extended to cover women and minor girls employed in hotels, lodging houses, clubs, restaurants, etc. If meals are furnished by the employer, 30 cents per meal may be deducted, and where lodging is furnished a deduction of \$2 per week is permitted.

Considerable progress has been made in Belgium since the war in organizing the industrial workers, the membership of the trade unions being now about five times that of six years ago. In 1913 the total number of members was 126,745 compared with 613,500 in 1919, before the census was taken. The census reveals a still greater increase. The most important trade unions, in point of numbers, are the miners, iron and steel workers, railroad workers, carpenters and joiners, textile workers, and factory labourers.

The compulsory arbitration law in force in Norway has stopped a strike of

Norwegian engineers, whose negotiations with the Shipowners' Association broke down. The Government decided to apply this law, which had only been used on two previous occasions, to prevent a stoppage that would have paralyzed all coastal traffic. A Court of Arbitration has been set up, with the Chief Justice of the Supreme Court as chairman to deal with the issue.

It is reported that Japan is planning the establishment of a government bureau to deal with the problem of industrial relations between worker and employer, patterned after the United States Conciliation Service. Japan's interest in governmental machinery arises, it is stated, from the growth of manufacturing in that country in recent years.

## INDUSTRIAL CONDITIONS DURING APRIL, 1920

### I.—General Review

After a stationary period continued from the previous month a considerable increase set in during April in the total volume of employment throughout Canada, the gains in the last half of the month being the largest since November, due mainly to the revival of railway construction. Gains were steady in the Maritime and Western provinces, but Quebec and Ontario showed a slight decline before the upward movement began towards the middle of the month.

In the metals and machinery group the iron and steel industries, while showing an average gain, were affected during the third week, especially in Ontario, by shortage of fuel and materials, caused by the switchmen's strike in the United States. Shipbuilding showed a marked increase at the same period in both the eastern provinces and British Columbia. The food group showed a somewhat downward tendency throughout the month except in the Maritime Provinces, the decline being marked in the abattoir and meat packing plants in the Prairie provinces. The textile industries showed a seasonal decline which was most marked in the second week; in Ontario, however, gains were recorded later in the month. The clothing group generally continued to be well employed. The pulp and paper indus-

try continued to show great activity with increased employment in every province. Marked and steady increases were also recorded in the woodworking industries, keeping pace with the general seasonal gains of employment in building construction; similarly, the clay, glass and stone trades showed an upward tendency, in spite of occasional interruptions by bad weather. Leather workers experienced the usual decline of activity at this period of the year, but paint, oil and chemical workers were increasingly active in the latter half of the month. Railway transportation showed a decrease in the first two weeks, but recovered later, these movements, however, being reversed in British Columbia. Marine navigation showed a decline, but lake shipping increased; and local transportation also made general gains. Mining (other than coal) showed a slight decline in metallic, but steady gains in non-metallic minerals. Employment in coal mining in the Maritime provinces rose steadily and in the Prairie provinces gains were made towards the end of the month, but British Columbia showed less activity. Railway construction showed marked activity in every province. In logging and lumbering, employment fell in the interval between work in the woods and river driving, but increasing activity was evident after the ice broke and the saw-mills started operations.

**The Labour  
Market**

The loss of time on account of industrial disputes during April was greater

**Strikes** than during March, 1920, but less than during April, 1919. There were in existence at some time or other during the month 44 strikes, involving about 6,249 workpeople, and resulting in a time loss of about 84,099 working days, as compared with 22 strikes, 3,789 workpeople and 43,169 working days in March, 1920; and 40 strikes, 13,470 workpeople and 132,346 working days in April, 1919. On April 1 there were on record 16 strikes, affecting 2,451 workpeople. Twenty-eight strikes were reported as having commenced during April, as compared with 14 in March. Seven of the strikes commencing prior to April and nineteen of those commencing during April were reported terminated, leaving 18 strikes, involving

about 1,691 workpeople, on record at the end of the month.

The prices movement was marked by some seasonal declines in foods, particularly in eggs, but there were again increases in several lines of foods and materials. **Prices** The index number of wholesale prices therefore showed a higher level, reaching 353.1 for April as compared with 349.0 for March, 279.6 for April, 1919, and 136.7 for April, 1914. In retail prices the average cost of a list of staple foods in 60 cities was \$15.99 at the middle of April as compared with \$15.98 at the middle of March, \$13.35 in April, 1919, and \$7.51 in April, 1914. Increases in sugar and potatoes were offset by decreases in eggs. Fuel was slightly higher and rent advanced in many of the cities.

## II.—Industries and Trades.

Activity in the metal industries of the Maritime Provinces was well sustained

during April. The output of the Dominion **Metals and machinery** Steel plant at SYDNEY was as follows: pig iron, 23,200 tons; ingots, 24,900 tons; blooms, 10,000; rods, 7,950; plate, 3,000; light rails, 600; wire and nails, 1,900 tons; three blast furnaces were in operation; other furnaces which have not been in operation since the middle of last year were being got ready to handle the flow of medium sized orders, which would increase production by 3,000 tons monthly; staffs were increased slightly during the month; the stove, furnace, and metal roofing trades continued active. The production of the plant at SYDNEY MINES was 7,400 tons of iron and 9,300 tons of steel; four open hearth furnaces were working and one steel furnace undergoing repairs. The steel industry at NEW GLASGOW was somewhat slack at times, owing to lack of steel and a dispute at one plant; bridge workers were also somewhat slack owing to shortage

of material. In WESTVILLE district all the steel mills worked steadily, double shifts being the rule every day except Sunday; sheet metal and farm implement workers were active; the electrical trades were normal, but the structural steel industry was quiet. HALIFAX reported fairly steady conditions in the steel trade, with good prospects, but production was hampered by shortage of material; the stove and furnace industry was active, though hampered by continued lack of sufficient space since the explosion. The foundries at AMHERST were not in full operation owing to shortage of stock; the malleable iron works was expected to reopen with orders enough to keep busy for a year (400 men were formerly employed at this plant). The metal trades at YARMOUTH were reported slack. At ST. JOHN a rolling mill which had been closed for two months reopened and was turning out bar iron, spikes and bolts, working day and night; brisk conditions prevailed in the tin and sheet metal trades. MONCTON and FREDERIC-

TON reported steady conditions in the foundries and machine shops. MONTREAL reported continued activity in the structural steel, engine, boiler, farm implement, tractor and electrical plants, but the sheet metal trades were quiet. At QUEBEC structural iron and steel workers had a busy month, but stove, furnace and metal roofing plants were slack. SHERBROOKE reported activity in the architectural and structural steel and machine shops. Active conditions also prevailed at THREE RIVERS, ST. HYACINTHE, ST. JOHN, IBERVILLE and SOREL. At OTTAWA and HULL the foundries and stove factories continued active. The metal and machinery industries at TORONTO all continued active, except where handicapped by shortage of steel, due in the earlier part of the month partly to the switchmen's strike in the United States delaying deliveries; farm implement, sheet metal and electrical workers had plenty of employment. HAMILTON reported a demand for skilled machinists and continued activity was noted throughout all branches of the metal group. At NIAGARA FALLS all the metal trades continued active, with a demand for machinists and electric welding operators. Day and night shifts were run at the rolling mills and foundries at BELLEVILLE. The metal workers at ST. CATHARINES continued well employed. At BROCKVILLE stove and furnace workers and tinsmiths were active and tool and hardware makers were busy turning out axes, hammers, sledges and heavy and light hardware. KINGSTON reported some slackness among machinists owing to shortage of steel. Foundries at PETERBOROUGH were exceptionally busy, overtime being frequent among coremakers and moulders; machinists and all iron workers were very busy, and machinists and electrical workers were in demand at the electrical works, where also overtime was the rule. Moulders were in great demand at GALT, activity prevailing at the pig iron and steel furnaces and converters, and in the factories for plates, bolts, rails and other rolling mill products; stationary engine and electrical workers were very busy, and help

was required in metal roofing, galvanized iron, tin, copper and other sheet metal work. At BRANTFORD stationary engine and boiler makers were very busy; stove workers and machinists were also well employed; help was in demand in the farm implement and electrical appliance shops. KITCHENER reported more help wanted in the clock factories and in the sheet metal works, and foundries and machine shops were very busy. Stationary engine and farm implement factories had a very good month. Activity prevailed at GUELPH in the metal trades, bench and floor moulders being in demand, also labourers for cleaning castings and cutting sand. Foundries and machine shops at STRATFORD worked full time with moulders and skilled mechanics in demand. WOODSTOCK reported a constant demand for moulders, and stove and furnace workers continued in steady employment. LONDON reported that activity in the metal trades was curtailed as the railway strike in the United States impeded imports of raw materials, affecting chiefly sheet metal workers; rolling mills, stove, furnace and hardware workers were very busy. At CHATHAM the structural steel industry showed steady improvement and the electrical trades were slightly above normal. Skilled bench and machine moulders were in demand at WINDSOR, but the architectural and structural iron trades were handicapped for material to supply the rush of business; sheet metal workers were having the best season for years; help was in demand at the injector factory, enlargements being planned. The stove and furnace, nail and screw workers at OWEN SOUND were well employed. The electro-foundries at ORILLIA started the manufacture of a ferro-alloy. The steel plant at SAULT STE. MARIE added considerably to its staff during the month. The various metal trades at WINNIPEG continued steadily employed without considerable change in the number of workers. Agricultural implement and machine shops at BRANDON were busy. At MEDICINE HAT one rolling mill was closed, but the other reopened, and re-

quired skilled help ; a similar shortage was reported in the pump and brass factory. Other metal trades were held up by the shortage of material. The LETHBRIDGE iron works continued busy. VANCOUVER reported fair activity in rolling mill products, and stove and furnace plants; sheet metal workers were well employed. Machine shops at NEW WESTMINSTER were working to capacity. Iron foundries at VICTORIA were moderately active, mostly on repairs ; stove factories were busy.

Shipbuilding and repairing yards at SYDNEY were busier in April than in the

previous month. At HALIFAX more skilled workers were taken on at the shipyards, where

activity was well maintained, with many orders ahead, work being confined to marine repairs and building ; smaller concerns remained fairly steady, though suffering from a shortage of plate. The shipyards at TRENTON continued busy, though some rivetters were laid off. At NEW GLASGOW lack of steel hampered the car shops, and staffs were reduced. WESTVILLE reported great activity at the Trenton shipbuilding yards; the car shops were getting ready for some big orders; engine and boiler makers and automobile factories were busy. At MONTREAL shipbuilding yards and railway repair shops were busy and automobile factories had plenty of work. QUEBEC reported exceptional activity in boat and shipbuilding and repairing, with frequent overtime, one plant employing 1,400 men; portable boiler and engine and railway repair shops were also very busy. The repair shops at SHERBROOKE were active. At THREE RIVERS shipyard workers were very busy until towards the end of the month, when a strike occurred. The shipyards at SOREL were increasingly busy. The car factories at OTTAWA and HULL continued normally active. TORONTO reported activity in the engine and boiler plants, and railway repair shops, but automobile factories had to reduce staffs owing to shortage of steel. At BROCK-

VILLE activity was shown in motor boat construction; automobile workers were preparing for a busy season; railway repair shops were active. KINGSTON reported some slackness in the locomotive and shipbuilding yards owing to shortage of steel, but repair shops were active. BELLEVILLE reported activity in the portable steam and marine motor engine shops, and carriage and automobile parts factories. Steam engine and boiler makers at GALT were very busy, and auto and marine engine trades were well employed. BRANTFORD reported activity in the portable engine shops and carriage and wagon factories. Engine shops at KITCHENER had a very good month. At STRATFORD the railway repair and machine shops were very busy. The wagon factories at WOODSTOCK had a busy month, with help of all kinds, skilled and unskilled, in strong demand. The motor factories at LONDON were compelled to lay off a number of men as the railway strike in the United States prevented the shipments of parts required for assembling cars. At CHATHAM the automobile factories worked overtime. WINDSOR reported employment in some automobile factories reduced to five days of seven hours a week owing to the coal and material shortage due to the strike, but help was in demand in some departments. The marine machinery plant at OWEN SOUND was very busy. The shipyards at PORT ARTHUR continued steadily employing about 900 men of all grades; the car works at FORT WILLIAM employed about 200 men steadily. Railway shops continued steadily active at WINNIPEG without change in staffs, and automobile factories were fairly busy. Railway repair shops at REGINA and CALGARY were fairly active. VANCOUVER reported employment good in locomotive and car and parts shops; boat and shipbuilding and repairs were more active, and automobile and motor engine plants were busy. A demand for men was reported for the shipbuilding yards at VICTORIA, where orders for four wooden vessels were being received; iron shipyards were fairly active, about 500 men being employed and 100 or more being laid off.

Continued activity throughout the food group was reported from SYDNEY.

**Food, liquors and tobacco** NEW GLASGOW noted a demand for female help. From HALIFAX improvements were reported in the baking, confectionery, creamery and condensed milk trades; sugar workers were steadily employed, but abattoirs were less active owing to meat shortage. The tobacco factory at TRURO worked full time. CHARLOTTETOWN reported quieter conditions among the creamery and milk workers, but other food industries were busy. Steady employment was reported from MONCTON and FREDERICTON. At ST. JOHN sugar refinery workers were again busy, some cargoes of raw sugar having arrived; other workers in the food group were well employed. At MONTREAL employment showed a falling off in sugar-using trades due to shortage of supply; flour and feed plants, abattoirs and meat packing houses were quiet, brewery workers were active and cigar makers were normally employed. QUEBEC reported activity in abattoirs and packing houses and in the baking and confectionery trades; breweries and tobacco factories were busy, but creameries and dairies were not yet fully working and aerated water factories were dull. General activity was noted at THREE RIVERS, SHERBROOKE, ST. HYACINTHE and SOREL. At OTTAWA and HULL abattoirs, bakeries and dairies had a busy month. At TORONTO flour, feed and cereal production and abattoirs and meat packing houses were quiet, but gave steady employment to women in the butter, egg and oleomargarine departments; bakers had steady work, and confectioners were busy, the ice cream trade showing a large increase; biscuit, candy and chewing gum factories were busy, with varying demand for help; fruit and vegetable canners and soft drink establishments were increasingly active; cigar makers had a fair month. Active conditions continued to prevail throughout the food group at HAMILTON, NIAGARA FALLS, ST. CATHARINES, KINGSTON, BELLEVILLE, BROCKVILLE and BRANT-

FORD. At PETERBOROUGH extensions were reported in flour mill, packing house and creamery capacity. Conditions also continued good at GALT and CHATHAM. At KITCHENER the sugar factory closed down, only 20 men being retained for the summer months; only two cigar factories were active instead of the six formerly operating, production now amounting to only 10 per cent of the former turnout; the brewery was slack; but that at WATERLOO was very busy. At GUELPH and STRATFORD steady conditions were the rule, but soft drink workers at the latter point were rather slack. A constant demand for female help was noted at WOODSTOCK for the biscuit and confectionery trades. The same condition prevailed at LONDON, where the flour mills and candy and ice cream factories were very busy; many cigar makers were laid off, the increased price causing a decrease in demand for cigars. The flour mills at ST. THOMAS were busy. At WINDSOR increased activity was noted throughout the group, but baking and confectionery were affected by sugar shortage; soft drink factories were very busy and the brewery ran at full capacity. WINNIPEG reported increased employment in the vegetable canning industry, and confectionery plants were busy, with the same staffs as in the previous month; abattoirs, meat packing houses, creameries and dairies, continued active without change in staffs. At PORTAGE LA PRAIRIE the flour mill was partially closed for installation of new machinery. At BRANDON activity prevailed, except among cigar makers; the flour mill was temporarily closed for repairs. REGINA reported steady conditions, but at MOOSE JAW a falling off was noted in flour and feed, abattoirs, and creameries, owing to shortage of material. At PRINCE ALBERT the meat packing plant ran almost to capacity. The flour mills at MEDICINE HAT resumed operations, running two shifts, or 16 hours per day; a shortage of cream supply was attributed to feed scarcity; soft drink trades improved, brewery work was only fair, but at LETHBRIDGE the brewery workers were

well employed; the flour mills were still closed, being affected by the recent order of the Wheat Board prohibiting exports. At CALGARY flour and feed and soft drink plants were very quiet, but abattoirs, bakeries and confectionery plants were busy. At LETHBRIDGE brewery workers were increasingly busy. VANCOUVER reported activity in the flour mills, abattoirs and packing houses, bakeries and confectionery plants, breweries and tobacco factories; the sugar refinery was fairly busy owing to increased supply of raw sugar; creameries and dairies were also fairly busy, and soft drink plants were more active than in the previous month. The meat packing plant at NEW WESTMINSTER was steadily active, and confectioners had a good month. Feed and cereal mills at VICTORIA were active; the bakery and confectionery trades were steady, and breweries were busy, mostly for export; cigar makers were fairly active.

The rope and twine factory at HALIFAX continued to give steady employment. The cotton mills at ST. JOHN ran steadily. At AMHERST the woollen mills closed during the month owing to an industrial dispute. Textile workers at YARMOUTH were very busy. At TRURO female help continued in strong demand for the woollen mills, though there was some slowing down owing to shortage of supplies. FREDERICTON reported a shortage of weavers, spinners and moccasin sewers. The woollen mills and underwear factories at MONCTON continued normally active. The cotton mill at MARYSVILLE (near Fredericton) ran to capacity. At MONTREAL the cotton and woollen mills continued to work under pressure; tent and sail makers were more active. QUEBEC reported the cotton mills working overtime and sailmakers very busy. Busy conditions were reported at SHERBROOKE in hosiery, underwear and knitted goods factories, and in bleaching, dyeing and textile printing plants. Additional help was taken on at ST. HYACINTHE in the under-

wear and hosiery factories, woollen and knitting workers being well employed. Over 1,400 hands continued in steady employment at the cotton factory at THREE RIVERS. At TORONTO woollen, hosiery and knitted goods factories were busy on export orders; tent, sail and carpet makers were active. Continued activity was reported from HAMILTON in all branches of the textile group. At ST. CATHARINES silk, woollen hosiery and knitting workers were well employed. Girls were in demand for the knitting factory at WELLAND. At BROCKVILLE the sail, tent and awning industry was active. Cotton and woollen mills at KINGSTON were very active. Textile dyeing and bleaching plants at BELLEVILLE were unusually busy. PETERBOROUGH reported great activity in the textile factories, plants being enlarged. Help was in demand for the cotton and woollen mills at GALT; the silk mills were also very busy. Skilled and unskilled labour was in demand at BRANTFORD for the women's whitewear, woollen underwear and blankets, silk underwear and glove factories; help was required for the binder twine factory. KITCHENER reported very busy conditions in the felt factory; help was in demand at the twine factory; the dye workers had a good month. Female help was in demand for the linen, worsted spinning, and carpet weaving mills at GUELPH; the cotton spinning, hosiery and knitted goods factories were active. Woollen and knitting factories at STRATFORD continued busy in all branches with a demand for female help. At WOODSTOCK female help was still required in the textile and knitting industries; some shortage of knitting material was experienced. LONDON reported a shortage of female help in the hosiery factories. A good average month was reported from ST. THOMAS at the knitting mills. The textile factory at CHATHAM ran full time with some overtime, and woollen factory workers were fully employed. The tent and awning factory at WINDSOR reopened for the season. A scarcity of girl workers was reported from OWEN SOUND for the textile and knitting industries; the tent

and awning plant was rather quiet. WINNIPEG reported activity in the knitting factory, without change in staff; bag workers were rather slack, but tent and awning plants took on more help. VANCOUVER reported activity in the knitted goods, tent, awning and sail factories.

Steam laundries at SYDNEY continued active during April. HALIFAX reported

**Clothing,**

**boots, shoes**

**and laundering**

improvement in ready-made clothing, though material was short; laundries and dyeing

plants also showed improvement. Similar conditions prevailed at CHARLOTTETOWN. ST. JOHN reported activity in tailoring and hat shops, and laundries showed a decline from winter port activity, but were fairly busy. The hat and cap factory at TRURO ran full time and help was in demand for the shirt factory. The underwear and cap factories at MONCTON were steadily active, and laundries were exceptionally busy. Tailoring establishments at FREDERICTON were advertising for help, larrigan and shoe makers were very busy, and laundries and dyers were well employed. At MONTREAL a slight decline was noted in the ready-made clothing and boot and shoe trades; the silk waist industry was held up by a wage dispute; an active season was anticipated in the fur trade; hat and cap and whitewear workers were busy; laundries were fairly active. At QUEBEC ready-made clothing and boot and shoe workers were very busy but glove and fur goods workers were slack; laundries and dyers were active. SHERBROOKE reported activity in the clothing and laundry group. Glove workers at THREE RIVERS had a busy month, and laundries were active. Silk workers at ST. JOHN'S and IBERVILLE continued active; female help was in strong demand in the hat, cuff and collar factories. Active conditions were reported at SOREL in the shirt and shoe factories. At OTTAWA and HULL tailoring shops were reported busy to capacity. TORONTO reported ready-made clothing, glove, neckwear, hat and cap, shirt, and women's whitewear factories

busy, with female help, operators and finishers, much in demand, applications being made for the importation of labour; manufacturers of overalls had heavy orders; boot and shoe workers were steadily active and rubber footwear workers were in demand; steam laundries and dyeing establishments were in steady operation; furriers had a rather quiet month. Help was in demand at HAMILTON for the tailoring, shirt and collar, hat and cap, and women's wear factories and in the steam laundries. At NIAGARA FALLS corset, suspender and knitting factories were advertising for female labour. The hat, glove and mitt factories at BROCKVILLE had an active month. The BELLEVILLE shirt industry was also busy. Help was in demand at GALT for the shirt factory; tailors, hat makers and laundry workers were well employed. The overall factories at BRANTFORD were very busy; also laundry workers and cleaners. KITCHENER reported a shortage of ironers, machine operators and learners in the shirt factories; help was also required at the button and glove factories; robe and clothing workers were busy; more girls were wanted for the steam laundries. The whitewear and trouser factories at GUELPH were very busy. Seasonal activity prevailed at STRATFORD in the ready-made clothing, dressmaking and millinery trades; boot and shoe workers were active and steam laundry workers were busy. Female help was in demand at LONDON in the clothing trades, which were very busy; boot and shoe factories increased their staffs. At WINDSOR extra help was engaged for the spring trade at the shirt factories; machine hands and female help were required at the overall and coat factories; button factories and laundries were very busy. OWEN SOUND reported activity in the whitewear factories. WINNIPEG reported conditions in the ready-to-wear and cap trades rather below the season's normal level; experienced help was in demand for the shirt and glove factories; furriers had a quiet month; laundries and cleaners were busy, and increasing their staffs. Steam laundries

and dyeing plants at REGINA, MEDICINE HAT, LETHBRIDGE and CALGARY were very busy. VANCOUVER reported activity in the ready-made clothing, shirt and overall, and boot and shoe factories; women's and children's whitewear workers were busy; laundries and dyeing plants were fairly busy. VICTORIA reported the shirt and overall factories unusually active owing to the demand for overalls; steam laundries and cleaning establishments were busy.

The pulp mill at ST. JOHN ran steadily. The BATHURST mill had a normal

**Pulp, paper  
and fibre**

month, continuing to turn out a daily average of about 110 tons.

The pulp mills at SHERBROOKE were very busy, and at THREE RIVERS the pulp and paper workers had a prosperous month. At OTTAWA and HULL pulp workers were busy to capacity. The fibre mills at TIMISKAMING were held up by lack of material, 300 men being thrown out of employment. Felt and tarred paper workers at HAMILTON continued active. At ST. CATHARINES the pulp and paper, beaver and other pulp product mills had a busy month. The pulp and paper mills at SAULT STE. MARIE ran day and night during the month. VANCOUVER reported the pulp and paper mills at POWELL RIVER and OCEAN FALLS as having a busy month. At VICTORIA the rubber roofing and felt plants operated steadily.

Printers continued active at SYDNEY. At HALIFAX skilled help was in demand.

**Printing,  
publishing  
and paper  
goods**

CHARLOTTETOWN reported newspaper shops active but job offices slack. Help was in demand at ST. JOHN, printers having to work overtime. Printers and bookbinders were busy at FREDERICTON. At MONTREAL and QUEBEC activity was noted in the paper box and bag factories and among printers, bookbinders and lithographers. Printers and bookbinders had a good month at SHERBROOKE, ST. HYACINTHE, THREE RIVERS and SOREL. At

OTTAWA and HULL printers were normally employed, but some job printers were hampered by shortage of paper. At TORONTO printing and allied trades had plenty of employment; bindery and paper box workers were in demand, one firm bringing over box workers from England. At HAMILTON, ST. CATHARINES, BROCKVILLE, KINGSTON and BELLEVILLE continued activity was reported throughout the printing and publishing group. At BRANTFORD, KITCHENER, GUELPH and STRATFORD the paper box and printing trades were well employed. Printers at WOODSTOCK were active, but without any demand for help. LONDON reported newspaper printers very busy and job printers fairly active; paper box makers were rushed with work. Steady conditions were reported among the printers at ST. THOMAS, and at CHATHAM help was taken on at the binderies. Female help was required for the binderies at WINDSOR, and the newspaper printing shop doubled its staff. The paper box factory at OWEN SOUND had a very busy month. WINNIPEG reported fair conditions of employment in the binderies and box factories, but without change in staffs. Active conditions were reported in the printing shops and binderies at BRANDON, REGINA, MEDICINE HAT and LETHBRIDGE. At CALGARY printers and bookbinders were very busy. VANCOUVER reported fair activity in the printing trades; publishing and binding were less active; paper box and novelty workers were fairly well employed. At VICTORIA the printing trades were active, and paper box factories were very busy, running day and night.

Sash, door and planing mills at SYDNEY showed increased activity during the month. Similar improvement was noted at

**Woodworking  
and furniture** HALIFAX and CHARLOTTETOWN, notwithstanding high price and scarcity of material. Mill and furniture workers at WESTVILLE were fairly busy. The wood-working trades at YARMOUTH were very busy. ST. JOHN reported great activity in the wooden box and

broom factories, and the planing mills also continued active. At FREDERICTON canoe factories were busy and planing mills ran full time. At MONTREAL wooden box and furniture workers had a fair month and piano makers were well employed. QUEBEC reported the planing mills and box factories busy; broom makers were active but furniture workers were rather slack. At SHERBROOKE the planing mills and the chair factory were busy and a scarcity of labour was noted in the mills at ST. HYACINTHE. At THREE RIVERS the toy factory was very busy, and chair factory and planing mill workers were well employed. Great activity was noted at ST. JOHN'S and IBERVILLE in the sash, door and planing mills, but at SOREL workers in wood had a quiet month. Continued activity was reported at OTTAWA and HULL in the sash, door, and planing mills and wooden box factories. At TORONTO the wood-working, furniture, piano and phonograph industries had a busy month. HAMILTON reported activity in the wood-working group. At NIAGARA FALLS more help was required in the sporting goods factory; the planing mills were active. Fair conditions prevailed in the wood-working trades at ST. CATHARINES. At BROCKVILLE the office furniture plant was active and other woodworkers were fairly well employed. KINGSTON reported activity in the sash, door and planing mills and in the piano and broom factories, and at BELLEVILLE, following building activity, the sash and door and furniture plants were very busy. PETERBOROUGH also reported active conditions throughout the group. Cabinet makers were in demand at GALT in the furniture factories, and the sash, door and planing mills were also looking for help. BRANTFORD reported all sash, door and planing mills and piano case factories working full handed. KITCHENER reported a shortage in the furniture factories of cabinet makers, machine hands, packers, trim sawyers, fillers, veneer hands and rubbers, wood turners and rip sawyers; more help was also required in the wood-ware factories and cooperages; the piano and organ factories ran full time;

sash, door and planing mills, wooden box, brush and broom factories were all busy. Bench carpenters were in demand in the sash, door and planing mills at GUELPH, more sewing machine mechanics were required and piano workers were very busy. Carpenters, bench hands and skilled mechanics were in demand at STRATFORD; planing mills and furniture and chair factories continued active. WOODSTOCK reported a serious shortage of labour, all kinds of help, painters, cabinet makers, machine hands, finishers and upholsterers being required; organ factories were busy but required no more help. Great activity was reported from LONDON in the woodworking group. A shortage of help was noted at WINDSOR in the woodworking trades, and at OWEN SOUND the various factories ran full time. Activity continued in the sash, door and planing mills at BRANDON, and at REGINA more help was required. Conditions at MEDICINE HAT were only fair, but at CALGARY the sash, door and planing mills were very busy. A slight increase of activity was noted in the mills at FERNIE. At VANCOUVER the sash, door and planing mills and box factories were reported busy, and at VICTORIA these industries were moderately busy. A new factory at PRINCE RUPERT was ready to start operations.

The trunk, bag and harness industries at HALIFAX continued to give steady em-

**Leather and rubber (other than clothing)**

ployment, though supplies were somewhat scarce. Leather workers were very active at FREDERICTON. At MONT-

REAL the tanneries were active, trunk, bag and harness makers were fairly well employed, and rubber workers were busy. Curriers and tanners at QUEBEC and ST. HYACINTHE were busy. Leather workers at THREE RIVERS and SOREL were well employed. The tire and rubber factory at BOWMANVILLE increased its staff. At TORONTO trunk, bag, harness and horse goods workers had steady work and the rubber trades were active. HAMILTON reported activity in the lea-

ther group. Rubber workers at ST. CATHARINES had a busy month. BROCKVILLE reported activity in the harness and horse goods trades. Tanners at KINGSTON were very busy. KITCHENER reported very active conditions in the tanneries; trunk and bag makers were steadily active, and more help was required in the rubber factories. At STRATFORD tanners and harness makers had a busy month. The tannery at WOODSTOCK gave steady employment during the month. At LONDON leather workers and tanners were very busy, and at OWEN SOUND activity was reported in the tanneries and harness shops. The tanneries and trunk and bag factories at BRANDON had a busy month.

The cut stone and granite industries of ST. JOHN continued slack. The glass factories at MONTREAL continued steadily active. Stone cutters at QUEBEC were slack, but at SHERBROOKE cut stone and granite and brickyard workers were fairly active. The artificial stone factory at THREE RIVERS had a very active month, and at ST. JOHN'S and IBERVILLE the clay products workers were active. At TORONTO brick and sewer pipe makers were well employed and glass factories were steadily active. HAMILTON reported continued activity in the stone, brick, cement and pottery works. At BROCKVILLE the corporation leased a brickyard and will manufacture in connection with the city building scheme; the cut stone and granite trades were fairly active. At KINGSTON cut stone and granite workers were active. BELLEVILLE reported the cement plant at Point Ann working day and night, and pottery and tile workers were also busy. At GALT activity prevailed in the brick, tile, sewer pipe, lime and plaster factories, and at BRANTFORD the brick yards ran full-handed. KITCHENER reported stone cutters and marble, brick, tile and sewer pipe workers all busy. The brick yards at STRATFORD had seasonal activity. All available help was required at LONDON in the cut stone yards, and the brick-

yards began the season's work. Clay industries at CHATHAM showed activity, increasing their staffs. At OWEN SOUND the brickyards were slack, and the cement works were idle. Cut stone and granite workers at REGINA were active. The brick plant at MOOSE JAW was expected to re-open on May 1. At MEDICINE HAT the brick and tile plants had a good month and the stoneware workers were fairly active.

SYDNEY reported continued activity in the tar, naphtha, carbolic acid, creosote, dead oil, naphthaline and pitch industries. At HALIFAX petroleum refinery workers were active, although production was hampered by lack of shipping to bring crude oil from Mexico; workers in paints, oils, etc., were busy. At MONTREAL the paint and varnish industry was active and chemical, drug and medicine workers were busy. The cartridge factory at QUEBEC was quiet. Activity was noted at SHERBROOKE in the gunpowder factory and in the acid, extract, drug and medicine plants. At TORONTO the paint and varnish, soap and chemical industries were active. HAMILTON reported soap and chemical workers active and gunpowder makers fairly busy. Paint and varnish makers at BRANTFORD were well employed. KITCHENER reported that oil and grease workers had a busy month. The paint industry at WINDSOR was very busy until the demand for the product was checked by a strike of painters; the salt industry continued busy; female help was required in the perfume, extract and pharmaceutical trades. At OWEN SOUND a scarcity of material was noted in the paint and oil section. The oil works at REGINA ran full time with full staff except in the mechanical department; the soap factory remained closed, but was being reorganized and was expected to re-open shortly. The linseed oil mills at MEDICINE HAT ran steadily day and night. VANCOUVER reported the Ioco oil refinery busy; paint, varnish and laundry soap workers were

**Clay, glass,  
stone, cement,  
etc.**

**Paints, oils,  
chemicals,  
explosives**

well employed. VICTORIA reported that the soap and paint factories were normally busy, and the explosive factories on Vancouver Island were active in filling a large order for dynamite.

The earnings of the Canadian Pacific Railway during March were \$15,715,936

**Railways,  
shipping and  
'longshore work**

as compared with \$12,-  
374,182 in March, 1919.

The Canadian Pacific  
Railway, Grand Trunk  
Railway, and Canadian

National Railways reported further reductions in their operation staffs, including general offices, train and engine crews, station forces, sleeping, dining and parlour car employees, during the first two weeks in April, but showed recovery towards the end of the month, which brought their total employees engaged in operation back to nearly the same figure as was shown at the end of February when there were about 66,000 persons on pay-rolls. The number of persons employed at the end of March was 65,250, and at the end of April 65,900, but for week ending April 10 the lowest number was registered since October, 1919, the total falling to 64,600 during that week. This low figure was brought about chiefly by a reduction of 500 persons on the Canadian Pacific Railway staffs, the recovery, however, was principally due to this company, their staff at the end of April being increased to 300 more than at the end of March. The Canadian National Railways showed a pay-roll of 350 more persons at the end of April than at the end of March, while the Grand Trunk Railway registered a nominal change only during the month.

SYDNEY recorded an increase of activity during April in navigation and 'longshore work; steam and electric railway, and transfer and garage workers were steadily employed. At HALIFAX railway employees continued active in both the steam and electric lines; about 400 coal handlers were idle for two weeks owing to a wage dispute. Railways at WESTVILLE were busy. TRURO reported employment steady in

freight and passenger departments. Great activity was noted at CHARLOTTETOWN among railway employees. ST. JOHN reported navigation active during the month, and ship labourers were still well employed, although many men who came for the season's work were returning to the outlying districts; railways were very busy in connection with ocean traffic; street railways, garages, and transfers were active. At MONCTON the street railway service re-opened after being closed for three months. Railways, transfers and liverys at FREDERICTON had a busy month. MONTREAL reported good employment conditions on the steam and electric railways. At QUEBEC the summer service on the railways had not begun; navigation opened during the month, but ocean steamships had not begun to arrive; street railways were active. SHERBROOKE reported activity in steam railways, transfers, and garages; electric railway workers were fairly well employed. At THREE RIVERS transportation workers were very busy, and at ST. JOHN'S, IBERVILLE and SOREL conditions were also good. TORONTO reported railways busy with heavy freight traffic, but during the earlier part of the month were hampered by the tie-up of United States freight due to the switchmen's strike; street railway men were well employed, and garages were busy. At HAMILTON steam and electric railways and steamship lines were very active. NIAGARA FALLS reported railway transportation greatly reduced owing to the switchmen's strike, very little freight crossing the international boundary during part of the month; motor trucks were used for rush freight, and many of these continued in use after the strike ended. Similar reports came from BRIDGEBURG. At PORT COLBORNE and ST. CATHARINES navigation re-opened for the season, greatly increasing local employment; lake and canal traffic started briskly; canal construction work continued quiet; railwaymen continued actively employed. BROCKVILLE reported slackness among 'longshoremen, little coal arriving. Navigation was opened at KINGSTON, but was still hampered by

ice in the harbour. Sailing vessels which had wintered at BELLEVILLE left for the season's coal trade; railwaymen at both these points were busy with heavy freight and passenger traffic. At BRANTFORD railways were said to be very slack owing to the American switchmen's strike, but improved towards the end of the month. To the same strike was attributed the crippling of freight activity at LONDON and ST. THOMAS, where many railwaymen were laid off both on the Grand Trunk and Canadian Pacific Railways. Activity in transportation work was reported from KITCHENER, GALT and STRATFORD. At CHATHAM and WINDSOR conditions were rather slack, owing to the strike. WINNIPEG reported continued activity in transportation, with railway mechanics in demand. At BRANDON railway work was dull, but transfers were very busy. Railway traffic at REGINA was very heavy and street railwaymen were well employed. PRINCE ALBERT reported a great increase of railway activity in northern Saskatchewan, but towards the end of the month traffic on the Canadian National Railways slackened and a few wipers were laid off. THE PAS reported that a steamer was being placed at Athapapuskow Lake so as to have a direct water route to the new mine fields. At MEDICINE HAT fair activity was reported on the Canadian Pacific Railway, and at CALGARY increased railway activity was noted. VANCOUVER reported steam and electric railway workers well employed; navigation and 'longshore work improved towards the end of the month; transfers and garages were busy. At VICTORIA considerable improvement was noted in transportation and 'longshore work, also in transfers and garages.

The salt mines at MALAGASH (near Amherst) give promise of becoming very active. Stone quarrymen at QUEBEC continued busy. At SHERBROOKE the gravel pits were busy and the granite quarries fairly active. The asbestos district at THETFORD MINES was

increasingly busy, and some mines which had not been worked for over ten years were preparing to reopen. Shipments from the silver mines in COBALT district amounted to 27 cars containing approximately 2,164,491 pounds of ore; bullion shipments amounted to 150,788 fine ounces of silver, as compared with 166,624 fine ounces shipped in the previous month; the leading producer, the Nipissing mine, was storing its product. At the gold mines of PORCUPINE and KIRKLAND LAKE an improved supply of labour was noted owing to the closing of the lumber camps and an increased tonnage of production was looked for. WINNIPEG reported a demand for rock drillers, muckers and trimmers for mining and quarrying in Manitoba. At THE PAS about 100 men were already at work at the Flin Flon mines, preparing for drilling and sinking shafts; no scarcity of labour was anticipated for these mines as about 1,200 trappers from the northlands would take this work in the summer months. Metalliferous mining was active round FERNIE, the Kimberley mines being busy after a partial cessation of work during the winter months, and other properties in the district again shipping fairly substantial quantities of ore; increased activity was looked for in Windermere district during summer. In the ROSSLAND mining district only development work was carried on. At TRAIL the copper furnaces and refinery were all shut down, every available man being employed on construction. PRINCE RUPERT reported conditions at Stewart mines improving, with great activity expected in summer.

SYDNEY reported great activity in coal mining in April, with prospects of a strong demand for labour during the summer months; the output

**Mining (Coal)** of the Dominion collieries, however, showed a decline, being 264,000 tons against the revised figure of 292,000 for the previous month, this decline being due to a snowstorm which tied up a number of collieries; the production of coke was 33,000 tons, compared with 26,500

tons in March, 120 ovens being in operation; the Mabou mine was expected to re-open shortly. The output of the Nova Scotia Steel and Coal Company at SYDNEY MINES was 51,000 tons of coal and 9,600 tons of coke, compared with the figures for March of 55,500 and 10,200 tons respectively; 190 coke ovens were in operation. Employment continued good in the mines at WESTVILLE, STELLARTON and THORBURN, but without a demand for more labour; new seams were said to have been located at WESTVILLE; in this district there was a total production of 52,331 tons (an increase of 13,848 tons), of which 17,974 tons were from the Albion mine, 10,041 from McGregor, 4,601 from Acadia No. 1, 9596 from Acadia No. 3, and 10,119 from the Allan shaft. Miners were in demand at SPRINGHILL where a new colliery opened, and at JOGGINGS. Activity at MINTO was still limited owing to the continuance of the miners' strike. Cold weather early in the month hampered production in the lignite mines in Saskatchewan, but at DRUMHELLER, there was a steady increase in output of coal, and some demand for experienced miners. At LETHBRIDGE mine work showed improvement over the previous month; some of the smaller mines worked only half time, but the larger mines worked full time for the last two weeks of the month; earlier in the month work was slack, the miners being employed only three days a week. CALGARY and EDMONTON also reported the Alberta coal mines as busier than in March, full staffs working at most pits, most of the disputes of the previous month having been settled. FERNIE reported activity in the local mines, which averaged about five days' employment in the week, with fair output; there was a demand for men at the Crow's Nest mines and at MICHEL. NANAIMO reported an improvement in the local coal mines, only one day being lost in the month, due to lack of shipping, but in the northern mines on Vancouver Island more time was lost, the miners at CUMBERLAND working only about four days a week.

The value of building permits issued in 56 cities during March amounted to \$8,258,410, compared with \$4,684,934 in February, and \$3,329,050 in March, 1919. During

#### Building and construction

April building operations in Nova Scotia were late in getting under way, owing partly to shortage of materials and partly to unfavourable weather. SYDNEY reported that contractors still awaited spring. Considerable activity was evident at HALIFAX before the month closed, carpenters and painters being in demand; the Government housing scheme was adopted by the City Council. At WESTVILLE a large gang of men was employed in restoring the electric railway bridge lately washed away by ice. The housing scheme was adopted at YARMOUTH, but at NEW GLASGOW it was not favoured owing to the cost of building material. Carpenters at TRURO were well employed. At CHARLOTTETOWN carpenters had some employment on inside work. In New Brunswick building activity was for the most part confined to FREDERICTON, ST. JOHN and MONCTON. BATHURST reported a demand for men for dam work at Grand Falls and for construction at Bathurst mines. At MONTREAL the building trades showed an increase of activity, prospects being good for a busy season. QUEBEC, SHEERBROOKE, THREE RIVERS, ST. JOHN's and IBERVILLE reported good employment on both industrial and domestic building construction. At SOREL the building trades were quiet. OTTAWA and HULL reported more activity than in the same month for some years, and some shortage of labour was anticipated for the season's work. At TORONTO building was quiet early in the month owing to unfavourable weather, but towards the close it became active; a large number of small houses were started, many large commercial and industrial structures were under way and the building trades were well employed. Construction work at HAMILTON was delayed by unfavourable weather. NIAGARA FALLS reported a strong demand for carpenters, plumbers and painters, building construction

being very active. Similar activity was noted at RIDGEWAY and PORT COLBORNE. Fair conditions prevailed at ST. CATHARINES. At BROCKVILLE construction was active, the city undertaking to build sixty houses. Activity was noted in all classes of building at KINGSTON, BELLEVILLE, PETERBOROUGH and GALT, but at BRANTFORD construction was confined to residences. A shortage of builders' labourers was reported from KITCHENER, and every bricklayer and carpenter was reported busy. GUELPH and STRATFORD reported fair activity, but at WOODSTOCK not much building was in evidence. At LONDON operations were still hampered by a strike of painters, but considerable construction was in progress, with prospects for a busy season. At CHATHAM building was rather quiet. WINDSOR reported great activity in the border cities in construction of dwellings and other classes of building. At TIMMINS preliminary work was in progress on the power dam at Twin Falls. SAULT STE. MARIE reported little activity, owing to cost of material and scarcity of unskilled labour. PORT ARTHUR reported a large staff employed at Cameron Falls on the Ontario Hydro-Electric Power Commission's construction work; the new government breakwater also gave employment in blasting and loading. At WINNIPEG practically all skilled mechanics were said to be employed, with prospects of a fairly busy season; an increasing demand for men for railway construction was noted. Building activity was reported from BRANDON, REGINA and MOOSE JAW. At PRINCE ALBERT the high cost of materials checked construction, and at LETHBRIDGE, CALGARY and EDMONTON building was at a standstill owing to unfavourable weather

early in the month, but improving later. Slack conditions also prevailed at FERNIE, CRANBROOK and NELSON. At VANCOUVER increased activity was reported in construction of dwellings, commercial and industrial buildings; the new dock also gave some employment. At NEW WESTMINSTER building was still very dull. NANAIMO reported slight activity. At VICTORIA several commercial and industrial buildings were under construction.

During the month of April the number of persons employed by the Canadian Pacific Railway, Grand Trunk Railway and Canadian National Railways on railway construction, including maintenance of way, showed an increase of 7,200 persons, the total at the end of the month being 36,100 as compared with 28,900 at the end of March. About half this increase was registered during the last week of the month; there were, however, steady gains during each of the first three weeks. Additions of about 3,300 to the Canadian Pacific Railway staffs, about 3,100 to the Canadian National Railways and about 800 to the staff of the Grand Trunk Railway, accounted for these increases.

River driving operations started in Nova Scotia and New Brunswick during the month, heavy ice causing unusual delay so that the saw mills were not expected to be in full swing before the middle of May. At CHARLOTTETOWN saw and shingle mill workers were said to be well employed. YARMOUTH, MONCTON and AMHERST reported some demand continuing for woodmen. The saw mills at ST. JOHN were operating, employing many men who were engaged at 'longshore work' in winter; it was estimated that fifty mil-

lion feet of logs would be towed down the St. John river this season, as compared with thirty-two million feet last year. At FREDERICTON the early drives were reported successful, though a large quantity of logs had to be left in the woods; prospects were bright for work at the saw mills, and there was already some demand for millmen. BATHURST reported a strong demand for river drivers; a few of the sawmills began working. At CAMPBELLTON it was reported that about 10 per cent of the cut had to remain in the woods, but enough logs came out to insure work at the mills all summer. River driving started in QUEBEC district under favourable conditions, and at SHERBROOKE the saw and shingle mills were busy. The sawmills at OTTAWA and HULL started work towards the end of the month and were running at part capacity. At PETERBOROUGH lumbering operations were very active, and the mills were busy, including a new mill built during winter, the largest production since 1914 being anticipated. In OWEN SOUND district lumbering work was rather quiet, but some camps on the north shore of the Georgian Bay were getting the logs ready for rafting; saw mills were busy, but tie mills were slack. At SAULT STE. MARIE river drivers were in strong demand, and mill owners were calling for engineers, setters, sawyers and labourers. Most of the bush camps near PORT ARTHUR and FORT WILLIAM had broken up early in the month, but some were kept open and continued to take general bushmen and tie makers; work was hampered by industrial disputes in some camps. WINNIPEG reported a demand for bushmen for northern Manitoba and for mill hands. At

THE PAS there was a demand for river drivers, and about 450 men were required for the saw mills, which, however, had not yet commenced work. REGINA, SASKATOON and PRINCE ALBERT reported a demand for drivers and millmen for northern Saskatchewan, but work in the woods for the most part ceased, many of the workers returning to their farms, leaving the lumberjacks and other permanent woodsmen to work in the mills. There was a demand for river drivers at HUDSON'S BAY JUNCTION. The lumber mills at BIG RIVER had not started work at the close of the month. EDMONTON reported a demand in Alberta for drivers and mill hands. The lumber camps at FERNIE were still busy, with a demand for sawyers, swampers, etc.; the mills were expected to start work on May 1. NELSON, TRAIL and CRANBROOK reported activity in lumbering, with a demand for woodsmen and mill hands. In VERNON district the drive started at the end of the month. Logging operations continued in KAMLOOPS section. VANCOUVER reported lumbering, saw and shingle mills as very busy, with demand for woodsmen and mill hands. The lumber mills at NEW WESTMINSTER were working at capacity, and skilled and unskilled men were in great demand. PRINCE RUPERT reported activity in logging and mill operations, men being supplied to camp on Queen Charlotte Islands; a new camp started at SURF INLET. NANAIMO reported activity on Vancouver Island, all the camps and mills running regularly; the lumber camp which started recently on Lasqueti Island closed down. VICTORIA also reported activity in logging camps, saw and shingle mills, with brisk export trade.

## INDUSTRIAL DISPUTES INVESTIGATION ACT, 1907

### PROCEEDINGS FOR THE MONTH OF APRIL, 1920, WITH TEXT OF BOARD'S REPORT

**D**URING the month of April the Department received a report from the Board established to deal with the dispute between the Canadian Fish and Cold Storage Company, Limited, Prince Rupert, B.C., and certain of its employees, being fish packers. Twelve applications were received for the establishment of Boards, and a request was received in the Department that procedure be discontinued for the present in connection with two Boards established during the preceding month.

#### Applications Received.

During the month of April applications for Boards were received as follows:

(1) From the employees of various manufacturers of wood work in general in Ottawa, members of Local No. 646, United Brotherhood of Carpenters and Joiners of America. This dispute was not one which fell within the scope of the Act and a Board could be established only upon receipt of consent to this procedure from all the employers involved and also their agreement to jointly nominate one member to the Board, in the event of the same being established. At the close of the month direct negotiations were in progress between the disputants looking towards a settlement without Board procedure.

(2) From the employees of the Dominion Power and Transmission Company, Hamilton, being linemen, operators, motormen, maintenance men, armature winders, pitmen and air brake workers, members of Local Union No. 105, International Brotherhood of Electrical Workers. A Board was established composed as follows: His Honour Judge Colin G. Snider, Hamilton, chairman, ap-

pointed by the Minister in the absence of a joint recommendation from the other two members; Messrs. Geo. S. Kerr, K. C., Hamilton, and Fred. Bancroft, Toronto, nominees of the company and employees respectively.

(3) From the employees of the West Canadian Collieries, Limited, Bellevue, Alta. In the Minister's view the causes of this dispute did not appear to be such as would bring it within the scope of the I.D.I. Act for investigation, and no Board was, therefore, established.

(4). From the employees of the London Railway Commission engaged on the London and Port Stanley Railway, members of Division No. 745, Amalgamated Association of Street and Electric Railway Employees of America. A Board was established composed as follows: His Honour Judge Colin G. Snider, Hamilton, chairman, appointed by the Minister in the absence of a joint recommendation from the other two members; Messrs. J. M. Campbell, Kingston, and B. W. Bennett, Sarnia, nominees of the employer and employees respectively.

(5) From the employees of the Dominion Power and Transmission Company, Hamilton, being shop and yard men, members of Division No. 107, Amalgamated Association of Street and Electric Railway Employees of America. A Board was established composed as follows: His Honour Judge Colin G. Snider, Hamilton, chairman, appointed by the Minister in the absence of a joint recommendation from the other two members; Messrs. Geo. S. Kerr, K.C., Hamilton, and Fred Bancroft, Toronto, nominees of the company and employees respectively.

(6) From the employees of the Hamilton Street Railway Company, Hamilton, being motormen and conductors, members of Local Division No. 107, Amalgamated Association of Street and

Electric Railway Employees of America. A Board was established composed as follows: His Honour Judge Colin G. Snider, Hamilton, chairman, appointed by the Minister in the absence of a joint recommendation from the other two members; Messrs. Geo. S. Kerr, K.C., Hamilton, and Fred. Bancroft, Toronto, nominees of the company and employees respectively.

(7) From the employees of the Dominion Transport Company, Toronto, being teamsters, chauffeurs, stablemen and helpers, members of Local Union No. 191, International Brotherhood of Teamsters, Chauffeurs, Stablemen and Helpers of America. A Board was established composed as follows: His Honour Judge J. H. Denton, Toronto, chairman, appointed by the Minister in the absence of a joint recommendation from the other two members, Mr. J. G. Merrick, appointed by the Minister in the absence of a recommendation from the company, and Mr. Jas. T. Gunn, nominee of the employees.

(8) From the employees of the Nova Scotia Steel and Coal Company, New Glasgow, N.S., members of (1) the Amalgamated Association of Iron, Steel and Tin Workers of America, (2) the International Brotherhood of Electrical Workers, and (3) the International Association of Machinists. On account of the nature of the work of the industry involved it was not considered that the dispute was one falling within the scope of the I.D.I. Act, and a Board could be established only upon receipt of the joint consent of the disputants. This consent had not been granted by the company at the close of the month.

(9) From the employees of the Canadian National Express Company, members of the Canadian Brotherhood of Railroad Employees. A Board was established composed as follows: Messrs. W. J. Christie, Winnipeg, and Fred

Bancroft, Toronto, nominees of the company and employees respectively.

(10) From the employees of various firms in Toronto, constituting packing houses and abattoirs, members of Local Union No. 188, Amalgamated Meat Cutters and Butcher Workmen of North America. Through the mediation of a departmental officer direct negotiations were renewed and a settlement of the dispute was reached without Board procedure.

(11) From the employees of the Winnipeg Electric Railway Company, members of the Street Railway Employees' Union. A Board was established composed as follows: Messrs. C. E. Dafoe and R. S. Ward, Winnipeg, nominees of the company and employees respectively.

(12) From the employees of the Winnipeg Electric Railway, members of the Gas Workers' Union. A Board was established composed as follows: Messrs. C. E. Dafoe and R. S. Ward, Winnipeg, nominees of the company and employees respectively.

#### Other Proceedings under the Act.

During the month of April a request was received in the Department that procedure be discontinued in connection with the application for a Board of Conciliation and investigation to deal with the dispute between the Dominion Transport Company, Limited, and the Shedden Forwarding Company, Limited, London, Ont., and certain of their employees, members of Local Union No. 663, International Brotherhood of Teamsters, Chauffeurs, Stablemen and Helpers. No further action therefore, looking to the completion of the Board, was taken.

**Report of Board in Dispute between the Canadian Fish and Cold Storage Company,  
Prince Rupert, B.C., and their fish packers.**

A REPORT was received from the Board established to deal with the dispute between the Canadian Fish and Cold Storage Company, Prince Rupert, B.C., and certain of their employees, being fish packers. The Board was composed as follows: His Honour Judge F. McB. Young, Prince Rupert, chairman, appointed on the joint recommendation of the other two members, Messrs. S. P. McMordie, and Geo. Rudderham, Prince Rupert, nominees of the company and employees respectively. The report of the Board was unanimous and was accompanied by recommendations of certain changes in wages and conditions as a settlement of the dispute. It is understood these recommendations were acceptable to both parties with the exception that the employees did not agree to that portion relating to the duration of the working agreement.

**Report of Board.**

In the matter of the Industrial Disputes Investigation Act, 1907, and of a difference between the Canadian Fish and Cold Storage Company, Limited, of Prince Rupert, B.C., and certain of its employees being members of the Fish Packers' Union of that city.

To the Honourable

G. D. Robertson,

Minister of Labour, Ottawa.

The undersigned, members of the Board of Conciliation and Investigation appointed in the above matter, beg respectfully to report as follows:

The wages paid by the company when the present dispute arose were as follows:

60 cents per hour for an 8-hour day.

70 cents per hour for overtime.

75 cents per hour for Sundays and holidays.

The Union now demands:

75 cents per hour for an 8-hour day.

85 cents per hour for overtime.

90 cents per hour for Sundays and holidays.

They base these demands on the increased cost of living as it affects them in Prince Rupert, B.C.

After a full consideration of the evidence and after hearing what was said by the representatives of both sides, the unanimous recommendations of the Board are as follows:

1. That the rate of wages to be paid by the company should be:

67½ cents per hour for an 8 hour day.

80 cents per hour for overtime.

85 cents per hour for Sundays and holidays.

2. That such increase in wages should take effect as and from the 24th day of February, 1920.

3. In addition to the above increase a bonus at the rate of \$1.00 per week—which was agreed to by the company—be paid to all employees working in the sharp freezers and cold storage rooms.

In this connection, if the finding of the Board does not meet the views of the Fish Packers' Union, it is recommended that by agreement between the company and the union the bonus, which from time to time would be earned, be distributed *pro rata* amongst all the fish packers employed by the company.

The Board recommends that both parties agree in writing to be bound by its recommendations for a period of twelve months from the 24th day of February, 1920.

All of which is respectfully submitted.

Dated at Prince Rupert, B.C.,  
April 6th, 1920.

(Sgd.) F. McB. YOUNG,  
Chairman.

(Sgd.) S. P. McMORDIE,

(Sgd.) GEORGE RUDDERHAM,  
Members of the Board.

## PROCEEDINGS OF THE CANADIAN RAILWAY BOARD OF ADJUSTMENT No. 1

**T**HE Department has received seven new decisions of the Canadian Railway Board of Adjustment No. 1. Supplement No. 3 to Case No. 13 has reference to the effect of a decision of the Board on the clerical forces of the Canadian Pacific Railway, at Vancouver and Coquitlam, B.C. Supplement No. 1 to Case No. 40 relates to the application of rates to the locomotive engineers and firemen in the mountain and valley territory of the Canadian Pacific Railway (Western Lines). Supplement No. 1 to Case No. 56 deals with a controversy as to the number of men who should be assigned to certain switch engines of the Toronto, Hamilton and Buffalo Railway. Supplement No. 1 to Case No. 66 has reference to the interpretation of a decision of the Board concerning railway clerks and station employees of the Canadian Pacific Railway (Western Lines). Supplement No. 2 to Case No. 66 has reference to a controversy as to rates of pay for certain classes of employees of the Canadian Pacific Railway (Western Lines), who are members of the Brotherhood of Railway Clerks, Freight Handlers and Station Employees. Case No. 75 relates to a controversy as to payment of punitive overtime to yardmasters on the Canadian National Railways (Eastern Lines). Case No. 76 has to do with the monthly mileage to which conductors in the passenger service of the Canadian National Railways (Eastern Lines) are entitled.

### **Supplement No. 3 to Case No. 13.—The Canadian Pacific Railway (Western Lines) and the Brotherhood of Railway Clerks, Freight Handlers and Station Employees.**

A dispute between the Canadian Pacific Railway, (Western Lines), and the clerical staffs of the freight and yard offices at Vancouver and Coquitlam, B. C., was submitted to the Board for adjustment. The question at issue was as

to whether the clerical staff was specifically named or not in the award of the Board of Conciliation which was made in December, 1917, (See LABOUR GAZETTE, January, 1918, pages 25 to 29). In Supplement No. 2 to Case No. 13, given in the LABOUR GAZETTE for September, 1919, on page 1036, the Railway Board of Adjustment had decided that if the clerical staff were specifically named in the award under which they were working, prior to May 1, 1918, they were entitled to the increases provided in the McAdoo Award as from that date, but if they were not so named, they were entitled to such increases as from August 1, 1918. The men contended that the clerical staff were specifically named in the award, but the Company claimed that they were not included in any agreement made with the freight handlers, and they were not recognized in any negotiations between the Company and the freight handlers. With reference to the award of the Conciliation Board, the Company quoted a supplementary report of this Board in which it was stated that the award was intended to apply to people employed in manual labour only, and that nothing in the award was intended to apply to persons engaged in clerical work. In its general statement the Board remarked that some confusion had been created by the different actions of the Board of Conciliation, which had evidently been the cause of a difference of opinion as to the intentions of that Board. However, in view of the fact that the rate to be paid certain of the clerical staff was one of the questions referred to the Board of Conciliation, reference being made to the matter in both the majority and minority reports, and inasmuch as the majority report approved of rates established by the Company, there appeared to be justification for the claim made by the employees that the clerical staff came under the award of the Board of Conciliation.

The decision of the Board was as follows :

"The claim of the employees is, therefore, sustained in so far as it refers to the clerical staff specifically named in the Award referred to."

**Supplement No. 1 to Case No. 40.—The Canadian Pacific Railway (Western Lines) and The Brotherhood of Locomotive Engineers and The Brotherhood of Locomotive Firemen and Enginemen.**

A difference arose between the Canadian Pacific Railway (Western Lines) and the locomotive engineers and firemen with regard to the application of Supplement No. 15 to General Order No. 27 (printed in the LABOUR GAZETTE, May, 1919) to mountain and valley rates, in accordance with the decision of the Board of Adjustment No. 1 in Case No. 40, which was given in the November, 1919, issue of the LABOUR GAZETTE, on page 1291. The present schedule on the Western Lines has two differentials classed as valley rates and mountain rates, both of which are higher than the standard rates.

According to the statement of the Board both parties agreed that rates higher than the Prairie rates should be continued, both in the valley and mountain territories. The difference between the parties was as to the basis of determining such higher rates under the application of Supplement No. 15 to General Order No. 27. It appeared that higher rates had always heretofore obtained on the territories in question, but that no definite basic method for the establishing of such rates had been recognized. General Order No. 27, with its flat percentage increases, brought about a higher rate in these territories as compared with the rate that had for some time before existed, and the employees felt that the increased differential rate brought about by the application of this Order should be recognized and continued and that under Article 10 of Supplement 15, the differential should be regarded as an arbitrary or special allowance, and that a percentage increase should be added thereto.

The decision of the Board was as follows :

The Board decides that the Company and the Employees shall jointly agree on rates for mountain and valley territory which shall bear the same general higher relation to prairie rates as heretofore existed when such rates were, by mutual agreement in schedule negotiations, established or revised. Due consideration, of course, should be given to the rate that had for two years been in effect by the application of General Order No. 27. The understanding is that no existing rate shall be reduced.

**Supplement No. 1 to Case No. 56. — The Toronto, Hamilton and Buffalo Railway Company and The Brotherhood of Railroad Trainmen.**

A controversy arose as to the number of men to be assigned to certain switch engines of the Toronto, Hamilton and Buffalo Railway Company. The employees contended that a second helper should be assigned to these engines, owing to the nature of obstructions surrounding industrial plants, dangerous grades and curvature of tracks which interfere with safe communication of signals. They also claimed that the third man was necessary in the interests of safety and for flagging purposes, owing to these yard engines working on the main track. The Company stated that in accordance with the decision of the Board in Case No. 56, they entered into conference with the men's committee and agreed to put a second helper on two switch engines, advising the men that these were the only ones upon which there appeared to be any justification for a second helper. The men's committee announced that this offer was not acceptable and named other engines on which they claimed a second helper should be assigned. The Railway Board of Adjustment No. 1 named a sub-committee to make an investigation of the situation on the ground. The sub-committee submitted its reports to the Board, explaining the situation as found by them.

The decision of the Board, based on the report of the sub-committee, was as follows :

As a result of further consideration of the matter and of the report made by the Sub-Committee of the Board, who made investigation on the ground, the Board decides that it would make for greater safety and despatch in these yard movements if certain of the yard engines in dispute had an additional helper placed thereon, and the parties to the dispute are instructed to further deal with the matter on such basis. In the event of a later dispute in reference to some specific engine, or more than one engine, the case may again be submitted to this Board.

**Supplement No. 1 to Case No. 66.—The Canadian Pacific Railway (Western Lines) and The Brotherhood of Railway Clerks, Freight Handlers and Station Employees.**

The general chairman of the Brotherhood of Railway Clerks, Freight Handlers and Station Employees submitted a request to the Board with reference to the interpretation of the Board's decision in Case No. 66. In that case the Board named certain classes of employees as being outside the scope of the proposed agreement. These classes were given as follows: "Foremen and other employees acting in a supervisory capacity with authority to administer discipline, also the Chief Clerks, Accountants, Chief and Head Time-keepers, and Personal Secretaries of Superintendents, Master Mechanics, or other officials of equal or superior rank." In negotiating an agreement, he said that the Company contended that this ruling of the Board referred to all foremen, while the men contended that the reference was only to the general foremen at Fort William, Winnipeg, Regina, Moose Jaw, Calgary and Vancouver, and places of like importance, who are the only foremen with authority to administer discipline. The Company claimed that the term "Chief Clerks and Accountants" had reference to all chief clerks in freight and yard offices, but the men held that they had reference only to chief clerks of the officers named, or their equals or superiors in rank. An interpretation of these points was requested. The Board stated that information received was to the effect that no dispute existed between the organization and the Company in connection with a decision made

by the Board in Case No. 66, but that an agreement had been signed dated February 28, 1920, and no question existed with regard to the intent or application of their decision.

The decision of the Board was as follows:

In regard to the decision referred to, which reads as follows:—"Foremen and other employees acting in a supervisory capacity with authority to administer discipline, also the Chief Clerks, Accountants, Chief and Head Time-keepers, and Personal Secretaries of Superintendents, Master Mechanics, or other officials of equal or superior rank." The Board is of the opinion that the foregoing language, in connection with which an interpretation is asked, does not seem to permit of different interpretations, and inasmuch as it has been conceded that no dispute exists in connection therewith, further consideration of the question at this time appears to be unnecessary.

**Supplement No. 2 to Case No. 66.—The Canadian Pacific Railway (Western Lines) and The Brotherhood of Railway Clerks, Freight Handlers and Station Employees.**

A controversy arose between the Canadian Pacific Railway (Western Lines) and the Brotherhood of Railway Clerks, Freight Handlers and Station Employees with regard to rates of wages of certain classes of employees. The two parties had failed to reach a settlement on the following points: (1) As to punitive overtime for the ninth and tenth hours for employees who, prior to February 21, 1918, were not paid a punitive rate of overtime after the regular day's work; (2) as to overtime payment for work performed on New Year's Day, Good Friday, Victoria Day, Dominion Day, Labour Day, Thanksgiving Day and Christmas Day, for employees whose assignment, prior to the application of Supplement No. 7 to General Order No. 27 of the Director General of the United States Railroad Administration, included these holidays; (3) as to request that rates of pay be increased beyond the provisions of General Order No. 27 and supplements thereto; (4) as to payment of overtime at double time rates to freight shed employees at Fort William handling boat freight on Sundays and holidays.

Representatives of the company and of the employees presented the following arguments on each of these points in the dispute:

(1) The Company contended that Supplement No. 7 to General Order No. 27 provided that where no existing practice more favourable to the employees was in effect, overtime would be paid *pro rata* for the ninth and tenth hours, and thereafter at the rate of time and one-half. Interpretation No. 1 to Supplement No. 7 provided that to employees who prior to February 21, 1918, were paid punitive overtime after the regular day's work, the same rate would apply on an eight-hour basis. Prior to February 21, 1918, freight shed staffs were paid punitive overtime at time and one-half after the established day's work at Vancouver, Calgary and Winnipeg. The Company contended that these employees were entitled to overtime after eight hours, at the rate of time and one-half, but that all others were entitled to overtime at *pro rata* rates for the ninth and tenth hours, and time and one-half thereafter. The employees contended that the claim for punitive overtime for the ninth and tenth hours, as per Clause (a), Article 2, of the Memorandum of Agreement, presented to the Company on March 25, 1919, was based on the fact that a large percentage of the employees concerned were already enjoying this privilege. They contended that the eight-hour day was now an almost universal institution, and that the punitive overtime rate should be made applicable to all classes governed by the agreement.

The decision of the Board was as follows:

Except as otherwise provided in the agreement between the parties, overtime for work performed on proper authority in excess of eight hours per day shall be paid for at the rate of time and one-half.

(2) With regard to payment for holidays, the Company contended that Interpretation No. 1 to Supplement No. 7 provided that the calendar year was based upon the recognized number of working days, including Sundays and holi-

days, where they have been considered a part of the employees' assignment. It was contended, therefore, that employees who, prior to the application of Supplement No. 7 to General Order No. 27, were required under their regular assignment to work on holidays, were not now entitled to overtime therefor. The employees contended that the overwhelming majority of the employees concerned have in the past been allowed the holidays mentioned above, and that in common fairness the practice should be extended to all, or, in the event of an employee being called upon to work on these days, he should receive overtime rate for doing so.

The decision of the Board was as follows:

Except as otherwise provided in the agreement between the parties, when monthly-rated employees are required to work on New Year's Day, Good Friday, Victoria Day, Dominion Day, Labour Day, Thanksgiving Day and Christmas Day, they shall be paid extra at the *pro rata* hourly rate when the entire number of hours constituting the regular week-day assignments are worked. Except as otherwise provided between the parties, when assigned, notified or called to work on the above specified holidays a less number of hours than constitute a day's work within the limits of the regular week-day assignment, employees shall be paid a minimum of two hours at time and one-half for the first two hours' work or less, and at the *pro rata* hourly rate after the second hour of each tour of duty. Time worked before or after the limits of the regular week-day assignment shall be paid for on the actual minute basis at the rate of time and one-half. When working the full regular week-day assignment, leaving work for the regular meal period allowance shall not constitute a second tour of duty. Employees heretofore receiving time and one-half for work on the specified holidays shall continue to be so paid at the points where the practice has prevailed.

(3) With regard to the request that rates of pay be increased beyond the provisions of General Order No. 27, the Company contended that the provisions contained in Supplement No. 7 to General Order No. 27 had been fully complied with, and they did not consider they should be called upon to increase rates in excess of the supplement in question at the present time. The employees contended that the present rates

were utterly inadequate to maintain a family on a decent basis, and that the prices of commodities being now on a settled high basis, the rates asked for by them would not do more than maintain the same level of existence that obtained in 1914, at the rates then effective. It was further claimed that very serious anomalies now existed, and that the employees desired to have a basic standard rate for classes doing the same work at different places.

The decision of the Board was as follows:

The rates of pay now in effect are, or should be, at least those established by the application of the provisions of Supplement No. 7 to General Order No. 27 of the Director General, United States Railroad Administration, as applied by the Railways of Canada. General applications for the revision of these rates of pay covering employees on the United States Railways, including those represented by the organization, a party to the submission, are now, we understand, under negotiation.

While not necessarily governed entirely by the rates of pay in effect on the United States railways, it must be admitted, particularly in view of the practice which has been adopted in Canada with respect to all classes of employees during the past two years, that the rates of pay generally in effect in the United States must have a material effect on the consideration of the rates paid similar classes in Canada, and, under these conditions, the Board is now able to deal adequately with the matter in a manner which the Board could be assured would be altogether fair to either party to the submission.

In the event of the developments referred to being unduly delayed for a period longer than ninety days hence, or in case a dispute should arise in regard to the application of the expected settlement the Board will be prepared to give the matter further consideration on request, and upon the submission of all data necessary to enable the Board to arrive at an equitable decision.

The Board is of the opinion that pending developments, the parties should further endeavour to mutually agree upon a temporary adjustment of this question, and recommends accordingly. It is suggested that incidental to such an adjustment, the parties reach an understanding as to effective date from which such rates, as may be finally agreed upon, shall apply. It is also suggested that in the meantime approximately the same differentials in rates as were previously in effect for such freight shed employees as stowers, coopers, etc., over the rates paid truckers might be re-established, and that some adjustment of rates might also

be made within the limit of present maxima for those classes which are now receiving lower rates than are paid to the same classes at other points who are performing work of relatively the same value.

(4) With regard to the payment of overtime, at double-time rates, to freight shed employees at Fort William handling boat freight on Sundays and holidays, the Company contended that the men concerned were now paid overtime for Sunday and holiday work at time and one-half, and the Company felt there was no justification for an increased penalty. The employees contended that the work at Fort William was of a casual and intermittent nature, and that employees working under similar conditions at St. John, Montreal, and other ports, were paid at the double-time rate for Sundays and holidays.

The decision of the Board was as follows:

"The contention of the Company is sustained, and payment of time and one-half shall continue."

**Case No. 75.—That portion of Canadian National Railways (Eastern Lines) which was formerly known as Canadian Government Railways (Eastern Lines) and The Order of Railway Conductors, and The Brotherhood of Railroad Trainmen.**

The following question with regard to payment of punitive overtime to yardmasters of the Canadian National Railways (Eastern Lines) was submitted to the Board: "Are yardmasters on the former Canadian Government Eastern Lines of the Canadian National Railways who are legislated for under schedule with yardmen entitled to punitive rates for overtime under Supplement No. 16 to General Order No. 27, as issued by the Director General, United States Railroad Administration?"

Both parties to this controversy made the following joint statement of facts: "Yardmasters on former Canadian Government Eastern Lines (now part of the Canadian National Railways) have been legislated for under schedule for yardmen, being paid an hourly rate with

a guarantee of eight hours per day, over-time *pro rata*."

The men contended that yardmasters had always been legislated for by their committee, and were paid on an hourly basis from four to five cents an hour more than the yard foremen, both working the same minimum day. When General Order No. 27 was applied, the rate for yardmasters was fixed by maintaining the same differential which always existed between that class and yard yard foremen, and the minimum day was in both cases reduced to eight hours. It was claimed by them that Supplement No. 16 gave yardmen time and one-half for overtime and that the Company refused to concede this in the case of the yardmasters. They contended that the yardmasters were entitled to the differential according to Supplement No. 16, and that they were entitled to an eight-hour day and the same basis of overtime as all other classes of yardmen by virtue of the schedule of agreement. If yardmasters were worked the twelve-hour day, as proposed by the Company, the men claimed that it would be a revision of the schedule, and no such revision could take place until either side served thirty days' notice. They claimed that no such notice had been given or received, and that the action of the Company was therefore irregular, and the men were entitled to their back pay from the effective date of the order. The Company contended that yardmasters were supervisory forces and should not be subject to punitive rates for overtime after eight hours' duty, and further that as Supplement No. 16 to General Order No. 27 made no mention of this class of employees, the Company was not obligated under the supplement to pay for overtime at punitive rates. The Company maintained that for the effective working of switching yards it was important that no more than two shifts of yardmasters were made in each twenty-four hours.

The decision of the Board was as follows:

Based on the Board's understanding of the intent of Supplement No. 16 and Interpreta-
